# Table of Contents

## News, Events, and Columns:

Update on the 2017 Conference of the United States Psychotronics Association (USPA), July 14-16, 2017, p. 1

ACRES USA Conference, November 30- December 2, 2016, Omaha, NE, p. 2

New Book on Psychotronics in Preparation – Call for Papers, p. 3

Among the Missing (and Updates): A Column about Missing People, Organizations, Periodicals, Books, Artifacts, and Collections in the Psychotronics Field, by John H. Reed, M.D, p. 7

## Articles:

The Past, Present, & Future of Consciousness Studies, by John Kilmo, Ph.D., p.12

The Physics of Alice's Looking Glass, by Robert E. Beutlich, p. 14

## Books of Interest:

Bioelectromagnetic and Subtle Energy Medicine, Second Edition  
By Paul J. Rosch, M.D., editor, p. 21

Open System Thermodynamics, by Peter Lindemann, D.Sc., p. 23

## Regular Features:

USPA Periodicals Update: p. 29

USPA Local Groups and Affiliates Update: p. 32

Exchange Corner and Classified Advertisements ([See the New Items](#)) p. 33

United States Psychotronic Association (USPA) Officers & Board Members, p. 34

What Is Psychotronics? p. 35

Ten USPA Membership Benefits and Membership Information: p. 36

USPA Membership Application and Link to Online Application: p. 37

## Update on the 2017 Conference of the United States Psychotronics Association (USPA)

The United States Psychotronics Association (USPA) will be hosting its annual conference, **July 14<sup>th</sup>-16<sup>th</sup>, 2017**, at the beautiful **Hyatt Regency** in Deerfield, Illinois, a suburb of Chicago, and **not at the Wyndham Glenview Suites** in Glenview, IL, as originally announced.

The Conference theme will be:  
***“Psychotronics: Emerging Technologies in Consciousness, Subtle Energy, and Radionics.”***

We will have numerous speakers addressing new and developing methods on these and related subjects, such as energy medicine, scalar waves, quantum fields, orgone energy, and related topics, as we advance the pioneering efforts of Albert Abrams, Robert C. Beck, Ruth Drown, T. Galen Hieronymus, Georges Lakhovsky, Wilhelm Reich, Royal R. Rife, Nikola Tesla, Marcel Vogel, and others. Further updates will be sent out in the coming months as conference speakers are selected for this special event involving leading edge sciences. Send your inquiries to:

[uspsychotronics@yahoo.com](mailto:uspsychotronics@yahoo.com)

**Call for Papers:** For an opportunity to speak at the 2017 USPA conference on any of the above subjects, please send your title, an abstract, and a short biography of yourself to the email address: [uspsychotronics@yahoo.com](mailto:uspsychotronics@yahoo.com). Please title your email with “2017 abstract - (your last name)” Abstracts are due by February 15, 2017. Accepted speakers will need to provide their own transportation and lodging, but the Conference fees will be waived.

### **Call for Vendors/Exhibitors**

The USPA welcomes vendors and exhibitors representing groups, firms, and organizations focused on the interactions of matter, energy, and consciousness. Fees are \$30 per table, plus 10% of gross sales. **For more information please contact Bob Peters, VP of Exhibitor Relations, at:** [cathyschleyer@msn.com](mailto:cathyschleyer@msn.com).

**The USPA website:** [www.psychotronics.org](http://www.psychotronics.org)

**Join USPA on Facebook:** <https://www.facebook.com/uspsychotronics/?fref=ts>

---

Acres USA will be holding its annual conference and trade show in Omaha, Nebraska this year from Nov. 30 through December 2, 2016. Their conferences frequently cover agricultural radionics, homeopathy, biodynamics, biomagnetism, subtle energies, and other subjects of interest to USPA members. Complete details on speakers, registration, lodging, etc., are available through the links below.

## New Book on Psychotronics in Preparation – Call for Papers

A new handbook is being prepared that focuses on psychotronics, biophysics, and topics of unconventional research worldwide. The book is titled **Handbook of Biophysics and Psychotronics**, is being edited by Dr. Serge Kernbach, and will be published by Pan Stanford Publishing. The book is intended not only to represent different social, cultural, scientific and philosophical aspects, but also to contribute to changing a social perception of unconventional phenomena. A description of the book, tentative table of contents, and author requirements are provided below. Anyone interested in contributing to this book should write to and send their manuscripts to: [handbook@cybertronica.de.com](mailto:handbook@cybertronica.de.com)

### Handbook of Biophysics and Psychotronics

This book is devoted to a new, currently emerging, interdisciplinary science on the boundary between micro- and macro-biology, robotics, quantum physics, biophysics and psychology. This area of research is related to various weak emissions and biophysical effects, and their impact on materials, biological, chemical and technological systems. The encountered phenomena include unconventional information effects, non-local signal transmissions, the influence of unconventional factors on the viability (productivity and environmental sustainability) of microorganisms and plants as well as on properties of materials, new energetics, medical and pharmaceutical studies. In particular, some phenomena are expected to have the nature of quantum effects in macroscopic systems, which can be measured by precise physical and biochemical methods. Special attention is attracted to consciousness, its possible quantum nature, and various psycho-biological effects. Modern science explores such phenomena on the field of biohybrid systems that vary from advanced bio-/phyto-sensors up to establishing an interface between natural and artificial ecologies.

Studies of unconventional effects and phenomena were carried out in various governmental projects of national socialist Germany, USSR, United States, and China throughout most of the twentieth century. Upon further exploration, a broader picture emerges. These phenomena have a long history, the written sources about their existence account for almost six thousand years, from IV-III BC in Mesopotamia and ancient Egypt up to the present time. This book surveys some of these historical retrospectives and represents modern technological developments, accurate measurement techniques, experimental results, replication experiments, case studies and practical examples in different areas of biophysical and psychotronic research. It includes contributions from over 30 academic, industrial and private laboratories from Europe, China, India, Brazil, Russia, USA and other countries. The handbook is addressed to suit a wide range of readers and professionals who are interested in the synthesis of technology and consciousness, weak emissions and biophysical effects, biohybrid systems and possible macroscopic appearance of quantum phenomena.

This handbook represents the first book of this kind and is primarily oriented on the technology as well as on popularization of this new technological science. It serves as a textbook, a handbook for specialists, thesaurus and as a popular material for public audience. The demonstrated showcases indicate current and potential applications of the developed devices, methodologies and techniques. It is intended to stimulate a socialization of these technologies and to generate a new social understanding of phenomena related to consciousness, biophysics and weak emissions.

Authors are invited to submit the chapter-in-book contributions. Address for submissions and communication:

[handbook@cybertronica.de.com](mailto:handbook@cybertronica.de.com)

## **Tentative table of content (not limited to these topics)**

### **Part I. Historical, philosophical and ethical background**

- Historical overview of unconventional phenomena
- Pangermanismus early XX century and its impact on unconventional research
- Psychotronics in Czechoslovakia in 60x and 70x
- Overview of unconventional developments in USSR and Russia
- The Star Gate program in USA
- Overview of psychical biology engineering and somatic science in China
- Ethical issues in unconventional research and development

### **Part II. Methodology, phenomenology, hypotheses**

- Methodology of measuring weak emissions
- On phenomenology of unconventional phenomena
- Spin-torsion hypothesis, synchronicity effects
- Possible appearance of quantum phenomena in macroscopic systems
- Morphogenetic fields
- Scalar waves
- Water as a basis of unconventional phenomena
- “Strange emission” and low-energy nuclear reactions
- The Aharonov-Bohm-Effect and magnetic vector potential
- Weak emissions and biophysics

### **Part III. Technology, sensors, effects and case studies**

- NIR and UV spectroscopy in detection of biological effects
- Electrochemical impedance spectroscopy and conductivity measurements
- Potentiometry and the dpH approach
- Plants and biological organisms as sensors of weak emissions
- Microbiological sensors
- The GRV approach
- Overview of long-range non-local signal transmission experiments
- Unconventional information effects
- Rotating masses as a source of non-electromagnetic emission
- Torsion-like sensors and detection of long-distance astronomic events
- Unconventional effects in metallurgy
- Instrumental transcommunication schemes and devices

### **Part IV. Consciousness and operator phenomena**

- Human operator effects
- The phantom effect
- Hybrid operator-device approaches and technologies
- Biofields, different psi phenomena
- Feedback in operator-device experiments
- Training and improvement of operator capabilities by instrumental assistance
- Alternative healing methods by using instrumental approaches
- Field effects and consciousness

### Current editorial board (will be extended):

Dr. V.Zhigalov (Russia)  
Prof. Dr. S.Maslobrod (Moldova)  
Prof. Dr. M.Krinker (USA)  
Prof. Dr. F.H.Balck (Germany)  
Prof. Dr. K.Korotkov (Russia)  
Dr. A.Smirnov (Russia)  
Prof. Dr. Guru Deo (India)  
Dr. G.Rein (USA)  
Prof. Dr. I.Jerman (Slovenia)  
Prof. Dr. V. Judu Ilavarasu (India)  
Priv. Doz. Dr. H.Treugut (Germany)  
Dr. J.DeMeo (USA)

### Requirements to the submitted chapters:

1. This book is intended as a textbook, a handbook for specialists and as a popular material for public audience, thus:
  - a. make sure that state of the art in your area of research is properly represented, introduce enough literature references, demonstrate that this field is well represented by different researchers;
  - b. describe the material deeply enough, however avoid specific formalisms and not understandable/not reasonable ideas, schemes, approaches;
  - c. use neutral terminology, avoid such expressions that are already under “pathologic critique”;
  - d. provide colour images, graphs, photos – **make sure you have copyrights for illustrative material** ! When you use image taken not by you – please provide a written permission allowing you to use this image. This is an obligatory requirement – images without permission will be removed by the editor;
  - e. provide demonstration and show cases for the technology and developed devices;
  - f. avoid any kind of direct advertisement;
  - g. this book is oriented on technology, thus, any topic from the tentative table of content is possible, however its representation should be also “technology-oriented”;
  - h. make indexing for used terminology (will be used for thesaurus)
2. use latex with the provided template for submitting the chapter  
<http://www.panstanford.com/pages/Manuscript-Guidelines.html>  
(review volumes, 9" x 6", latex). Please contact the editor team in case of problems with the template. The contribution should not extend 15-20 pages of the template format incl. literature.
3. All contributions will be peer-reviewed with several comment-improvement iterations. For simplifying this process, authors can provide first an extended abstract and, after a positive feedback, the full chapter.
4. The language is English. Make sure that the chapter is spell checked with some grammar analyser or similar tools. It is advised to make a proof reading by native speaker.

5. An agreement will be signed with authors. There are no financial requirements from authors, in turn, the publisher will not refund any costs for authors. The first author of a chapter will receive the free copy of the book.

**Deadlines:**

1. Publication of a call for chapters and invitations for submissions: **1 of November, 2016**
2. Deadline for extended abstracts (1-2 pages) and communication with the editor/editorial board: **31 of December, 2016**
3. Deadline for submissions of full chapters: **1 of April, 2017**
4. Deadline for iterative improvements of chapters: **1 of August 2017**
5. Closure of the preparation: **1 of November 2017**

**Pan Stanford Publishing** is an independent international publisher dedicated to publishing the best in micro- and nano- scale science, technology and medicine. The company was founded by a group of publishing professionals and academics with a strong focus in interdisciplinary and applied areas such as Nanotechnology, Biomedical Engineering, Biotechnology, Energy, Green Technology, Sustainable Engineering, Materials Science, Semiconductors, Electronic Engineering and other related areas. The company publishes a wide variety of books ranging from cutting-edge monographs, review volumes, handbooks, to undergraduate textbooks and books designed for the general audience. More than 500 titles are in the pipeline and some of the notable ones are: Nanomedicine: The Intersection of Nanotechnology and Healthcare, Energy and Nanomaterials, Physics and Chemistry of Graphene, Nanostructures in Photovoltaics, Handbook of Materials for Nanomedicine, Handbook of Nanoindentation, Science at the Nanoscale, Handbook of Collective Robotics and other titles, see more at [www.panstanford.com](http://www.panstanford.com)

**Editor:** Serge Kernbach, Dr.rer.nat., is a director of the Research Center of Advanced Robotics and Environmental Science “Cybertronica Research”. He graduated in electronic engineering and computer science in 1994. In 1996 he was awarded Presidential Fellowship as a young researcher, in 1997 – the DAAD fellowship, he was a guest scientist in the center of Synergetics led by Prof. H. Haken, who also co-supervised his PhD work. In 2007 his doctoral thesis won the faculty-award as the best dissertation of the year at the University of Stuttgart, where he worked as a head of group until 2013. Since 2004 he has been a coordinator of several European research projects on the field of bio-hybrid systems and collective robotics. He acquired more than 6.0 M Euro in different research projects. In 2016 he was elected as a Foreign Member of the Russian Academy of Natural Sciences. Serge’s main research interest is focused on biological and technological collective systems, weak bio-physical interactions; he is an author and co-author of 4 books and over 150 articles in international journals and conferences with best paper awards. Recently the book “Supernatural. Scientific approach” has been appeared to Russian readers, which is related to unconventional research, weak interactions, and integration of technologies and consciousness.

## **Among the Missing, (and Updates): A Column about Missing People, Organizations, Periodicals, Books, Artifacts, and Collections in the Psychotronics Field**

**by John H. Reed, M.D**

This is a new “column” or section of the USPA Newsletter, and will be an ongoing part of every issue, with the purpose of helping the USPA, as well as, our members and research associates locate people, organizations, periodicals, books, artifacts, collections, and other items that have seemingly disappeared, or have been extremely difficult to find. **Updates will be added, and each missing item will be retained in future issues until it is found or otherwise resolved, since some readers may not have seen prior issues of the USPA Newsletter or the original notice of the missing item.**

In addition, this will also serve as a “People Locator Service” to help find authors and researchers on psychotronics, radionics, subtle energies, energy medicine, and related subjects, who have “disappeared” or have died long ago, and whose relatives you may be trying to find in order to preserve the research papers and collection of that person.

In our research and reading, we all have encountered people, organizations, periodicals, books, articles, or other things that we have tried to find, and some people have searched for years to find something, but have not yet found it, despite the vast resources of the Internet. However, with our large USPA membership, we can all help one another find what we have been searching for. Some of you may have experience in genealogical research, or private investigation, law enforcement, or even intelligence work which you could utilize to help each other, or perhaps just make suggestions on how or where to search for something.

So if there is anything you have been searching for and need help to find, please write to me, John H. Reed, M.D. at: [joreed43@gmail.com](mailto:joreed43@gmail.com), and I will include your search help request in the next and subsequent issues of the USPA Newsletter. And if you have any information about an item that is listed in “**Among the Missing**”, please write to the same email address and share what you know or your suggestions. If there is something that is confidential, your confidentiality request will be honored and protected.

### **Missing People, and Updates:**

We are trying to track down some of the original directors and officers of the United States Psychotronics Association (USPA), when it was organized in 1975, with the word “Radionics” in the organization title. Does anyone have any information on the current whereabouts of the following people, or family members, if the person is known to have passed away, or where they passed away?? Please check Ancestry.com, social media websites, newspaper archives, and any other databases you have to help find these people.

**1. Dr. Marcel Vogel and his Research Papers:** Does anyone know what became of the papers and files of Dr. Marcel Vogel, who died in 1991? Dr. Vogel did extensive research on crystals and crystal healing, pyramid power, the "Backster Effect" involving plants and their bioenergetic fields, and a number of other psychotronics related subjects. He also spoke numerous times at USPA conferences. Marcel Vogel worked at IBM for 27 years and had 32 patents. If you have any knowledge about Marcel Vogel and what became of his papers and files after he died, please write to your editor at: [joreed43@gmail.com](mailto:joreed43@gmail.com). The USPA would like to make sure that all of his papers are preserved.

**2. Colonel I. B. Clark**, a Director of the USPA in the first two years of its existence in 1975-1976, and then second Vice President in 1977. **November Update:** Col. Clark's family has been found, but unfortunately after nearly 40 years, they no longer have any of his papers. He passed away in 1977 at the age of 70.

**3. Dr. Otha Wingo**, Original USPA Board Director, 1975-1977; Update: A researcher provided information that Ortha Wingo's full name is Elvis Ortha Wingo.

**4. Paul Sauvin**, USPA 2<sup>nd</sup> Vice Pres., 1976 and 1<sup>st</sup> Vice Pres., 1977

**5.. Henry Nagorka**, USPA 1<sup>st</sup> Vice Pres., 1975 and 1976, and then President, of the USPA in 1977.

## Missing Pages of a Book

The book, **Relationship Between Parapsychology and Gravity, Vol. 3 of Handbook of Unusual Energies**, by **J.G. Gallimore**, was published by Borderland Sciences in the 1970's, although the date of publication and copyright date were not noted in this book. The USPA has this book in its library, and plans to republish it for the Gallimore family, but unfortunately, pages 208 and 209 are missing from the printed book. It appears that this is a publisher printing error, because page 210 is printed on the back side of page 207. However, it is possible that pages 208 and 209 were missing from the manuscript when it was sent to Borderlands for publication. Or these pages of the manuscript may have been inadvertently lost by the publisher, or possibly they were intentionally removed by someone from the manuscript prior to publication.

**Do any of you have a copy of this book, and if so, would you please check to see if it has pages 208 and 209?** I have searched the WorldCat, which shows the books and monograph holdings of virtually every public and university library in the United States and Canada, and many of the large libraries in the UK and elsewhere in the

world. But not a single library has this book in its collection. If by chance you have a copy, please let me know what you find by emailing the editor at: joreed43@gmail.com

## Missing Organizations:

1. **International Association for Psychotronic Research (IAPR):** Does anyone know what became of the International Association for Psychotronic Research? And do any of you have copies of its meeting proceedings or newsletter, if such a newsletter were published? It was founded in 1973, even before the United States Psychotronic Association (USPA), which was founded in 1975. However, the current location or activities of the IAPR are unknown.

The IAPR held numerous international conferences around the world, beginning with its first in 1974 in Prague, then Czechoslovakia. At this conference, Dr. Zdenek Rejdak was elected president for the Eastern Division of the IAPR, and Dr. Stanley Krippner was elected president for the West. The 8th International Conference on Psychotronic Research was held in Milwaukee, Wisconsin, 1993, as a joint conference with the United States Psychotronics Association (USPA), but it is unknown if any subsequent conferences of the IAPR were held.

Proceedings of each of these conferences were published. If copies of these proceedings can be obtained, or any newsletters that it may have published, we will add them to the USPA Library and make them available to USPA members. If you have any knowledge about this organization, please write to the editor at: joreed43@gmail.com

2. **International Radionics Association (IRA):** Does anyone know anything about the **International Radionics Association (IRA)**, which was located in Springfield, Missouri in the late 1940s. This is known, because a book called **The Truth about Radionics** was published in 1947 by this organization, and although the author's name is anonymous, it is highly probable that the author was T. Galen Hieronymus, who passed away many years ago.

I checked several newspaper databases, and references to this organization were found in the press as far back as the early 1930s, and as late as the early 1960s, but nothing more recent than that. If you have any knowledge about this organization, please write to the editor at: joreed43@gmail.com

## Missing Periodicals:

1. **British Journal of Radiesthesia and Radionics:** Does anyone have any issues of The British Journal of Radiesthesia and Radionics. It was published in London,

England, by the British Radiesthesia Association, 1953-1963. The original title was **British Journal of Radiesthesia**, published from 1953-1957. No libraries in the United States, public or university, have this journal in their collection., and only five libraries elsewhere in the world are known to have any issues at all: The British Museum Library (AKA The British Library), Oxford, Cambridge, the National Library of Scotland, and Trinity College Library, in Dublin Ireland. If you have any issues of this periodical, will you please let me know? And for our members and associates in The UK and Ireland, if you can access these periodicals at any of the above libraries, you would do a huge service for all of us if you would Xerox what issues are available and send them to me. A generous donor has offered to pay whatever expenses are involved for doing this service. We will add them to the USPA Library and make them available to researchers. Please contact the editor at: joreed43@gmail.com

2. **Journal of Scientific Controversy**. This periodical was referred to on [page 49 of the Vol. 1, No. 1 \(Spring, 1967\) issue of the INFO: The Journal of the International Fortean Organization](#). Someone was trying to find out about it even then, 49 years ago, and said that this journal was “formerly published in Boulder , Colorado” implying that it may have ceased publication prior to 1967, or that it moved somewhere else after being published for a period of time in Boulder. I have searched the WorldCat, which shows the periodical holdings of virtually every public and university library in the United States and Canada, and many of the large libraries in the UK and elsewhere overseas. But this title, or anything close to it does not exist in the WorldCat database, so that indicates that this periodical title is not held in any library, even special collections, which are also included in WorldCat. However, this does not mean that the periodical does not exist, since many periodicals in the psychotronics , scientific anomalies and similar fields are excluded from libraries. If any of you have ever heard of this periodical or know anything about it, such as its editor, publisher, or other information, please write to the editor at: joreed43@gmail.com

## Missing Books:

Rhea White and Larissa Vilenskaya wrote a book titled **Parapsychology in the Soviet Union, Eastern Europe, and China: A Compendium of Information**. It was supposedly published by Scarecrow Press of Metuchen, NJ, a well know publisher of reference books. This book was listed as reference work #680 on [page 213 of Rhea White's book, Parapsychology: New Sources of Information, 1973-1989](#) , also published by Scarecrow Press. I called the publisher, and they said they have never published this book, and know nothing about it. As you can see from entry #680, Rhea White noted that this book was “in press”, so it may have been in a preparation stage, but the manuscript may never have been sent to Scarecrow Press.

Aganin, I have searched the WorldCat, which shows books and monograph holdings of virtually every public and university library in the United States and Canada, and many of the large libraries in the UK and elsewhere in the world. But this book title does not exist in the WorldCat database, which indicates that this book is not held in any library, even special collections, which are also included in WorldCat. Unfortunately, I was unable to ask either of the authors about this, since both have passed away.

Rhea White was a well known parapsychology researcher, so some of you may have known her or heard her speak of the missing book manuscript that she was working on. Larissa Vilenskaya was from Russia, but lived and worked in the San Francisco area, and she was a prolific researcher on Russian and Eastern European psychotronics research. Please write to your editor at: [joreed43@gmail.com](mailto:joreed43@gmail.com) if you have any information about this at all.

# **The Past, Present, and Future of Consciousness Studies**

July 2010 United States Psychotronics Association Conference, Louisville, KY

Jon Klimo, Ph.D.

Professor, Clinical Program

The American School of Professional Psychology  
Argosy University, San Francisco Bay Area Campus

## **Introduction**

The purpose of this presentation is to focus on the past, present, and future of consciousness studies, and to particularly do so guided by the United States Psychotronics Association's definition of psychotronics as "The science of mind-body-environment relationships, an interdisciplinary science concerned with the interactions of matter, energy, and consciousness."<sup>1</sup> We will primarily focus on the nature of consciousness as well as on how it relates to matter and energy (and spirit). As part of this effort, we will consider, from ancient times to the present and speculating into the future, how science and philosophy have conceptualized and utilized consciousness in light of three paradigms or worldviews: 1.) material monism and physical reductionism; that reality is understood as ultimately entirely *physical* reality; 2.) different kinds of dualism, involving interactions of mind and matter as two fundamentally different kinds of nature and reality; and then the still unanswerable question remains: if they possess such entirely different kinds of nature, how do they interact as they seem to do; and 3.) mental/spiritual perspectives, including philosophical idealism, that views physical, external, reality as being subordinate to some kind of inner/mental, higher, non-or trans-physical reality.

First, we must ask, what is consciousness? Admittedly, it represents one of the most complex and elusive concepts we humans have ever attempted to understand. It's like asking how we think about our own thinking, or how we are-- or how we can become-- aware of our own awareness. Are we so close to our own consciousness, is it so at-one with our own experiencing selves, that we cannot adequately and objectively focus our thinking on it to understand it? Science has had a long history of having avoided, or at least of having considerable difficulty with, the study of consciousness because this overly subjective thing under our scrutiny does not lend itself well to traditional scientific kinds of understanding. That is, how does one scientifically study consciousness? Given this challenge, it has long also been the role of the discipline of philosophy to try to come to non-scientific terms with the nature of human consciousness. In addition, because of the subjective, inner, and nonphysical aspects of consciousness, our various religio-spiritual enterprises throughout history have shared in the multidisciplinary effort to provide explanations and contexts for understanding the states, phenomena, processes, and experiences of consciousness, particularly as they relate to the domains that seem to transcend physical reality, that move us to come to terms with an inner, as well as just an outer, reality.

Webster's New Third International Dictionary characterizes consciousness as "...awareness or perception of an inward psychological or spiritual fact; intuitively perceived knowledge of something in one's inner self... a state characterized by sensation, emotion, volition, or thought:

mind in the broadest possible sense...[and] as distinguished from the physical.”<sup>2</sup> For at least a century, there has also been a phenomenological perspective that consciousness possesses *intentionality* in the sense that to be conscious one needs to be conscious of something. So, while one can be conscious of the kind of morning it is outside one's window, or be conscious of the way one's body feels lying in bed, it is also intrinsic to the nature of consciousness that one is also able to be conscious of one's various ‘inner’ states not associated with one's bodily aspect, or with the bodily aspect of Nature as the larger objectively real world lying seemingly outside of, and experienced by, one's own consciousness. That is, of all the things with respect to which we can be conscious, that we can entertain in and with our consciousness, the most challenging of all is consciousness itself. This involves the process of consciousness studying itself in the living mirror of its own existence. As we will see in the following presentation, this most perplexing of all endeavors, of using our consciousness in order to understand itself, and to understand ourselves as possessing, or *being*, consciousness as our most deep, central, and defining attribute and quality, could be considered a mental way of studying the realm of the mental as “distinguished from the physical,” as Webster's puts it.

Now we come to the chief focus of this presentation, which is to look back through history, look at the present, and attempt to look into the future, with regard to how our human consciousness, with its mode of intentionality, operates to bring various subjects and objects into its ken to focus upon them in order to understand and work with them. Within this context, the emphasis in this presentation will be upon: 1.) how as a species we have tried to understand our own consciousness, our own mental lives; 2.) how we have tried to understand with our consciousness a range of existence, presence, being, phenomena, that do not seem to fall within the domain of physicality, that do not seem to be objectively real in the sense of having autonomous existence separate from and irrespective of the consciousness that is entertaining and experiencing them as its objects and contents, including the non- or trans-physical reality of the religiospiritual; and 3.) understanding and using how consciousness interacts with objective reality as understood by current classical and post-classical physics and parapsychics<sup>3</sup>. This third domain includes our current attempts to conduct our consciousness studies that relates to the interests and practices of our own psychotronics organization. And here we look at consciousness as it bears upon understanding and working with the emerging possibilities of higher frequencies, higher dimensionality, subtler energies, and the place and role of the mental domain and its potential efficacy with regard to what lies at the limits of our understanding of external reality. This includes the frontiers of complementary and alternative medicine, certain anomalous, even “magical,” mind-over-matter type possibilities, and what may become a truly post-Cartesian, post-dualistic world of science and technology involving what I have elsewhere referred to as an ever-increasing process of *mentalizing the physical* within an *emerging spiritualization of science*.

**Editor's Note: Because of the length of this excellent article, it was not possible to fit it into this newsletter, and only the Introduction has been included. To access the full article, please click on the link below and you will be taken to a PDF of the entire article:**

# **The Physics of Alice's Looking Glass**

Robert E. Beutlich, BS-TV Eng.

July 2002

When Alice stepped into her mirror, it became a 'Wonderland' of mixed up things and all seemed backwards from ordinary logic, welcome to the quantum world of sub-atomic physics. The sub-atomic world has baffled science since the early 20's of the last century and little by little as each new paradigm became accepted, it's strangeness became even more weird. The current super-string theory has as it's base a ten dimensional worlds of infinitely small strings of energy enfolded upon each other. An extension of the 10 dimensions yields some 26 dimensions of space/time. The classical Klein Bottle of modeling or the 'Light Cone' attempt to give some physical meaning, but they all fall short of giving the ordinary person any kind of a glimpse of it's structure.

A most serious error is being made in current quantum physics as well as other researchers when they depict the extra dimensions beyond the physical world as being extra-spacial with time remaining as a scalar. Using this modeling does not account for all the various types of psychic phenomena that has occurred over the millenniums.

Time in our physical world is a one dimensional (scalar) thing, it just goes on and on, forwards, never stopping, never going backwards. Gravity is also a Scalar, a one dimensional thing, always going inward.

So Imagine a balloon as it expands, it just goes outward, like Time. And gravity is like the outside air pushing inwards on the balloon. You can not grab a piece of time and hold it, its every where but nowhere. This instant in time is the same instant in time all over the Cosmos, it does not have to travel to get there, it Just Is! If time rises up all over at the same time, then this is in fact a holographic universe. But where is the master clock that beats and synchronizes it all?

The answer comes from the Kabbalah, the ancient Hebrew mystic portion, they call it Ein-Sof or 'Nothingness', 'The No-Thing', which in turn creates the first of four basic ten dimensional worlds. The pattern of each world consists of ten Sepirot, (eminentors of 'light'), interconnected by a triune beam of energy, A scalar 'rod' with two beams of counter rotating energies. (Ah-ha, shades of Phase Conjugate Mirrors!) There is a descending hierarchy from the first world, (Tree of Life), which in turn creates the second, then the third and finally the fourth. The fourth world relates to this physical world of 3-D space and 1D-time. The preceding worlds are made up 3D-time and 1D space, and are literally the worlds of Spirit.

Each of these four worlds interact with each other and create a standing wave pattern between each one of them, thus there are seven worlds; 4 fixed and 3 temporal (in constant flux). Each of these four worlds has a base velocity, the last being physical, operates at the velocity of light or "C". The next at 3C; next, 9C ; and the top most at 27C. The sum of which are  $1C + 3C + 9C + 27C = 40C$ . (The biblical 40) The 'in-between worlds' also have velocities which are at the 3/4 point due to their pulsed nature. (Were these sine waves the would be the sum of the two divided by 2.) The 1C world is this physical creation; the next world up is the Mental world at 3C; when the mind interacts with the physical, emotions result as a standing wave pattern in the Astral plane, and that is at 2.5C, the 3/4 nodal point ! We will discuss this later when describing the work of Leadbetter & Bessant of the Theosophical Society in the late 1890's and onwards. These velocities were derived by this author in 1978 (1) from the frequencies given in book by Mrs. Bloomfield Moore on John Keely's work, and verbal conversation with Arthur Mathews (A Tesla Assistant) who cited a biblical reference in Revelations Chap.4-3, Jasper, Sardine stones and Emerald. (See 'The Ring That Sings' and phase diagram of crystals in Wm. Tiller's book, --??--)

The velocities are all odd numbers, 1 - 3 - 9 - 27, which means that these are odd harmonics produced by square waves or pulses which in turn leads us to Tachions. Tachions form tetrahedral shape, (the first of the five platonic solids) and their motion is a stepped clocking action, moving in three steps in one direction, then in a reverse direction of rotation thus creating a pulse or square wave phenomena!

To put it simply, this world's three dimensions of Vector Space (x,y,z directions that have length and direction) and one dimension of Time (Scalar, which has only an outward flow from each and every atomic structure) inverts at the mirror (event horizon of the 'Quantum World') when the space size is equal to, or smaller than a proton's diameter. Of course a mirror inverts the image, like wise the world inside the proton is a mirror of the outside Space-Time World ,our physical world of 3 Space and 1-Time . On the inside it inverts and becomes 3-Time and 1-Space. Here in the sub-atomic worlds, Time is now a vector quantity and can add up , just as Space adds up on the outside, 1 mile, 2 miles, etc. And what was scalar time on the outside now becomes scalar space. Here scalar space connects every thing in this world together. You can imagine scalar space as being a solid iron rod that connects all particles that were created together as being inseparable, what ever you do to one particle, the other reacts. This is a most important concept , moving all the way over to the remote location!

A very elegant description of this was an experiment based on one of Bell's theorems. Here an electron pair was created, one of the electrons is called 'spin up' (like having a North pole) and the other is 'spin down' (like having a South pole) They are now sent down the long chamber and separated into two different paths , as they are traveling their separate ways, a field is applied to one of the electrons and it is flipped over, from say an 'up', to a 'down' position. Although no field is applied to the other electron, it also flips so fast that it is impossible that electromagnetic field traveling at the speed of light could have caused the flip. This enigmatic discovery can easily explained with the

concept of Scalar Space! That scalar space, 'the iron rod', connects the two electrons, when the first one is forced to flip, the second one has to flip because they are tied together by this rigid rod of scalar space!

It is my belief that using the work of Leadbeater and Bessant (Clairvoyants in the early days of the Theosophical Society) in their seminal book, "Occult Chemistry" which described Molecular, Atomic, Sub-Atomic (quarks) and sub-sub atomic structures called ANU will clarify the 'picture'. In an altered state, they viewed various atomic elements provided by Sir William Crookes of the Royal Academy, London. The initial results were published Nov. 1895, in magazine, 'Lucifer' which included Hydrogen, Oxygen, Nitrogen and a fourth unknown gas which had an atomic weight of 3. These investigations proceed over the next 49 years, until their deaths in 1933 and 1934. Three editions were published, the last in 1951 which corrected many errors that had crept into the books. As the work proceeded intermittently over the years, there evolved platonic structures and families of like base units.

In addition to the data from "Occult Chemistry", shall use the paradigms of Dewey Larson, Portland, OR, (deceased), who self published a series of books about the "Reciprocal" theorems. (Now out of print) He postulates there are two major sectors, the Physical and it's mirror, the Cosmic. Within each are small portions of opposite polarity regions. Hence this brings to mind the famous Ying-Yang symbol of the Far East; the circle divided into black and white portions by a 'S' curve and within the white is a spot of black also within the black sector is a spot of white. His paradigm allows for 90% of the universe's missing mass, and 'spooky action at a distance', common to psychic phenomena.

And next we shall use a liberal application of the ancient Hebrew Kabbalah, the works of J.G. Gallimore and this author, and some of the concepts of Ken Killick of Canada on Tachions.

All of the above will combine to hopefully yield a clear concept of the basic structure and functions of Psychotronics.

There is in my proposal a basic concept that has been totally ignored or misstated both in current physics and by my peers. The 'Other Worlds' are really in the Time Domain, (with 3 finite vectorial velocities in excess of  $C$ , the speed of light) which some call 'Frequency', but this does not yield a true picture. Dewey Larson's concept, was for each unit of time, there is a corresponding unit of space.

That all is 'Nothing But Motion' (his first book); for any particle to exist it must be in motion. The natural datum is a progression of time outward from unity, time, in this world is always going outward as a scalar, or one dimensional thing. (When an electron in an excited orbit falls back to its normal value, light is emitted. Light is merely an oscillation which is carried outward by the natural progression of time). Time (this instant,  $i$ ) arises all over the universe at the same instant, it does not have to travel to get there! Thus time flows outward from each nucleus. We can talk on the phone to

New York from Chicago, which is an hour's clock time difference, but we are talking almost simultaneously, only delayed by the transit time of the electronics, close to the speed of light, 'C'.

Our ordinary world is made up of three dimensions of space, the X, Y, and Z axis, with one dimension of time which is called a 'Scalar'. Here, time only goes outwards, never backwards. Gravity goes inwards, never outwards, it also is a Scalar. Scalars have only magnitude.

To simplify, the proton can be viewed as existing in units of 'Time' and the electron existing as a corresponding unit/units of Space.

Borrowing from Bruce DePalma's concepts, he proposes that the magnetic field is really a 'Time Field'.

This applied to an electric generator, the logic is : When a magnet field passes through the copper wire, electrons are displaced causing a current to flow. The truer explanation is: Time and Space are orthogonal (at right angles to each other and exclude each other); thus when 'X' units of Time (magnetic) pass through the copper wire (with free electrons) 'X' units of Space (electrons) are displaced. When the Time field stops moving, the Electrons stop moving.!

## **The Physics of the 'Other Side', Part 2. ('03 lecture)**

### **By Robert E. Beutlich**

To briefly review last years presentation, "The Physics of Alice's Looking Glass", covered the four worlds of creation ala the Kabbalah, Dewey Larson's theorem of 'Reciprocity', which explains in detail the dimensional time and scalar space of the 'Other Side' The velocities of the 'Other Side' in terms of multiples of the velocity of light of 1C, 3C, 9C, and 27C. Also described the 'In Between Worlds' velocities as 2.5C, 7.5C, and 22.5C.

Now we shall examine some of the experiential events that lead me to the previous conclusions.

It all began in the fifties when my father, who was then in charge of all construction projects for the Chicago Park District showed me dowsing which he had learned from a bulldozer/trencher operator while building the new South Branch of the Outer Drive along the Lake Michigan Shoreline.

In the seventies, I became heavily involved with the 'New Age' movement after reading "Psychic Discoveries Behind the Iron Curtain" and "Secret Life of Plants". Becoming a 'weekend junkie' to all the 'New Age' groups that had sprung up. But being an engineering type myself, wanted to know how all this 'strange stuff' occurred, what was this strange energy behind all of this phenomena? That is when J.G. Gallimore stepped in with the 'First US Radionics Congress' in Indianapolis, 1975. Oh Boy what an

eye-opener! We meet the following year, 1976, in Washington DC and formed the U.S. Psychotronics Assn.

It was there I meet one of the speakers, Dr. Dan Fry, a physicist who had worked at the White Sands Proving Grounds on the Hydrogen bomb. He told me a story, one Saturday night, he missed the last bus going into town (where all the 'boys' could get a drink and have some 'fun'), so he took a stroll through the desert. Where upon he became a contactee of the third kind, he was invited aboard a UFO. He seemed to acquire a great deal more 'knowledge', he then developed a mechanism for 'reading ones thoughts'. In an electromagnetic shielding screen booth, he placed a bunch of coils in a headband helmet, placed on the skull. Observing the trace on the oscilloscope, he could not 'lock it in', it jittered so much he could not read the patterns of the various emotions he was trying to analyze. He then took a sample of the signal and applied it to a frequency generator, the output he used for the horizontal sweep on the scope, this stabilized the signal. He could then read the patterns love, anger, hate, truth statements, lies, which he created in his mind. Incidentally, he did all this work alone, on his own time, nights, but using the facilities there at the base. The signals were PULSED SPIKES, AT BRAIN FREQUENCY RATES, WITH A DECAYING RAMP OF FM FREQUENCIES!.

Now this fits exactly into my theorem of the velocities of the four kabbalistic worlds, a pulsed or spike is created by odd harmonics, hence the 1-3-9-27C, all odd harmonics. Which I derived in 1978 from Keely's work, factoring the frequencies and expanding the pattern given in the back of Mrs. Bloomfield Moore's book, "Keely and His Discoveries", page 360-361. The derivation was first published in Theosophy Science, Adyar, India, 1978.

We now come to the second man that I've met who was aboard a UFO, Arthur Matthews of Lake Beauport, Que., Canada. In 1975, had seen the pattern in Gallimore's book, 'Handbook of Unusual Energies', Pg. 341, the Odic Periodic Table, above first row of elements 1 to 8 there were numbers which indicated there were 128, but his table only went to 96. Also a notation " Notice Each Polarity (E) Jumps two places in next line down, Not Planned Analyzing the table, I found the pattern, and completed his table to all 128 Odic periodic elements, and presented at first meeting in 1975. Prior to that, I had shown the table to a friend with whom I had been doing some joint research on the Hendershot Generator. She was a musician, and sometimes psychic, Margo Butgereit.

While describing the print of the 128 Odic Periodic Table on her dinning room table one evening, she turned and talked to someone else in the room, but there was no one else there! As I turned to the NE corner of the room to see to whom she was talking, the conversation ceased. (I could only hear her side of the conversation). Asked, who/what was that? Nonchalantly, she said oh that was Tesla, he said, "That's Right", and there is more in this book". What book? She described a blue

leather book with gold lettering on the cover that was shown to her. But, who was it? “Oh that’s Tesla, I see him now and then. He’s from Venus, and I think sometimes my twin is also there on Venus. (Incidentally, a few years later she experienced ‘transfiguration’ she described a column of light descending upon her, making her ‘all aglow’ and she passed over shortly afterwards.)

Querying her further, she had no idea that Tesla had been here on Earth, and was the creator of our A.C. electrical power system that accelerated the phenomenal growth of the past century. Switching back to Mathews, I had gotten his book from Health Research, “The Wall of Light”. It described Tesla’s arrival on Earth from Venusian’s UFO and deposited with Earth parents. This tied in directly with what Margo had told me!. In that book he intimated many other secrets of Tesla, and he had painted 26 pictures that revealed Tesla’s secrets. (I did obtain a slide set of them, but not the notes that went with them— he had given the paintings and notes to the Canadian Government)

I visited Arthur Matthews many times on my way to the Dowsters conference, going through Canada, stopping in the Quebec City area, then on down to Danville, Vermont. Showing him the 128 element Odic Periodic Table and the story of Margo, I asked him about the ‘blue book’, he replied the only blue book Tesla had was a blue leather covered bible with embossed gold letters! Many famous men had come to ‘check him out’, including Andrija Puharich, Chris. Bird, etc. Puharich had purchased a typewriter from him which he said had been Tesla’s, Andrija, checked out the up/down/spacing pattern of the typewriter letters with the documents in Tesla Museum, they were identical! Regrettable it was lost in an arson fire set at Puharich’s mansion in NY.

Arthur told me his uncle was in the Royal Academy, London, and as a young boy of eight had met Tesla there one day. Arthur moved to Canada and became an electrical engineer for the Canadian railway system. Here again he met Tesla in the late thirties, helping him disassemble generators (at the end on railway line in northern Quebec) which were backpacked to a waterfall site and re-assembled. Arthur would not reveal any of Tesla’s secrets, should you ask, -- it’s all in the Bible he would say. But he would confirm any concepts you had, saying yes that’s true— thus I found that my work on the velocities of the four worlds was correct, and “it’s in the bible”, Revelations, Chap. 4.3, stones of Jasper, Sardine and Emerald. This further confirmed my work in “The Ring that Sings” where I found the fundamental rays on the nine gem stone, Navaratna Ring from India. These turned into angles which in turn became musical notes. (The song it played was from a melody a boyhood chum had written three years prior!) Now, Tiller describes group phase velocity, faster than ordinary signals in crystals.

Crystals are super-conductors for not only the Etheric but also at Astral & Mind levels. Hence Arron’s breastplate was a communication device to the ‘above’. The 12 foundation stones in Revelations are the resonant structures that empower the creation process’s. Look back on my papers and you will see a path. (not consciously deliberate)

Arthur also described the X-12 space craft that landed on his property, NE of Quebec City, and he went aboard. The second man I've personally known to be aboard a UFO. Another fascinating portion of Matthew's story, he became deathly ill and 'died' in the hospital, but somehow recovered, and came back a 'different man'. Both Ken Killick & I believe that the 'different personality' that came back in Arthur Mathews body was in fact Nicolai Tesla!

Here I introduce you to the third person I've known to have been aboard UFO craft, Ken Killick, whom I met through Mary Hardy. When Ken was 12 years old in England, he was picked up by space craft, his life was forever changed. He had knowledge well beyond his education, became an Episcopal priest, and at one point ran some very sophisticated programs growing crystals commercially. He worked extensively with the Hardy's on their pyramids and healing circles and a joint book. After Arthur's death we both came to the conclusion that when he 'died' and a different man came home, that man was a walk-in - Nicolai Tesla. Arthur's main function was apparently to maintain the "Tesla Mystique". (Incidentally, Arthur asked for permission to forward my 128 Odic Periodic Table to the Canadian Government in exchange for his written notes on the 26 paintings that revealed Tesla's secrets, But it turned out to be a one way street, they never sent back his notes to me.)

Importantly— the mathematics to describe FM and Phase modulation are Bessel functions , these were used by Whittaker to describe conversion of transverse electric fields to longitudinal scalar waves and visa versa. (see Tom Bearden's volumes of papers presented at USPA) "All information between worlds, is transmitted via pulsed, phase modulation, longitudinal scalar electromagnetics".

End

# Bioelectromagnetic and Subtle Energy Medicine, Second Edition

**Edited by Paul J. Rosch, MD, FACP**, Clinical Professor of Medicine and Psychiatry, New York Medical College, Chairman of the Board, The American Institute of Stress, Full Emeritus Member, The Bioelectromagnetic Society

Extensively revised and with cutting edge new chapters, *Bioelectromagnetic and Subtle Energy Medicine, second edition*, continues to be the gold standard in the field.

It is the only comprehensive resource for authoritative and up to date information on bioelectromagnetic therapies for cancer, coronary disease, depression, epilepsy, tinnitus, Parkinson's and other degenerative and neurologic disorders.

This key reference work thoroughly explains the biologic effects of electricity and electromagnetic fields and the importance of dosimetry in determining clinical efficacy and safety. Additionally, it presents examples of cutting-edge breakthroughs supported not only by rigid clinical trials but also by solid basic science research, and identifies promising new approaches based on research advances in the U.S., Europe, Russia, and Pacific Rim countries.

## At a glance...

- Focus on evidence based medicine
- Visualizing and measuring energy fields in health and illness
- The difference between electromagnetism and bioelectromagnetism
- The role of subtle energies in bioelectromagnetic phenomena
- Bioelectric Resonance bridges Chinese and Western medicine
- Multiple health benefits of Earthing (Grounding)
- How to make sense out of homeopathy and "memory of water"
- Why doctors will be prescribing frequencies instead of pushing pills
- The role of the pineal in bioelectromagnetic medicine
- How biological water (H<sub>3</sub>O<sub>2</sub>) acts like a battery to provide energy
- Why MRI-guided focused ultrasound will replace surgery
- Problems with FDA approval and classification of medical devices
- How intentionality can alter the pH of a solution and speed up larval maturation, and how this energy can be transferred and stored on a computer chip to achieve the same effect at a different location

# OPEN SYSTEM THERMODYNAMICS

by Peter Lindemann, D.Sc.

"The *2nd Law of Thermodynamics* says that machines that produce more energy than you put into them are *impossible*, but that's not true! That only applies to machines whose energy input is closed to the environment. But for machines that are OPEN to the

environment, they CAN produce  
more energy than you put into  
them! "

REVEALED: Learn the Real History of Thermodynamics and  
how discoveries in the last 40 years have laid the  
foundation for the industrial use of super-efficient  
machines in all sectors of the economy!

*Peter Lindemann*

## *Open System Thermodynamics*

<http://opensystemthermodynamics.com>

by

*Peter Lindemann, D.Sc.*

Peter Lindemann has over 35 years experience  
teaching, researching and developing alternative  
energy technologies. Peter is an internationally  
recognized Lecturer and Educator, and is the founder

of one of the oldest and most successful free energy websites on the internet.

**Conference Series, Part 3**  
***BEDINI-LINDEMAN 2013***  
***Science and Technology Conference***

**From: Peter Lindemann, DSc**

**Date:** Sunday, November 20, 2016

**RE: Open Systems Thermodynamics**

Dear Friend,

I became interested in the idea of a "self-running" engine in 1973. That's when I ran into an article about Ed Gray's EMA Motor that produced 80hp and kept its batteries fully charged at all times.

Something just "clicked" inside of me. I knew this was really important, and I wanted to learn more. My brother and I wrote to the company, but were told they couldn't tell us anything else besides what was in the newspaper articles. That was disappointing, but it started me out on a life-time quest to understand more about this science.

Ten years later, I was living in Santa Barbara, California, and working with a brilliant engineer and machinist named Michael Knox. Together, we developed a number of novel electric motors and generators, all of which produced anomolous behaviors. The biggest problem we had was that we really didn't know how to **test** the machines.

In 1987, Eric Dollard showed up in our lab and finally ran some definitive tests. One of the generators could not be made to operate below **108% efficiency**! The tests were all done correctly! There was only one possible conclusion; the "Laws of Thermodynamics" were **NOT** an absolute, limiting case on the efficiency of machines!!!

Of course, as soon as we had something to show, with test results to prove what it was doing, all funding dried up! Actually, we tried to raise funds for the project for far too long, and our personal finances became desperately low. In the end, we had no other choice. We put the project on the shelf, dissolved the company, and all went out and got jobs.

But I kept studying, and learning, and writing about these ideas. In 1994, I published an article in BORDERLANDS Magazine titled ***Thermodynamics and Free Energy***. It was my first attempt to explain the inaccuracies and inconsistencies in the Laws of Thermodynamics, and why Free Energy machines were possible. That was 19 years ago. Today, I know a lot more. So, I decided to put together an up-dated, definitive explanation of my current understanding of Thermodynamics and the physics of how to use energy more efficiently, and ultimately, to produce a wide variety of "self-running machines." Now **you** can have this understanding, too!

**OPEN SYSTEM THERMODYNAMICS** is that communication. I know, the name doesn't sound very interesting, but honestly, I believe it is the most important lecture I have ever given.

It lays out a broad, historic overview of the development of humanity's relationship with HEAT and the breakthrough

realization of how to power our machines with it, starting about 300 years ago. Considering that our ancestors harnessed FIRE tens of thousands of years ago, heat engines remain a relatively recent development.

The Ancients were totally focussed on "harnessing Nature" to power their machines. Wind powered boats go back to pre-historic times, and water flowing in rivers was used to lift water into aquaducts by the Romans 2000 years ago. The point is, Heat was not harnessed by our early ancestors because they didn't understand what it was or that it could be separated from Fire. Fire could cook their food, but it could also burn down the whole town. There was always a "fear factor" associated with heat because of the dangers with Fire getting "out of control".

So it was, that the "fearless and systematic" study of Fire and Heat started only about 300 years ago. The math to properly engineer heat engines is less than 200 years old. The metallurgy needed to build small, powerful engines is less than 100 years old. The understanding of how heat behaves in "closed systems" near the point of "equilibrium" is about 160 years old. And the understanding of how heat behaves in "open systems", far from the point of "equilibrium", is only **40 years old!**

We are finally at that point in History where the materials science, the math and the theory are all available to begin harnessing heat from even "low grade" sources. That is what heat pumps do! In fact, a home heating system based on a heat pump can extract enough heat from the outside air on a cold, Winter day, to warm your house.

Back in 1900, Nikola Tesla published an article titled **The Problem of Increasing Human Energy**. In it, he discusses the possibility of building a machine that could be powered by the "heat of the ambient air". He believed it was the ideal way to harness the energy from the Sun and "the ideal way of obtaining motive power." This was Nikola Tesla's vision; an

endless, clean power source, replenished by the Sun, but available everywhere, 24 hours a day!

Near the end of my lecture, **OPEN SYSTEM THERMODYNAMICS**, I show you the complete method to accomplish Tesla's amazing invention. He called it his "Self-acting Engine". It is a "heat engine" that extracts all of the heat it needs to operate from the heat in the ambient air, and produces mechanical energy and cooled air as a by-product. It is a combination of a heat pump and a thermal expansion engine with some very unique features.

That one revelation is worth the entire sales price, but you'll get much more...

**To order this book, please click [here](#), or go to Dr. Peter Lindemann's Free Energy website [here](#).**

## United States Psychotronics Assn. (USPA) Periodicals Library Update

In order to do good psychotronics research of any kind, whether it involves radionics, radiesthesia, psionic medicine, dowsing, subtle energies, biophotons, or any other subject covered by psychotronics, you need to have access to as much of the periodical literature as possible on these subjects.

**To address this issue, the USPA has resolved to identify and acquire every psychotronics related periodical that has ever been published anywhere in the world, and to retain copies in the USPA Library for the benefit of USPA members.**

**As a first step, we have developed the following list of periodicals that focused on or frequently had articles on psychotronics related subjects.** But this is only a preliminary list, and we know that there are probably more psychotronics periodicals that have been published, but that we do not yet know about.

So please look over the following list and check your own personal physical libraries and your computers to see if you have any issues of the periodicals on this list. Even if you just have one issue, please let us know, because that may be the one we need to complete all the issues of a particular periodical. **Please write to me (John) at: [joreed43@gmail.com](mailto:joreed43@gmail.com), since I am the USPA librarian and archivist coordinating this effort,** and tell me what periodicals you have.

**As a whole, the members of USPA have a huge “library” of periodicals, but it just happens to be “distributed” among its members** at this point in time. However, we can work together, and if you would be willing to loan, donate, xerox, or as a last resort, sell copies of your periodicals for the USPA Library, then we will be able to build a large centralized library of all psychotronics periodicals. And all USPA members will then be able to use these periodicals in their research or for their reading enjoyment.

**Bioelectromagnetics:** Published by John Wiley and Sons from 1980 to present. We need all issues.

**Bridges:** This was the newsmagazine of the International Society for the Study of Subtle Energies & Energy Medicine (ISSSEEM) from the 1980's through about 2010, after which it was discontinued. **We have a complete set of this periodical.**

**British Journal of Radiesthesia and Radionics.** Published by the British Radiesthesia Association, 1953-1963. The original title was British Journal of Radiesthesia. We need all issues.

**DeLaWarr Laboratories Newsletter:** published by George and Marjorie DeLaWarr, and later their daughter Diana Di Pinto, from 1964-1986. **We have a complete set of these,** unless you know of any issues published after 1986.

**Dowsing Today:** The journal of the British Society of Dowsters, published from 2000 to the present. Original title was Radio Perception, which began in 1933. We need all issues.

**Electro and Magnetobiology:** Published by Taylor and Francis from 1993-2002. Title was changed to Electromagnetic Biology and Medicine. We need all issues.

**Electromagnet Biology and Medicine:** Published by Taylor and Francis from 2003-present. We need all issues.

**Electronic Medical Digest:** published 1946 to about 1955, also by Fred J. Hart and the College of Electronic Medicine. We need all issues.

**Journal of Bioelectricity:** Published by Taylor and Francis from 1982-1992. Title was changed to Electro and Magnetobiology. We need all issues.

**Journal of Electronic Medicine:** This was a continuation of Physico-Clinical Medicine, and ran from 1939-1945, published by Fred J. Hart and the College of Electronic Medicine. We need all issues;

**Journal of the British Society of Dowsters:** Published by the British Society of Dowsters from 1956-2000. Prior title was Radio Perception. Succeeding title: Dowsing Today. We need all issues.

**Journal of the United States Psychotronics Association.** Published by the United States Psychotronics Association. Only six issues were published, and **we have a complete set.**

**Mind and Matter:** published by George DeLaWarr of the DeLawarr Laboratories in Oxford, England from 1957-1967. **We have a complete set of these very rare journals.**

**Newsletter of the Institute of Psionic Medicine.** Published by the Institute of Psionic Medicine only from 1978-1979. We need all issues.

**Newsheet of the Psionic Medical Society.** Published by the Psionic Medical Society in the England only from 1975-1977. We need all issues.

**New Zealand Society of Dowsing & Radionics Journal.** Published by the New Zealand Society of Dowsing & Radionics from 1988-present. We need all issues.

**Physico-Clinical Medicine:** This journal was started in 1916 by the father of radionics, Dr. Albert Abrams, and continued to be published up through 1938, by Fred J. Hart, who took over the College of Electronic Medicine after Abrams died in 1924. **We have all issues from 1916-1923**, but need all issues from 1925-1938.

**Psionic Medicine.** Published by the Psionic Medical Society in the UK from 1969-around 1991. We need most issues.

**Radio Perception.** This was the original title of the Journal of the British Society of Dowsters, which began in 1933 and was published under that name until around 1956, when its name was changed to the Journal of the British Society of Dowsters, and continues today under the name, Dowsing Today. We need all issues.

**Radiesthesia.** Published by the Dowser's Club of South Australia, and began in 1992. We need all issues.

**Radionics Journal:** Published by the Radionics Association in England from 1954 through the present. We **have a complete set of these from Vol. 1, no. 1 (1954), through 2005**, but need all issues published after 2005.

**Resonance:** Newsletter of the Bioelectromagnetics Special Interest Group (BEM SIG) of American Mensa during the 1980s and 1990s. **We have a complete set of this rare periodical;**

**Subtle Energies and Energy Medicine:** Published by the International Society for the Study of Subtle Energies and Energy Medicine (ISSSEEM) from 1990 through the present, with some interruptions. We have some, but need most of these.

**USPA Newsletter:** Published by the United States Psychotronic Association from 1977 through present. **We have a complete set.**

## USPA Local Groups and Affiliates Update

As mentioned in previous USPA Newsletters, one of our goals is to reactivate all of the former 24 USPA Chapters that once existed across the US and world. In addition, we plan to establish new local groups of people interested psychotronics and related subjects in other major cities in the US and other countries as well. All such local groups and affiliates will be independent, but will work together with the USPA in a mutually beneficial relationship to achieve our goals of advancing research and applications in psychotronics, radionics, subtle energy, and related fields.

So I would like to invite all of former USPA Chapters leaders and members to contact me (John Reed) at: [joreed43@gmail.com](mailto:joreed43@gmail.com) and let me know if you would like to help reactivate your local chapter. In addition, if you are a leader or member of a psychotronics or related organization which was never a chapter of USPA, and we would welcome you as a USPA affiliated organization as well.

We will be establishing a USPA affiliated groups as traditional organizations and also via the Meetup.com online group platform. This will enable current and former members to more easily have local get-togethers, meetings, and other activities, and those activities, times, and other details can be posted online. So please let me know if you would like to be the leader of a group in your area.

If you do decide to use Meetup.com to establish your local group, you could do it quickly and easily by going to [www.meetup.com](http://www.meetup.com) , and clicking on the big red word “**Start**” in the upper left, and then just following the step-by-step procedures.

**You can give your local group any name you want, but it should probably have a name that relates to psychotronics in some way.** And if you need any help, please let me know, and I will help you in any way I can. Perhaps the most important thing is enthusiasm and determination, so write to me, even if you don’t know any other USPA members in your area, and I will help you set up a local group: [joreed43@gmail.com](mailto:joreed43@gmail.com)

## Exchange Corner

The "Exchange Corner", is a place for USPA members to buy, exchange, or sell items of interest, or request information or other help in relation to something wanted. So if there is anything you want to buy, sell or trade that has to do with psychotronics, radionics, subtle energy, or related subjects, please contacted the Classified Ads manager at: [usparesearch@gmail.com](mailto:usparesearch@gmail.com). For the next few issues, all such ads will be free of charge, so please send your ads and wanted requests as soon as possible before advertising charges begin.

### **Bruce Copen MARS III for Sale**

I am a current USPA member and have a **Bruce Copen MARS III** for sale. The system is about 7 or 8 years old and in original, excellent condition. Sale includes original SCOPE analysis, database and broadcast software, HP laptop, comprehensive training manual and program disc, interconnects and boxes. I have always run it on XP with no issues; everything original as supplied by Copen.

All operations can be automated and multiple broadcasts can be run simultaneously, although Copen saw to develop this device so it could be used in many radionic styles and without computer control. The price is \$8500 USD roughly half the original cost. I prefer to not ship to a destination outside the USA. A limited amount of training by me, as I understand it, is available to a confirmed purchaser, as time and distance reasonably permit. Please contact: **Dr Robert Dixon**, [robertdixondc@gmail.com](mailto:robertdixondc@gmail.com) or [call \(304\)-268-7707](tel:(304)268-7707) Berkeley Springs, WV.

**Wanted: Any issues of the Newsletter of the American Society of Dowsters, published from 1961 through 1963.** These were 8.5X11 inch sheets stapled together, and not the digest size journal that you may be familiar with, which began in 1964. Contact John at: [joreed43@gmail.com](mailto:joreed43@gmail.com)

**Harmonic Translation System per Jon Monroe, ver. 9.3, complete, original, little used, with manual, video, software and Mayan Codes app. \$2000.00. Contact Bob Dixon DC, (304) 268-7707 or [drrobertdixon@aol.com](mailto:drrobertdixon@aol.com).**"

**Wanted:** Any articles, periodicals, books, devices, or other materials on psychotronic related subjects that you can donate or lend to the USPA for its library, archives, and museum. **The USPA is a nonprofit, 501(c)(3), tax exempt organization, and as such, you are able to make tax deductible donations to the USPA. Please email the USPA at: [usparesearch@gmail.com](mailto:usparesearch@gmail.com) to make arrangements. Thank you for your generosity.**

# United States Psychotronic Association (USPA) Officers and Board Members

## Officers:

**President:** Jon Klimo, Ph.D. email: [JonKlimoidealism@gmail.com](mailto:JonKlimoidealism@gmail.com)

**VP (Scientific Research & Conference Speakers):** Glen Rein, Ph.D.  
email: [glenrein@gmail.com](mailto:glenrein@gmail.com)

**VP (Exhibitor Relations):** Bob Peters email: cathyschleyer@msn.com

**VP (Radionics & Agriculture):** George Kuepper email: [georgekuepper@yahoo.com](mailto:georgekuepper@yahoo.com)

**VP (Library, Archives & Museum):** John Reed, M.D. email: joreed43@gmail.com

**Secretary / Treasurer:** Scott Buetlich email: scottbeutlich@rocketmail.com

**Executive Secretary:** Daniel Taylor email: dnltlr@hotmail.com

## Board Members:

**Chairman of the Board:** Tim Lippert email: tdlviking@gmail.com

**Member:** Lutie Larsen email: lutielarsen@mac.com

**Member:** Jon Klimo, Ph.D. email: JonKlimoidealism@gmail.com

**Member:** Eric Rowley email: werowley@ConversionTechnologies.com

**Member:** Ed Kelly email: ed@kellyresearchtech.com

**Member:** John Reed, M.D. email: joreed43@gmail.com

**Member:** Beverly Rubik, Ph.D. email: [brubik@earthlink.net](mailto:brubik@earthlink.net)

**Member:** Linda Lancaster, N.D. email: [drlinda@lightharmonics.com](mailto:drlinda@lightharmonics.com)

**Member:** Daniel Taylor email: dnltlr@hotmail.com

**Member: Marty Lucas** email: majorlucas@yahoo.com

## WHAT IS PSYCHOTRONICS?

The United States Psychotronics Association defines psychotronics as the science of mind-body-environment relationships, an interdisciplinary science concerned with the interactions of matter, energy, and consciousness. Psychotronics involves the study, research, and applications of the physics and technology of the mind, brain, spirit, consciousness, and the underlying forces of life and nature – hence the term “psychotronics”.

We believe that a true understanding of the universe must include the spiritual, as well as, the technical, and provide an opportunity for amateur researchers to present their findings along with the professionals. We stress research, with documentation of results, and practical applications, rather than personal experience and unsupported hypotheses.

**Some Prominent People in the history of psychotronics research and application:** Albert Abrams, Thomas Bearden, Robert C. Beck, Robert O. Becker, Jacques Benveniste, David Bohm, Harold Saxon Burr, George W. Crile, Ruth Drown, T. Galen Hieronymus, Vlail P. Kaznacheyev, Georges Lakhovsky, Wilhelm Reich, Royal R. Rife, Rupert Sheldrake, Nikola Tesla, Marcel Vogel, and others.

**Some of the forces, fields, waves, and energies studied and researched in psychotronics include:** bioelectromagnetism, biophotons, biopotentials, electromagnetic wave pollution and harmful effects; coherent emanations of DNA, emanations of matter, “free energy”, morphogenetic fields, non-hertzian waves, orgone energy, pyramid energy and power, qi (chi), quantum fields, scalar waves, subtle energies, ultra-weak radiation of living matter, zero-point energy, and others.

**Some of the phenomena believed to be produced or involved with the above fields and energies:** action-at-a-distance, the aura of the body and other living things, bioinformation, bioluminescence, chakras, consciousness, distant intercellular interactions, meridians of the body, mind-body interactions, non-locality, the placebo effect, quantum consciousness, spontaneous remission of cancer and other diseases, water memory, water structure, and others.

**Related fields of study and research covering the above forces, energies, and phenomena of psychotronics:** bioelectromagnetics, bioenergetics, biophotonics, biophysics, psionics, psychoenergetics, psychoneuroimmunology, quantum biology, radionics, scalar electromagnetics, and others.

**Some practices, techniques, and applications related to psychotronics include:** acupuncture, biogeometry, brain entrainment, clairvoyance, dowsing, energy healing and medicine, extrasensory perception, feng shui, homeopathy, kirlian photography, magnetic therapy, pendulum use and methods, prayer effects, psionic medicine, psychic healing, psychometry, qigong, radiesthesia, radionics, remote viewing, shamanism, sound and sonic healing, telekinesis, telepathy, and others.

## Membership Benefits

So if you are interested in any of the above subjects, then the USPA is the place for you, where you can interact with, exchange ideas, and collaborate with other people who are interested in the same subjects. So sign up now for membership in the USPA using the form on the following page and start enjoying all of your membership benefits. These benefits include, but are not limited to:

1. **Free access to the USPA Psychotronics Library** of articles, periodicals, books, and certain audio tapes, videos, and other materials on the above subjects, useful to your research.
2. **Your free subscription to the USPA Newsletter;**
3. **Your right to freely publish articles in the WISE Journal - The Journal of the World Institute for Scientific Exploration (ISSN 2381-1536),** enabling the world to see your ideas or research, and thereby enhance your resume and credentials;
4. **Your right to use the USPA Literature Research Service,** whereby we will find any article, book, or other item you are seeking on the above subjects, and provide it to you;
5. **Your right to participate in the USPA “Research Assistance Program”,** especially useful to professors, authors, and other researchers, who need extra help on their projects. USPA will help find volunteers to help you with your research project(s).
6. **Your right to be part of the USPA Project Participation Program,** whereby you can volunteer to help on numerous available USPA projects, or help researchers who are conducting research on psychotronics and related subjects.
7. **Your right to make oral or poster presentations at the annual USPA meeting,** with the approval of the Annual USPA Meeting Planning Committee.
8. **Your right to discounts** on the purchase of certain items and services made available for sale or provided by the USPA and its members.
9. **Your right to freely advertise in the WISE Journal,** which goes out to thousands of people.
10. **Your right to participate in the USPA Psychotronic Literature Preservation Program (UPLPP).** The USPA, via its Library and Archives, has established a “Literature Preservation Program” to preserve your personal papers, files, records, and collection of articles, periodicals, books, and devices on psychotronics and related subjects, noted above. You may no longer need or use some of these items that you have, and you can send them to the USPA, and we will preserve them in our library and archives, so that they can be of use to other researchers.

## MEMBERSHIP INFORMATION

**The U.S. Psychotronics Association (USPA), was incorporated in the District of Columbia in August, 1977, and is a nonprofit, 501(c)(3), tax exempt organization, and as such, you are able to make tax deductible donations to the USPA.** It is empowered to enroll members in the parent organization throughout the United States, Canada, and other foreign countries. Membership is open to all people who wish to join with the USPA on the new frontiers of science in working constructively for the qualitative improvement of man and his environment. **Please remember the USPA in your annual charitable giving, especially if you want to advance research in the above subject areas, which can greatly benefit humans, animals, plants, and the environment.**

# USPA MEMBERSHIP APPLICATION

[Online Membership Application: click here.](#)

**Mail-in Applications:** Please print out this page, fill in your information, check the appropriate spaces, and send to the USPA Membership Secretary at the address at the bottom of this page:

**Your Name:** \_\_\_\_\_

**Mailing Address:** \_\_\_\_\_

**City:** \_\_\_\_\_ **State:** \_\_\_\_\_ **Zip:** \_\_\_\_\_

**Country:** \_\_\_\_\_

**Phone:** \_\_\_\_\_ **email address:** \_\_\_\_\_

**Type of Membership desired:**

General: \_\_\_\_ \$35 (1 yr.)

**AMOUNT ENCLOSED:** \_\_\_\_\_

**Please check the appropriate items below that apply to you:**

\_\_\_\_ List me/us in the USPA membership directory with the following

Interests: \_\_\_\_ General \_\_\_\_ Healing \_\_\_\_ New Age Physics

\_\_\_\_ Radionics/Dowsing \_\_\_\_ Subtle Energy Research

Other Interests, please specify: \_\_\_\_\_

\_\_\_\_ Do not list me in the USPA Directory

**Payment (in U.S. funds only) by:**

\_\_\_\_ Check or Money Order enclosed (Payable to USPA)

\_\_\_\_ Visa \_\_\_\_ MasterCard

Charge Card # \_\_\_\_\_ Exp. Date \_\_\_\_\_

Signature \_\_\_\_\_

**Please send to the USPA Membership Secretary:**
