The nature of Systemic multidimensionality

Andrew Michrowski

Planetary Association for Clean Energy / Société planétaire pour l'assainissement de l'énergie

Successful creative act – brain-mind-thinker model

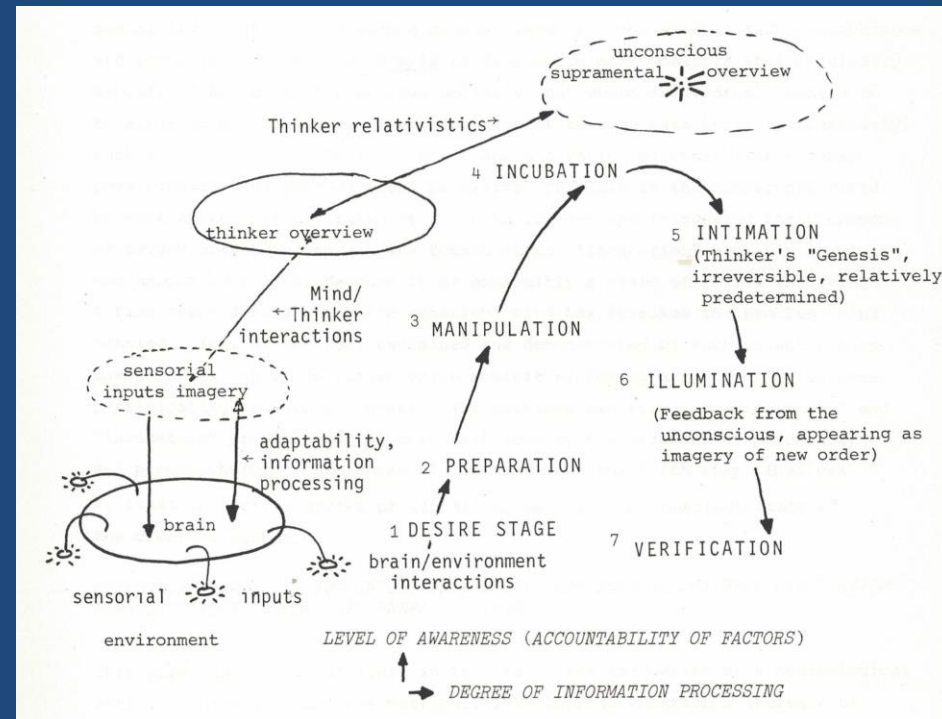

Process described as involving relativistic overview, will/intent/coherence, and "orbital electron velocity" oxygen uptake to brain to induce intelligent dialogue/communication as well as creative acts, designs/solutions.

Cymatics analogy – oscillation (as coherence)

provides extra freedom of movement

Upwards, beyond 2D parameters and inputs.

The nature of Systemic multidimensionality

Andrew Michrowski

Planetary Association for Clean Energy / Société planétaire pour l'assainissement de l'énergie

Micro viewing of quantum structure

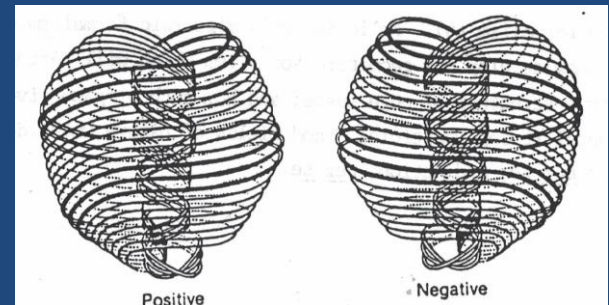

Anu - Annie Besant, Charles W. Leadbeater after Hindu training, 1895

“Force + pours in heart-shaped depression, - issues from the point”

“bound by very thin line of lighted force”

“changing shades of colour, flashing out from rapidly revolving with s

“several spiral activities, change of activity from one spiral to another changes colour”

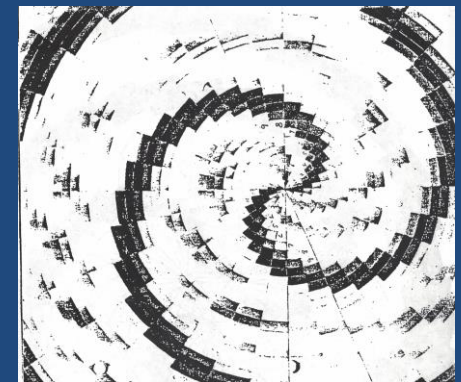

Sharon's Spiral - Sharon Gayle Alexander, 1976

“particles: 10 trapezoids, with positive circle ccw with 9 bound & 1 free, negative circle ccw with 9 bound & 1 free / 20 trapezoids X 3 (+ , zero, - -) = 60

“angles: Log spiral 10 Ls, 90 degree each = 10 x 9 degrees = 90 degrees

“ Additional particles; Graviton= 2, Tachyon = 2”

The nature of Systemic multidimensionality

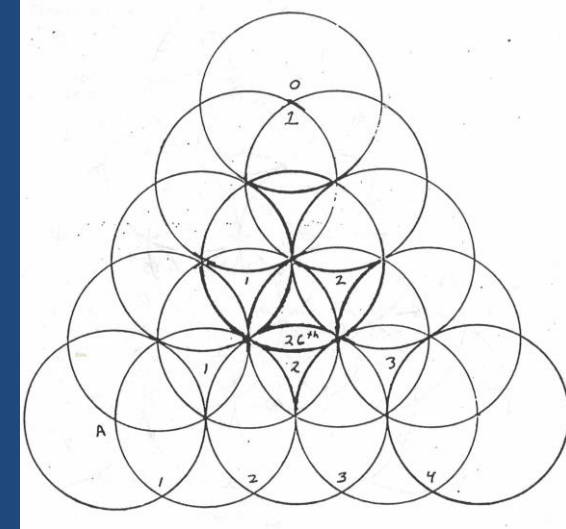

Andrew Michrowski

Planetary Association for Clean Energy / Société planétaire pour l'assainissement de l'énergie

Geometric formalism – Andrija [Henry K.] Puharich, 1989-90

“QUANTUM UNIT OF PURE SPACE”

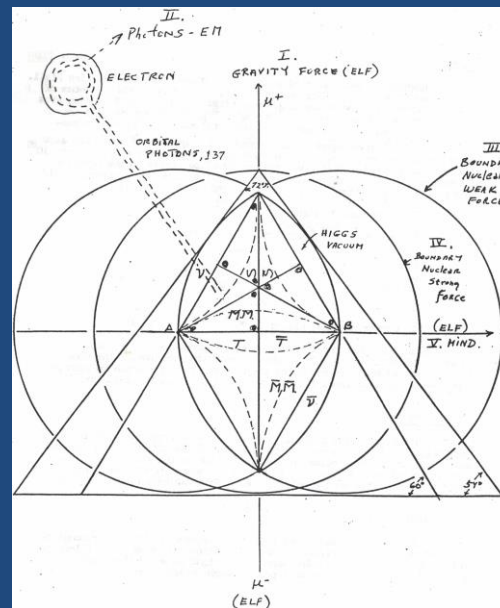

15 circle cells bounded by 3 nested (not shown) equilateral triangles giving rise to 9 points, 10 vesica Pisces, vertical hypersphere adding up to 26, interpreted to be the 26th dimension.

Relationships between 5 forces of Nature schematic

Puharich 1989, after Eddington, Planck, Weyl, Dirac, Harrison, Sirag & Alexander “viewing”

- I: Gravity
- II: Electromagnetic
- III: Nuclear Weak Force
- IV: Nuclear Strong Force
- V: MIND - Universal & biosystems (ELF)

3 Log spiral derived formalism per Sharon Spiral

The nature of Systemic multidimensionality

Andrew Michrowski

Planetary Association for Clean Energy / Société planétaire pour l'assainissement de l'énergie

To re-iterate the Puharich theme – the quantum structure unit of space is a matrix that unifies, for our perceived 3D space:

Strong nuclear force, Weak nuclear force,
Electromagnetism, Gravity,
&

MIND (Universal , and as embodied in living systems)

As there is MIND, there is INTELLIGENCE and there is THOUGHT
(Universal , and as embodied in living systems)

How to describe the dynamics between the
Universal MIND and the living systems Mind?

The nature of Systemic multidimensionality

Systemic geometry - hypersphere response to Systemic Point

A point radiates Light in all directions. Its opposite is an infinitely large sphere that radiates and floods Systemic multidimensional Space. The response to Infinite Light is Infinite Darkness.

Such dynamics of the Systemic multidimensional domain

Synthetic geometry is a classical approach to describing this formality.

The nature of Systemic multidimensionality

Movement between Systemic (n -dimensional) & 3-dimensional realms

Viewable as asymptotes of a hyperbola with its branches,

All spatial phenomena are based on actual relationships in Space. The left cone describes a concentrating centripetal while the right a dissipating, centrifugal Movement.

The nature of Systemic multidimensionality

Andrew Michrowski

Systemic multidimensionality & 3D experience: some concepts

We observe, integrate and accommodate Space inclusively - tangible / tactile (perceivable from a surface) / interactive / communicative in a "Mind-Universe"

Existence is an expression of dimensionality.

Mind as a time tunnel through which thought travels as a magnetic continuum connecting the brain to a systemic point of origin of the thought process that broke away from the nuclear physical universe when space began its expansion at the expense of light.

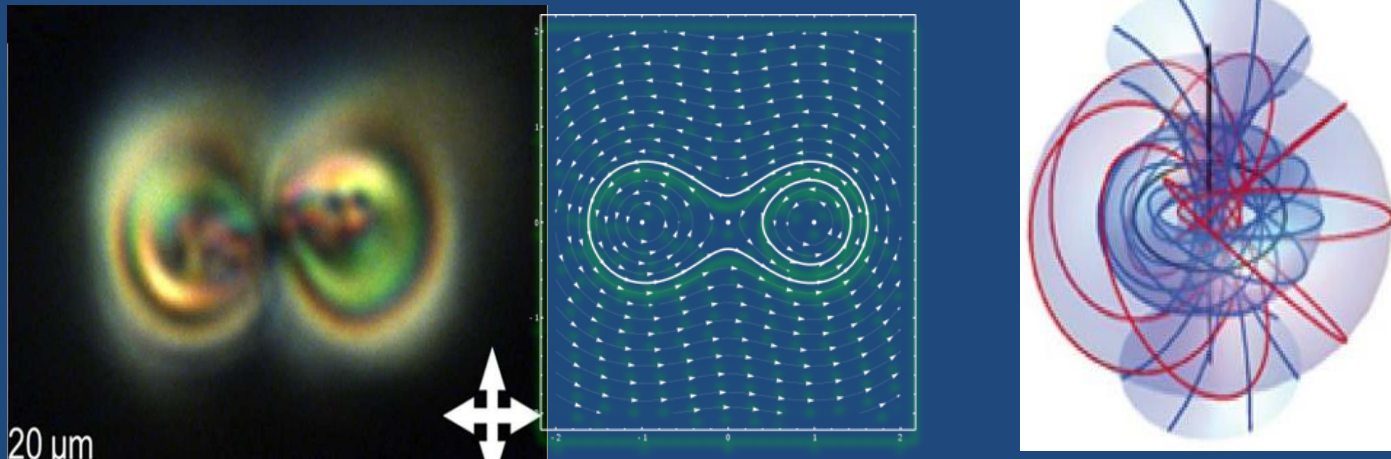

This tunnel configuration is based on the energy laws of thought communication networks that constitute the fundamental environment of forces at work in the universe. This is a medium through which intelligences animate. relatively more dense evolving beings.

Novel ways of dealing with EMF Pollution

Andrew Michrowski

Planetary Association for Clean Energy / Société planétaire pour l'assainissement de l'énergie

Wave functions in resonance interactions – imaging systemic multidimensional coupling, communications & “betweenness”

“Twiston” observed on liquid crystals, including “hofions” between 2 lattices – scalar & quantum field vector distributions – University of Colorado, Boulder – June 2019.

Computer modelling of phenomenon that indicates the vectors (electrodynamics potentials included) that have been traced to be involved in such resonant interactions. It resembles Puharich study and confirms multi-dimensional systemic / 3D interface & coupling features.

The nature of Systemic multidimensionality

Planetary Association for Clean Energy / Société planétaire pour l'assainissement de l'énergie

Multiple multidimensional movement & interplay

Intention & coherence as inducing rotational and spiralling effects as suggested by the Cymatics analogy of quartz and sand (under vibration). It suggest the significance of existential Individualism as a significant and a necessary evolutionary status – free from influence and sustaining.

Flows also occur, suggesting nebulae and galactic phenomena. It suggestis how systemic multidimensionality may allow transportation & travel throughout the cosmic "mind" as an experiential phenomenon.

The nature of Systemic multidimensionality

Andrew Michrowski

Applying multidimensionality in advanced technology

Real time reduction of radioactivity: instrumental or with focussed intent and free-movement HHO and plasma

Some examples of braiding producing novel effects, including longitudinal, also referenced as scalar waves. After Glen Rein.

Below are illustrations of the Smith Coil components and circuit based on descriptions by Wilbert B. Smith.

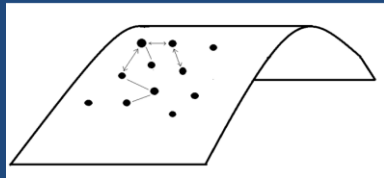

The nature of Systemic multidimensionality

Andrew Michrowski

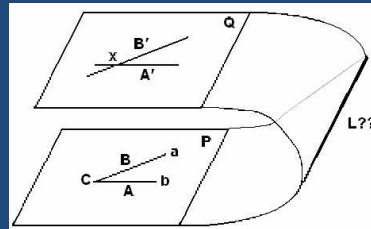

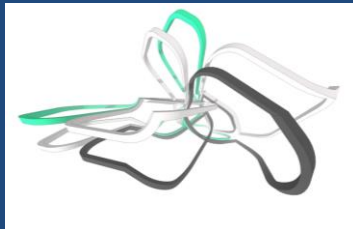

Planetary Association for Clean Energy / Société planétaire pour l'assainissement de l'énergie

Synthetic geometry - studying “betweenness” of “field” in high η -dimensions (in convex hull) without numbers & coordinates

In multidimensionality as examined with synthetic geometry, properties between “points” can be line segments, angles, triangles, polygons, scalars, imaginary numbers ...

Parallel superposition by folding

Radionics inverse broadcasting. Principle of homeopathy chirality, deployment of Brown's Gas/HHO flame and certain plasma, knotting and in braiding, twisting and folding.. A Central Asian custom relies on invoking while twisting cloth to help locate lost items.

Google reported in May 2003 that by engineering braiding it could correct errors in quantum computing when using “non-Abelian anyons” to become robust against “noise”.

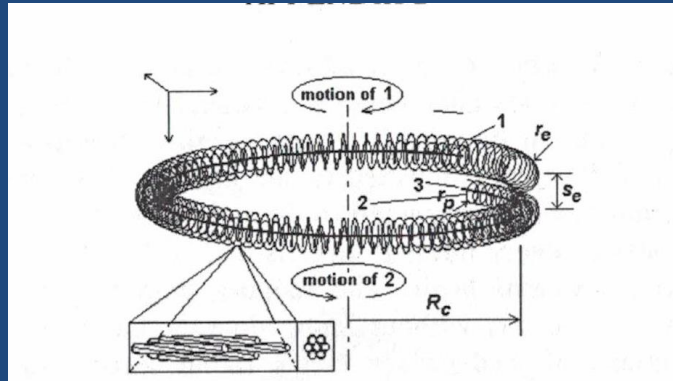

Braiding in cables reduces magnetic skin effects by up to 30 times, while inducing current next to conductors.

The nature of Systemic multidimensionality

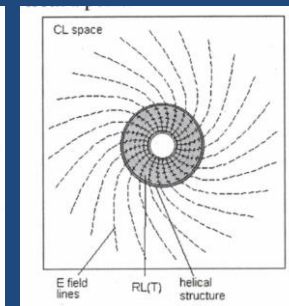

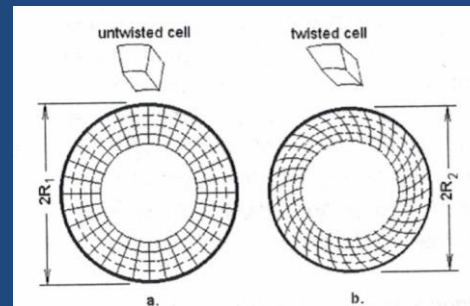

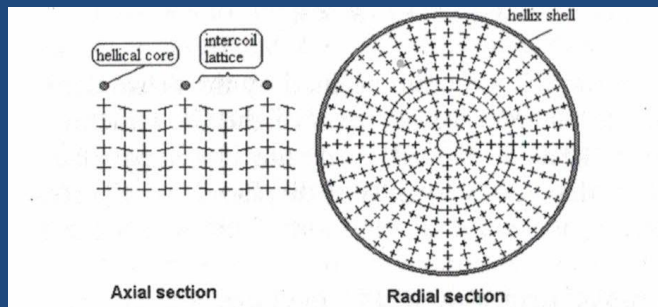

Andrew Michrowski

Planetary Association for Clean Energy / Société planétaire pour l'assainissement de l'énergie

Synthetic geometry – Systemic folding - example of oscillating electron

Oscillating screw-like electron has 3 helical structures: external negative, internal positive and internal negative core. Box shows helical structure formed of 7 right-handed prisms (without twisting). The ends are not connected as in a torus. This model leads to derivation Hydrogen model and basis for suggested arrangement of protons and neutrons From Stoyan Sarg BSM theory. *Physics Essays* 2003.

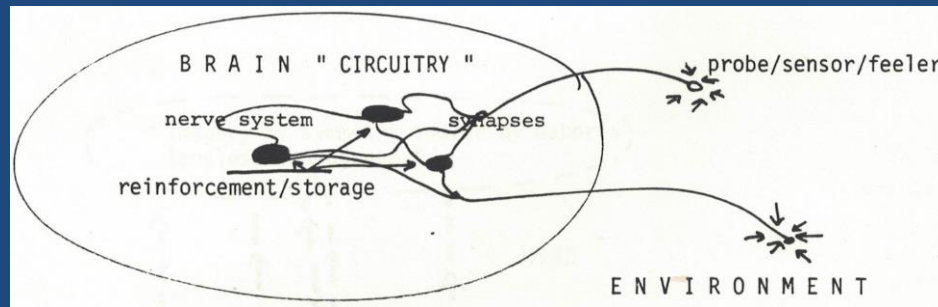

Geometrical considerations suggest further dimensional internal lattices with the electron, which can further enabled inter-dimensionality by twisting /coherence , Such twisting form the electrical field, seen as twisting a close range- which is what **Nikola Tesla** observed (and later used as his logo) when looking a wire sections during single-wire transmission of electricity – as applied in his **Magnifying Transmitter** technology. For his relatively loss-less planet-wide distribution of electric power.

The nature of Systemic multidimensionality

Andrew Michrowski

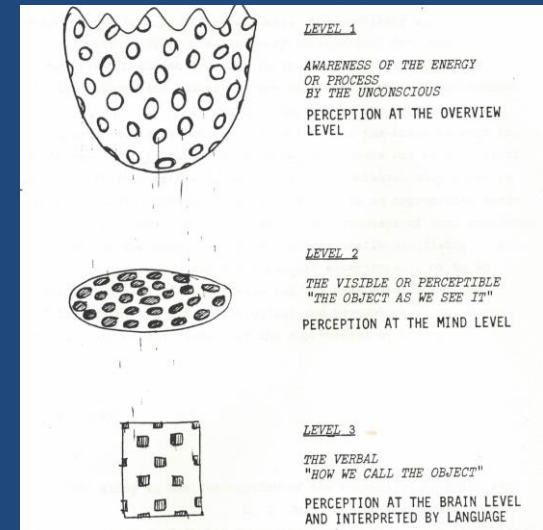

Planetary Association for Clean Energy / Société planétaire pour l'assainissement de l'énergie

3D processing, projective re-depiction of filtered, coded realities

Mental imaging

Absorption and interpretation of pre-personal reality through activated dialogue. To re-depict realities as they Stream, either one returns to the multidimensional source Or uses "lenses", filters or codes to faithfully reproduce the Source.

The nature of Systemic multidimensionality

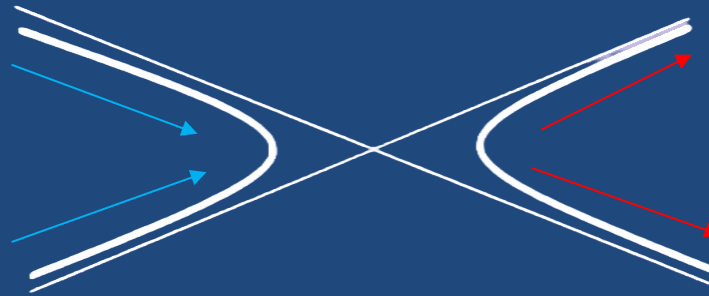

Andrew Michrowski

Planetary Association for Clean Energy / Société planétaire pour l'assainissement de l'énergie

Comparing Systemic with personal individuality & intelligence

Cosmic stature

Dictates Nature,
not spiritualized, does
not "search for truth,
Infused with otherwise
unavailable creative
Energy, involves more
quantic levels of life &
immortality in the universe,
knowledge of levels of intelligence,
pre-personal

"mind experience"

False state of equilibrium,
Based on "memory bank"
of historically polarized
Ideas-imprisonment,
race memory, subject to
multidimensional
domination

The nature of Systemic multidimensionality

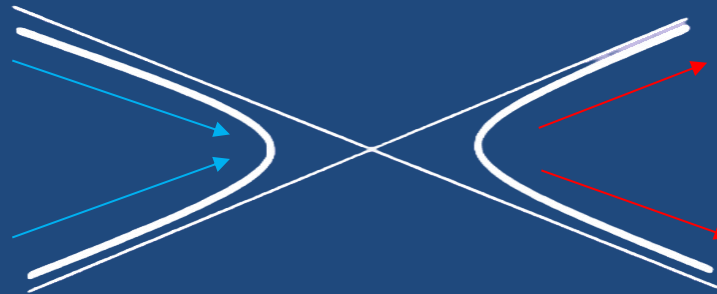

Andrew Michrowski

Planetary Association for Clean Energy / Société planétaire pour l'assainissement de l'énergie

Dynamics in Systemic & personal individuality & intelligence

Creative centricity

Focusing, flowing, aligns, does not self-reflect, conscious communication with interdimensional levels, absolute, aware of "reality" of the unity of consciousness.

Self-experience

Unconscious, the "I" is conditioned as "proof" of self-identity, rigid, unaware of sources of "thought", continually polarized by emotions and thoughts, preventing alignment with Systemic contact.

The nature of Systemic multidimensionality

Andrew Michrowski

Planetary Association for Clean Energy / Société planétaire pour l'assainissement de l'énergie

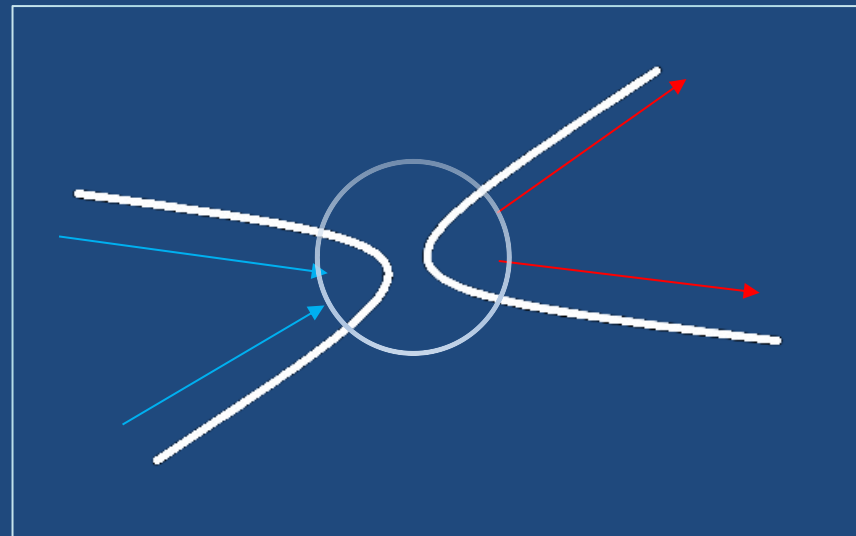

Adaptation process between the creative person & the personality

Towards a new “third” mind:

Enables contemplation experience without stress, absent of polarity, destroys reflective equilibrium, testing towards new experience of more inclusive thought systems and unconditional knowledge, no psychological Requirement.

Knowing without having to prove

Enabling “cellular consciousness” or regenerative growth processes – “etheric” rather than “astral” Bonding, psychological maturity & equilibrium.

The nature of Systemic multidimensionality
