1:39:36	Jed S:	Replying to "I am familiar with E..." Regarding Reiki healing the power symbol Cho Ku Rei means the same thing whether drawn clockwise or counter-clockwise unless you intend them to mean drawing in energy vs. extracting energy. Belief and intention are keys. Symbols only represent something in our field of consciousness. Doing Reiki type healing I like to just be in a receptive non-resistant state to let the Universal energy current come through to support the recipient for what they are ready to receive. I believe the frequencies modulate to help balance the current and the inflow and outflow of energy in the system. That's just my perception and interpretation.

1:47:42	Libby R:	Do you know how the resonances between the base stacking pi bonds can be measured? I have looked in literature, but these effects seem to be so small that it becomes confusing what is actually being measured.

1:49:16	Damn R:	Yes, thank you 🙏
1:49:47	Damn R:	Much appreciated Ty
1:50:11	Irma S.:	There are multiple sound frequencies produced by P Garaev, who tragically died in 2020 you can find them on You Tube
1:50:30	Damn R:	Replying to "The Rasha is Jere Ru..." Oh really? I thought Meyl developed it with DARPA.
1:50:38	Damn R:	Replying to "The Rasha is Jere Ru..." Ty for correction
1:51:31	Damn R:	Replying to "There are multiple s..." Yes. His genetic wave linguistics approach is fascinating
1:51:57	Libby R:	The reason for asking my question is that I have seen that these are the "expression" of the DNA, or the "song", and these relates to the energy of the 99% of in between DNA between genes.
1:52:56	Kat B:	That was in reference to negative frequency
1:53:09	Vivek M:	This is very interesting, as a musician also - I am wondering how I can bring some of this into my compositions?
1:53:28	Irma S.:	Thank you for a fantastic presentation. Sadhguru, an Indian mystic is talking about the same impact of mantras and yantras on healing

1:53:44	Damn R:	Could it be the DNA enables a phase conjugate or time reversed coherent phase lock to quantum and higher dimensional energies?
1:54:03	Kat B:	Reacted to "Could it be the DNA ..." with ❤️👍
1:54:36	Sharon M:	Just sharing because of the questions about the 118. A class I took on sound healing in 2017 uses 118.825 Hz as the frequency for the Schumann Resonance.
1:54:45	Doe K:	How do we use this knowledge to protect ourselves against the encroachment of toxic EMF (that I am informed heats our DNA, causing it to unwind in its "trauma" by microwave radiation, and then it must rewind)? And is there any more you can say about the skin as antenna when exposed to millimeter waves.....
1:54:54	Kwang P:	Glenn's website quantum-biology.org doesn't exist. If I open it in Safari, it says the domain is "parked" on godaddy.com but nobody's put anything on it. Sometimes it gives me a warning that the web certificate is out of date, so it might be someone impersonating the real site, and if I use DuckDuckGo, it won't even let me go on it because of the out of date certificate.
1:55:04	Vivek M:	Reacted to "Just sharing because..." with ❤️👍
1:56:14	Mary-Sue H:	the quantum-biology site also does not open "Brave" browser. So, Hope the info is retained and accessible somewhere.
1:56:30	Beth K:	The mRNA vax seriously affects the antenna functioning of DNA yet passes on the unwanted integration to younger generations via auric genetic transfer. Definitely unwanted and detrimental
1:56:53	Jody J:	Reacted to "The mRNA vax serious..." with 👍
1:57:00	Kat B:	Reacted to "The mRNA vax serious..." with 👍

1:57:38	Damn R:	Scalar and cold plasma connections?
1:57:48	Rebecca L:	For the number sequence you showed I would recommend investigating the numbers that have been shown to emit BG3 according to BioGeometry. 16, 19, 28, 34, 43, 54, 68, 72, 83, 89, 99... Are some of them. These numbers are based on Golden Ratio Phi ($\phi - 1:1,618\infty$)
1:57:51	Doe K:	So Glen, in essence, you could say that we living creatures are living, breathing antennae!

1:57:56	Janet G:	how does distance healing work? just like that!
1:59:41	Aaron D:	Is this the same technology Otis T. Carr learned from Nikola Tesla and used in his inventions. Otis even talked about controlling his conscious inventions through intent, using collectors, drawing from the endless sea of energy around us.
2:00:10	Sky D:	Dr Carl Simonton actually did suggest very specific visualizations of immune system cells attacking and destroying cancer cells. He founded the Simonton Cancer Treatment Center. NIH has funded cancer research based on Simonton's methods for decades now. Dr David Spiegel of Stanford Medical school helps terminal breast cancer patients double their survival times as well as significantly improve their quality of life. All based on Simonton visualization methods. Which are based on Silva Method visualization methods which Dr Simonton modified for cancer patients.
