2:07:41	J. T.	harmony is what it is aboutie theharmonyproject.tv lol acidentaly perfect.
2:08:09	Timothy R	Al is based on abstraction processing machines (computers) doing dynamic abstraction pattern matching at its core.
2:08:39	Jeane M	Thanks for putting AI in a better perspective than my hasty comment, Dan.
2:09:09	Johanna F	Replying to "I asked the Claude S" Interesting. ChatGPT has a Vedic GPT. I asked it the same question: The secret of Sāṅkhya lies in realizing that liberation (mokṣa) is attained by discerning the eternal, unchanging consciousness (Puruṣa) as distinct from the transient, ever-evolving material reality (Prakṛti) and its interplay of qualities (guṇas).
2:09:37	Ricardo M	do you know where can we get a radionic camera???
2:09:53	Nick M	looking fwd to that newsletter
2:10:12	Jeffrey Buist:	thank you
2:12:00 2:12:13	Karl K Roberto	What is a radionics camera meant to do? Register auras? The technology of the extraterrestrials is 200,000 years ahead of ours. If we take into
	D	account that a large part of what exists on this planet was created and / or influenced by the extraterrestrials it should be obvious that if we are looking for a new source of energy, we must turn to the E.T. A new source of energy will come from the extraterrestrials and will be given to Quebec. It will have the shape of a module of one cubic foot, and each unit will provide an infinite source of electricity. This should happen in a few years. (Andrew M. should be aware of this)
