

MANIFESTING FROM AETHER

- **Most do not know that many early Experimenters were students of metaphysics such as Yoga, Rosicrucian, Vedanta, Buddism, etc.**
- **Radionics came to its understanding from early experimenters view of how the universe operated and equipment arose from this.**
- **Analysis of radionic equipment equipment shows it is grossly low powered.**

The Sacred Fire

- **One subject in metaphysics is the sacred fire. The Divine Fohat..**
- **A well known sacred fire is the Violet Flame.**
- **Past experimenters have built VF generators.**
- **The Violet Flame Sacred Fire as well as the others manifest all levels. They are the 7 major rays of esoteric tradition as well as 7 ELOHIM of the 7 major builders of planets and galaxies.**

THE ETHER OR AETHER AS I CALL IT HAD BEEN A FASCINATING TOPIC FOR

- **The aether is a topic of interest and speculation.**
- **From the ancient Yoga text to modern times it is an intrinsic factor in thinking of how the universe came to being and how it operates.**
- **Ether's Qualities and capabilities are as infinite as its source, GOD.**
- **Ether is the energy basis of the universe from which all things are created.**

- **Intelligence based universe.**

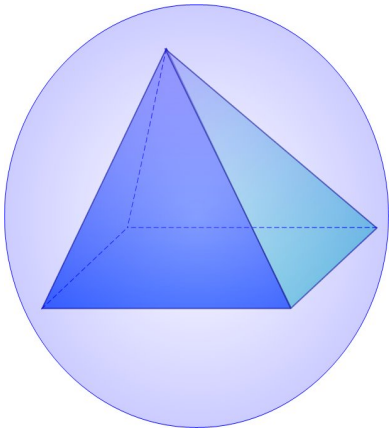

- **Intelligence of energy is rarely discussed in academic circles. To do so implies an entity behind the energy and academia wants no part of it.**
- **Such a view is stupidity and shows the low level of our academia.**
- **Until this is recognized we cut ourselves off from who we are and surprisingly what we are and can become.**

MOST WELL KNOWN EXAMPLE of ether IS THE PYRAMID (1 of 2)

- **The pyramid has many interesting properties as discussed in my previous talk**
- **The pyramid focuses energy to the center at the 1/3rd height level, i.e. simple geometry.**
- **Experiments proved the pyramid also has a forcefield of non EM energy around the pyramid.**
- **This force field can be controlled by a specific frequency; namely, phi (57...), base angle of great pyramid as a frequency and was built into the pyramid as a clue to latter generations.**

THE MOST WELL KNOWN EXAMPLE IS THE PYRAMID (2 of 2)

- **To turn the pyramid energy off, beam the frequency inside field value ϕ and all the energy in the forcefield collapses into a beam of energy going off the apex of the pyramid.**

Master Power Flame

- **The MPF is a collection of Patterns from the center of the galaxy, known as the great great central sun.**
- **The HP3 is a device I built to energize any pattern so the representative pattern manifests.**
- **A picture of yourself on the HP3 will blaze a sun presence of the violet flame around your body.**
- **Clairvoyants readily see this action.**
- **If you are sensitive you will feel the violet flame and see it if you are somewhat clairvoyant.**

Pattern Physics is the Operating rule for AETHER

- **If the pattern is in the Master Power Flame it manifests when the pattern is energized.**
- **The MPF pattern can be for physical substance or an aetheric substance.**
- **Energizing the pattern manifests the object.**
- **Personal created patterns when energized also operate the aether.**
- **Hate is one negative example. The Violet Flame will neutralize hate creation.**

Ideal Radionic Pattern Manifestor

- **Many years ago a call from an young experimenter asked me if we would ever get to the Star Trek device that generated food or whatever.**
- **I told him YES, such a device is possible based on devices, i,e. advanced radionics devices.**
- **Creation of objects from the aether comes from the many stories of adepts creating food or whatever out of seemingly nothing.**
- **Advanced radionics devices would mimic adepts.**

Criteria of Advanced Radionic Manifestor

- **The Criteria for such a device is same as criteria for an adept.**
- **First Purify the area where object is to be manifest.**
- **Generate the pattern and energize it.**
-
