0:53:46	Derek G:	Replying to "What is a sympatheti..." IMHO the scalar field is the medium of interconnectedness of all things. The sympathetic cause is an influence acting through the scalar field, eg thoughts, prayers, radionic machines are example of sympathetic causes.
0:54:09	Pamela M:	I didn't get the name - Quimby? anyone know the full name
0:54:25	Verónica S:	What's the name of Quenley, didn't understand,tía.

0:59:30	Jana A. S:	All rates on radionic devices are ARBITRARY for:
1:00:01	Jana A. S:	1. that Moment, 2. that device, 3. that person

1:00:32	Alexander S:	that Moment, 2. that device, 3. that person not according to David Tansley and De La Warr though!
1:01:13	Jana A. S:	Tansley and De La Warr understood something About directed ENERGY, this is why they had very good results.
1:01:27	Derek G:	Replying to "what is the mechanis..." I think of it as a kind of matching of intrinsic qualities through the scalar field, eg every thought corresponds to a (collection of) frequencies

1:01:59	Elizabeth P:	How can we code harmonic identifiers if every person is different.? Does one code work for all? i
1:02:02	Jana A. S:	Most users of Radionics are not able to PUTOUT a stable and big enough ETHER stream. This is why the results vary widely.
1:03:33	Derek G:	Replying to "Most users of Radion..." I think you are on to something...
1:03:55	Alexander S:	Most users of Radionics are not able to PUTOUT a stable and big enough ETHER stream. This is why the results vary widely. Most Old Radionic masters (Abrams, Drown, Copen, De La Warr) actually did! That's why radionic rates books exist
1:03:58	A. B.	Does disease create scalar disturbance without overt intention, like cancer, for instance, because it stems from a thought or feeling? Can an AI identify the sympathy of this disturbance and balance it?
1:04:09	Anthony J:	The entanglement is not chaotic. Not chaotic allows for predictability to one degree or another. This predictability allows for directing or influencing outcomes.

1:12:25	Derek G:	Replying to "Does disease create ..." MHO agree, yes disease has a scalar aspect and yes this is related to the mind-body connection eg Deepak Chopra, Louise Hay. I personally don't use AI for this as the training data for AI in this area is poor.
1:12:43	A. B.	Can AI create a sympathetic link between itself and target?
1:12:52	R W:	Does the human mind then have the ability to translate sensory and recorded information to these "ontological" sympathetic identifiers? Is that what we are doing?

1:15:05	A. B.	What is Dales Patreon's address for his newsletter so we can subscribe?
1:15:16	Anthony J:	Of course! This is the root of the concept of the Shaman... It is entirely based on intention of "tuning" in sympathy of others intrinsic experience to such a degree as to be able to co-facilitate a particular outcome specifically beneficial to the "patient."

1:18:36	Alexander S:	Key Details About the Manuscript What it is: It is a compiled set of notes and excerpts created in 1934 by a man named C.W.[1][2][3][4][5][6] Snell. The Source Material: Snell created the manuscript by taking detailed notes from original books written by John Keely himself.[3][4][5][6][7][8] Snell reportedly found Keely's books in an "old library" in Detroit.[2][3][4] Shortly after Snell made his notes, the original books disappeared and have never been seen since. Content: The manuscript contains Keely's complex theories on the "neutral center," acoustic resonance, and inter-etheric force. It details how vibration could be used to disintegrate matter, overcome gravity, and produce energy—concepts that directly influenced De La Warr's own inventions. The Connection to George De La Warr[9][10][11] George De La Warr "got his hands on" this manuscript likely because he was actively researching the same principles of vibration and resonance that Keely had explored decades earlier.Discovery in Archives: While the

1:27:45	Alexander S:	The acoustically-driven De La Warr Multi-Oscillator (specifically the model developed around 1962), though the "acoustic" principle was also central to his standard Diagnostic Instrument (often called the "Black Box"). @Dale Pond - have you ever researched the acoustic sympathetic resonance in radionics, after De La Warr's research and Keely's principles as above? Have you ever seen the actual De La Warr's Mk I instrument in action?
1:29:23	Jana A. S:	Acoustics deals in HERZ and is ONE POSSIBLE STABLE ENERGY SOURCE. This is why These devices work very well - they have an acoustically modulated ETHER SOURCE.
1:31:27	L O:	QUESTION: If using a homeopathic remedy (with or without a radionics device), can you have effect on a person, if they do not believe in it, or do not want the help, or they do not know that the remedy is being administered or sent?
1:31:49	Jana A. S:	Ether/Vril/Prana/Chi/Black Energy/Mana/Love/Life Energy....etc., etc. is ALL the same stuff - ETHERIC GASES, which there are 4 of here on this planet. Look at the first table of chemicals.
1:32:00	Anthony J:	In my experience yes. We create remedies for these situations.
1:32:19	Johanna F:	QUESTION: How much does the specificity of our thought/intention affect the results of the healing? For instance, some specific changes measurably happen in 2-3 seconds - others take much longer. Is this due to our specificity of thought/intention?

1:43:33	Jana A. S:	The harmonics and the overtones is a Special chapter, the Tuning is made on the FUNDAMENTAL tone.
1:44:00	Jana A. S:	Tuning Forks are for determining the fundamental tone, not the harmonics, nor the overtones.
1:46:28	Maryann H:	That brings up the witness question for me; what is the best witness to use on the machine (poloroid, hair...)
1:50:50	Alexander S:	That brings up the witness question for me; what is the best witness to use on the machine (poloroid, hair...) You can use your focused imagination of the target - that seems to be the best witness type, you just need to do a bit of training to be able to do that
1:51:56	Alexander S:	your focused mind can create a perfect phantom of the Target

2:10:13	Alexander S:	Bjerknes's Discovery (The Pulsating Spheres): Carl Anton Bjerknes spent his life proving that pulsating spheres in a fluid could attract or repel each other just by vibration. This was the "Hydrodynamic Analogy." The Link to the Bomb: The famous physicist Niels Bohr (who did work on the Manhattan Project) explicitly used Bjerknes's "fluid" concepts to create the Liquid Drop Model of the atomic nucleus. The Result: The Liquid Drop Model was the theoretical breakthrough that allowed scientists to understand nuclear fission (splitting the atom).[2] Without the "fluid dynamics" theories started by Bjerknes, the calculations for the atomic bomb might not have been achieved in time.
2:10:13	Jana A. S:	Konstantin Meyl finished the Maxwell Formula.

2:11:36	Alexander S:	The Keely/Snell Connection: This work is cited in the Snell Manuscript and by proponents of John Keely (like De La Warr) as scientific proof of "Sympathetic Vibratory Physics." They used Bjerknes's "pulsating spheres" to validate Keely's claim that vibration alone could create attraction (gravity) or repulsion (levitation).
