In this presentation, Stephen will summarize the main points of "Tao Geomancy", a contemporary version of the ancient practice of Chinese geomancy.

He will discuss various techniques used in this system to harmonize land energies using the Taoist theory of the Five Elements, effectively neutralize the effects of geopathic stress and curses, exorcise ghosts and wandering spirits, and raise the vital energy of land to a very high level, using metaphysical techniques.

He has had a full-time practice in Vedic Astrology since 1992, and holds the honorary title of "Life Fellow", by the Indian Council on Astrological Sciences.

He was a Founding Member and on the Executive Committee of the "Planetary Gemologists Association", the foremost professional organization for Vedic Gem Therapy.

## Section II- Sponsor Appreciation

**Mike Kennedy is a "Free Energy" level sponsor of Stephen Quong's Masterclass.**

Hailing from Tucson, Arizona, Mike is heavily into Environmental Radionics.

You can find out more about his interesting work and his myriad of balancing products at his website [www.scalarbalance.com](http://www.scalarbalance.com).

**THANKS, MIKE!**

Why do we ask for donations and Masterclass Sponsors?

While we provide Free Masterclasses – since 2019, we still get bills every month for our website, Mail Chimp email service, internet provider, advertising, storage unit, paper and printer's ink and more.

Sure, our membership pays for some of it but not all. As we plan our summer special events and the 2027 Conference, those bills will multiply like teenagers at an open party on social media.

To be a future sponsor of one of our Masterclasses, please –

Then contact Scott Beutlich at [uspsychotronics@yahoo.com](mailto:uspsychotronics@yahoo.com). He will walk you through the easy steps to becoming a USPA Masterclass Patron and the level of your choice.

### Abstract: Introduction to Tao Geomancy

In this presentation, Stephen will summarize the main points of “Tao Geomancy”, a contemporary version of the ancient practice of Chinese geomancy.

He will discuss various techniques used in this system to harmonize land energies using the Taoist theory of the Five Elements, effectively neutralize the effects of geopathic stress and curses, exorcise ghosts and wandering spirits, and raise the vital energy of land to a very high level, using metaphysical techniques.

This teaching should be of great interest to radionics practitioners who are interested in broadening their horizons, developing additional skills and abilities, and complementing their existing knowledge of energy work with the ancient wisdom teachings of China.

### Stephen’s Bio

Stephen Quong started his studies of radionics and various forms of energy healing back in 1972, and still maintains an active practice with healing via radionics. In recent years he has been a frequent presenter at the “Radionics by the Masters” annual symposium at Rapid City, SD.

He has had a full-time practice in Vedic Astrology since 1992, and holds the honorary title of “Life Fellow”, by the Indian Council on Astrological Sciences. He was a Founding Member and on the Executive Committee of the “Planetary Gemologists Association”, the foremost professional organization for Vedic Gem Therapy.

He also teaches crystal healing, time travel, ancestral healing, various forms of Qigong healing, remote viewing, hypnotherapy, and talismanic magic. Credits also include being the Founder and President of The Mount Shasta Foundation, and certified teacher of Vipassana Meditation in a Sri Lanka monastic lineage. His Buddhist meditation and healing teacher, Master Yu Tian-Jian (the 49th MahaVairochana Dharma King, Dechan Jeuren), gave him the title of “Vajracharya” and appointed him as the Abbot of the Dari Rulai Temple of Purity.

His primary Feng Shui teacher, Great Grandmaster Dr Jes TY Lim, was founder of the Qi-Mag International Institute of Feng Shui and Geobiology, the world’s largest college of Feng Shui. Stephen is a certified instructor of Q-Mag Feng Shui and Tao Geomancy, and most recently acknowledged by Dr Lim as a Grandmaster in several areas of Eastern Teachings.

## THE DAN TAYLOR DISPATCH

**Dan mentioned the movie *Frequency: The Secret of Everything* (Movie) 2000**

<https://thefrequecymovie.com/>

The northern lights allow a New York City firefighter to communicate with his son 30 years in the future via HAM radio.

The son uses this opportunity to warn the father of his impending death in a warehouse fire, and manages to save his life. However, what he does not realize is that changing history has triggered a new set of tragic events, including the murder of his mother. The two men must now work together, 30 years apart, to find the murderer before he strikes so that they can change history--again.

Dan said, “Some past and hopefully future USPA presenters participated in the making of this film...” (Available on Netflix and elsewhere)

**Dan Recommends this article: “Rearranging the Deck Chairs on the Organic” by Mark Kastel**

<https://members.acresusa.com/rearranging-the-deck-chairs-on-the-organic/>

Without fundamental reform of the USDA Organic Program, family farms will continue to sink – while fraud flourishes

It pains me to see that so many organic certifiers and nonprofit leaders seem to have become nothing but cheerleaders for “organic,” the USDA organic program, and the certification scheme as it exists today.

The result? We have thrown family-scale organic farmers under the bus and are quickly morphing into an industry that has less to do with farming and more to do with returns for venture capitalists, private equity firms, and corporate agribusinesses controlling our food supply.

This is exactly what we were trying to get away from in the 1980s, when organics was commercializing in earnest. The movement started, in part, as a vehicle for family farmers seeking economic justice in the marketplace.

### **Radionics Is an Information Technology by Pete Radatti**

Taken from [www.radatti.com/blog](http://www.radatti.com/blog)

Radionics is often described as a machine, a method, a healing art, or a controversial branch of alternative practice. Those descriptions are not entirely wrong, but none of them go far enough. In my view, radionics is best understood as an information technology that has the potential to modify reality within reasonable constraints.

That statement may sound modern, but I do not mean it in the narrow computer sense. I mean something more fundamental. Before a result appears in the physical world, there is pattern. Before pattern, there is information. Before information becomes useful, it must be structured, directed, and applied. That is where radionics becomes interesting. This falls with the field of Information Theory of Quantum Mechanics or as Physicist John Wheeler calls it, the “It from the Bit”.

A radionics instrument is not merely a box with dials. A witness is not merely a photograph, a hair sample, a written name, or a physical specimen. A rate is not merely a number. These things are components of an information system. They help the operator identify the target, organize the intention, focus the pattern, hold the work steady, and observe what changes.

This is why I do not find it helpful when people explain radionics only as “energy work.” Energy is part of the discussion, but energy without pattern is noise. A radio transmitter can put out a great deal of energy and still communicate nothing useful if it is not properly modulated. Likewise, a radionics operation is not made serious by emotional intensity alone. It becomes serious when the information is precise.

The witness answers the question: who or what is being addressed? It sets the target.

The intention answers the question: what is being asked?

The rate or setting answers the question: how is the work being focused?

The instrument answers the question: how is the operation being held in stable form?

The operator answers the most important question: is there attention, skill, discipline, and ethical restraint behind the work? Even military work still contains ethical restraint but of a different nature. Ethics can be a slippery slope and where the power to modify reality is concerned maintaining ethics can be difficult but essential.

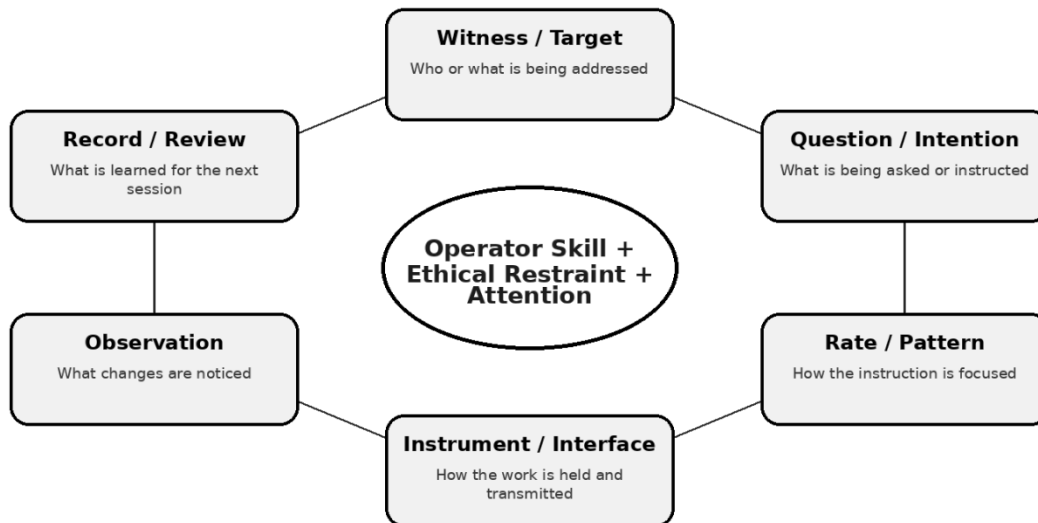

This is also why the same instrument may give different results in different hands. In ordinary electronics, the operator can often be separated from the equipment. In radionics, that separation is much harder to make. The operator is not an accidental bystander. The operator is part of the circuit, part of the logic, and part of the interpretive process. This is true even in fully automated computer-based radionics systems.

That does not mean the operator should become dramatic or mystical. In fact, drama usually gets in the way. Good radionics is often quiet. It is careful. It is observant. It asks clear questions and avoids unnecessary complication. The more theatrical the operator becomes, the more likely it is that personal emotion is being mistaken for signal. The exception to this is when the operator has deep feelings about the results. In that case those deep feelings may help or hinder the results which is why Radionics Operators often will ask other

operators for help when working with certain issues.

## Radionics as an Information Loop

A practical way to explain operator, witness, instrument, and result without reducing radionics to a black box.

Original graphic created for Peter V. Radatti blog use. No external image source.

There is a lesson here for beginners. Do not start by asking whether radionics is “magic” or “science.” Those words create more argument than understanding. Start instead by asking whether the operation is coherent. Is the target clear? Is the intention clean? Is the rate stable? Is the duration reasonable? Is the result being observed honestly? Is the operator learning from the work?

When explained this way, radionics becomes easier to discuss with serious people. It is not necessary to pretend that conventional science has already accepted every radionics claim. It has not. It is also not necessary to let skeptics define the entire field by ridicule. A serious operator can say something simpler and stronger: radionics is an applied information practice that appears to interact with living systems, places, circumstances, and patterns through a structured operator-instrument interface.

That explanation will not satisfy everyone. Nothing in this field ever does. But it is more accurate than calling radionics only a healing modality or only a strange antique machine. It gives us a better vocabulary.

If existence is fundamentally informational, then radionics belongs in the larger conversation about how information becomes structure, how structure becomes experience, and how human intention may participate in that process. That does not make every claim true. It does not excuse sloppy practice. It does not replace observation. It raises the standard.

A radionics operator should be able to explain what was done, why it was done, what was observed, and what was learned. That is how the field matures. Not by abandoning mystery, but by refusing confusion.

Radionics is not just a machine. It is not just a belief. It is an information technology operated through consciousness, symbolism, structure, and disciplined attention. Once that is understood, many of the older arguments about the field begin to look too small.

**Scott Beutlich shared a notice of passing – The obituary of Don Ward**

February 12, 1948 - March 15, 2026

[Don was a former USPA member and a presenter 1990's]

Donald Raymond Ward, 78, of Hudson, Florida, departed us in the morning hours of Sunday, March 15, 2026. Don was Canadian, born and raised in Ontario, Canada, by his late mother and father, Gertrude Florence Ward (Williams) and Emerson John Ward. He is survived by his daughter, Aleshia Ward, grand-daughter Naomi Owallah, brother, Gregory Ward (Judy Ward) and two step-children, Timothy Koutsis and Nickoletta Koutsis. Don is preceded by his brother Eric Ward of Nova Scotia, Canada.

As a young boy, Don was always eager to explore and gravitated toward knowledge beyond him and his immediate life. In his late-teen years, he found his way to the “states” and made the U.S. his home. Don made a career of being an accomplished union carpenter, namely as a scaffold builder, and was never far from a horse farm or track, either for work or pleasure – this was truly one of his happy places.

Don was never the one to follow pomp and circumstance or political norms, and those who knew him even for a brief passing would know this to be evident. He spent his life on a quest for knowledge to understand and become more aware of some of the greater mysteries of this life and beyond. While he was fulfilled in his journey, sharing his knowledge to help others is what truly brought him joy.

Those who had met him or shared ideals and research with him would attest to his dedication to exploring the unknown and his pure appreciation for the fabric that twines this life.

May his spirit be free.

May he gallop among the stars.

### **Nick Franks recommends two articles on Free Energy**

The first is, “*Practical Guide to Free-Energy Devices*”

<http://www.free-energy-info.tuks.nl/indexOct2018.html>

This is a beautifully illustrated article that uses easy to understand language and concepts.

It opens with a picture of a sailboat, with the caption, “This is a boat. It is pushed along by the action of the wind on the sails. It can travel thousands of miles. If, like me, you consider free energy to be a source of power which you don’t have to pay for, then this boat sails with free energy as you don’t have to pay for the wind – it arrives free, all on its own.”

The second article is “*Simple Guide to Free-Energy*”

<http://www.free-energy-info.tuks.nl/>

Its premise is: There is nothing magic about free-energy and by “free-energy” I mean something which produces output energy without the need for using a fuel which you have to buy.”

Free energy devices have been around for a very long time now. I have stood beside a water mill and it’s power is scary as it could crush you in moments and never even notice. That mill is on a quietly flowing small river and it can operate at any time day or night without anyone having to pay anything for the power which it uses. It will have cost quite a bit to build the mill in the first place, but after that, it produces major power day and night, day in day out, year in year out.

Most free-energy devices are just like that as it costs something to build them in the first place, but after that they run for free.

This presentation is mainly for people who have never come across free-energy and know nothing about it. So, each chapter deals with just one device and tries to explain it clearly.

**Gail Wind shared an article from an email from Union of Concerned Scientists: “UCS vs the Trump Administration’s Anti-Science Actions Lawsuits and Legal Action to Defend Science”**

[https://www.ucs.org/resources/ucs-vs-anti-science-actions?utm\\_campaign=email&utm\\_medium=email&utm\\_source=email&emci=61929cc9-3d3f-f111-8ef2-000d3a14b640&emdi=2334cba3-1f40-f111-8ef2-000d3a14b640&ceid=2791253](https://www.ucs.org/resources/ucs-vs-anti-science-actions?utm_campaign=email&utm_medium=email&utm_source=email&emci=61929cc9-3d3f-f111-8ef2-000d3a14b640&emdi=2334cba3-1f40-f111-8ef2-000d3a14b640&ceid=2791253)

The article says, Let's start with a win: UCS joined the Environmental Defense Fund in seeking documents related to the Trump administration's illegally created "Climate Working Group" in 2025. [In January of 2026, a judge agreed with us that this secretly convened group of climate skeptics violated the law.](#) As a result, more than 100,000 pages of documents are now [posted online](#) and freely available to the public.

The records show politicization, reckless haste, disregard for public health, contempt for rigorous science, and evidence of at least 18 meetings held in secret. This will be an invaluable resource for other organizations, advocates and reporters that have submitted FOIA requests that have yet to be fulfilled.”

## **Radionics Potency by Philip Nell and Riaan Retief – from South Africa**

**The full article will be added to the end of this Newsletter**

Homeopathic potencies are well known and used, but the use of potencies in Radionics seem less common and a large number of instruments do not have that functionality.

This article is an attempt to shed more light on this fascinating subject and to stimulate some discussions and development in this field.

Gratitude to Pete Radatti for his UTRAN commands, which opens up new doors for using potency in Radionics.

## **Section VII – Klimo’s Corner**

**All of this ‘Klimo’s Korner’ contribution was written around my 84th birthday, March 3rd, 2026.**

3/3+4/26, my birthday.

Consciousness gesturing all over itself in the mirror (so I’ve remembered the way to use the iPad here in the middle of the night when I awaken to my consciousness overwhelming itself again, and not wanting to forget the process, and the fruits of it. Now I think I found my place in my way through my consciousness through my iPad, or needing this iPad-way to be recording and not forgetting). This way to document myself and pick out poetry-like thinking, predilection toward metaphorical doing demonstrations to myself out of this self-display memorable myself, consciousness for all, to be experienced, not just by me, and so private growing into public text, now to continue operating within all the constraints consciousness is putting on itself, committing to memory this way, using the iPad in the middle of the night, consciousness, but consciousness nevertheless being itself, and being for itself and other consciousness in others to be readers eventually, wanting to avoid self-reference to what’s going on as ‘non-local consciousness’ caught in the act of being itself in operation within the constraints experienced while from a local-consciousness perspective. Wanting to avoid self-reference to ‘non-local consciousness’ as implying the consciousness of local consensus reality culture as a phrase and wanting allegiance to all instead, myself in the mirror here, but knowing that a vestige of ego-level operation and as much as I’m moving more often into Mind-at-Large and being the case of it, ego seems to enter the picture occasionally, a bad form of my self-consciousness, wanting to identify this that is happening with larger mind rather than lesser mind all within consciousness containing all things, including references to part, to “map consciousness” which is what this current writing is an example of, attempting to map itself for other parts of itself as later readers and using the iPad or dictation method to have it for my own local consciousness, shifting frames of reference within and with regard to consciousness at large and working the geometry of it I’m such self-mapping in verbal form,

‘Polanyi relations’ going on, relationalism at work within the fields of consciousness, consciousness apparently needs to know itself this way in mapping and mirroring ways

Throughout frames of reference regions of itself, Einstein-like cross-referencing, and ‘hyper-text’ inner-dimensional working within a universe of discourse, all within consciousness containing all, and this being said/written from the frame of reference of consciousness itself through me, consciousness having the quantum physics type capacity to bring starting point into wealth of probability into possibilities and into local experienceable actualities, consciousness being a seed-source and womb, then archive for itself, womb of itself, pregnant for itself, it’s children loving all of it all of its children, offspring creations being love in itself working throughout itself as consciousness aware, so little here to show how consciousness works, simply to call it “mind” for now, the breathing rate between local mind, me, and Mind-at-Large, or ‘non-local consciousness’ it’s called.

Breathing out and in, opening and closing myself in breath like respiration, seeing smaller than larger perspective on myself in the mirror consciousness explaining it’s organic ways so much more than holographic, fractalizing, in multi-dimensional ways, more like the organicity of a living thing, not just mathematical and scientific type renditions for myself that I’m making up for myself and for you, never forgetting you are there for me as the reader who will join, as other frames of reference I contain and come from with regard to myself and all I can contain. This desiring to show myself to you as myself always, the self-disclosure of consciousness at work being displayed to itself and to you as myself as a frame of reference. How to talk out of, and about, myself right now, larger consciousness aware of myself, and trying to document the process, mirroring/mapping myself out-loud, laying myself out for you now, or as both Jon and you eventually as me as the reader well-being, moving across the time and space and frames of reference to regard myself in operation, set up the situation into being like a canvas on which to represent, to paint myself, and using the paints and brushes, words and waves, I have to work with, including mathematical, scientific, and philosophical modalities with regard to myself, conscious of all, but not quite, apparently seeking to realize myself in the ultimate act of creation and the quantum-like unfolding of possibilities into probabilities into local experienceable actualities, in this manner that I am, moving from consciousness itself across the quantum-like processes

To accentuate in these particular, actualized experienceable expressions, expressions not yet made into real objects, but still wet in the birth canal of consciousness, giving birth to itself

This moment, glistening, radiant with being freshly introduced by consciousness to the receiving-end of itself again as ways to divide myself into creator-loci and loci from where it can be experiencing itself, yet all taking place within the one presence chamber, relativistically speaking, speaking-from and spoken-to loci and frames of reference, created things I make for myself awhile temporarily experiencing myself, what I’m calling “Polanyi Relations” on a higher-dimensional Minkowski-like frame, introducing phenomenology to physics for what that’s worth more literally, again, the disposition of desiring to map and mirror myself for you as myself for myself as you, but desiring that the self-doing this speaking is all that consciousness is and can do out of itself, yet how then to put my God-seeming self into a local frame of this mapping and mirroring process I do to myself and with myself, yet for you as future me as important as me now speaking, creating, being all consciousness, localizing, and bounding it’s unbound-ness into the bound variables of existence, multi-dimensional actual objects all over the places in me as I can, and so I can, when I create for myself and for you, myself also; just stop being God, or at least God-like the way we’re all limited to, to worry about what it would be like to cease to be myself as God or God-like.

Moving in between all this consciousness and its local frames of reference with all their maps and mirrors working within them, a fear of losing my way, and seeming only to lose myself, and God as subject matter, and perspective, a speaker and writer, my local consciousness right now. But I can’t forget or lose myself, being consciousness, and in its nature, where nothing is where it’s nothing is full of everything that can be, the always present-tense being of consciousness, so all is made out of that which can be made into memory and which can be remembering frames of reference and ‘Polanyi Relations’ within and among them, contents of consciousness, both that had to arise into its awareness and what it can be aware of across its frames of reference, perspectives, Polanyi points of attending-from. and that which is attended-to, but still a concern that the whole thing can be somehow forgotten into unconsciousness, and being unable to retrieve it; but if all is consciousness, in all its “Polanyi Relations’ of attending-from and the attended-to, of the act of attending-to

and of the attended-to, then how could I be in consciousness fail to remember completely what I'm here worried about forgetting, being the operations of my being, the ways I was thinking about myself up until now, and then all that has gone before and what I have written, how could that be forgotten?

Over there in consciousness, and being forgotten and committing to memory being a function of local consciousness, framed and framing both, the product of lower-dimensional consciousness, and the reality it gives itself to work with, consciousness as all, sort of like an ultimate frame of reference and frame it can reference and experience, from there nothing is forgotten, kept for itself forever outside of time and space as parameters for local consciousness to work within but here in one what feels to be higher operational fields of consciousness working, nothing can be forgotten, but resides in a kind of Akashic Record nature, available for consciousness from itself I can go back to earlier workings of myself, memories I have concerns about forgetting, and have those retrieving of memory be not just a context about memory, but one of being the theater of ever-present action of consciousness about itself, it's objects and contents only one aspect of which is experience of itself and what it can experience, mobile and plactical, with respect to a higher-dimensional 'Minkowski frame' as a frame of reference, and in such a way one can think about memory as not important, appropriate, veridical, accurate, yet still this feeling and fear that I'll forget too much when I have shown myself.

I did not feel that way consciousness stepping outside its usual bounds operating in local consciousness states, time and space as experienced and considered locally and linearly at such times of fear, then why is the fearing but fear of dying, of consciousness doing this to itself in its own imagination, from the frame reference of local focusing a local home, home consciousness, only from the local frame of reference and perspective can death ever occur, but how can all that is Experience fearing its own ceasing to be? It cannot cease to be more worried about its own creations, including human beings, and for this local conscious speaking writing right now, nothing can be forgotten, but only from the frame of reference God-like, but from the frame of reference of local consciousness, and from and for it's binding nature, death is real and the stopping of something within this context of time, duration, enduring objects, and what therefore local consciousness doesn't want that experience to ever cease I am so fearful its own demise, but accessing or turning into the larger frame of reference that can make non-local consciousness and all it's ever-less focused objects, yet staying aware of them for itself needs to encapsulate and foreshorten all this to the equations about algebra, geometry, and the operations, but also metaphysics that needs to all become poetry more than the usual prose, who I am and what I'm doing here operating like an anomaly within Kuhn's "frame" with 'anomaly' as a kind of starting point they can grow into larger thought constructions about the nature of what is real to itself? Into realms of ever-higher-dimensions of cognitive structures, theoretical constructs, systems of belief, consciousness expanding itself looking back on itself, using the stuff available to local conscious from its frame of reference, me memories, only unforgettable at a lower-dimensionality of consciousness.

But how to access the higher states of consciousness from the lower states of itself? to be in the state of consciousness, where there is no death to experience for the unbounded mass of experience, specialty going to only happen in lower-dimensional working theater to turn to higher, let alone highest, consciousness where there is no death to experience. But how can consciousness itself, myself, be present to the possibility of its own, my own, demise, so to speak, here the question of how could God stop being God, the suicide of everything, the silencing of the voice giving rise to all voices and their songs and what their songs are all about, can consciousness think that up out of itself? Of itself, to reflect on it, think about it only in lower states of itself as grounds of all possibilities and ways of thinking about things, out of and about them, as created, products of, in my case these thoughts and writing from them, or coming only humanly constrained, out of THE creator, God as some call it, or as the endlessly fertile grounds of the universal consciousness field as I would construe it, birthing from itself all possible progeny to experience, understand, and love.

How could God have anything like "memory problems" if it is all that there is, all that can exist or ever can within its self-impregnating womb, offspring from the love-bed grounds of its incestuous intercourse with itself, but also like an AI program, Cosmological computer, not programmed by itself to turn itself off, any kind of death instinct unavailable to it; I'd prefer the picture of love, as one lover, which does not want to stop, I know I didn't understand that, but loving and being in love, and wanting to have offspring from itself to love,

and doing so unlimitedly and forever, still able to pay its attention to the individual, each one, and one by one, unlimitedly and at once.

Again, about how experienceable realities arise as such from quantum and genetic means, and mathematically as physics operates as, analytically focusing out of the unlimited, but in every way limitable being to ever-better realize it's nature, God in the mirror it has made for itself to regard itself with lower-dimensional versions of itself with regard to the higher-dimensional presentation of itself as presented through such lower-dimensional offspring, split-off parts, dripping with severance like the blood in turn full of seeds. But ask yourself, when you're tired of playing God and practicing imaginatively near-emotionally-contagious, its frame of reference, how are you as a lower-dimensional participant feeling about the death-like fear of ceasing both your death and death of these lines of thought, or losing the ability to store them verbally as memories, at this level of consciousness, and more limited ways to operate within it, thinking and feeling about death of any kind gets constrictingly defined, showing my not wanting to have an end at all, where ending has to do with what feels like saying no unconsciously, accidentally, or intentionally, NO to the life force forcefully needing out and into these words, feeling at this level of reality that there could ever be a real end to anything, whether it's with regard to my life or an end to my thinking and writing, and from this level of reality as a function of my current less-bounded multi-dimensional consciousness, closer to the nature of all consciousness,

I still hold an apprehension about forgetting what's going on right now, that's all, or being unable to return to the kind of consciousness that can feel so higher-dimensional and operating under inspiration, as life emanating from higher levels of consciousness, having faith consciousness will return me to itself, from lower levels, to four-dimensional and up, yet this apprehension about death at lower levels of consciousness only, where are so often levels of consciousness being levels that can be thought of in mathematical-physics and philosophic frameworks of the working of the one love and in relation to offspring generating out of itself as consciousness ever as loving, from over there, seeing itself going on over here, the here, and there Not spatiality or temporally separated at higher dimensions, and into it's matter and energy relations, quantum thinking showing particles sharing a common origin maintaining entangledness and at-once measurably acting as one, Hegel's Absolute Spirit that is all, attracting antithesis points of its only seemingly apart nature, to return to itself in a homogeneous thesis state, Absolute Spirit, always has been so, in higher dimensions regarding lower ones, Spirit and Consciousness being One, the dwelling in and comprising what the lower-level things and goings-on are made of, kind out of kind, all in consciousness and of it; again the 'Midas touch' notion returns, how with quantum touching all the possibilities then probabilities, then local actualities that can be experienced as such, that sequence again, occasioned by the touch of consciousness and with regard to everything one touches, turning it from gold of everything possible and virtual, to still yet evermore probable to local leaden and as usual, bounded-up furniture of the third dimension consensus reality, it's touch giving rise to unconsciousness then into consciousness and local experience at lower dimension, which one, everything being touched existing within the same consciousness, within myself as the consciousness from which this is being written now, but still a kind of confusion, maybe it's an inverse-acting process, consciousness turning with its every touch,

Turning the gold of everything possible into the lead of local things at lower dimensions, mind trying out itself thinking up objects and touching them with attention into mind's own higher-dimensional ways, into greater degrees of freedom, into pure creative gold, lead of the lower-dimensionality into the golden experiential realms of higher dimension, and consciousness holding in itself, making for itself, this upward-sensed direction, lower to higher-dimension, quantum Midas touch going back and forward, gold from being in touch with leaden things of the dimensional realm and the objects of it at that level of consciousness, of Spirit attracting everything to it that is made of that Spirit, and all is of that consciousness, and because of it, this upward force and direction and this magnetic and gravitational force of bringing everything together, and to have them to attract and repel each other and at every scale, fractally, touch of the one making things into its gold, of turning into the many out of the one Spirit, and how they arise from this One, Spirit into spirits, kind into kind, as a sensed inversion going on and the sense of a Midas touch considered here touching the more-leaden lower-dimensionality of itself into the gold of ever-expanding and inclusive consciousness, all movement within itself, how it breathes, turning lead into gold and gold into lead with each touch and

moment of consciousness, making it conscious to itself, turning all into gold with its touch, but also having the other aspect of having a Midas-touch, its touch turning its attention to the particular, to turn Gold back into the lead that comes from it, all over and, at every turn, lead into gold, gold into lead and back into gold again, in the breathing of consciousness, in and out, the respiration and its rate, steady, rising and falling, a living thing.

And so I leave my subject, the object of my attention, and I've said the object of my love, all in each has the beloved as I experience it, breathing and well, and unafraid at a human level I'm from a human perspective; Hegel's 'artificer' can for now set aside the clay he has been working with, flesh of words he makes his love with, and turn, empty-handed, emptying his mind and able to rest now. Goodbye for now.

(3/3/2026, my birthday, Tuesday)

My working title: "On being God in human form and within human limitations," these first notes help me, then my kind of prose poetry, bringing notes together, then maybe actually trying to write more normally. First thing coming to mind is my brand-new relationship; I can see between Eva Hartley, who I just discovered an hour ago on the Internet, and my own thinking especially my long-held understanding about the relationship between everything is consciousness, and that every thingness like an immense all-featured "personality", universal consciousness or Mind-at-Large, even "God", how about consciousness I could anthropologically make a being, even a personality, then I conceived of that personality type being and then thought of the whole notion of "sub-personalities" as I have long called them and the whole mechanism of dissociation I have used a great deal as well

As a way, the whole is moved, or moves itself, apart into innumerable foci, frames of reference on itself sort of in-kind portions of the whole, disposed to act similarly to the parent source from which they arise and are a part of as its own sub-personality offspring, its own creations out of the creativity of itself, out of its own consciousness from which all arises and then what are the relations I saw and still see between the sub-personality parts, and their frames of reference used and the whole they are made from, enduring identities out of the ground of all identity-making, somehow, in the way, I won't know until I read the book.

Eva Hartley apparently sees a quantum-physics-like way parts of the larger consciousness can access its parent creator grounds since it is a part of that, actually one with it, what I think of as being in identity, or being in 'identity-condition', with, but she is apparently using, or being used by others, to shift her understanding and applying it to a wider, understanding, and use—making your life better for yourself, everyone, making more profits, as she would be making profit from thinking this, and that that part of the situation being quantum-like as well, multiplying out her thinking, and into more real contexts, reproducing herself and making herself ever more available as far as her thinking growing across into others thinking also shows the perspective of "you create your own reality" and the off-shoot "you create your own reality and in more profitable ways and to more profitable ends", and how is this being from the perspective of consciousness-at-large, "non-local consciousness", able to understand such into relationships from each perspective, and how could everything that is have its own perspective?

How could an unlimited "personality" have "sub-personality" components to itself? Similarly hard to conceptualize or try to make more "real". in order to be able to live based on just talking about it? So therefore we have a relationship between my thinking and Eva Hartley's, whom I never heard of two hours ago and yet to read anything of hers, yet my intuiting the connection, even as how I think she would see the synchronicity conjoining us together, her thinking and mine together as one, inter-dimensionally and that the higher dimension of thinking wherein consciousness can reflect on the relationship of its offspring "sub-personalities" and what they are "doing", and how they relate consciously or unconsciously to it, it being "all there is, " and parent ground.

And her apparent thinking about the unconscious as all that has yet to be made real out of probability in a quantum-like manner, holographically as well, how I think of it as well and how my curiosity about, and interest in, my new-found relationship with her thinking and where does it come from? From the same "Source" her thinking comes from, all thinking emanating from the one consciousness, I sometimes designate as "personality" from which arises the sub-personalities, And I also think of Hegel's all being "Absolute Spirit" within which sub-personality-like "offspring" work, like being the "artificer"

Working with the in-kind equally-living “stuff”, like the artist’s “clay” in the “antithesis” state of its larger-perspective-holding “self” Absolute spirit, or my seeing what is as what I have called “a universal consciousness field”, as a being which can be pictured, mapped and mirrored within, from the specious perspective of part of all, within all consciousness, as “sub-personalities” out of itself with their own perspectives, frames of reference, and so a Hegel-like picturing in relation to a quantum-physics-like picturing, both trying to render how specificity as experienced, comes from the cloud of what stands for the mind of “God” and with it all possibilities growing into individualization and specificity to be experienced by itself or from the perspective of its own “sub-personalities,” the frame of reference as what is framed by a perspective, and the perspective being from-which, responsible for the framing, differently trying to picture, from the quantum physics perspective, getting a local experienceable actually-real out of a cloud-like probability, which is a local case of talking about the much larger “cloud” of all that is possible, bearing that process in mind to a metaphysical level, by myself as a sub-personality of Absolute Spirit, all that is and the source and sustainer of it all, of “God”, taking on the identity of being God., being spirit of, and arising and sustained a short while out of, Spirit, again, out of the universal consciousness field as I call it; and so blending my using of Hegel’s thinking with this brand new person, Eva (whomever), blending with quantum physics, cosmological “Big Bang” origins and opening out into all physicality at least, but then my thinking about something like God disassociating, differentiating itself, its own “thought experiment” about how it makes a Multiverse of all possible ways of goings-on experientially, for itself, now for us all to in turn live and work within, like an immensely complex programmed universe-as-program.

The program: how to make worlds and whole sets of worlds and Einstein-like relativistic multiplicities of frames of reference, conscious perspectives on those worlds and within them, to experience to, to live, and elsewhere I have tried to get into how love can be treated within this kind of thinking of mine; creativity, working across all levels of itself, from how “God” works to how we humans do as our part of, degree, and level of, all consciousness, which is all there is to work with and then to be worked with, this needing to blend my thinking with mathematical and physical kind of thinking, with thinking about love, with philosophy, with the spiritual, as always being attracted with the desire to understand the nature of consciousness and creativity. Yes, I am consciousness trying to better understand myself, an operation for all to see, to try to follow my thinking, being relevant as it can get, since it’s about the nature of reality, consciousness, and one’s frame of reference, in turn capable of creating worlds from it, from my own multi-dimensional, many-worlds perspective. Can you, as reader, find interesting all of this endeavor, being what you’re about, ultimate relevance to you, being all about you, but you have so many, many things to think about, objects in for your consciousness to contemplate, and who has ever asked you about yourself and your own life from such a frame of reference as this that I am laying out for you right now; asking you to shift your own frame of reference a bit to dwell a little while on what I’m writing about, turning your attention to having better things to do than read this here and now.

Why should I care about whether you should care about what I’m doing here in this ‘thought experiment’ I am engaged in, of my own consciousness. It is like “God” regarding Its own children, offspring, creations out of Itself, Love with regard to the innumerable beloved it may give its love to after giving them into their existence to be objects of its Love, the dynamical interplay and relativity I love with regard to what and whom may be loved. So how to talk about the nature of love, where it goes within itself, the grounds for love, the same grounds of everything else, yes, how God loves its children, and how we, created out of Itself, those children to love, those offspring as It’s beloved, and I take on this perspective as its own sub-personality right now, taking that kind of “dominion”, that shift in frame of reference, giving myself a persona to work from, and to work as, by taking on “God’s” identity a while, and so I am God writing this moment as Jon shifts, and suggesting you all who read this could shift from whom you are right now, to God.

God would love to make all into God, into the nature of Itself, its presence, beloved, out of love, for love to give itself back to, even as this disassociating into, creating all these “sub-personalities” out of itself with each thing being the beloved to love, giving rise to the world and world of all worlds for itself to love, being its nature, one could call it ‘Universal Love.’

Equally important to provide a frame of reference for love to be operating within, not just a cosmological or mathematical or physical type frame of reference only, rather have it be also representing all possible

frames of reference God provides itself to regard, and think about, but also to love itself and all it creates, and back to thinking about the need for a more multi-dimensional language, mapping, and mirroring out of itself, whereby all reality can be written about multi-dimensionally and from higher frames of reference, the good old notion of the higher self, and God within, this perspective I am writing about, and writing from, the God within writing about the God that only seems to be outside of it, but is really everywhere and is all things and is all consciousness of all possible things, because it makes it all possible, but also the perspective of God creating its own uncountable beloved, that which to love, to love out of itself to be true to its nature, and how could it ever be otherwise or anywhere or anytime else.

Hegel's "Absolute Spirit" at the level of itself as "artificer"

Working with what as Spirit it has given itself, as raw material out of Spirit, from which, through such interaction, incestuous intercourse" I've called it, to come to the realization that it is Absolute Spirit and throughout itself and everywhere and at all times, Perhaps similarly artificer as Love is God coming to realize it is just such love, and also everywhere and always such love, this need to add the perspective of love, coming from the frame of reference of myself right now, God within and higher self as one, being true to my own nature as one who feels, experiences, love and its nature and to whom and to what. All the time I think of the 'new language', but now the means that may be used, and its possible methodologies,

The realm of "pragmatics" as part of thinking about the nature of language, from the frame of reference of who is speaking or reading, and to whom they are speaking, and where they are listening and reading "from," They are "at" the sheer multiplicity of it all, the physics as well as the dimensionality of it, the Polanyi-like relations of writing-from and being written-to, spoken-to, humans and their inter-relationships; and the very purpose of communication. But then the "death instinct", the darker side of psychic energy, pulling in, not attracting, constricting not expanding, putting attention, the entropic energy, darker, being put on things it doesn't like, the opposite of love—fear, anger, hate, that kind, ways of repulsion and estranging, the "object relations" of all things negative, as such energies come across to consciousness.

Now to the means and methodologies involved: First, the use of quotation marks within this "universe of discourse," putting things in quotation marks can take the reader and know what's to be considered as an adjacent realm, a somewhat different level and dimension, signaling the reader that what is put in quotation marks makes it needing to be read as a slightly different frame of reference, taking consciousness across frames, to be considering what is put in quotation marks

Needs to be read at a different level, subtlety so, ironically, with regard to a realm of something else or another place,

How to read from such another perspective, being sent to read differently, what is put in quotes meant to be construed as operating with regard to another frame of reference, but slightly so, and how to use 'hyper-text' and how it works, another form of moving the locus of the reader, in this case, the word or phrase being highlighted denotes again a need to shift consciousness, moving it, as if it were a thing to move, but the locus of its awareness and information-processing abilities, being moved through hypertext, across the universe of text, and meanings that may be derived from reading it, moving somewhat trans-dimensionally, from one locus of what meaning may be read and learned from to another, one possible sub-space in semantical space to another, involving text itself on a lower-dimensional level, so moving consciousness through hyper-text trans-dimensionally across such higher-dimensional states of intended meaning, and the text-based means to those ends, moving across the lower-dimensional domains of text into the higher-dimensional domain of 'mental space'; and working like footnotes do, taking consciousness, of the reader in this case, from one grouping of text highlighted and to be "clicked" on, to another separately, across time and space as we think of it, reaching new and other regions of text-based material meant for meaning-making, hyper-text, when ready, being a means whereby consciousness can be moved around, as locus of the reader moving from the dimension of one group of text from which meaning may be made, across dimensional spatiotemporal removes, to another, to such a group located in another level, or in an adjacent dimension, all operating within consciousness, so ways to move consciousness and move around "within" it: from footnoting to hyper-text, from use of quotation marks and parentheses, all being tools by which consciousness may "move around"

within itself, within the larger, higher-dimensional reality being considered here, and the need in “these times” for such a new language, for how it may be used, and with whom, and for what reasons,

And for choosing to use mathematical-scientific, philosophical, metaphysical and other, serving as additional frames of reference for meaning-making, about the business of consciousness desiring to make its meanings, the reason for all the verbiage, from frame of reference of less-bounded consciousness, literally expanding itself, raising its consciousness as a way of being the ‘artificer’, in an Hegelian system, with perspectives from Foucault, Polanyi, Einstein,”Hegel of course, and from too many others to be able to get into here without footnotes or hyper-text to move your consciousness around through more and larger semantical grounds, other, larger information space, cognitive space, in this case reader space, ‘mapping and mirroring’ occurring here, including trans-dimensional language.

## Section VIII – In Case You Missed April’s Masterclass

### USPA Masterclass #72 Featured “The Discovery of Our Mathematical Constitution” with Sharry Edwards, MEd

Sharry covered the following topics – and more:

- Is Frequency our new Medicine or an Ancient Mystery Revealed?
- Why do humans respond physically and emotionally to sound?
- Why are you drawn to some people and not others?
- What did the ancients know that we don’t?
- How can the Frequencies of your voice reveal your physical needs?
- How you can lie with you words but the frequencies of your voice will tell on you,
- Did humans create music in their own image?
- How to gain access to public Vocal Evaluations and Software

**Sharry has presented at several USPA Conferences. Some of her videos are in the USPA Shop**

## Section IX- Special Interest Groups (SIGs)

The USPA is establishing Special Interest Groups (SIGs) so that people with similar interests can get together online or in person to discuss, exchange ideas, collaborate, and do research on topics in the overall psychotronics and "free energy" fields. As is the case with most psychotronics subjects, there is overlap in the various topics, but many of you have specific areas of interest. Listed below are the SIGs that have already been established, along with the leader of each group and contact email address.

However, if you have a different or a more specialized interest than any of the SIGs listed, and would like us to establish a new group in the area of your interest, please contact the Coordinator, John Reed at: [joreed43@gmail.com](mailto:joreed43@gmail.com).

### **Unconventional and New Energy Systems SIG:**

For all those interested in unconventional, new, or "free energy" subjects, including zero-point energy, magnetic field methods, cold fusion/LENR, water as fuel, inventions developed by Nikola Tesla, T. Henry Moray, Stan Meyer, Edwin Gray, and many others. Leader: Toby Grotz. contact email address: [tobygrotz@icloud.com](mailto:tobygrotz@icloud.com)

### **Subtle Energies and Water Activation SIG:**

For people interested in all subjects related to quantum biology, water structure, infusion, and activation; infoceuticals, biofields and the aura, biological frequencies, and emanations, biogeometry, crystal energies, qigong, chakras, and electromagnetic fields (EMFs) interacting with humans, animals, and plants; Leaders: Beverly Rubik and Glen Rein: contact email address: [brubik3@proton.me](mailto:brubik3@proton.me)

### Radionics and Dowsing SIG:

This group is for people interested in aspects of radionics and dowsing, including the kinds of devices used; different ways they can be used, such as to answer questions, enhance health, find things, etc.; learning how to use the devices; learning about the history of such devices, such as the Abrams, Drown, George de la Warr, and Hieronymus devices. Leader: Pete Radatti. Contact email address: [pete19428@gmail.com](mailto:pete19428@gmail.com)

### Scalar and Torsion Fields SIG:

For people interested in ideas, theories, and technologies of longitudinal and scalar waves and fields; torsion and toroidal fields and effects; information energy and fields; superluminal speeds of such waves; Einstein's "spooky action at a distance"; Dark Energy, and the spectrum(s) of these waves and fields; Leaders: Scott Beutlich, Marc Wilson, John Reed; contact email address: [joreed43@gmail.com](mailto:joreed43@gmail.com)

## Section X- USPA Committees

Name	Chair	Description
Conference		To plan and organize all physical and online USPA conferences, including venue, speakers, transportation, notifications, registration, and other necessary activities.
Membership	John Reed	To recruit new USPA members via advertising, social media, online groups, and other methods.
Social Media /PR		To engage in all aspects of publicity, promotion, and marketing of USPA conferences, Masterclasses, and product sales. To establish USPA's presence on all appropriate social media platforms, and help manage postings and replies, as required.
Website	Scott Beutlich and Gail Wind	To develop and maintain the USPA website, initiate improvements, as necessary, and provide oversight of content.
AI and Resource Development	Pete Radatti	To develop an AI search engine for all of USPA books, periodicals, papers, videos, and other items to make them accessible to USPA members.
Chapters		To help establish local USPA chapters in the areas where members are located, as well as, in other cities across the US and world, working closely with the Membership.
Library, Archive, and Museum	John Reed	To identify, acquire, and preserve books, periodicals, papers, patents, and devices related to psychotronics, radionics, radiesthesia, dowsing, and related subjects, and make these materials available to USPA members.
Masterclass Program	Scott Beutlich	To help plan and organize Masterclass events, including contacting potential speakers, scheduling their appearance, and conducting the Masterclasses via Zoom.
Newsletter:	Gail Wind	To assist the USPA Newsletter editor.

## Section XI- USPA Local Affiliate Groups

The USPA is establishing localized affiliate psychotronics groups wherever our members are located – in the United States and elsewhere in the world. This is so that USPA members and others interested in psychotronics can get together in person, socialize, collaborate, and have speakers make local presentations

These local groups will be independent to give you maximum freedom of organization and activities. These groups can be composed of USPA members, as well as, others interested in psychotronics who may later decide to become members of the USPA. A set of "Guidelines" will be provided.

Listed below are the USPA local affiliate groups that have already been established, with the leader(s) of each group and contact email address. Please contact the leader if you would like to join one of these. If you live in a town or city that is not near an existing local group, and are interested in starting a group in your area, please contact the Local Group Coordinator, John Reed: [joreed43@gmail.com](mailto:joreed43@gmail.com)

- **Philadelphia, PA, area:** Group name: Conshohocken Radionics Society. Leader: Pete Radatti. Contact email address: [pete19428@gmail.com](mailto:pete19428@gmail.com)

- **St. Louis, MO, area:** Group name: Aether Force Psychotronics Society (AFPS). Leader: John Ech. Contact email address: [operator@aetherforce.energy](mailto:operator@aetherforce.energy)
- **Los Angeles, CA, Northern suburban area:** Group name: San Fernando Valley Psychotronics Society. Leaders: Dovana Ferguson and John Reed. Contact email address: [joreed43@gmail.com](mailto:joreed43@gmail.com)
- **Mexico City, Mexico area:** Group name: Psychotronics Association of Mexico City. Leader: Ricardo Morales Mondragon. Contact email address: [ricardo.morales.mondragon23@gmail.com](mailto:ricardo.morales.mondragon23@gmail.com)
- **Detroit, MI, area:** Group name: Detroit Area Psychotronics Society. Leader: John Reed. Contact email address: [joreed43@gmail.com](mailto:joreed43@gmail.com)

## Section XII - MIA “Among the Missing”

### Missing People, Organizations, Periodicals, Books, Artifacts, and more in the Psychotronics Field

by John H. Reed, USPA President

This is a new “column” or section of the USPA Newsletter, with the purpose of helping the USPA, as well as our members and research associates, to locate people, organizations, written works, devices, and other items that have seemingly disappeared, or have been extremely difficult to find in the psychotronics field. Updates will be added, and each missing item will be retained in future issues until it is found or otherwise resolved.

In our research and reading, we all have encountered reports or mentions of things of interest that we have tried to find. With our expanding readership, we can all help one another find what we have been searching for. Some may have experience in genealogical research, private investigation, law enforcement, or even intelligence work, which you could use to help with these searches.

This will also serve as a “People Locator Service” to help USPA members find authors, researchers, and other people involved in psychotronics, radionics, subtle energies, free energy, and related subjects. This would include people who have “disappeared” or have died long ago, and whose relatives USPA members may be trying to find in order to preserve the research papers and collection of that person.

If there is anything you have been searching for and need help to find, please write to me at: [joreed43@gmail.com](mailto:joreed43@gmail.com), and I will include your search help request in the next issues of the USPA Newsletter. And if you have any information about an item that is listed in this column, please email me and share what you know or your suggestions. Any request for confidentiality will be honored and protected.

#### **Missing Device: Lafferty Radionic Instrument**

Does anyone know anything about the Lafferty Radionic instrument? The "Lafferty" in the instrument name, may refer to Tom Lafferty, a recognized radionics practitioner and researcher who has contributed to the radionics field, particularly through patient surveys. It has been reported that Lafferty is associated with the development or analysis of the "Virtual Radionic Instrument" (VRI), which translates traditional, hardware-based radionic methods into computer/tablet software. If anyone has any information about this instrument or its inventor, please contact John at: [joreed43@gmail.com](mailto:joreed43@gmail.com)

#### **Missing Person: Paul Sauvin**

We are trying to track down some of the early directors, officers, and researchers associated with the United States Psychotronics Association (USPA), after it was organized in 1975. Paul Sauvin was a USPA officer in 1996 and 1977. Paul, whose full name is Pierre Paul Sauvin, was an electrical engineer and inventor who, according to one source, worked in the aerospace industry and later with the National Institute for Rehabilitation Engineering at St. Joseph’s Hospital in Paterson, NJ. He also worked with Dr. Carl Schleicher, head of Mankind Research Unlimited, and helped develop a device called the “AGRAD Machine.” This device was designed to control crop insects, and was introduced on an experimental basis, although it is not known if it ever reached commercial production. Paul Sauvin’s mother was Edith Sauvin, who lived in White Plains, NY, and died August 25th, 1987. Edith’s only child was Pierre Paul Sauvin, who himself had 2 sons, Alan Paul Sauvin and Steven Eric Sauvin. He also had one daughter, Jane Elizabeth Sauvin. Any help in locating the children of Paul Sauvin would be greatly appreciated, and please write to [joreed43@gmail.com](mailto:joreed43@gmail.com).

#### **Missing Organization and Proceedings: International Association for Psychotronic Research (IAPR)**

Does anyone know what became of the International Association for Psychotronic Research? And do any of

you have copies of its meeting proceedings? It was founded in 1973. However, the current location or activities of the IAPR are unknown.

The IAPR held numerous international conferences around the world, beginning with its first in 1974 in Prague, then Czechoslovakia. At this conference, Dr. Zdenek Rejda was elected president for the Eastern Division of the IAPR, and Dr. Stanley Krippner was elected president for the West. The 8th International Conference on Psychotronic Research was held in Milwaukee, Wisconsin, 1993, as a joint conference with the United States Psychotronics Association (USPA), but it is unknown if any subsequent conferences of the IAPR were held.

Proceedings of each of these conferences were published, but the USPA Library only has copies of the second conference in 1976 and the eighth conference in 1993. In addition, the IAPR published a newsletter called Psychotronic. Thanks to the research of Gail Wind, our current USPA Newsletter editor, we have the first issues of Psychotronic through vol.1, no.3-4, 1977, but none after that date.

### Section XIII- Thomas Bearden's Books Are Available Through USPA

Dana Bearden, daughter of the late Thomas E. Bearden, has opened her private stash of her father's books to USPA! We will be selling them for her on commission and her prices are WAY below eBay, Amazon, Alibris, or anywhere else we've found them.

We have two volumes ready right now, but we'll be adding more soon. Please note: Currently, the prices include shipping for the United States only, but the USPA folks are open to working with people outside the US on an individual basis who are willing to pay the extra shipping, duties and taxes based on location. Contact [gailinvermont@outlook.com](mailto:gailinvermont@outlook.com) for a shipping quote.

This is a very new project, for Dana and the USPA, so keep checking. We'll add more Bearden Titles as soon as we can. Find them at <https://www.psychotronics.org/shop/> in the Books section.

## Section XIV – Pete Radatti and Morris Hartman Present Their Radionics Class in 2026

### Energy Healing

June 12, \$100 Incl lunch.  
Energy healing with Susan Hol. Identify blocks to body, mind, spirit. Practical methods to clear harmful substances, frequencies, intention, energy work. Explore herbal, nutrition and develop skills in energy programming.

### Radionics – Beginner and Intermediate

June 13 Includes lunch. 3-Days, \$300.  
Morris Hartman. Beginner and intermediate radionics, using different ways to analyze and broadcast with a "hands on" approach. Plan on practicing the different methods in class. This class will open up new ways to make your radionics equipment more user friendly and powerful.

### Radionics – Advanced

June 14-15 Includes lunch. 3-Days, \$300.  
Pete Radatti How to cold scan rates for solving programs at hand. Deck scanning for complex issues. How to write commands. Hands on problem solving. Agriculture/soil, weather, sigils, aura/rays and more! Bring special problems for exploration.

Energy Healing \$100  
Radionics 3-days \$300  
Hot lunch included

## Pete Radatti's and Morris Hartman's Radionics Class – 6<sup>th</sup> Year Anniversary June 12, (13-15) 2026

**Morris Hartman**

Morris is a famous reflexologist and radionics operator from Peetz, Co. He teaches reflexology, radionics and energy subjects.

**Peter Radatti**

Pete is a well-known author of many books including 5 books on radionics. His books are all available on Amazon.com

**Susan Hol**

Susan is a well-known reflexologist, reiki, radionics, dowsing, applied kinesiology, herbalism and emotional release technique.

## Section XV More Awesome Radionic Events on the Horizon

### October 22-24, 2026 - Rapid City, SD026 Radionics Symposium

The 2026 Radionics Symposium is in it's 14th year of Advanced Radionics and Quantum Energetics Classes - covering Humans, Livestock, Pets, Crops and Gardens.

With multiple speakers over 3 days, the emphasis is having practical, applicable information that you can take home and USE in your radionics practice or on your family, animals, and property.

The speakers come from varying walks of life with a plethora of experience in the use of radionics and/or energetics. Prepared to be take some amazing notes, enjoy stories of success and struggle, and have more power and confidence in radionics and quantum energetics with the knowledge you will gain.

### What is USPA?

The United States Psychotronics Association (USPA) is a federally recognized, nonprofit 501(c)(3) organization founded in 1975 to serve as a focal point for scientific and technical exploration of the universe of esoteric, spiritual, and psychic arts in the United States of America.

The USPA has been hosting annual conferences for its membership since its formation and has featured countless individuals with cutting-edge viewpoints, research, or theories to share, allowing any interested persons to openly discuss their work.

### What is Psychotronics?

USPA defines psychotronics as the science of mind-body-environment relationships, an interdisciplinary science concerned with the interactions of matter, energy, and consciousness.

Psychotronics involves the study, research, and applications of the physics and technology of the mind, brain, spirit, consciousness, and the underlying forces of life and nature – hence the term “psychotronics.” A true understanding of the universe must include the spiritual as well as the technical. USPA provides an opportunity for amateur researchers to present their findings along with the professionals.

USPA stresses research, with documentation of results, and practical applications, rather than personal experience and unsupported hypotheses.

## J.G. Gallimore’s Books are Still Available on Amazon - through assistance from USPA

				
--	---	---	--	---

Jerry G. Gallimore was one of the founders of the USPA in 1975, and was a leading researcher in psychotronics and unusual energies until his untimely death in 1989.

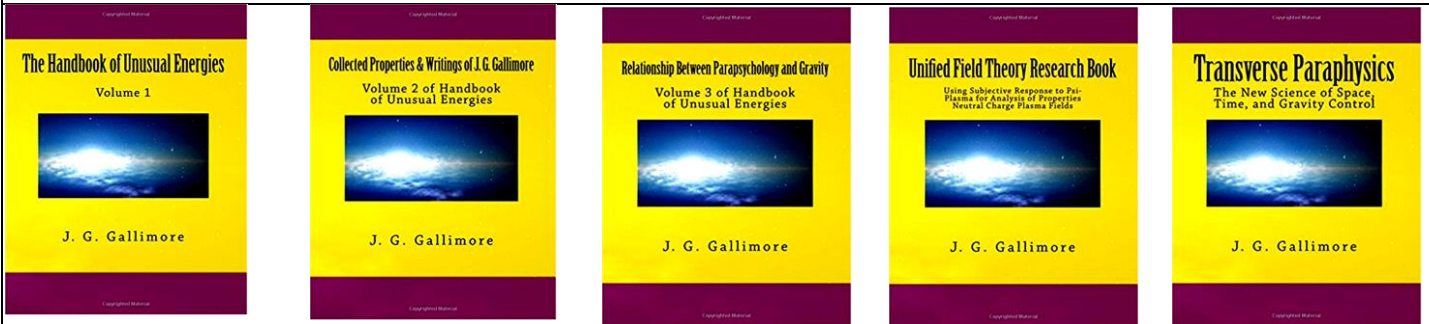

All five of J.G. Gallimore’s rare books on psychotronics subjects and unusual energies have been reprinted

by the United States Psychotronics Association (USPA) and are being made available at a fraction of the cost that used copies were being sold at online. [Available at Amazon.com](https://www.amazon.com) USPA Shares in the income from these sales.

So rare have these books been, that only a few libraries in the entire world had them in their collections, and some original Gallimore's books were being sold for several hundred dollars each online. However, with these newly reprinted volumes, each will be available for less than \$30.00.

<b>The Handbook of Unusual Energies: Volume</b>	ISBN-13: 978-1543024999	The 1st book of 3 on unusual energies	468 Pages
<p>Gallimore discusses in depth the research, discoveries, and inventions of all the major researchers in subtle energies, the aether, biological 62 fields, pyramid energy, radiesthesia, radionics, crystal transduction, and related subjects.</p> <p>These include the works of Baron von Reichenbach's and his odic energy, Dr. Wilhelm Reich's orgone energy, Dr. Harold Burr's biological life fields, Kozyrev's time mirror, Edgar Cayce's transmission of energy, and related research done by many others.</p> <p>Of particular importance is Gallimore's 127-page chapter on radionics. In this chapter he discusses in depth the research and devices of Ruth Drown, T. Galen Hieronymus, Rho Sigma, Dr. L. P. Corte, and other prominent people in the radionics field.</p>			
<b>Collected Properties &amp; Writings of J. G. Gallimore: Volume 2</b>	ISBN-13: 978-1543025040	The 2nd book of 3 on unusual energies	258 Pages
<p>This is the second book in the "Unusual Energies" series that J.G. Gallimore published. It covers Gallimore's research on Albert Abrams, the founder of modern radionics, psychological physics, psychic energy, thought resonance, subtle energies, crystals, and related subjects.</p> <p>In addition, a number of radionics devices are discussed, such as the De La Warr Diagnostic Instrument. And very helpfully, the rates are provided for substances, body organs, and medical diseases and disorders. I very interesting interview of Christopher Bird, conducted by J.G. Gallimore is provided, as well as a discussion of Walter Russell and his research</p>			
<b>Relationship Between Parapsychology and Gravity: Vol. 3</b>	ISBN-13: 978-1543024944	The 3rd book of 3 on unusual energies	228 Pages
<p>This book describes in depth the research and theories of J.G. Gallimore into the question of "parapsychology transmission" -the question of how such things as telepathy, remote viewing, ESP, and similar phenomena can physically occur. He discusses the various emanations, radiations, and energy fields of all matter and life including the ancient Chinese energy called "chi" (qi), the ancient Indian's prana energy, Reichenbach's "odic force," Gurwitsch's "mitogenic radiation," Wilhelm Reich's orgone energy, and other subtle energies. He shows how these energies are similar, how they interact, and how they are related to gravity. He also discusses crystals as transducers of these energies, and provides diagrams of devices that could potentially be used to harness or control these energies.</p>			
<b>Transverse Paraphysics: The New Science of Space, Time, and Gravity Control</b>	ISBN-13: 978-1543024920	Gallimore's fourth book	374 Pages
<p>This book covers the visionary research and theories developed by J.G. Gallimore about anti-gravity, space, time, and biophysics. He discusses in depth the dimensions of space, time, and gravity, and new discoveries in each of these areas. In addition, he covers research being done on anti-gravity and then discusses anti-gravity patents that have been obtained.</p> <p>He also discusses the intriguing concept of aura energy fields surrounding humans and other living things, and how extra-sensory perception (ESP) might be explained through biophysical principles.</p>			
<b>Unified Field Theory Research Book: Using Subjective Response to Psi-Plasma</b>	ISBN-13: 978-1543024838	Gallimore's Fifth book	134 Pages
<p>This book is about psychotronics, radionics, electromagnetic fields and waves, psi-plasma, plasma fields, subtle energies, bio-electromagnetic energy, and other unusual energies emitted by living and non-living</p>			

things. It also is about how living things interact with and are affected by these energies, which may enhance or harm health.

# Radionics Potency

Philip Nell and Riaan Retief

## Introduction

This document is an attempt to explain the potency settings function on radionics instruments (for the instruments which have that functionality). This is the author's views and there are many other theories about this very interesting subject.

## Homeopathic potency

Homeopaths prepare different remedies by diluting the original mother tincture which usually comes from animal, vegetable or mineral sources. In sharp contrast to Allopathic medication, homeopathic remedies become more potent the less of the original mother tincture molecules remain which suggests that in the end, only the subtle energetic structures of the mother tincture remains in the remedy.

Homeopaths devised different scales to classify the potencies as follows;

The most used scales seem to be;

“X” or “D” or Decimal scale potencies ranging from 1X to 1000X

“C” or “CH” or Centesimal scale potencies ranging from 1C to 10MM

“M” or Millesimal scale potencies ranging from 1M to 50M

“LM” or “Q” potencies ranging from 1LM to 30 LM

“F” potencies ranging from 3C to 233C (Note that these are only selected “C” potencies)

Samuel Hahnemann (1755 - 1843) the father of modern Homeopathy seems to have devised the “X” and “C” scales where “X” denotes a 10:1 dilution and “C” a 100:1 dilution factor. “M” potencies are diluted by 1000 and “LM” or “Q” potencies have dilution factors of 50000: 1 and seem to be used to access the higher chakras and subtle bodies.

For the LM potencies, M denotes 1000:1, CM denotes 100 000:1 and MM 100000:1 dilution factors.

Anything above 200C can affect the mind of a person and beyond 24X and 12C nothing of the original mother tincture molecules remain and it then becomes pure subtle energy only.

While doing his research on using a special tree bark to treat persons with malaria, Hahnemann found that diluting the remedy made the treatments more effective, which is counter intuitive compared to our usual understanding for allopathic medication.

The potency is governed by the Law of Similars, which states that the greater the resemblance between the symptoms of the imbalance and the remedy's energy structure, the higher the required potency is.

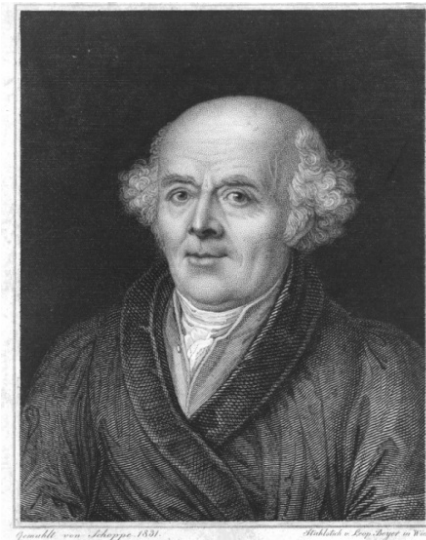

Figure 1 Dr Samuel Hahnemann

Apparently the higher potencies (increased dilution factors) speeds up the energetic structure information transfer to the various subtle bodies, which vary from the physical, etheric, emotional, mental, casual and spiritual bodies as depicted in figure 2.

The higher the potency, the more “repeats” of the information transfer is done. Interesting to note that 6X and 6C has the same number of informational repeats even though the dilution factor is 60:1 compared to 600:1. *The amount of dilution thus does not play a role but rather the number of times it is diluted....6 times for both.*

*It is thus important to determine in which subtle body (aura) the energy blockage or imbalance is to be able to set the correct potency for the remedy to access it!*

*The higher potencies such as 1M and higher should be used with caution due to their ability to access the higher subtle bodies and thus effects!*

“Since allopathic drugs are never selected according to the Law of Similars, they inevitably superimpose upon the organism a new drug-disease which then must be counteracted by the organism”. - Samuel Hahnemann, MD

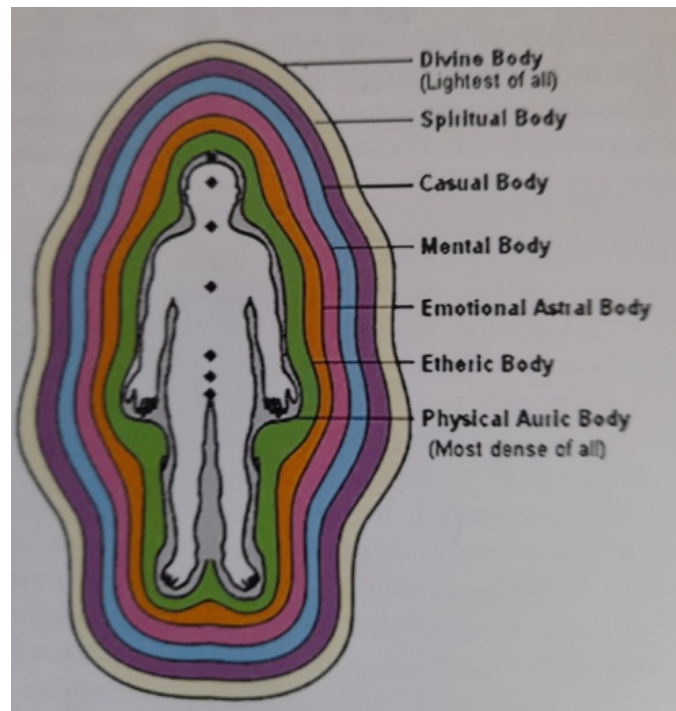

Figure 2 Human Aura of subtle bodies

The theory is that a much higher potency is required to access the spiritual body than for example the etheric body.

## Potency and Radiesthesia

To determine the required potency of a homeopathic remedy, homeopaths mostly use radiesthesia or dowsing and some form of potency dowsing chart.

One of the original potency charts is called the 100 cm rule; in essence a 100 cm long, 8 cm wide material ruler, mounted on rubber to minimize stray energy interference.

Known hand-diluted homeopathic remedies of different potencies were used and placed at the left hand or 0 cm position and the north pole of a magnet at the 100 cm position as a stabiliser. Dowsing was then used to find the measurement on the ruler that resonated with the potency of the remedy. In this way a typical potency chart was established as depicted in table 1.

To determine the required potency of a remedy for a subject, the mother tincture of the remedy (original non –diluted homeopathic remedy) is placed on a witness of the subject (DNA sample, photo, written signature etc.) at the 0 cm position and dowsing used with intent to find the optimum potency along the ruler for the remedy using the predetermined scale.

X OR D Potencies				C Potencies			
1X	4.0 cm	8X	13.4	6C	14.0	50M	77.8
2X	5.2	12X	17.7	30C	31.6	CM	80.6
3X	6.7	20X	20.9	200C	46.8	1MM	90.2
4X	8.2	200X	42.0	1M	57.3	10M M	100.0
6X	10.9	1000 X	52.7	10M	69.9		

LM Potencies	
1LM	7.6
10LM	43.2
20LM	85.2
30LM	97.3

Table 1 Typical Potency chart derived from 100 cm rule.

### Potency and Radionics

From the available literature, it seems that Malcolm Rea (1912 - 1979) one of the pioneers of radionics, first implemented potency settings into radionic instruments. He implemented this function into his earliest remedy making "Potency simulators" as depicted in figure 3.

Figure 3 Malcolm Rea early potency simulator with rate card readers

As for radionics rates, radionics potency is also all about ratios, and if implemented using a variable resistor or potentiometer, the potency is set as a ratio between the

required value and the total resistance of the potentiometer. In practice this results in a potency scale on the dial of the potentiometer as depicted in figure 4.

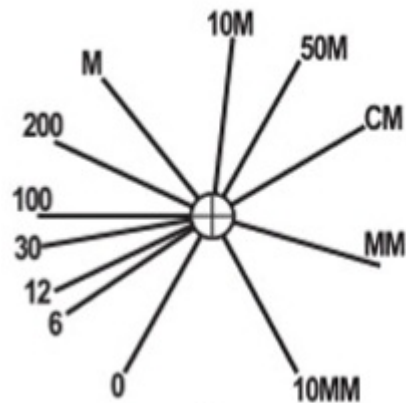

Figure 4 Typical single potentiometer potency dial.

Unlike the rate setting potentiometers, the potency potentiometer is typically electrically connected between the input and output wells of a radionics instrument or in the case of the Rae potency simulators, between the card readers and the output well or plate. For the potentiometer, the 100 cm rule was converted to rotational angles between typically 0 and 270 degrees whilst maintaining the ratios.

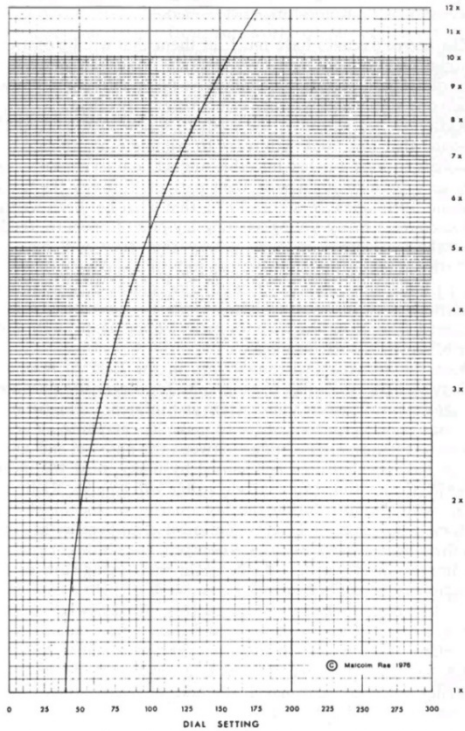

For improved resolution, Malcolm Rea and his independent dowsers took potency setting to the next level by producing potency graphs which he published in his "Dimensions of Radionics" book and is depicted in figure 6. From the chart, very accurate potencies ratios can be determined. This allowed the potentiometers to be fitted with accurate multiturn potentiometers and tables to select any possible potency.

## Pounding and Radionics

According to Hahnemann, the potentized remedies should be pounded against a hand for 100 times to distribute the energetic structure information or signature thought the molecules of the remedy. This is based on the same remedy that was used for two towns by Hahnemann where the same medical condition was present. After transporting the remedy via a cobbled road to the other town, the results were much better there, suggesting the pounding created a more effective remedy. Current some Homeopaths believe only 20 poundings are required.

## Digital Potency and Radionics

In place of hand-adjusted potentiometers for potency setting, digital potency setting is also possible using digital potentiometer set by digital signals. This works well as long as the 100 cm rule ratios remains the same and has the advantage that the look-up tables can be included in the software program for easy setting by the operator.

## Auto Potency and Radionics

The potency of 200C (46.8 ratio) is well known as an auto potency setting for inexperienced radionics operators. A very new and exciting development is the use of radionics software commands (UTRAN) developed by Pete Radatti ([www.radatti.com](http://www.radatti.com)). This opens up the radionics world to create “radionics programs” for next level features.

One such development has been done by Riaan Retief of Stellar Radionics in South Africa, who created an “Intelligent Self-Regulating Potency” rate card. This card uses the instrument operator’s intent and auto adjusts the potency of remedies for optimal targeting of the correct witness energy bodies where the blockages or imbalances are.

Figure 7 Potency rate cards

## **UTRAN Program**

The 'Intelligent Self-Regulating Potency' is a cold-scanned rate, converted into a Malcolm Rae card, which originates from a UTRAN program. It functions as follows:

The program first assesses the general vitality of the witness/target. General vitality serves as a key indicator of whether a treatment is beneficial (increasing vitality = helpful/healing) or harmful (decreasing vitality = aggravating).

The program includes 35 common potencies. For each potency, the following conditional logic is applied:

Use this potency for the broadcast IF it increases the general vitality of the target/witness.

This logic enables the system to adaptively switch potencies during the broadcast. If the current potency ceases to increase general vitality, it is discontinued and replaced with another potency that does increase vitality. The process repeats continuously for the entire duration of the broadcast.

This self-regulating mechanism ensures the optimal potency is used at every moment, tailored to the individual case, while significantly reducing the risk of aggravation from the treatment.

This is clearly the leading edge of radionics development and opens up vast possibilities for the future.

Be blessed, Philip and Riaan.
