

USPA Newsletter

New Series Vol. 2, No. 2 (February, 2016)

Update on the 2016 Conference of the United States Psychotronics Association (USPA)

The speakers for the **United States Psychotronics Association (USPA) Conference on July 15th-17th, 2016**, have all been selected, and the conference is expected to be a real blockbuster. Being held at the beautiful [Wyndham Glenview Suites in Glenview, Illinois](#) (near O'Hare airport Chicago), we have an outstanding

lineup of speakers who include the following: **Karl Maret, M.D.**, who will be speaking on "Explorations of Subtle Energy in Energy Medicine."; **Dr. William Tiller**, speaking on "The Power of Human Intention"; **Dr. Linda Lancaster and Lutie Larsen** speaking on the DeLaWarr Camera and other radionics instruments; **Dr. Ellen Kamhi** speaking on "Herbs, Dowsing, and Radionics"; and **Guy Obolensky**, speaking his Tesla healing research.

In addition, we will have internationally known researchers **Dr. Dean Radin, Dr. Beverly Rubik, Dr. Glen Rein, and Dr. Don Paris, and John H. Reed, M.D.** speaking on their latest research on subtle energy, energy

medicine, and related subjects. Numerous other speakers in the psychotronics field will also be making presentations, and a full schedule of all speakers and the titles of their presentations will be posted in the next USPA newsletter.

A colorful poster for the USPA Conference and some of its speakers has been created by Scott Beutlich, and is on the next page of this newsletter, without borders or a page number. Since this is a PDF document, you can print that page out separately, so please feel free to download it and make copies to hand out at meetings and events that you may be attending before the USPA meeting in July.

Vendors/Exhibitors: Some spaces are still left for vendors wishing to display their products and services

The USPA welcomes vendors and exhibitors representing groups, firms, and organizations focused on the interactions of matter, energy, and consciousness. Fees are \$30 per table, plus 10% of gross sales. **For more information please contact Bob Peters, VP of Exhibitor Relations, at: cathyschleyer@msn.com.**

Subtle Energy

"For the last four hundred years, an unstated assumption of science is that human intention cannot affect what we call 'physical reality.' Our experimental research of the past decade shows that, for today's world and under the right conditions, this assumption is no longer correct. We humans are much more than we think we are and Psychoenergetic Science continues to expand the proof of it".

Dr William Tiller

The Mind, as conscious and unconscious thoughts exists as "subtle energy" that surrounds and permeates the body.

Dr. Richard Gerber

President's Message

by John Klimo, Ph.D., USPA President

Elected as the USPA's new president last summer, I don't see myself writing a single President's Message to cover the entire year or my whole tenure, but, rather, creating ongoing installments or progress reports to keep you posted on my own thinking and the activities and direction of the USPA while I am president. I tried my hand at the first such message last November. If you did not get it or no longer have it and would like it, let me know and I will send you a copy to the email address you provide me (my email is jonklimoidealism@gmail.com).

Quickly reviewing my November first President's Message to you, I listed a number of things I will be working with our officers and board members to move toward realizing in the coming year:

- Increasing our organization's membership, visibility, and outreach.
- Exploring ways to bring much-needed income into our organization's coffers.
- In the area of research: working with IONS' Research Director Dean Radin on one or more selected joint research projects shared by the USPA and IONS aimed at experimentally demonstrating to the scientific and academic communities the efficacy of selected radionic and psychotronic (and related) approaches and treatments. Also, working with the Parapsychological Association (of which I am a member) to study various long-known radionic and psychotronic procedures and their effects in relation to the traditional parapsychological sub-disciplines of ESP (incl. remote viewing, clairsentience, and radiesthesia) and psychokinesis (PK). And working with fellow research oriented USPA members (Glen Rein, Beverly Rubik, et al.) to initiate and carry out our own in-house USPA research and to publish and in other ways disseminate our findings.
- Working with John Reed and other officers and members of our board to continue exploring ways to make best use of the USPA's considerable archives of past published and recorded conference presentations, and of future USPA-generated material. I believe these contributions will become increasingly valued for being the true pioneering work they are by those outside the USPA as our Western science and technology continues to move into a new era increasingly characterized by quantum non-locality, subtle energies, higher-dimensionality,

and the increasing centrality of consciousness and intentionality in our growing understanding of the nature of reality.

As I review those goals I suggested last November, I now think that there are two things that I believe the USPA needs most right now, and that radionics and psychotronics as part of it needs most: 1.) to earn increasing credibility and legitimacy in the eyes of the scientific and academic communities, and thereby, in the eyes of the world in general; and 2.) to conduct our own, and/or to work with others to conduct, critical well-designed experimental research to demonstrate, hopefully even prove, that radionic and psychotronic approaches and technologies actually work and can have predictable and replicatable efficacy in a variety of nonlocal and at-a-distance ways.

The purpose of the remainder of this current President's Message is to begin sharing with you over time some of my thinking with regard to radionics and psychotronics (and related fields) that comprise the heart of the USPA's interests and activities since its inception. I realize that aspects of my own perspective on radionics and psychotronics, both with regard to their nature and their effects, probably differs from many of my fellow USPA colleagues. Therefore, I will try not to slip too often into my own idiosyncratic views, but rather work to come from a more eclectic, mainstream, viewpoint about radionics and psychotronics, subtle energies et al. that I think is held by the majority of our USPA membership.

Within the USPA, since around 1990 I have shared with you what I'm calling my idiosyncratic views by way of my presentations at numerous annual USPA conferences and published in their proceedings. Those of you familiar with at least some of my presentations know that I am essentially what is called an "*idealist*," in my case interpreted as someone for whom All-That-Exists is a single realm of ideas, not material things, of objects and contents of consciousness, not of objects and events whose existence is seen as lying outside of and independent from the consciousness experiencing them. For me, everything-that-exists is at its heart taking place within one universal, living, multidimensional interiority; and all that exists falls within, never outside of and separate from, this one being, this interiority.

When I get going, I probably sound more like a home-made philosopher than anything else, though my doctorate was in psychology and I'm sufficiently multidisciplinary to seem all-over-the-place to many. But when one sides with seeing everything as essentially a world of ideas, then the next step is to cast around for whose ideas these are. What is their origin? Within what, or where, or whom, are all these ideas existing that account, as I see it, for everything that is taking place?

I have always been drawn to the 17th and 18th century Anglo-Irish philosopher Bishop George Berkeley's view that all that exists is taking place only as perceptions within our own minds, and, ultimately within the mind of God. At 73, I really really care about what the ultimate nature of reality is and what the meaning of our existence is relative to that reality. I've always been this way. I just can't help myself. I'm not only way up in my head about this, I'm probably right out the top of my head and out-of-body and into the ethers about it. If all things are ideas in the mind of God, as Berkeley implied, I really desire to understand the mind of God, or at least to understand Nature in relation to the mind of God as deeply as it will allow me to understand it.

In my writing and presentations over the years I have also drawn upon 18th and 19th century German idealist philosopher G.W.F Hegel, who, in my interpretation, saw ultimate reality as being comprised of '*Absolute Spirit*' aware of itself as such throughout itself (though, for Hegel, aspects of this Spirit can occasionally get dissociated from itself). So, I trace my roots back to Berkeley and Hegel. But, what about the relationship of all this ephemeral stuff to our scientific understanding and our technological abilities to effectively work with the stuff of this reality that science purports to understand? That's what I would like to devote the remainder of this president's message to and to continue as a thematic thread through the remainder of all my messages. As I have experienced it, so much of what the USPA has always been about is this ongoing work of bridging the physical and nonphysical worlds. It would be my guess that most of our members are Cartesian dualists in their view of the world, embracing as equally real, but as separate and different from each other, 'external' physical reality and 'internal' mental/spiritual reality. I have noticed that, to the extent to which any of us are trying to discover a truly satisfying grand unified theory for everything that makes sense for us individually, we tend to bring one of the two realities of traditional dualism -- physical and mental, outer and inner-- into the other to be subsumed within it. In past writing, I have called this the disposition to "physicalize the mental" or to "mentalize the physical." I think you have seen in this message so far how my personal disposition has been to do the latter. On the other hand, I think most traditionally trained scientists, no matter how much they think they are unifying everything into one field, are oriented toward doing the former, that is, physicalizing the mental.

One of the invited keynote speakers for our upcoming USPA conference is physicist William A. Tiller, for many years Chairman of Stanford University's Department of Materials Science (a bastion of physicalizing everything). I have known him since shortly after I moved out to California in 1982. I have declared myself to you in this message as being an *idealist* at heart for whom everything ultimately reduces down to living consciousness. Tiller has been impressively

educated and trained as a physicist and engineer and has incredible discipline, rigor, and analytical muscle in his knowledge and thinking, far more than I have. I do not think that he would see himself as an idealist, but, rather, as a unifier of all things into one field or system of understanding. He has spent many decades working to place the physical, mental, emotional, and spiritual realms into elegant relationship, drawing on mainstream and forward-edge science and mathematics to do so. What gives me considerable hope is that, having read Tiller's books and recently reviewing the 40 different "White Papers" on his website (www.tillerinstitute.com), I feel that he and I are brothers in our thinking, though with me admittedly found wanting in the mathematical physics and analytical end of things. I would suggest that some of you might be interested in looking at some of his white papers on his website prior to our upcoming conference and his presentation there. What he calls "psychoenergetic science" in his writing, and what he includes in the name of his overarching Institute, is his version of what so many of us in the USPA community call by a variety of names and descriptions; but always the tropism across most of us to bridge and integrate, even 'heal', the dichotomy of long-separated mind and body.

Part of my thinking in turning to Bill Tiller right now is that I think you will see the centrality of consciousness (even spirit) in Tiller's model of reality, and yet at the same time you can sense his exceptionally strong mathematical and physics training and understanding. So, I find myself turning to him in my thinking to do a lot of the "heavy lifting" that I am ill-equipped to do for myself in this lifetime in order to make many of the necessary connections between what we call physical reality and the discipline of physics, on one hand, and the trans-physical realm of consciousness and spirit, on the other. I think it's too late for me to go back and get another Ph.D., in physics this time, to make many of the bridging and integrating connections correctly in the eyes of other scientists that Tiller has already done for us; but thanks to him, I don't have to. However, I certainly better use his work, and that of others like him, to help me build my own ladders from our shared physical reality up into the brain-mind, and then into nonlocal consciousness, and on into Spirit itself.

In his introductory essay to the White Papers on his website, Tiller writes, "The main purpose of this work was to awaken the consciousness of humanity, the lay public as well as the scientific community, to the importance of human consciousness and its focused development upon both (1) the progressive evolution of our latent human capabilities and spiritual perspectives and (2) the actual expansion of our orthodox science to perceive and beneficially utilize consciousness as a significant experimental variable in the study of nature's manifold expressions and opportunities." (p. 1, from *Rationale for the Following Series of White*

Papers, 2009). Some of his other 40 white papers most relevant to my current message include: *It is time for a consciousness-inclusive science* (White Paper IV, 2009); *What is human consciousness and how do we significantly increase its magnitude in our world?* (White Paper XXXVI, 2015), and *Steps for moving psychoenergetic science research into the hands of interested general public researchers* (White Paper II, 2015).

In his 2009 White Paper XXXVI, Tiller reports that "I and my colleagues discovered that it is possible to make significant change in the properties of the material substance by consciously holding the intention to do so...[and] To actually 'store' a specific intention within its [a simple electric device's] electric circuit" (p.2, "White Paper 1: *A Brief Introduction to Intention-host Device Research*," W.A. Tiller & W. G. Dibble; www.tillerinstitute.com). Whether it is a matter of physicalizing the mental or of mentalizing the physical, as I have put it, we are left to wonder how the experimenter in this case is storing intention in a physical device, able to be later retrieved and used. Are we talking here about information or energy, or both, or neither? In another paper, Tiller refers to the "indwelling consciousness present in the experimental space [that] can be activated" when creating what he calls "intention- host devices." To my mind, this has an idealist or a panpsychist feel to it; that is, that underlying and indwelling in all physical reality is *consciousness*. That's why I'm heartened to continue hanging out with Tiller and others like him, including some of the rest of you right here in the USPA.

My point is that Tiller and I have been about a similar business for the past few decades. I mentioned a few of his White Papers you can look at on his website. You can also look at some of mine on my website (www.jonklimo.com) under "Publications." Some of my papers there that are particularly relevant to this present message include, *The role of consciousness in emerging new paradigm science: Toward an idealist paraphysics* (2000), and *More speculation on the emerging nature of an idealist science* (2002).

Perhaps the largely-unspoken-of "elephant in the room" in this message is radionics, which I think is the preeminent candidate for such an idealist science and technology. At the least, it is squarely situated at the heart of the 'paradigm shift' (as Thomas Kuhn defined it) of what our centuries-old Cartesian dualist thinking is gradually evolving into. Both conceptually and in real-world practice, radionics is capable of conjoining physical objects, both animate and inanimate, and the thoughts ideas and symbols for such objects, into a true post-Cartesian unified field of operation. Yes, radionics and other equally martyred systems and approaches related to it, have been too long neglected and ridiculed by the mainstream scientific community and most of the public at large. Historically, the USPA has been a-- or the-- repository for and guardian of key aspects of this 'post-Cartesian' field of activity. The late USPA member Marcel

Vogel, predated by decades Tiller's research of placing intention into physical devices, when he demonstrated placing his own intention into quartz crystals and then transferring what had been put into the crystals into further substance, such as water or grape juice to speed the process of fermentation into winemaking. I have been interested for decades, as have Vogel and Tiller, in how things may operate at the very multidimensional boundary line between the ever-more-antiquated domain of physical reality and its energies seen as separate from the realm of consciousness, intention, and spirit.

As I think about Tiller's apparent experimental success in putting intention into physical devices, to be stored there and later retrieved to have an effect upon other portions of physical reality, I am brought back to my own reservations about many of my colleagues who, in their attempts to bridge and integrate the outer and inner worlds, the physical and the mental, do something that doesn't fit my earlier-described *idealist* understanding. There is something all too real about these conceptualizations and explanations that presume a physical reality "out there" in the world that is separate from and different than the "inner world" associated with intentions, ideas, and consciousness. In a 2007 USPA conference paper I wrote:

An all-as-consciousness idealist model challenges what I call "*the fallacy of misplaced locus*" (i.e., that we mistakenly impute the location of superordinate action to systems construed as external and separate from the consciousness operating on and experiencing them), and "*the fallacy of operator-independent technology*" (i.e., the mistaken belief that causal efficacy resides primarily or only in systems experienced as separate from consciousness).

(p.1., *The Neoshamanism of Quantum Idealism: Toward an Emerging Technology*, 2007 USPA conference proceedings).

In this brief message I have tried to give you a flavor of my thinking, especially as it relates to how I see myself situated with regard to the USPA, its history, its members, and to our various beliefs and practices. You may notice that 'non-locality' and 'nonlocal consciousness' are terms being increasingly used in the last decade or so that are gradually beginning to infiltrate both our establishment and forward-edge science. It is my hope that as we move into the future, radionics may serve as a kind of Rosetta Stone for bringing together disparate understandings and practices. I am very hopeful that a number of things that the USPA represents and espouses will come to function as what Thomas Kuhn, in his *Structure of Scientific Revolutions*, calls "anomalies" that serve to bring about a paradigm shift in our scientific understanding and eventually in our worldview.

Can Technology Birth a Spiritual Revolution?

Watch Spiritual Technology Summit 2.0

Beverly Rubik, Ph.D.

Board Member, USPA

A landmark summit on consciousness and spiritual technologies—technologies promoting transformation of consciousness including self-transcendence--was recently hosted by Pamela Parsons Dupuy, John Dupuy, and others from Spirit Tech Media and iAwake Technologies. Use of such technologies are considered novel ways for people to rapidly and holistically transform and evolve into more empowered beings that we need to be in order to face the enormous stress and challenges of our time.

This summit, which is the first online summit of its kind, represents a coming together of early pioneers, researchers and innovators of spiritual technologies, such as Bill Harris, Ken Wilber, Dr. Jeffery Thompson, and the Awakened Mind folk, as well as the new wave of consciousness tech designers and researchers, including Mikey Siegel, Dr. Shamini Jain, and Dr. Neema Moraveji, and many more.

In addition to individual speakers' presentations, a panel discussion with Mikey Siegel of www.consciousnesshacking.org; Dr. Julia Mossbridge, director of the Innovation lab at the Institute of Noetic Sciences; researcher Dr. David Muehsam of Consciousness and Healing Initiative; and researcher Dr. Beverly Rubik, president of Institute for Frontier Science and board member of the USPA, was convened to explore this emerging technology, the state of the science, ethics, and other issues.

The online summit will take place from February 25-29, 2016 with live interaction with participants and afterwards archived for continued viewing. The event, completely free, is accessible online at <http://www.spiritualtechnologiessummit.com/>.

Dr. Beverly Rubik's presentation is available for viewing at <http://aff.iawaketechnologies.com/referral/?p=drrubik&w=st2>. She will be present online for live discussion on Sunday, February 28 at noon Pacific Standard Time.

We invite you to join us to explore mindful video gaming, biofeedback, brainwave entrainment, flotation tanks, subtle energy devices, and mobile apps designed to "hack" our biology for awakening to transcendent and transformative states of consciousness.

This is a generous offering with paradigm blasting and novel takeaways:

- Get a historical, 50,000 foot view of how the spiritual technology revolution has happened and where we are now.
- Learn directly from the visionaries who have been working on this for decades, and the new consciousness tech crew online
- Engage with speakers and attendees in live chat rooms and enjoy the benefits of belonging to a purpose-shared community.
- Join a live, worldwide meditation session, hosted by Amplifield.
- Receive access to a plethora of free tools created and curated by the innovators themselves, including biofeedback, brainwave entrainment, papers on biofield research and transcendent technologies, subtle energy devices, and apps--designed to hack our biology for awakening to transcendent and transformative states of consciousness.

We live in extraordinary times. The evolution of human consciousness is accelerating with unprecedented momentum. In relation to this, stress and necessity have always the driver of change and evolution. Yet the fossil record does not show the gradual evolution of species as predicted by Darwin. Instead, practically new species and huge evolutionary leaps are found.

Today something similar may be happening in the evolution of human consciousness. A huge and dramatic quantum leap in awareness, capacity, and deep identity is upon us. As Margaret Meade once wrote, "Never doubt that a small group of thoughtful, committed citizens can change the world; indeed, it's the only thing that ever has."

What is Radionics?

by Dr. Linda Lancaster

What is Radionics? It is a method of diagnosis and healing at a distance through the medium of an instrument or other means using what is known as the radiesthetic faculty. In this way a trained and competent practitioner can discover the cause of disease within a living system ie: human, animal, plant or soil. Suitable therapeutic energies can then be made available to the patient or subject to restore optimum health.

To understand Radionics, there must be an awareness that everything is ENERGY. All matter has an energetic aspect or vibration. Radionics uses vibrational patterns to remove energy blockages to restore health. Through the intention of a qualified practitioner of Radionics, the vital force of the patient can be stimulated, infections can be cleared, negative radiations and detrimental forces can be neutralized, and shock can be removed, allowing the patient to heal. Practitioners are trained in Medical Radiesthesia using a Pendulum or a “stick” to find the cause of illness revealing the imbalances and disharmonies within the person. These imbalances can be caused by various environmental factors such as negative radiations, pollution, parasites, heavy metals, chemicals and underlying conditions unique to each person.

All systems of the body are analyzed with regard to optimum function in degrees of deviation. With a Pendulum, organs, systems and cellular function can be measured in electromagnetic energy units. The history of Radionics can be traced back to Atlantean times through Modern-Day Radionics with the work of the distinguished physician Dr. Albert Abrams, Dr. Ruth Drown, Dr. Hazel Parcells, Malcolm Rae, De La War, Hieronymus and many others. Further interest has been inspired by the current scientific knowledge of Quantum Physics. There is now a greater understanding of the Etheric Energy of the Human Anatomy which has opened the door for Energy Medicines such as Radionics to be understood and accepted as a viable tool to analyze and neutralize unseen negative influences. Since the practice of Radionics does not require the patient to be present, it has caused many people to question its efficacy and has only now through proven results given the patient an opportunity to experience the convenience and immediate results that Radionics has to offer as a Healing modality.

Dr. Linda Lancaster, Homeopathic, Naturopathic, Radionics Practitioner

Founder: GFIM Global Foundation for Integrative Medicines

www.gfim-world.com

Founder: Light Harmonics Institute www.lightharmonics.com

Light Harmonics founded by Dr Linda Lancaster, has been in the forefront of Energy Medicine Research. Light Harmonics is a Clinic and Teaching Center for over 30 years, located in Santa Fe, New Mexico

Ed Kelly Featured in Recent Popular Mechanics Article

Ed Kelly, board member of the United States Psychotronics Association (USPA), was recently featured in the October, 2015, issue of Popular Mechanics magazine. In a lengthy article titled ["Spooky Action at a Distance: The Strange Science of Radionics"](#), the author reports on radionics with more objectivity than one is accustomed to in mainstream periodicals. And although the article is somewhat negative in tone, it was not openly mocking, as we have seen in other mainstream articles about radionics.

The author discusses contemporary radionics practitioners, as well as, historical figures, including Albert Abrams, M.D., Wilhelm Reich, M.D., and T. Galen Hieronymus, Ph.D. A significant portion of the article is devoted to Ed Kelly and his [Kelly Research Technologies \(KRT\)](#) company, which was founded by Ed's father, Peter Kelly, in 1984 to manufacture high quality radionics instruments.

In addition, the author discusses quantum entanglement as a possible explanation for how radionics works, although he interviews a physicist about this who is obviously a skeptic. Overall, this article is a good read, and shows an example of how mainstream magazines may be shifting in their attitudes to a more positive view of radionics.

USPA Local Groups and Affiliates Update

As mentioned in the January, 2016, USPA Newsletter, one of our goals is to reactivate all of the former 24 USPA Chapters that once existed across the US and Mexico. In addition, we plan to establish new local groups of people interested in psychotronics and related subjects in other major cities in the US and other countries as well. All such local groups and affiliates will be independent, but will work together with the USPA in a mutually beneficial relationship to achieve our goals of advancing research and applications in psychotronics, radionics, subtle energy, and related fields.

So I would like to invite all of former USPA Chapters leaders and members to contact me (John Reed) at: joreed43@gmail.com and let me know if you would like to help reactivate your local chapter. In addition, if you are a leader or member of a psychotronics or related organization which was never a chapter of USPA, and we would welcome you as a USPA affiliated organization as well.

We will be establishing a USPA affiliated groups as traditional organizations and also via the Meetup.com online group platform. This will enable current and former members to more easily have local get-togethers, meetings, and other activities, and those activities, times, and other details can be posted online. So please let me know if you would like to be the leader of a group in your area.

If you do decide to use Meetup.com to establish your local group, you could do it quickly and easily by going to www.meetup.com , and clicking on the big red word “**Start**” in the upper left, and then just following the step-by-step procedures.

You can give your local group any name you want, but it should probably have a name that relates to psychotronics in some way. And if you need any help, please let me know, and I will help you in any way I can. Perhaps the most important thing is enthusiasm and determination, so write to me, even if you don't know any other USPA members in your area, and I will help you set up a local group: joreed43@gmail.com

Exchange Corner

The “Exchange Corner”, is a place for USPA members to buy, exchange, or sell items of interest, or request information or other help in relation to something wanted. So if there is anything you want to buy, sell or trade that has to do with psychotronics, radionics, subtle energy, or related subjects, please contacted the Classified Ads manager at: usparesearch@gmail.com. For the next few issues, all such ads will be free of charge, so please send your ads and wanted requests as soon as possible before advertising charges begin.

Wanted: Back issues of all psychotronics, radionics, dowsing, and related periodicals. We want to form a complete set for the USPA Library, and to make them available to members as a membership benefit. Contact: usparesearch@gmail.com

Wanted: Any issues of the Newsletter of the American Society of Dowsters, published from 1961 through 1963. These were 8.5X11 inch sheets stapled together, and not the digest size journal that you may be familiar with, which began in 1964. Contact John at: joreed43@gmail.com

Does anyone happen to have the book, **Contact with Space**, by Wilhelm Reich, M.D.? This book was published in New York by Core Pilot Press in 1957, and was the last book Reich published, before the FDA sent him to prison for trying to help treat people with cancer, and then burnt his books. We are aware that it can be purchased for \$50.00 or more from some sources, but would prefer to borrow it and save the money for research. Please email John at: john91373@gmail.com

Wanted: Any articles, periodicals, books, devices, or other materials on psychotronic related subjects that you can donate or lend to the USPA for its library, archives, and museum. **The USPA is a nonprofit, 501(c)(3), tax exempt organization, and as such, you are able to make tax deductible donations to the USPA. Please email the USPA at: usparesearch@gmail.com to make arrangements. Thank you for your generosity.**

Wanted: Articles, notices, and other items to be published in this USPA Newsletter. This newsletter reaches up to 500 people in the psychotronics community, so please tell us about your research and other activities in this field.

WHAT IS PSYCHOTRONICS?

The United States Psychotronics Association defines psychotronics as the science of mind-body-environment relationships, an interdisciplinary science concerned with the interactions of matter, energy, and consciousness. Psychotronics involves the study, research, and applications of the physics and technology of the mind, brain, spirit, consciousness, and the underlying forces of life and nature – hence the term “psychotronics”.

We believe that a true understanding of the universe must include the spiritual, as well as, the technical, and provide an opportunity for amateur researchers to present their findings along with the professionals. We stress research, with documentation of results, and practical applications, rather than personal experience and unsupported hypotheses.

Some of the forces, fields, waves, and energies studied and researched in psychotronics

include: bioelectromagnetism, biophotons, biopotentials, electromagnetic wave pollution and harmful effects; coherent emanations of DNA, emanations of matter, “free energy”, morphogenetic fields, non-hertzian waves, orgone energy, pyramid energy and power, qi (chi), quantum fields, scalar waves, subtle energies, ultra-weak radiation of living matter, zero-point energy, and others.

Some of the phenomena believed to be produced or involved with the above fields and

energies: action-at-a-distance, the aura of the body and other living things, bioinformation, bioluminescence, chakras, consciousness, distant intercellular interactions, meridians of the body, mind-body interactions, non-locality, the placebo effect, quantum consciousness, spontaneous remission of cancer and other diseases, water memory, water structure, and others.

Related fields of study and research covering the above forces, energies, and

phenomena of psychotronics: bioelectromagnetics, bioenergetics, biophotonics, biophysics, psionics, psychoenergetics, psychoneuroimmunology, quantum biology, radionics, scalar electromagnetics, and others.

Some practices, techniques, and applications related to psychotronics include:

acupuncture, biogeometry, brain entrainment, clairvoyance, dowsing, energy healing and medicine, extrasensory perception, feng shui, homeopathy, kirlian photography, magnetic therapy, pendulum use and methods, prayer effects, psionic medicine, psychic healing, psychometry, qigong, radiesthesia, radionics, remote viewing, shamanism, sound and sonic healing, telekinesis, telepathy, and others.

Some Prominent People in the history of psychotronics research and application:

Albert Abrams, Thomas Bearden, Robert C. Beck, Robert O. Becker, Jacques Benveniste, David Bohm, Harold Saxon Burr, George W. Crile, Ruth Drown, T. Galen Hieronymus, Vlail P. Kaznacheyev, Georges Lakhovsky, Wilhelm Reich, Royal R. Rife, Rupert Sheldrake, Nikola Tesla, Marcel Vogel, and others.

Membership Benefits

So if you are interested in any of the above subjects, then the USPA is the place for you, where you can interact with, exchange ideas, and collaborate with other people who are interested in the same subjects. So sign up now for membership in the USPA using the form on the following page and start enjoying all of your membership benefits. These benefits include, but are not limited to:

1. **Free access to the USPA Psychotronics Library** of articles, periodicals, books, and certain audio tapes, videos, and other materials on the above subjects, useful to your research.
2. **Your free subscription to the USPA Newsletter;**
3. **Your right to freely publish articles in the WISE Journal - The Journal of the World Institute for Scientific Exploration (ISSN 2381-1536),** enabling the world to see your ideas or research, and thereby enhance your resume and credentials;
4. **Your right to use the USPA Literature Research Service,** whereby we will find any article, book, or other item you are seeking on the above subjects, and provide it to you;
5. **Your right to participate in the USPA "Research Assistance Program",** especially useful to professors, authors, and other researchers, who need extra help on their projects. USPA will help find volunteers to help you with your research project(s).
6. **Your right to be part of the USPA Project Participation Program,** whereby you can volunteer to help on numerous available USPA projects, or help researchers who are conducting research on psychotronics and related subjects.
7. **Your right to make oral or poster presentations at the annual USPA meeting,** with the approval of the Annual USPA Meeting Planning Committee.
8. **Your right to discounts** on the purchase of certain items and services made available for sale or provided by the USPA and its members.
9. **Your right to freely advertise in the WISE Journal,** which goes out to thousands of people.
10. **Your right to participate in the USPA Psychotronic Literature Preservation Program (UPLPP).** The USPA, via its Library and Archives, has established a "Literature Preservation Program" to preserve your personal papers, files, records, and collection of articles, periodicals, books, and devices on psychotronics and related subjects, noted above. You may no longer need or use some of these items that you have, and you can send them to the USPA, and we will preserve them in our library and archives, so that they can be of use to other researchers.

MEMBERSHIP INFORMATION

The U.S. Psychotronics Association (USPA), was incorporated in the District of Columbia in August, 1977, and is a nonprofit, 501(c)(3), tax exempt organization, and as such, you are able to make tax deductible donations to the USPA. It is empowered to enroll members in the parent organization throughout the United States, Canada, and other foreign countries. Membership is open to all people who wish to join with the USPA on the new frontiers of science in working constructively for the qualitative improvement of man and his environment. **Please remember the USPA in your annual charitable giving, especially if you want to advance research in the above subject areas, which can greatly benefit humans, animals, plants, and the environment.**

USPA MEMBERSHIP APPLICATION

[Online Membership Application: click here.](#)

Mail-in Applications: Please print out this page, fill in your information, check the appropriate spaces, and send to the USPA Membership Secretary at the address at the bottom of this page:

Your Name: _____

Mailing Address: _____

City: _____ **State:** _____ **Zip:** _____

Country: _____

Phone: _____ **email address:** _____

Type of Membership desired:

General: ____ \$35 (1 yr.)

AMOUNT ENCLOSED: _____

Please check the appropriate items below that apply to you:

____ List me/us in the USPA membership directory with the following

Interests: ____ General ____ Healing ____ New Age Physics

____ Radionics/Dowsing ____ Subtle Energy Research

Other Interests, please specify: _____

____ Do not list me in the USPA Directory

Payment (in U.S. funds only) by:

____ Check or Money Order enclosed (Payable to USPA)

____ Visa ____ MasterCard

Charge Card # _____ Exp. Date _____

Signature _____

Please send to the USPA Membership Secretary:

Gail Ruggles
