WHAT IS PSYCHOTRONICS?

Beverly Rubik, Ph.D.
President, USPA

Psychotronics originally referred to the mind (*psycho*) operating devices (*tron*) with thought. This term came out of parapsychology in the 1960s in Czechoslovakia. The early psychotronics researchers conceived of and built psychotronic generators—sacred geometrical forms composed of pyramids and cones along with crystals, copper coils, and other materials. Unlike most machines, these devices were “operator dependent”—having various effects depending upon the operator and the directed intention—and demonstrated positive effects on people, animals, plants, and processes.

Today our interests are more broadly based. The US Psychotronics Association (USPA) investigates and applies science and technology to interactions of mind, matter, spirit, consciousness, and the underlying forces of life and nature. Psychotronics challenges the dominant scientific worldview because it deals with the power of consciousness to interact directly with the physical world, which is not considered in mainstream science. However, numerous lines of scientific and other evidence point to severe limitations of the dominant paradigm, which holds that consciousness is only a passive observer. We are among those mavericks shaping the new worldview in which consciousness plays an active role in generating physical reality.

Our membership is quite diverse and fascinating. Some USPA members are frontier scientists conducting research on the effects of intention and subtle energy healing on systems such as structured water and its memory, plant growth, and the integrity of DNA. We are also concerned about the impact of electromagnetic pollution from the proliferation of wireless devices in our environment and how to protect ourselves. Other members are practitioners and teachers of radionics, using directed intention to assess and improve the well-being of living systems through the use of radionics devices, pendulums, and dowsing rods. Still others practice energy therapies ranging from hands-on healing to use of sound and light therapies, homeopathy, Oriental medicine, and other complementary modalities. Some members are skilled intuitives who can assess the biofield and subtle energy directly, without any tools. Still others are exploring psychotronics for personal growth and evolution. Despite our differences, we have much in common as we are all open-minded persons focused on expanding our understanding of nature, consciousness, and the full human potential. We enjoy camaraderie and sharing our new learning with one another.

One main focus of the USPA is the existence of a cosmic energy or bioenergy, also called *qi* in Oriental medicine and *prana* in Ayurveda—associated with the biofield

or life force. Energy may be mobilized with directed intention, which corresponds to the principle of ancient Eastern philosophy—“where mind goes, the *qi* flows.” Psychotronics devices may serve as resonators or conduits of a cosmic energy affecting living systems at a physical level. The biofield, the energy field of each organism, is also fundamental.

Is this cosmic energy an aspect of science that has somehow been overlooked, or a new form of energy? We are taking a deeper look at the science of Nikola Tesla, among other pioneering scientists, who have been largely ignored. We are also revisiting the “aether” in physics that was displaced by a materialistic worldview, but may actually be the quintessence underlying physical reality, and the etheric body in radionics, to expand the scientific perspective.

The theme of our 40th annual US Psychotronics Association conference is, “Mind, Matter, and Aether: Applications to Radionics.” Recently I had a conversation with Dr. Jeffrey Mishlove about the event, which he produced into a short video: <https://youtu.be/hR8APqBbgCg> Dr. Mishlove, a parapsychologist, who is also an invited speaker at our event, spoke with me about his upcoming presentation in another short video: <https://youtu.be/iWkRElpYTml> Our 2018 conference features 20 speakers, with more invited speakers than ever before and promises to be one of our best. All are welcome to attend. We look forward to seeing you there!

Mind, Matter and Aether: Applications of Radionics

Distinguished Speakers Include:

Drs. J.J. and Desiree Hurtak – *The Power of Music and Sound for Mental Consciousness Upliftment*

Dr. James Oschman – *Structure and properties of the Quantum Information Field*

Dr. Jeffrey Mishlove – *Highlights of Psi Research*

Dr. Patrick Bailey – *New Energy Technologies and the Scientific Basis of Alchemy*

Pete Radatti – *Practical Innovations for the Radionics Practitioner*

Dan Davidson – *Aetheric Physics: Cosmic Structure and Aether Function*

Stephen Quong – *Radionics Broadcasting of Sanskrit Mahamantras*

Dr Lauren Palmateer – *Opening Organs of Perception: The Human Body Antenna*

Dr. Beverly Rubik – *Overview of Psychotronics: Intention meets Technology*

Dr. Glen Rein – *The Etheric Nature of Life Force*

Dr. Linda Lancaster – *Understanding the Etheric Body*

2018 USPA Conference Schedule

Friday, July 20, 2018

1:30 pm	2:30 pm	Welcome; "Overview of Psychotronics: Intention Meets Technology"	Beverly Rubik
2:40 pm	3:05pm	"The Luminiferous Aether: Its Role in the History of Science"	Scott Beutlich
3:15p pm	3:40 pm	"Pyramids Generate Scalar Waves and Create Orgone Energy As An Antenna With the Proper Orgone Covering"	Mary Hardy
3:40 pm	4:00 pm	BREAK	
4:00 pm	4:30 pm	"Programming Plants with Frequency Information"	Marty Lucas
4:40pm	5:25 pm	"Using Etheric Energy to Heal"	Aimee Whalen
5:25pm	7:15 pm	DINNER on your own	
7:30 pm	8:30 pm	"The Power of Music and Sound for Mental Consciousness Upliftment"	JJ & Desiree Hurtak

Saturday, July 21, 2018

8:30 am	8:40am	Welcome and Announcements	Beverly Rubik
8:45am	9:45am	"Highlights of Psi Research"	Jeffrey Mishlove
9:55 am	10:30am	BREAK and EXHIBITION	
10:30 am	11:15 am	"Understanding the Etheric Body: The 4 Ethers and Subtle Forces in Radionics"	Linda Lancaster
11:25am	12:25pm	"New Energy Technologies and the Scientific Basis of Alchemy"	Patrick Bailey
12:30pm	2:00 pm	LUNCH on your own and EXHIBITION	
2:00pm	3:00 pm	"The Case for Radionics Broadcasting of Sanskrit Mahamantras"	Stephen Quong
3:10 pm	4:00 pm	"The Etheric Nature of the Life Force"	Glen Rein
4:00 pm	4:30pm	BREAK and EXHIBITION	
4:30pm	5:30 pm	"Practical Innovations for the Radionics Practitioner"	Pete Radatti
5:30pm	6:00pm	EXHIBITION and One-Minute Presentations by Exhibitors	
6:00 pm	7:00pm	EXHIBITION and No-Host Bar	
7:00pm	9:30 pm	USPA DINNER with focused discussions and/or networking (advanced ticket sales only)	

Sunday, July 22, 2018

8:45am	9:30am	"Quantum Agriculture in India 2018"	Lutie Larsen
9:40am	10:40am	"Structure and Properties of the Quantum Information Field: Implications for Homeopathy and Morphic Resonance"	James Oschman
10:40am	11:10am	BREAK and EXHIBITION	
11:15am	12:00pm	"Aether: The Dynamic Substrate of Physical Reality"	Beverly Rubik & Harry Jabs
12:10pm	1:10 pm	"Aetheric Physics: Cosmic Structure and Aether Function"	Dan Davidson
1:10pm	2:30pm	LUNCH on your own and EXHIBITION	
2:40pm	3:40pm	"Opening Organs of Perception: The Human Body Antenna"	Lauren Palmateer
3:50pm	4:20pm	"Eclipse Lore and Results of 3 Solar Eclipse Experiments"	Harry Jabs
4:30pm	5:15pm	"Accessing and Supplementing Morphogenetic Fields with Radionic Coding Via the Ether"	Daniel Taylor
5:15pm	6:00 pm	USPA MEMBERSHIP MEETING and ELECTION	USPA-BOD
6:00pm	6:15pm	Election Results; Final Remarks and Farewell	USPA-BOD
6:15pm	6:45 pm	EXHIBITION open until 6:45pm—END OF CONFERENCE	

A Non-Profit, all volunteer organization, 501c(3)

The United States Psychotronics Association presents:

Radionics 101

An Introductory Workshop on Radionics and Dowsing

July 19-20, 2018

(registration begins at 1:00 pm on, July 19; sessions start at 2:00 pm)

The Hyatt Regency Hotel

Deerfield, Illinois

As a prelude to the 2018 U.S. Psychotronics Conference, we are offering a short, practical introduction to radionics, beginning early afternoon on July 19th. The workshop is designed for novice practitioners and prospective students, as well as for those simply wanting to learn what radionics and psychotronics is all about. It will combine visual and explanatory presentations with several “hands-on” sessions, so participants get a real feel for what radonics practitioners do.

This workshop will be an excellent entrée to formal training in radionics. Students will learn fundamental theory, the design and role of instrumentation, and get an overview of the many applications of this cutting edge art and science. More importantly, much of the program will be hands-on. There will be several opportunities to experience the radionics “stick” and/or dowsing response, which is key to instrument operations in radionics and in radiesthesia.

During the program, participants will receive numerous handouts and other literature, some basic dowsing tools, and their own radionics template for what we hope will be the start of rewarding adventure in radionics.

All teachers are members of the USPA Board of Directors. Each has many years of experience in the practice of radionics and, collectively, their experience covers a wide range of applications:

Scott Beutlich is a former Director and current officer of the US Psychotronics Association (USPA), as well as the son of one its founding members. Scott will open the program with a brief history of the USPA and its role in promoting radionics through education.

Scott will be followed by George Kuepper--a long-time radionics practitioner, Biodynamic grower, and owner of Midsouth Radionics, who will give a quick history of radionics and an overview of its many applications to human and animal welfare, farming and gardening, and the environment.

Marty Lucas, the owner of Every Advantage Consulting, is a former president of the American Society of Dowzers and a certified organic farmer. Marty will lead a hands-on session on basic dowsing using traditional tools like pendulums.

Following dinner, Lutie Larsen, a noted teacher, practitioner, and the owner of Little Farm Research, will provide further hands-on training using a radionics template. The template is a simple device for basic skills training that includes finger-stick dowsing, the use of witnesses and rates, taking measurements, and broadcasting.

The following morning, Ed Kelly, the President of Kelly Research Technologies—a manufacturer of radionics instruments—will give everyone an “under the hood” look at radionics devices, to demystify the how and why of instrument construction and function. He will also guide a short exercise in instrument operation, to afford students another hands-on learning opportunity.

Dr. Linda Lancaster, a Board Certified Naturopathic Physician, Homeopath, and founder of the Light Harmonics Institute, will wrap up the program by discussing the principles of radionics and the evolution of this cutting edge science.

The workshop will come to a close at noon, prior to the USPA Conference, which kicks off at 1:30 pm. Workshop participants are encouraged to stick around!

Our Schedule To Date

Thursday, July 19, 2018:

1:00 pm-2:00 pm	Registration	
2:00 pm-2:30 pm	Welcome; About the USPA	Scott Beutlich
2:30 pm-3:30 pm	Overview of Radionics	George Kuepper
3:30 pm-3:45 pm	Break	
3:45 pm-5:30 pm	Dowsing Workshop	Marty Lucas
5:30 pm-7:30 pm	Dinner & Break	
7:30 pm-9:00 pm	SE.05 Workshop	Lutie Larsen

Friday, July 20, 2018:

8:30 am-10:00 am	About Radionic Instruments	Ed Kelly
10:00 am-10:15 am	Break	
10:15 am-12:00 pm	The Fundamentals of Radionics	Linda Lancaster

12:00 pm

Lunch...followed by conference.

KRT Radionics Workshops: **Chicago, Illinois**

Kelly Research Technologies is very proud to support the **U.S. Psychotronics Association's 40th Annual Conference**, to be held in Chicago on **July 20-22, 2018**. The USPA is a non-commercial, not-for-profit organization that supports research in "psychotronics" - the science of mind-body-environment relationships, and interactions of matter, energy, and consciousness. Because the USPA is dedicated not just to radionics, but also the broader spectrum of esoteric phenomena, this meeting will present research and information from a wide variety of disciplines. The theme of this year's conference is ***Mind, Matter, and Aether: Applications of Radionics***.

KRT founder Peter J. Kelly was a founding member of the USPA in 1975, and KRT's Ed Kelly has been a member of the USPA's Board of Directors since 2011. For more information about the USPA and the 2018 conference please visit: www.psychotronics.org.

Immediately following the USPA conference, on **July 23 and 24**, KRT's Ed Kelly will be deliver **Basic Radionics**, a two-day course covering the fundamentals of radionics, including analyzing and balancing of soil and water samples using a Hieronymus-type variable capacitance radionic instrument. This hands-on workshop will equip participants with the tools needed to immediately apply radionics at their homestead or farm. Space is limited, so register to participate today!

BASIC RADIONICS: July 23-24, 2018

Chicago, Illinois

An introduction to the basic theory and hands-on operation of the radionic instrument. This course is designed for the brand-new beginner and anyone wanting a refresher on the basics. Topics include:

- History and Theory of Radionics
- Samples and Witnesses
- Energetic Analysis and Balancing
- Water & Plant/Soil Analysis Worksheets
- Use of Reagents: Physical and Electronic
- Basic Rate Scanning/Electronic Dowsing

Participants will practice using and developing a touch for the radionic instrument by completing analysis worksheets on water and soil samples brought from home or taken at the site of the class, then utilizing the instrument in the broadcast mode to energetically balance those elements.

Each individual and family/friend enrollee will be provided with following materials and information:

- *Radionics - Book 2: Applied Radionics*
- Set of 10 KRT radionic worksheets
- One 300 ml Griffin beaker
- One year: Kelly Research Report

Individual Enrollment	\$400.00
Retake or with Purchase of a New Instrument	\$200.00
Instrument Rental (Supplies are limited!)	\$50.00

SPECIAL OFFER! Save \$50.00 on your enrollment with each new student you bring to the workshop. *The more folks you bring, the more you save!*

Enroll today!

Call: **706-782-2524** or email: cathie@kellyresearchtech.com

- Who:** Courses taught by Ed Kelly, President of KRT. Ed is a uniquely qualified instructor with a lifetime building radionic devices and writing about this amazing art.
- When:** Classes will run from 8:30 am to 5:00 pm on July 23 and 24, with breaks.
- Bring:** Any Hieronymus-type two-dial radionic instrument, plus samples of water, soil, plants, and/or animals from home. *Please order as soon as possible if a new instrument is required from KRT.* A limited number of instruments will be available for rent.
- Where:** All workshops will take place at the Deerfield Hyatt Regency located at 1750 Lake Cook Rd, Deerfield, IL 60015. See the web page at: <http://tinyurl.com/jtgv6oq>. Special room rates of \$119.00 have been secured for USPA and KRT workshop program participants and includes two breakfast vouchers per night booked. Call for reservations at (847) 945-3400 and ask for "USPA".
- Food:** Participants will be responsible for their own meals.
- Enroll:** All prices are in US dollars. All registration must be paid by credit card or PayPal. Call to enroll via credit card at (706) 782-2524, or complete and fax the following enrollment form to (706) 782-1047. PayPal payments should be directed to: sales@kellyresearchtech.com. Send other correspondence to KRT, Inc., PO Box 128, Lakemont, GA, 30552, USA. Enrollment will be refunded upon request in the event a participant cannot attend, less a non-refundable fee of \$75 each. *New student registration offer can reduce class enrollment fee(s) to zero, then accrues as credit for purchases from the KRT catalog.*

NOTE: The universal radionic concepts covered in class will equip participants to conduct radionic research in any area of interest. However, human health issues cannot be covered at any time. Regrettably, any questions concerning human health will have to be declined.

Judy Lynne Cole to Give Two Workshops Following USPA Conference

On July 23 and 24, 2018, after the USPA Conference, Judy Lynne Cole will be offering two different post conference workshops on these topics: 1) Innovations in Sound and Light and 2) Time and Valence. Each is described below:

WORKSHOP ONE

Innovations in Sound and Light

Level: Beginner or Introductory

July 23 and 24, 2018

Monday and Tuesday Afternoons:

1-4:30 P.M.

The information presented will be related to innovations in sound and light, and different applications for water sonication, such as hydroponics, cormorant behavior modification, stress reduction and cetacean communication.

Participants will have an opportunity to experience portions of The Cole Fusion Protocol. *

The Introductory/Beginner workshop has a fee of \$111.00, a deep discount off the normal \$222.00 fee for presentation of this material.

* * * * *

WORKSHOP TWO

Monday and Tuesday Evenings:

6-9 P.M.

Time and Valence

Level: Intermediate

July 23 and 24, 2018

Monday and Tuesday Evenings:

Workshop topics:

Monday Evening: Energetic ebbs and flows are excellent sets of information which can be used as tools for analysis after you understand how this relates to the level of overall System functioning.

Tuesday evening: How to use circadian rhythm and time anomalies to determine what

valence, spinal segment , integral pair and the importance of co-factors.

Judy's research, belief system, and experience is that a System out of attunement can be retuned with layered applications of Coherent and Isomorphic Sympathetic Vibratory Physics.

Tools to consider for resetting circadian rhythm and calming sympathetic nervous system overdrive which will be introduced are: Radionics, OMNiSound, Essential Oils, Prisms, Noise Reduction, Eye Exercises, Nutrition, Tuning Forks, Light and Positioning techniques for optimization of applications of recurrent resonances. *

The Intermediate workshop has a fee of \$222.00, a deep discount off the normal \$500 fee for presentation of this material.

Class Size of each workshop is limited to 20 participants.

***Note regarding the above workshops: human health issues cannot be covered at any time. Regrettably, any questions concerning human health will have to be declined.**

No Radionic equipment is necessary for any of Judy's informational and optional experiential workshops. Radionics will be discussed and demonstrated.

10% of the proceeds of each class are donated to The US Psychotronics Association.

Dual participation in both the afternoon and evening workshops will give the participant a discount coupon redeemable on select classifications of one Healing Partnerships product purchase.

Registration is to be paid prior to the workshops. Square, Stripe, Paypal, Check, Money Order or Cash will be accepted.

Please indicate interest in either or both workshops by Judy by emailing her at sonformula@hotmail.com or calling her at (260)249-3893.

For more information, please visit www.healingpartnerships.info

To Your Health!

Dr. Beverly Rubik Discusses the Biofield with Dr. Jeffrey Mishlove ([39 minute video](https://www.youtube.com/watch?v=fnrF_MKQwKg&t=21s))

https://www.youtube.com/watch?v=fnrF_MKQwKg&t=21s

Beverly Rubik, PhD, is a biophysicist and is president and founder of the Institute for Frontier Science in Emeryville, California. She has authored dozens of scientific papers regarding the human biofield, psychotronics, psychic healing and other aspects of cutting-edge science.

Here she addresses many aspects of biological energy fields, including electromagnetic and photonic. She also describes a subtle energy detector that she has developed in her laboratory that is capable of registering human emotions, even when shielded from all known forms of electromagnetic or acoustical radiation. She also describes her work with high voltage, digital photography of the corona discharge from human fingertips. (Recorded on December 15, 2017)

New Thinking Allowed host, Jeffrey Mishlove, PhD, hosted and co-produced the original Thinking Allowed public television series. He is author of *The Roots of Consciousness*.

For a complete, updated list with links to all New Thinking Allowed videos -- as well as many other opportunities to engage with and support the New Thinking Allowed video channel -- please visit the New Thinking Allowed Foundation at <http://www.newthinkingallowed.org>.

Newly Discovered Psychotronics Related Organizations and Periodicals, April, 2017

A number of newly discovered psychotronics related organizations and periodicals have been identified since the last issue of the **USPA Journal and Newsletter**. These organizations and periodicals, some of which ceased operation many years ago, are listed below, with brief information. **If you know anything about these organizations, please contact the editor.** The periodicals have been added to the master list of psychotronics periodicals in the **USPA Periodicals Library section** of this journal. We are seeking copies of all issues of these periodicals, which we plan to digitize and make available to our members as a USPA membership benefit. So if you have any issues the periodicals listed below or any of the missing issues of the periodicals listed in the USPA Periodicals Library section of this Journal, please let the editor know by emailing him at: joreed43@gmail.com.

Organizations:

European Confederation of Magnetizers and Radiesthesists (Confédération Européenne des Magnétiseurs et des Radiesthésistes (COEMARA)): This organization was founded in Paris, France, in 2000. COEMARA focuses on radiesthesia, dowsing, and magnetic healing. It is unknown if this organization ever published a periodical of any kind, and it has no known website.

Pathometric Society: This is an alternative name for the Universal Society of Pathometrists, which was profiled in the December, 2017, issue of the USPA Journal and Newsletter.

International Society of Psychosomatic Energetics (Internationale Gesellschaft für Psychosomatische Energetik (IGPSE)) : This organization was originally founded in the early 2000's in Bregenz, Austria, and later moved to Zurich, Switzerland, its present location. It focuses energy healing and training, to become "Certified Energy Therapists in the Methods of Psychosomatic Energetics® (PSE)". It is unknown if this organization ever published a periodical of any kind, but it does publish numerous research reports and an annual anthology of research articles. Its website is: <https://www.igpse.ch/en/>

Periodicals: (all added to the master list of USPA psychotronic periodicals)

Bioenergetik (ISSN: 0933-6176): This was a periodical published in Bruchsal, Germany, by Energetik-Verlagby. It focused on Kirlian Photography and bioelectrical diagnosis and therapy. This periodical began with issue No. 1 in 1986, edited by internationally known researcher Dr. Marco Bischof. Bioenergetik continued being published through issue No. 17 in 1991, when it ceased publication. **The USPA Library needs all issues of this periodical.** Only four libraries in the world are known to have this periodical in their collections: 1) National Library of Medicine in Bethesda, Maryland, 2) The Badische Landesbibliothek in Karlsruhe, Germany; 3) The Deutsche Nationalbibliothek in Frankfurt am Main, Germany; and 4) The Württembergische Landesbibliothek in Stuttgart, Germany. If any readers live near any of these libraries, it would be greatly appreciated if you would xerox any of these issues that you can, and send them to the USPA Library. Please write to the editor (John Reed) ahead of time if you are willing to help: joreed43@gmail.com.

Transactions of the American Electro -Therapeutic Association (AETA): This was a periodical published in New York, NY, by the AETA. It focused on the activities of the AETA, especially the presentations and other activities at their annual meetings. This periodical began in 1891 and continued through at least 1909, but it is uncertain if any issues were published after that date. **The USPA Library needs all issues of this periodical.** Only one library in the world is known to have this periodical in their collection: The University of Michigan. If any readers live near this library, it would be greatly appreciated if you would xerox any of these issues that you can, and send them to the USPA Library. Please write to the editor (John Reed) ahead of time if you are willing to help: joreed43@gmail.com;

Short News, Notes, and Queries

(If anyone would like to make a short news announcement, report something, has a question about anything related to psychotronics and related subjects, or has any information or comments about any of the following notes and queries, please write to the editor, John Reed at: joreed43@gmail.com)

1. **USPA Local Chapter Newsletters**

The US Psychotronics Association (USPA) once had 26 local chapters, some of which published local newsletters for their members. Does anyone have copies of any of these local USPA chapter newsletters? If so, we would like to obtain copies of any issues for the USPA Library and Archives. Please write to the editor, John Reed at: joreed43@gmail.com .

2. **USPA Membership Directories**

Does anyone happen to have any copies of old US Psychotronics Association (USPA) membership lists or directories? These were put out in the past, but USPA has not published a membership directory or list for many years. We would like to get any past USPA membership directories for the USPA Library and Archives. Please write to the editor, John Reed at: joreed43@gmail.com.

3. **Does anyone know the whereabouts and/or contact information of Dr. Robert N. Miller?** At the 1978 USPA Conference, Dr. Miller gave a presentation with Pierre Paul Sauvin titled “ Methods of Detecting and Measuring Healing Energies.” That was the only time that Dr. Miller ever spoke at a USPA conference, and we would like to follow up with him on any research he has done since that time.

4. **Journal Title Correction:** You may recall that some time ago we listed “Electrus Newsletter” as one of the periodicals in our USPA Psychotronics Periodicals Library section. We have discovered that the full title was actually “Electrus Newsletter on Bioelectronics” This periodical was published by the American Institute of Archives located in Keene, Texas, in the early 1990s. It was edited by Mark Simpson, author of the book, The Rife Way III, and focused on Royal R. Rife research and bioelectromagnetics. It began with Issue #1 (August, 1990) and published at least two issues, with the second being Issue # 2 (November, 1990). We are still searching for these two issues, and any other issues that may have been published.

5. **Radionics Blog Owner Found:** As you may recall, we recently had a short note asking if anyone knows who the author – owner is of the radionics blog at <https://radionics spectro.com/> Because it is one of the finest blogs covering radionics and psychotronics subjects on the entire Internet, we wanted to identify the owner and compliment him on all the very useful and informative articles he has written. We knew his first name was Carl, but nothing else. We are happy to report that through the help of one of our readers, we were able to determine that the blogger's name is Carl Comier, who lives in Canada. We urge you to visit his very informative website at the link above.
6. **Does anyone have any periodicals, books, article clippings, devices, or other items about radionics, psychotronics, or related subjects that you would like to have preserved in the USPA Library, Archives, and Museum?** If you no longer need or use the items you have, or if you have a relative who has passed away and was once interested in psychotronics subjects, we would be happy to preserve those items in their name. Please contact John Reed at: joreed43@gmail.com
7. **Mangrove College for Radionics:** Does anyone know anything about the Mangrove College for Radionics, and if it ever published a periodical of any kind? Its address at one time was: 1313 N. Market St., Hercules Plaza Suite 3410, Wilmington, Delaware 19801, although this appears to be a mail box service location. It was once headed by a Dr. P. W. Meier.
8. **Do any of you happen to know anything about the Paraphysical Laboratory that was founded in the UK by Benson Herbert in 1966, or have any issues of the Journal of Paraphysics that he published for more than 20 years?** Mr. Herbert's laboratory was located at Privett Farm, Downton, Wiltshire, England, between Salisbury and Southampton. His mission included an attempt to provide a workable theory and physical explanation for paranormal phenomena, including telepathy, remote viewing, dowsing, and other extraordinary abilities and phenomena. Unfortunately, Benson Herbert died in 1991, and no one seems to know what became of the papers and records of the laboratory, or if he even had any family, who might be able to shed light on this. So if you know anything about Benson Herbert or have any issues of his periodical, please contact the editor at: joreed43@gmail.com.
9. **A comprehensive bibliography of articles on biophotons, subtle energies, and related subjects has recently been discovered via the Wayback Machine.** This bibliography was compiled by Dr. Marco Bischof in 2006 and includes over 1,700

articles and monographs on these subjects, dating back to the early 1900s. They include the works of such pioneers in this field as Dr. Alexander Gurwitsch, Dr. Harold Saxton Burr, Dr. Fritz Popp, and many others. Most citations are from peer reviewed journals. [This bibliography is available here for your use.](#)

10. **We have been recently informed that one of the radionics devices that Jerry Gallimore invented in the 1970's or 1980's used a GSR meter in place of a stick plate.** Does anyone happen to have or know anything about this particular device? Such a device would be very significant, because if there is a such a radionics device that can be successfully used without a stick plate, which depends on the sensitivities and subjectivity of the user, it would enable nearly anyone to use that radionics device. One of the problems that beginners in radionics often have is the detection of the "stick", on the stick plate, and some people are never able to develop this ability.
11. **Do any of you know anyone who has ever owned, used, or did research on the Dotto Ring?** This was an electrotherapy treatment device, pictured at left, developed by Gianni Dotto back in the 1970's and is said to have been was used successfully to treat cancer and other diseases in humans and animals. In addition, the Dotto Ring was also said to be able to slow down the aging process and even rejuvenate individuals to some degree.
12. **Does anyone know anything about a man named William Lehr (1933-1996), who lived in Scammon, Kansas, and who developed several energy and healing devices, and made a reproduction of the T. Henry Moray energy device?** In addition, Lehr is said to have created a high-powered spark-gap device for healing purposes that cured a man who had been sent home to die, as well as a huge bibliography of articles and books dealing with new energy sources and energy medicine and treatment.
13. **Does anyone have video tapes of the presentations that Andrija Puharich made at the 1982 US Psychotronics Association Conference?** The title of Dr. Puharich's first presentation was: "Chemical Compounds: Receptors of Artificial ELF", and was sold for a period of time on the USPA website with this title and catalog number F6.

The second presentation that Dr. Puharich made at the 1982 USPA Conference was the Keynote Address at the Awards banquet. The Title of this presentation was "Kindling + 1" and had catalog number F7. If anyone has either or both of these tapes, please contact the editor, John Reed at: joreed43@gmail.com.

Andrija Puharich, Chemical Compounds: Receptors of Artificial ELF (1982) F6

Andrija Puharich, Keynote Speaker:, Kindling +1; Awards Banquet (1982) F7

14. **Art Tool and Die Company:** Does anyone know anything about the Art Tool and Die Company that was located in Detroit, Michigan, in the 1930s and 1940s, and apparently manufactured radionics devices? It has been referred to in a number of publications on radionics, psychotronics, and related subjects, but it is not clear what devices they manufactured.

US Psychotronics 2017 Conference DVD Order Sheet			
DVD	No.	Name	Presentation Title
	2017-1	Jon Klimo, Ph.D / Scott Beutlich	Welcome / USPA "Ted Talk"
	2017-2	Nick Begich	Mind Control: A Brave New World or Enhancing Human Performance
	2017-3	George Kuepper	Radionics & Biodynamics in the Garden: Tuning in to Nature
	2017-4	Lorna Reichel	Unseen Worlds of Subtle Energy
	2017-5	Don Paris	Consciousness Interactive Technology in the 21st Century
	2017-6	Glen Rein	The Holographic Nature of the Mind and its Role in Mediating Higher Order Healing Phenomena
	2017-7	Beverly Rubik and Harry Jabs	The Memory of Water and Beyond
	2017-8	Michael Leger	21st Century Radionics – Theory and Practice
	2017-9	Ed Kelly	Radionics: Easy as 1-2-3!
	2017-10	Jon Klimo, Ph.D.	Nonlocality, Higher-dimensionality, and Radionics
	2017-11	Judy Lynne Cole	K.I.S.S. "Hello" to the Next Collaborative Revolution in the Industries of Health, Art and Music
	2017-14	Linda Lancaster	Endocrine System and its Role in Radionics
	2017-15	Ellen Kamhi	Pineal Stimulation for Higher Health and Consciousness: Radionics - Dowsing - Botanicals
	2017-16	Elizabeth Rauscher	Psychotronics, PSI and Consciousness: A New Revolution
	2017-17	Dan Taylor	History and Overview of Radionics
	2017-18	Marty Lucus	Higher Octaves of Physical Frequencies
	2017-19	Rainer Fromknecht	Body – Water as a Conducting System for Electromagnetic Information
	2017-20	Craig Dongoski	Mental Radio
	2017-21	Scott Ertl	Magnetism and Polarity

2016 US Psychotronics Post-Conference DVD Order Sheet

MP4	DVD	ID	Speaker and Lecture Title
		2016-1	Dr. Beverly Rubik & Harry Jabs- "Geometry Coupled with Intention: Effects of a Pyramidal Structure"
		2016-2	Dan Taylor - "The Physics of Radionics – USPA Luminaries Light the Way"
		2016-3	Panel Discussion- "Subtle Energy w/ E. Kamhi, J. Klimo, G. Rein, E. Rowley, B. Rubik, W. Tiller, Dan Taylor"
		2016-4	Ed Kelly - "The History of Kelly Research Technologies"
		2016-5	George Kuepper - "Practicing Radionics for Farming and Gardening: Past, Present and Future"
		2016-6	Tim Lippert - "Elimination of Lyme Disease, Allergies, and the use of Radiation Hormesis"
		2016-7	Dr. Don Paris - "The Latest Advances in Radionics"
		2016-8	Lutie Larsen and Linda Lancaster - <i>Radionics Cameras of the 1900s</i>
		2016-9	Marty Lucas - "Geometry and the Shape of Disease"
		2016-10	Panel Discussion - "Radionics / G. Kuepper, E. Kelly, L. Larsen, L. Lancaster, T. Lippert and D. Paris"
		2016-11	Dr. William Tiller - "The Power of Human Intention and its Many Applications"
		2016-12	Gayle Mack - "Spiral Breath and the Glia Brain: Activate Higher Consciousness"
		2016-13	Tom Masbaum - "Consciousness - Some Effects of Emotions and Memories on the Body"
		2016-14	Judy Lynn Cole - "Phase Shifting"
		2016-15	Dr. Glen Rein - "Subtle Light Energy and the Substratum: Bio-Physics and Mysticism"
		2016-16	Dean Radin - "Skype: Mind-Matter Interactions at the Quantum Level"
		2016-17	Geoffrey Miller - "Free Energy 30 Years Ago and Where We are NOW in 2016"
		2016-18	Ellen Kamhi - "Herbs, Dowsing, and Radionics: Self-Care Techniques for the Coming Times"
		2016-19	Dr. Karl Maret - "Exploring Subtle Energies in Energy Medicine"
		2016-20	Dr. Jon Klimo - "Radionics: Working with the Post-Cartesian Unified Field"
		2016-21	Kenneth Diehl - "Subtle Energy Relationships in Human Form and Function"
		2016-22	Mary Hardy - "Balancing the Grid so the Schumann Resonance Does Not Affect Human Consciousness"
		2016-23	Dr. John Reed - "Evidence Based Psychotronics"

Among the Missing, (and Updates): A Column about Missing People, Organizations, Periodicals, Books, Artifacts, and Collections in the Psychotronics Field

by John H. Reed, M.D

This is a new “column” or section of the USPA Newsletter, and will be an ongoing part of every issue, with the purpose of helping the USPA, as well as, our members and research associates locate people, organizations, periodicals, books, artifacts, devices, collections, and other items that have seemingly disappeared, or have been extremely difficult to find. **Updates will be added, and each missing item will be retained in future issues until it is found or otherwise resolved, since some readers may not have seen prior issues of the USPA Newsletter or the original notice of the missing item.**

In addition, this will also serve as a “People Locator Service” to help find authors and researchers on psychotronics, radionics, subtle energies, energy medicine, and related subjects, who have “disappeared” or have died long ago, and whose relatives you may be trying to find in order to preserve the research papers and collection of that person.

In our research and reading, we all have encountered people, organizations, periodicals, books, articles, or other things that we have tried to find, and some people have searched for years to find something, but have not yet found it, despite the vast resources of the Internet. However, with our large USPA membership, we can all help one another find what we have been searching for. Some of you may have experience in genealogical research, or private investigation, law enforcement, or even intelligence work which you could utilize to help each other, or perhaps just make suggestions on how or where to search for something.

So if there is anything you have been searching for and need help to find, please write to me, John H. Reed, M.D. at: joreed43@gmail.com, and I will include your search help request in the next and subsequent issues of the USPA Newsletter. And if you have any information about an item that is listed in “Among the Missing”, please write to the same email address and share what you know or your suggestions. If there is something that is confidential, your confidentiality request will be honored and protected.

Combo Mystery Solved:

You may recall that for some time we have been listing a “Combo Mystery” in this “Among the Missing” section, which included a missing person (Dr. Floyd S. Graham, Sr.), a missing organizations (Radionic Laboratories and Radiant Associates, Inc. founded by Floyd S. Graham, Sr.), and a missing book: The Radiant Era, by Floyd S. Graham, Sr. It was believed that because of the name of the organization and book that they were somehow related to radionics or radiesthesia. However, with the help of Marc Demarest, head of the International Association for

the Preservation of Spiritualist and Occult Periodicals (IAPSOP), it was determined that this is not the case. Fortunately, Mr. Demarest sent me a copy of the book, *The Radiant Era*, and after reading it, it was clear that the book, and the activities of Dr. Fred S. Graham had nothing to do with radiesthesia, radionics, or related subjects that the USPA is concerned about. Instead the book deals with agricultural practices of soil building, based on religious principles, and in the words of the author, quoting from page 2 of the book, "We have adopted the word Radiant for our soil building practices, for the reason that its procedures radiate from the word of God." So this mystery has been solved and the case is closed.

Missing Inventions: The Missing Invention of Arthur H. Matthews to Control Insect Pests, Microbes, and Diseases at a Distance

Where are the patent and invention by Arthur H. Matthews, a Canadian, who in his own words stated "This refers to my invention of selective control – at a distance – with no physical contact – to control any form of germ – any sickness – all kinds of insect[s] which cause damage to forest, garden and human[s]." Those words appeared in Matthews' own hand writing at the bottom of a reproduced letter on Appendix page A-10 of his book, *The Wall of Light*, which he published in 1971. But the big mystery is that the Canadian Patent Office database of patents does not show this invention or any other invention by Arthur H. Matthews.

Interestingly, correspondence of the Canadian Commissioner of Patents shows the title of the invention as "Methods for the Control of Insect Pests" and the patent **application** number of: 510,626, but not the number of the patent, if it was ever granted. So the question arises: What happened to this wonderful invention by Mr. Matthews, and why does the Canadian Patent database have no record of this device whatsoever in its database of patents?

Further details on this mystery are available in an article titled, "Among the Missing" Special: The Missing Invention of Arthur H. Matthews to Control Insect Pests, Microbes, and Diseases at a Distance" in the [February, 2018, issue of the USPA Journal and Newsletter, pages 24-27, available here.](#)

If anyone has any information about this invention by Arthur H. Matthews, please write to the USPA editor, John H. Reed, M.D. at: joreed43@gmail.com.

Missing Project: The "RA Project"

In the late 1980's Vernon J. Rogers of Boulder, Colorado, headed what was known as the "RA Project", which was a project of the Institute for Bio-Information Research (IBIR). Has anyone ever heard of this project, know anything about it, or know what the RA stands for? The IBIR focused on researching the interaction of electromagnetic fields with living systems and psychoneuroimmunology, so presumably the project related to one of these subjects, but this is uncertain. Unfortunately, Mr. Rogers passed away in early 2016. **If anyone has any information about this project of Vernon J. Rogers, please write to the USPA editor, John Reed, M.D. at: joreed43@gmail.com**

Missing Issues of the Periodical, The Pendulum.

As noted in the “Newly Discovered Psychotronics Periodicals”, this was a monthly periodical published in London, England, from 1950-1963, and focused on all aspects of radiesthesia, pyramid energy, subtle energies, and related subjects. The USPA Library has 132 issues of this periodical, but is still missing the following issues:

Volume 3 Numbers 5 through 12 (February through September, 1953);

Volume 4, Numbers 1 through 7 (October, 1953 through April, 1954);

Volume 7, Number 3 (December, 1956)

Volume 8, Number 9 (June, 1958)

Volume 9, Number 11 (August, 1959)

Volume 11, Number 8 (May, 1961)

Volume 12, Numbers 9 through 12 (June through September, 1962)

Only one library in the world has this periodical in its collection: The British Library. If any readers live near this library, or have any of the above issues in their private collections, it would be greatly appreciated if you would xerox these issues and send the copies to the USPA Library. We will be happy to reimburse you for any expenses.

Please write to the editor (John Reed) ahead of time if you are willing to help:
joreed43@gmail.com;

Missing Person: Paul Sauvin, USPA 2nd Vice Pres., 1976 and 1st Vice Pres., 1977

Paul Sauvin, whose full name is Pierre Paul Sauvin, is an electrical engineer and inventor who, [according to one source](#), worked in the aerospace industry and later with the National Institute for Rehabilitation Engineering at St. Joseph's Hospital in Paterson, NJ. He also worked with Dr. Carl Schleicher, head of Mankind Research Unlimited, and helped develop a device called the [“AGRAD Machine”](#). This device was designed to control crop insects, and was introduced on an experimental basis, although it is not known if it ever reached commercial production. Paul Sauvin's mother was Edith Sauvin, who lived in White Plains, NY, and died August 25th, 1987. Edith's only child was Pierre Paul Sauvin, who himself had 2 sons, Alan Paul Sauvin and Steven Eric Sauvin. He also had one daughter, Jane Elizabeth Sauvin. Any help in locating the children of Paul Sauvin would be greatly appreciated, and please write to joreed43@gmail.com.

Missing Person and Periodical: William Reid, Editor of the Journal of Scientific Controversy

We are trying to find William Reid, or his surviving family, who lived in the Boulder, Colorado, area in the 1960s and edited a periodical called “**Journal of Scientific Controversy**.”

Mr. Reid had placed an advertisement in a 1963 issue of **Analog Science Fiction and Fact** (ASFF) stating that the first issue of the **Journal of Scientific Controversy** would be published in the second quarter of 1963. The advertisement showed William Reid as the editor, **with the address: P.O. Box 855, Boulder, Colorado.** (There was no zip code at that time.)

However, it is uncertain how many issues, if any, were ever published of this periodical. It is not found in any public, government, or university library in the world, including the Library of Congress or British Library. But many periodicals on controversial subjects are not held by such libraries, so this is not entirely surprising.

If any of you know, or once knew, a person by the name of William Reid, who lived in the Boulder, Colorado, area in the 1960s, please write to the editor at: joreed43@gmail.com. Many of you are family tree and genealogy researchers, so even if you have never heard of this man, perhaps you would be kind enough to check your genealogy resources to help locate him or his family.

Missing Device: Marcel Vogel's Omega- 1 Radionics Instrument

In a 1987 meeting presentation, [YouTube Video, available here, beginning about 4:20](#), Marcel Vogel states that he had been trying to find a way by which he could measure the subtle energies and fields in the crystals he was working with, and that he prayed to God to give him an instrument to make such measurements. Marcel says that about two months later, a man named Daniel Perkins, apparently guided by higher forces to build such an instrument, came to Marcel's door and said, “Here is your instrument, the Omega-1. You will know how to use it,” and walked away. **But where is that particular Omega-1, and were any other Omega-1 instruments built?** It is known that other Omega models of radionics instruments were produced, especially Omega-5 instruments, but it is not known if the company that built them still exists. **In addition, does anyone know who Daniel Perkins is, and where he is located?** Anyone who can shed light on this mystery, please write to the editor at: joreed43@gmail.com.

Missing and Mysterious Stone: The “Swedish Stone” of T. Henry Moray's “Free Energy” Device:

Has anyone done any research on what the substance called “Swedish Stone” is that T. Henry Moray used in the 1920s to extract energy from cosmic rays and produce electricity? According to Moray's original diaries, he discovered the stone somewhere near the city of Abisko, Sweden, in 1913 when he was there doing his overseas Mormon missionary service. He brought the stone back to the US and

subsequently created a device using the stone to produce electricity in much the same way that silicon is used to produce electricity when struck by light. However, the Swedish stone used in Moray's device apparently had the particular molecular and/or crystalline structure such that it would produce electricity when struck with **cosmic rays**, which constantly strike the earth. And since cosmic rays are an electromagnetic wave with much higher energy than light, which is also an electromagnetic wave, Moray's device produced a great deal more electricity than any current silicon based devices of similar size.

Since cosmic rays flood the universe, clearly such a device could provide essentially free electrical power anywhere on earth or anywhere else in the universe. Some have hypothesized that the Swedish stone was a radioactive substance, whose radioactivity was used to produce the electricity. However, others believe that the Swedish stone was not radioactive, but just happened to have the particular structure necessary to convert cosmic rays to electricity. Theoretically there are substances like silicon, only of a different structure, that will convert each of the electromagnetic wave frequencies to electricity, and perhaps Moray just accidentally discovered the substance that would do this with cosmic waves. **Please contact the editor if you have any information about this "Swedish Stone" substance: joreed43@gmail.com**

Andrija Puharich's Lost Manuscript and other Puharich Mysteries by Greg Mallozzi

During the late 60s and into the 70s, Puharich owned and worked out of a large house in rural Ossining, New York. A home laboratory known as Lab 9. Lab 9 produced the most mysterious and far out work that Puharich was involved in when he began to delve deeper and deeper into parapsychological, experimental research: like alleged communication with extraterrestrial beings VIA trance mediumship and ELF (extremely low frequency) waves and their effect on the brain.

At Lab 9, Puharich worked with a faraday cage, a large cage that blocks electrostatic and electromagnetic influences. Puharich found that when a subject was placed inside the faraday cage and a certain level of specially controlled electromagnetic waves were sent through the cage, the subjects ESP abilities were heightened significantly. He conducted what some have called inhumane, psychological experiments on human subjects. Lab 9, like The Round Table Foundation, began to attract people from all walks of life.

Shrouded in controversy, the new film on the life of Dr. Andrija Puharich that we are producing will show what Lab 9 was really like, using never before seen photos, videos and transcripts. In 1978, a mysterious attempt to burn down Lab 9 was made. The town of Ossining ruled it arson. Puharich's publisher, Doubleday, was also broken into at this time and the manuscript he was working on was destroyed. Was someone out to get Puharich, to discredit and sabotage his work? If so, who? People who were present at Lab 9 at the time of the infamous fire will weigh in on what really happened, which to this day is unsolved.

If anyone has any knowledge about the missing manuscript or other mysteries surrounding the life of Dr. Andrija Puharich or has any video tapes, audio tapes, or correspondence of Puharich, please contact:

Greg Mallozzi at: gregorymallozzi@gmail.com or the editor John Reed at: joreed43@gmail.com

Missing Devices:

1. **The AGRAD Machine:** In the 1970's Mankind Research Unlimited, Inc.(MRU), headed by Dr. Carl Schleicher, was offering for sale a device called the AGRAD Machine. It was intended to be used in the electromagnetic treatment of crops and the control of insect populations, and sold for \$390.00. MRU claimed that AGRAD machines had been used for several years by MRU researchers to conduct experimental applications of the type described in **The Secret Life of Plants** by Christopher Bird and Peter Tompkins, and **Report on Radionics** by Edward W. Russell. Theoretically, the AGRAD machine was intended to produce effects through electromagnetic wavefronts that would interact with and control insects by disturbing the insect sensor mechanisms. A photo of the device and additional information appeared in one of MRU's publications [which you can access here.](#)

Missing Organizations:

1. **American Electronic Research Association (AERA):** Albert Abrams established the American Electronic Research Association in the early 1920s and it continued to operate until at least 1935, when John F. Spaulhurst was the president of AERA, according to the 1935 Edition of Who's Who Among Association Executives. The AERA published the monthly Journal of the American Electronic Research Association from 1924 through some point in 1936, when it ceased publication, according to Harvard University records.. Only two libraries in the world are known to have issues of this periodical. There are only two issues in the Harvard University Medical School Library, and the Kirkwood School of Osteopathic Medicine has one issue. If you know anything about this organization, or happen to have any issues of its journal, please contact the USPA Journal and Newsletter editor, John Reed at: joreed43@gmail.com.

2. **International Association for Psychotronic Research (IAPR):** Does anyone know what became of the International Association for Psychotronic Research? And do any of you have copies of its meeting proceedings or newsletter, if such a newsletter were published? It was founded in 1973, even before the United States Psychotronic Association (USPA), which was founded in 1975. However, the current location or activities of the IAPR are unknown.

The IAPR held numerous international conferences around the world, beginning with its first in 1974 in Prague, then Czechoslovakia. At this conference, Dr. Zdenek Rejdak was elected president for the Eastern Division of the IAPR, and Dr. Stanley Krippner was elected president for the West. The 8th International Conference on Psychotronic Research was held in Milwaukee, Wisconsin, 1993, as a joint conference with the United States Psychotronics Association (USPA), but it is unknown if any subsequent conferences of the IAPR were held.

Proceedings of each of these conferences were published. If copies of these proceedings can be obtained, or any newsletters that it may have published, we will add them to the USPA Library and make them available to USPA members. If you have any knowledge about this organization, please write to the editor at: joreed43@gmail.com

3. **International Radionics Association (IRA):** Does anyone know anything about the **International Radionics Association (IRA)**, which was located in Springfield, Missouri in the late 1940s. This is known, because a book called **The Truth about Radionics** was published in 1947 by this organization, and although the author's name is anonymous, it is highly probable that the author was T. Galen Hieronymus, who passed away many years ago.

I checked several newspaper databases, and references to this organization were found in the press as far back as the early 1930s, and as late as the early 1960s, but nothing more recent than that. If you have any knowledge about this organization, please write to the editor at: joreed43@gmail.com

Missing People, and Updates:

Missing USPA Related People:

We are trying to track down some of the original directors and officers of the United States Psychotronics Association (USPA), when it was organized in 1975, with the word "Radionics" in the organization title. Does anyone have any information on the current whereabouts of the following people, or family members, if the person is known to have passed away, or where they passed away?? Please check Ancestry.com, social media websites, newspaper archives, and any other databases you have to help find these people.

1. **Dr. Marcel Vogel and his Research Papers:** Does anyone know what became of the papers and files of Dr. Marcel Vogel, who died in 1991? Dr. Vogel did extensive research on crystals and crystal healing, pyramid power, the "Backster Effect" involving plants and their bioenergetic fields, and a number of other psychotronics related subjects. He also spoke numerous times at USPA conferences. Marcel Vogel worked at IBM for 27 years and had 32 patents. If you have any knowledge about Marcel Vogel and what became of his papers and files after he died, please write to your editor at: joreed43@gmail.com. The USPA would like to make sure that all of his papers are preserved.

Missing Periodicals:

1. **British Journal of Radiesthesia and Radionics:** Does anyone have any issues of The British Journal of Radiesthesia and Radionics. It was published in London, England, by the British Radiesthesia Association, 1953-1963. The original title was **British Journal of Radiesthesia**, published from 1953-1957. No libraries in the United States, public or university, have this journal in their collection., and only five libraries elsewhere in the world are known to have any issues at all: The British Museum Library (AKA The British Library), Oxford, Cambridge, the National Library of Scotland, and Trinity College Library, in Dublin Ireland. If you have any issues of this periodical, will you please let me know? And for our members and associates in The UK and Ireland, if you can access these periodicals at any of the above libraries, you would do a huge service for all of us if you would Xerox what issues are available and send them to me. A generous donor has offered to pay whatever expenses are involved for doing this service. We will add them to the USPA Library and make them available to researchers. Please contact the editor at: joreed43@gmail.com

Missing Books:

Rhea White and Larissa Vilenskaya wrote a book titled **Parapsychology in the Soviet Union, Eastern Europe, and China: A Compendium of Information**. It was supposedly published by Scarecrow Press of Metuchen, NJ, a well known publisher of reference books. This book was listed as reference work #680 on [page 213 of Rhea White's book, Parapsychology: New Sources of Information, 1973-1989](#), also published by Scarecrow Press. I called the publisher, and they said they have never published this book, and know nothing about it. As you can see from entry #680, Rhea White noted that this book was "in press", so it may have been in a preparation stage, but the manuscript may never have been sent to Scarecrow Press.

Again, I have searched the WorldCat, which shows books and monograph holdings of virtually every public and university library in the United States and Canada, and many

of the large libraries in the UK and elsewhere in the world. But this book title does not exist in the WorldCat database, which indicates that this book is not held in any library, even special collections, which are also included in WorldCat. Unfortunately, I was unable to ask either of the authors about this, since both have passed away.

Rhea White was a well known parapsychology researcher, so some of you may have known her or heard her speak of the missing book manuscript that she was working on. Larissa Vilenskaya was from Russia, but lived and worked in the San Francisco area, and she was a prolific researcher on Russian and Eastern European psychotronics research. Please write to your editor at: joreed43@gmail.com if you have any information about this at all.

DETECTING BIODYNAMIC SIGNALS

PART III *INTERSTELLAR COMMUNICATION*

by Michael Theroux

HISTORICALLY, the alleged reception of signals of an extraterrestrial origin dates back to the very beginnings of radio. In fact, we find that the recent history of the investigation into interstellar communications is almost completely restricted to the science of radio astronomy — a technology which is quite limited due to the necessity of obeying the confines of the electromagnetic spectrum. Early in his career, Dr. L. George Lawrence recognized this limitation, and sought to overcome it by introducing a means of communication which was not bound by conventional electromagnetic laws. "Biological" or "Biodynamic" communication, as Lawrence called it, found its medium completely outside of the electromagnetic spectrum, and therefore solved many of the problems facing the prevailing radio-astronomical methodology of interstellar communication. To comprehend the complexity of these problems, we must briefly detail the historical background of conventional interstellar communications (hereinafter referred to as ICOMM).

Radio Astronomy and the Birth of ICOMM

Both Nikola Tesla and Guglielmo Marconi would be remembered for their early pronouncements of receiving "alien" signals (see "[Communicating with Mars](#)" ([index.html](#)) on page 33), but it wasn't until 1930 that the birth of radio astronomy and the consequent reception of radio signals of galactic origin heralded the beginnings of ICOMM. Karl Jansky, an American radio engineer, was the first to pinpoint signals originating from the center of the galaxy. We needn't detail his findings here as we have reprinted the entire 1934 document (see "[Short-wave Signals from Interstellar Space](#)" ([index.html](#)) on page 38). Shortly after World War II and the development of RADAR, the military began frequently intercepting radio signals originating from outer space. With this development, the first large radio telescopes would be employed for purely scientific purposes.

The first plan to monitor the stars for signs of intelligent life was conducted by Frank Drake, the then Director of the National Radio Astronomy Observatory (NRAO) at Green Bank, West Virginia in 1960. The project was called "Ozma", after the imaginary land of Oz, from L. Frank Baum's Wizard of Oz. The intended targets were Tau Ceti (11.9 light years from earth) and Epsilon Eridani (10.8 light years from earth). After observing for a total time of about 4 weeks in the region of the 21-centimeter hydrogen band, no signals were found. Thus ended Project Ozma — and to this day — no signals have been found by any standard radio-astronomical methods. Many so-called SETI (Search for Extraterrestrial Intelligence) projects, and several millions of dollars in funding later, have turned up nothing. Even NASA showed interest for a while, spending \$60-70 million since 1971, but in the early 1990s, they dumped SETI and other projects from their budget.

The SETI institute's latest endeavor, called Project Phoenix, began in February 1995 at the Parkes radio astronomy observatory in New South Wales, Australia. So far, they have managed to bring in more than \$7.3 million in private donations for their efforts. State-of-the-art equipment was used to listen to about 200 southern hemisphere stars, scanning 28 million channels simultaneously at single-Hertz resolution using the 64 meter radio telescope. A follow-up telescope located 120 miles away allowed them to distinguish between terrestrial and galactic signals by utilizing Doppler shift. But, still no ET. Promising signals have all turned out to be things such as satellites, military radar, and even TV stations. They haven't given up though, and plan to focus on 900 northern hemisphere stars next.

The Problem with Radio-astronomical ICOMM

The major difficulty with radio-astronomical ICOMM is that at its foundation lies some very uncreative quantitative assumptions. The basis for the entirety of this research assumes that an extraterrestrial civilisation's technology is comparable to, and has evolved to a state equal to our own. Without thought, academia casually presupposes that there are many, "...civilisations intelligent enough to build radio transmitters," and "...several million civilisations matching the Earth's standard of development." Quite an egotistical assumption for a culture that admits no solution to the mysteries of their own ancient civilisations!

Because technology on this planet has evolved in a specific direction (in this case toward the quantitative and mechanistic) does not foreordain that any other civilisation's technological evolution must parallel ours. It is quite possible, and certainly probable that many civilisations of galactic origin may have technologically evolved toward the perceptive and qualitative. These may be the standards by which they seek to communicate, and as we shall see, offer greater success considering the great distances with which ICOMM necessitates.

Language of the Stars

The most difficult obstacle to overcome concerning ICOMM lies with the exchange of information. Since conventional presumption is so anthropomorphically restrained, the academics insist on using our own cultural and societal development as a guide to choosing the proper cosmic linguistic form. Simple messages, binary call signals, pictograms, and even an artificial schematic language called Lincos have been suggested and even transmitted to the stars. But, even simple language can pose incredible difficulty for scholars wishing to make an interpretation. Earlier advanced cultures on our own planet have left us with innumerable writings which still evade academia's decryption. Even the late skeptic and mechanist Carl Sagan foresaw this conundrum: "European scholars spent more than a century in entirely erroneous attempts to decode Egyptian hieroglyphics before the discovery of the Rosetta Stone [1799] and the brilliant attack on its translation by Young and Champollion. Some ancient languages, such as the glyphs of Easter Island, the writings of the Mayas, and some varieties of Cretan script, remain completely undecoded at the present time . . . how can we expect that a civilisation vastly more advanced than we, and based on entirely different biological principles, could ever send a message we could understand?"

Dr. L. George Lawrence was clearly aware of these facts before he began his pioneering efforts in biodynamic ICOMM. Dr. Lawrence proposed that certain advanced civilisations would have developed a means of communication utilising purely biological principles. This biological exchange of information has been previously outlined in parts I and II of this article, which also detail Dr. Lawrence's experiments in biodynamic transfer of information. Dr. Lawrence stated that these galactic cultures may have communicated by a method now lost to our civilisation — eidetic communication — where the biodynamic energy transfer acts as the carrier, and the patternate content is the modulation. This patternate content is the actual eidiform, or complete eidetic picture. What makes this method superior to conventional radio reception is the fact that biodynamic information is transmitted in a longitudinal point-to-point fashion. One doesn't have to wait light years for the reception of a message — it is nearly instantaneous. This may be likened to simple remote viewing, only in this case it is device assisted — ensuring minimal errors. Gerry Vassilatos has done substantial work in this field which he calls Device Assisted Remote Viewing — and with notable success.

Determining the Method of Transmission

Dr. Lawrence was not without his own assumptions concerning the possible methods of galactic transmission. Of course, we have to begin somewhere, and Dr. Lawrence, being a radio engineer, followed the simple progression entailed in sending and receiving conventional radio communications. This follows the Russian theorist Y.I. Kuznetzov's outline of the communication process via the concepts of communication, coding, signal, and modulation. Lawrence's version would be detailed thusly: The communication (Eidogram) would be converted into a form suitable for transmission (biodynamic signal), the coding being the method of conversion, and the modulation (patternate content) would be the change in the parameters of the emission serving as the carrier of the (biodynamic) signal. For reception, one would simply reverse this process.

Dr. Lawrence arrived at these conclusions based on his qualitative analysis of the sound emitted from his experimental setup. The modulations he heard displayed a character not unlike other conventional transmissions, which led him to

work on their immediate conversion to visual images. At the very heart of Dr. Lawrence's system was a unique form of biodynamic transducer which enabled him to receive and transmit signals of a biological origin.

Qualitative to Quantitative Analysis: Biosensor Technology and the Biodynamic Transducer

Early in Dr. Lawrence's career, he began work on a series of transducers of biodynamic energy. In order to utilise quantitative measuring instruments, biodynamic energy would need to be converted or transduced into electrical energy. Initial experiments commenced with simple Wheatstone bridge circuits and plant material as the biosensor. Although the plant material reacted to biodynamic stimuli such as touch, and even directed thought, this was found to be unwieldy as the plant material was possessive of its own consciousness. It could easily become fatigued and stressed, or would simply seem unconcerned when experimental matters were conducted. Dr. Lawrence then began a systematic search of the organic semiconductor library for an answer. He found that a simple mixture of protein complexes, a sort of primeval soup as it were, produced remarkable results. But, the problem of tuning to specific biodynamic energies still existed. One needed to capture individual responses to particular stimuli in order to rule out any possibility of unwanted artifact. This necessitated the addition of special substances to the soup, to be used as what Lawrence termed the "excitation" mixture. These ranged from organo-methylglyoxol compounds to a variety of mineral compositions — each with their individual response characteristics. Now, the qualitative reactions of this biological "soup" could be directly transduced into a quantitative electrical signal via the use of high impedance amplifiers, and when mixed with a local oscillator, produced the desired output signal for analysis.

Project LUCAS in the High Desert of So. Cal. Small tube pointing to the right in the photo is original bisensor prototype assembly — still operational.

performed to our expectations with no interference problems. Our initial targets would be two galaxies in the Ursa Major constellation: M81 and M82. These were chosen because of all the searches conducted, Dr. Lawrence had the greatest success there. Our horizon-to-horizon scanning continued slowly to ensure proper functioning of the equipment, and eventually would focus in on the target area. Our first pass at M81 revealed nothing. I was concerned that the older equipment wasn't sensitive enough and I began tuning knobs. Nothing happened. As we settled into the campsite, we decided to leave the telescope and biosensor focused in on the target area for awhile. I remembered Dr. Lawrence's notes regarding how several

weeks would go by without the detection of any signal, but I was still becoming somewhat discouraged and impatient by the lack of reception of signals, and continued to believe the equipment may be to blame. Suddenly, bursts of modulation poured out of the speakers. I immediately checked the equipment to make sure there wasn't a malfunction. Everything was in order. The bursts lasted only about ten seconds, and then as if nothing had happened, the equipment returned to the idle state. This would happen one more time the entire evening. Both instances were captured to cassette tape for further analysis.

We feel confident that this project confirmed Dr. Lawrence findings. There is no doubt that some kind of biodynamic signal was received from the direction of the constellation Ursa Major. Ideally, a remote biodynamic station would be set up to monitor this area on a continuing basis so more information could be obtained and analysed. We may return to the problem of interpretation of these signals at a later time, but for now, the reception of biodynamic information from space has once again been verified.

Conclusi on

Hopefully, there will be enough interest and time to continue in this experimental direction. The need for better equipment, and constant monitoring are essential to such a project, but without proper funding, may be delayed for several years. Still, we continue experimentation on the transfer of biological information, and are now working toward development of simple practical applications of this technology. Working outside of the electromagnetic spectrum into the domain of biological energies opens up a vast new area of research far exceeding the singular employment of interstellar communications. Technologies which could arise from this pursuit are manifold, and applications such as point-to-point terrestrial communications, and portable biodynamic detectors may be a part of the near future.

Scalars, Part II

by Eldon Byrd

Not only are Maxwell's equations shown to be incomplete, they are shown to be inadequate to describe scalar information transfer in either the steady state or non-steady state cases, even though both cases can be written as scalars. The characteristics of scalars are explored, and tables of definitions and relationships of electromagnetic quantities are compiled. The contrast between scalars and vectors is elucidated, and examples are given.

It is concluded that although the space-time matrix limits the physical world, the mind is scalar in nature and, as such, is not bounded.

Introduction

Scalars as information carriers are allowed in mathematical physics much in the same way that ideas are: Ideas cannot be measured, but their effects can.

Electric fields exert a force on stationary as well as moving charges. However, magnetic fields exert a force only on a moving charge (because a magnetic field can be produced by moving charges but not by static charges, whereas an electric field can be produced by either). One big problem: Magnetic quantities were defined in electrical terms. The source of electrical flux is the coulomb charge. No such source for magnetic flux is known or defined (Sillitto).

The following is an attempt to define scalars from the viewpoint of established math and physics. Because current math and physics are inadequate for the task, I suggest that the next step should be to develop an entirely new set of physics and math to explain scalars, independent of what currently exists.

Maxwell's Equations

Maxwell's equations do not describe the behavior of electrical densities, they describe only the effects of a combination of electrical densities on a continuous field with material points that are discontinuous in space. This indicates the incompleteness of the theory; a complete theory requires the continuity of all elements in time and all points in space. In order to deal with this problem from a mechanistic point of view under the assumption that matter causes field, great complexity is added and paradoxes emerge. For example, Maxwell's equations in free space are only useful for the case of real electromagnetic (EM) energy propagation (they ignore the complex conjugate). They *cannot* describe instantaneous scalar information transfer in space-time because they predict an infinite

amount of energy to do so. It takes *no* EM energy to accomplish a scalar information transfer, as becomes apparent with a shift in thinking to the concept that field gives rise to "matter."

In a non-steady state condition, Maxwell's equations are all **scalars**. Then, in textbooks, boundary conditions are imposed and the solutions become non-wave solutions. In order to *make* them work as waves an *unknown* factor was added to the equations to get them to come out right. Scientists will go to great lengths to prove the universe works the way they think it does, whether they can figure it out or not.

Maxwell's first equation was developed by assuming a charge, Q , was contained in a volume and a flux was passing through the volume's surface:

The electric flux coming out of the surface (S), integrated over the *entire* surface of the volume was defined to be equal to the charge inside:

$$\oint_S D_s dS = \int_{vol.} \rho dv = Q$$

However, this says that the flux is *infinite* for a *finite* volume, because there are an infinite number of flux lines emanating from the charge. The only way around this was to shrink the surface and volume to *zero*, and set the result equal to zero. Terrific! Now our physical interpretation of Maxwell's first equation is that the only place in the universe where there is a finite amount of electrical charge is where there is no space!

There is nothing wrong with the non-steady state integral form of Maxwell's equations—it is the absurd boundary conditions that were imposed that make them useless for all practical purposes when discussing scalars. However, the preceding equation and:

$$\oint E \cdot dL = \int_s \frac{\partial B}{\partial t} \cdot dS$$

$$\oint H \cdot dL = I + \int_s \frac{\partial D}{\partial t} \cdot dS$$

$$\oint_s B \cdot dS = 0$$

are all scalars. They are the non-steady-state form of Maxwell's equations.

Characteristics of Scalars

Electromagnetic fields were theorized 125 years ago and discovered a few years later. Potential fields were theorized 50 years ago and discovered only a few years ago. Scalar fields have been theorized, and recently there is reason to believe their interaction with a laser beam and living human neuronal tissue has been discovered.

Scalars are more fundamental than potential fields because they are derived from them, just as potential fields are derived from electromagnetic fields. Scalar fields replace potential fields when E and B are zero. Scalars are longitudinal in nature; they are derived from potential fields capable of supporting longitudinal signals in the total absence of electric and magnetic fields. Longitudinal waves have been observed in physical non-linear conducting media, such as plasmas.

Because "propagation" of scalars is independent of the two physical quantities electric permittivity and magnetic permeability (which are linked with the speed of light), scalar information is not limited to the speed of light. Scalar potential is an instantaneous potential, although scalar information can ride piggy-back on EM waves, thus slowing it down from infinity to 3×10^8 cm/sec. Thus, it is possible that we live in a universe filled with information fields operating at all frequencies; subtle fields not yet detected by instrumentation; fields that link all life forms. These fields were described by the great mathematician, Dirac.

The superposition of two scalar fields can only yield more scalar fields, not EM or potential fields. Therefore, scalars cannot be used for power transmission—only information transfer. Information may be transmitted using scalar fields and detected by some process like electron interferometry. Biological systems are highly non-linear and also can detect and interact with scalars. Because all "matter" is electromagnetic phenomena, there is an interconnectedness through the scalar fields. All biological organisms communicate with each other, and therefore affect each other.

It is obvious that electrical energy can be stored in a capacitor (anyone who has touched the terminals of a large charged capacitor can attest to this fact). Yet, *where* is the energy stored? In the "charges" themselves? On the plates? In the dielectric? Or in the field between the plates? EM field theory makes it look as if it is in the field, but no one knows for sure. If it is in the field, where in the field? Scalar energy just *is*; it isn't anywhere.

When Magnetic and Electrical Fields are Zero

David Bohm in England described in 1975 a subtle effect when both E and B fields were non-existent. When the fields are zero, there are no *physical* results observed because there is no *physical* energy flow. However, when E and B fields are zero, under certain conditions, their sources (the scalar potential, V_m , and the magnetic vector potential, A) can produce physical consequences. The ob-

servable is the probability density of electron phase shifts occurring under the influence of potential fields while no magnetic or electrical forces exist. This effect has been demonstrated by a number of experiments (Aharonov, Bohm, Chambers, Jaklevic, Lanke, Olariu, and Popescu). Because there is no energy transfer to objects when the electric and magnetic fields are zero, A fields are decoupled from E and B and become scalars which penetrate all objects and also transfer information instantaneously. This makes detecting them with currently available instrumentation virtually impossible. However, generating a scalar field is simple. At extremely low frequencies, all B and E fields are contained within a toroid:

A is external but not directly measurable. In a mobius, the E and B and A fields are contained; however, a scalar as a function of time varying A is generated (not directly measurable by standard electric and magnetic equipment—all of which requires a transfer of energy to register).

Vector Math

Vector math has been defined and manipulated by college professors and students for a long time. Any good textbook can provide details; however, for purposes of the next section a few relationships will be reiterated.

A *vector* is defined as a scalar that is moving in time and/or space. A vector of zero order is a point with a direction. Vectors can be added, subtracted, multiplied, divided, and operated upon. Operations on vectors are of particular interest. Vectors that are invariant under coordinate transformations are called tensors.

The divergence (div) of a vector, A , is:

$$\frac{\partial A_x}{\partial x} + \frac{\partial A_y}{\partial y} + \frac{\partial A_z}{\partial z}$$

The divergence operation on a vector yields a scalar and is known as the del (∇) operation. Thus, $\nabla \cdot A = \text{div } A$. This operation is also known as the gradient (grad). Thus,

$$\nabla \cdot A = \text{div } A = \text{grad } A$$

The gradient of a scalar is a vector; the gradient of a vector is a scalar.

There are basically two types of vector multiplication—the dot and the cross product. The dot (scalar) product is defined as the magnitude of A times the magnitude of B times the cosine of the smaller angle between A and B (i.e., $|A| |B| \cos \angle_{AB} = A \cdot B = \text{a scalar}$).

The cross product is defined as the magnitude of A times the magnitude of B times the sine of the smaller angle between them times the unit vector, a_n , perpendicular to A and B :

$$A \times B = |A| |B| \sin \angle_{AB} a_n$$

There are many combinations of scalar and vector products; e.g.:

$$\nabla \bullet A \times B,$$

$\nabla^2 \times A$ is a scalar, where A is any vector field.

$\nabla^2 V = 0$ satisfies every field and provides unique solutions as a function of boundary conditions we make up, so it is useless for scalar considerations.

Vector and Scalar Math Applied to Electromagnetics

When a scalar ($\nabla \bullet A$) is integrated over a three-dimensional space, it becomes a two-dimensional surface:

$$\iiint \nabla \bullet A d\tau = - \iint \frac{\partial A}{\partial n} dS$$

$$\iint \frac{\partial A}{\partial n} dS \text{ represents the flux.}$$

Scalars are invariant in any coordinate system.

Converting the steady state Maxwell equations into scalars is easy. Take the divergence of each:

$$\nabla \bullet \nabla \times E = 0$$

$$\nabla \bullet \nabla \times H = 0$$

$$\nabla \bullet \nabla \bullet D = \nabla \bullet \rho = 0$$

$$\nabla \bullet \nabla \bullet B = 0$$

Math and physics are satisfied, everything equals 0, and we have again proven we know a whole lot about nothing.

$$B = \mu H = \nabla \times A \text{ and } \nabla \bullet \epsilon E = \rho$$

B and H are linked with μ , and E and ρ are linked with ϵ . μ and ϵ are defined by a linkage to the speed of light. Therefore, all the manipulation in the world will not allow these physical quantities (and therefore Maxwell's equations) to describe instantaneous scalar information transfer.

Conclusions

This paper has shown that the foundations of mathematical physics, as applied to the classical and quantum mechanical basis of electromagnetic field theory, fail to account for an entire area of theoretically available signals termed "information scalars." For example, suppose a molecular structure possesses an inherent field quality that "broadcasts" its presence to all the universe. The "information" about the structure is omnipresent—there is no electromagnetic energy transfer associated with this process, and time does not even enter into it.

Cause and effect have been established between scalars and biological processes empirically. It behooves us to come up with math and physics to explain what's going on; it has to be outside of established math and physics, which has failed to provide a complete basis for observation, and even a complete basis for its own theoretical self.

Summary

Reality is not based on measurement. Science is; therefore, reality is not based on science. Science is metaphor.

Fields produce "matter."

Newtonian mechanics is incomplete.

Quantum mechanics is incomplete.

Maxwell's equations are incomplete.

Scalars are information.

Particles (including protons, electrons, and sub-atomic particles) are really just fields that manifest themselves to our senses and instruments in such a way that we define them as "matter."

Glossary/Definitions of Electrical and Magnetic Scalar Quantities

Name	Symbol	Units	Dimensions
Charge (Electric Flux)	Q or ψ	Coulomb	coulombs
Electrical permittivity	ϵ	Farads/meter	secs ² coulombs ² per gram per meter ³
Volume Charge Density	ρ	Coulombs/meter ³	coulombs per meter ³
Electric Field Intensity	E	Volts/meter	gram meters per coulomb per sec ²
Mass	M	grams	joule meters/sec ²
Capacitance	C	Farad	secs ² coulombs ² per gram per meter ²
Current	I	Amperes	coulombs per sec
Electric Flux Density	D	Coulombs/meter ²	coulombs per meter ²
Electric Potential	V	Volt	gram meters ² per coulomb per sec ²
Electric Flux (see Charge)			
Resistance	R	Ohms	gram meters ² per second per coulomb ²
Distance	L	Meters	meters
Magnetic Field Intensity	H	Amps/meter	coulombs per meter per second
Magnetic Flux Density	B	Webers/meter ²	grams per second per coulomb
Magnetic permeability	μ	Henry/meter	gram meters per coulomb per coulomb
Magnetic Flux	ϕ	Webers	gram meters ² per coulomb per second
Magnetic Scalar Potential	V_m	Amperes	coulombs per second
Magnetic Vector Potential	A	Webers/meter	gram meters per second per coulomb

Relationships

$$\begin{aligned}

Cyberbiological Studies of the Imaginal Component in the UFO Contact Experience

DENNIS STILLINGS, Editor

Prominent anomalists from outside the field of ufology apply their insights to explorations of the archetypal imagery of UFOs and extraterrestrial abduction. The cyberbiological point of view addresses aspects of these anomalies involving interaction of consciousness with self, others, and world.

Abstracts of Important Articles and Papers

Below are some abstracts of important papers related to psychotronics subjects found in the academic and professional literature. Many of these articles are still under copyright restrictions, but if you are interested in any of these articles, please write to the editor, John Reed, (joreed43@gmail.com) and he will assist you in getting a copy. Also, please remember that one of the benefits of USPA membership is your right to use the USPA Literature Research Service, whereby we will find any article, book, or other item you are seeking on any psychotronics related subject and provide it to you, if at all possible.

Novikov, S.N., A.I. Ermolaeva, S.P. Timoshenkov, and E.P. Germanov. “Distant Transmission of Medicinal Substance Properties to Water Is the Result of the Phonon mechanism of Dispersed Bodies’ Surface forces” International Journal of Unconventional Science, Issue E1 (2016), pp. 81-89.

(This article is freely available online at: <http://www.unconv-science.org/pdf/e1/novikov-en.pdf>)

Abstract

A comprehensive study in the transmission of medicinal substance properties to liquid water (project “Emission” by DST fund) has been carried out using kinetic methods of gravimetry, work function of electron, scanning force and capacitive microscopy. Assumption based on model experiments, theory of water’s coherent dynamics and conceptions about phonon mechanism of disjoining pressure structural component at phase boundary has been proposed: the observed transmission effect of medicinal substance properties to the liquid water (www.dst-fond.ru and www.newpharm.ru) was caused by interaction of dispersed electric surface micro-relief of carriers (oxide surface, CDR), modified by medicine, with the dipoledipole emission from the decay of the coherent domain by water evaporation.

Korneev, A.A. and Peter P. Gariaev. “Some Aspects of Wave Gene Transmission” (Institute of Quantum Genetics LLC, Moscow, Russia). DNA Decipher Journal, Vol. 5, Issue 3 (December, 2015), pp. 1-19

Abstract:

This work introduces and describes the process in one type of helium-neon laser with two orthogonal optical modes. These modes can record polarized modulations of scanned biological structures in the recording regime of the traveling intensity waves (TIW) holograms. This process is used to model recording and distant transmission of wave genetic information.

(USPA Journal Editor's Note: The DNA Decipher Journal is an excellent journal edited by Huping Hu, Ph.D., J.D. and Maoxin Wu, M.D., Ph.D., of QuantumDream, Inc., New York, with many articles that are of great importance on the above and related subject matter. Their home page is:
<http://www.dnadecipher.com/index.php/ddj/index>)

Kernbach, Serge and Olga Kernbach.(1). "Reliable Detection of Weak Emissions by the EIS Approach" International Journal of Unconventional Science, Issue E1 (2016), pp. 90-103.

(This article is freely available online at: <http://www.unconv-science.org/pdf/e1/kernbach3-en.pdf>)

Abstract:

This work describes the methodology of EIS (Electrochemical Impedance Spectroscopy) measurements, related to detection and characterization of weak emissions possessing non-electromagnetic, non-acoustic, non-thermal and non-mechanical nature. The 'shape effect' is used as a test source of such emission. The proposed approach with the source of emission (the generator 'Contur') and the detector (EIS spectrometer) can be applied for demonstration purposes, where the local or non-local impact is reliably detected by changes of impedance. Statistically significant number of measurements demonstrated 93,3% repeatability of results. This allows performing replication, laboratory and industrial measurements related to weak emissions of different origin by well accepted approach. Small changes of conductivity on the level of 10^{-9} - 10^{-11} S/cm require an accurate handling of systematic and random inaccuracies during measurements, and strict following the experimental methodology.

The Rife Handbook of Frequency Therapy and Holistic Health

By: Nenah Sylver, PhD

Hardcover: 768 pages

Publisher: Desert Gate (2011)

Language: English

ISBN-10: 0981807518

ISBN-13: 978-0981807515

ASIN: B01FIXD5UK

Package Dimensions: 11.2 x 8.7 x 1.9 inches

[Available for sale at Nenah Sylver's Website, here](#)

This is one of the best and most comprehensive books written about Royal Raymond Rife and the Rife technologies. Rife is reported to have cured cancer and numerous other diseases back in the 1930's, and Dr. Sylver discusses this and brings one up to date on the latest Rife based technologies and frequency therapy.

CHAPTER HIGHLIGHTS a brief sample

For a complete Chapter Outline plus Index, go to: <http://www.rifehandbook.com/>

Chapter 1: The Politics of Medicine and the Nature of Health. Drug damage versus effectiveness. How to analyze clinical trials and hospital procedures. Iatrogenic (doctor-caused) disease and preventable deaths. How vaccines damage the body. Big Pharma marriage to the FDA, other government agencies, and universities. How drugs are approved, marketed and publicized. rBGH, aspartame and other toxins. Corporate-owned media, the fallacy of peer reviewed articles, industry ties to medical journals, the bribing of doctors. Doping our children with psychotropic drugs. Addiction. How electronic media affects the brain. Drugs in our food and drinking water. Big Pharma's campaign against nutritional supplements.

Chapter 2: The History of Pleomorphism and Inventions of Royal Raymond Rife. Life cycles of a microbe (Bechamp versus Pasteur). Precursors to disease, including deficiencies in sleep, oxygen and nutrients, and chemical/electromagnetic toxicities, injury, pH imbalance, pathogens, and emotional states. Pleomorphism proponents Virchow, Nightingale, Enderlein, Haefeli, Reich, Rosenow, Livingston-Wheeler, Naessens, Mattman and others. Little known facts about Royal Rife's life, his Universal Microscope, Ray, and clinical trials. How Rife's devices actually worked. John Crane, John Marsh, and the next generation of frequency devices. Detailed diagrams and measurements of a pleomorphic life cycle as viewed through a modern high-resolution German microscope. Photos of Rife, his colleagues, instruments, and news articles.

Chapter 3: Complementary Therapies. Water and distillation, minerals, heavy metals, unabsorbed minerals, electrolytes. Cleaning and restoring water. Selected beverages. Food: different diets, biochemistry and metabolism. Factory farming, genetic engineering, irradiation, cloning. Explaining organic, wildcrafted, heirloom, local, free range, Brix. Good and bad fats, chemicals, conditioners, preservatives, and synthesized foods. Sweeteners: history, biochemical effects, and processing of agave syrup, xylitol and stevia. Weston A. Price. Food preparation methods and cookware. Potency and preparation of herbs. Food-based versus synthetic nutritional supplements. Hydrogen peroxide. Ozone in drinking water; insufflation, funneling and bagging; inhalation; salve; generators; using ozone in the sauna. Colloidal Silver: history, properties, contraindications, preparation, particle size, storage, home generators, how to use, dispelling the myth of CS toxicity and how to reverse argyria. Colon cleansing. Aerobic/anaerobic exercise and the lymphatic system, and its anti-inflammatory and anti-aging properties. Physiological and emotional implications of touch, massage, craniosacral therapy, chiropractic. New research on the relationship of myofascial release to Oriental medicine. Light and color therapies in depth: the pineal gland and light, SAD, monochromatic light therapy with lasers and LEDs, and Dinshah's Spectro-Chrome Color Therapy. Sauna therapy. Sleep, sleep-inducing food and supplements, Inclined Bed Therapy (IBT), new developments in meditation.

Chapter 4: Frequently Asked Questions about Rife Equipment and Sessions. Precautions and contraindications, including if you have a heart condition, are wearing a pacemaker, are pregnant or nursing, have blood clots, are taking pharmaceuticals/herbs, are wearing implants, are sensitive to concentrated EM radiation. Giving sessions to infants, children, pets, and farm or zoo animals. Eliminating toxic waste released by rifting. Types of devices (with and without RF); desirable traits of devices and manufacturers. Lasers and LEDs, general sweep units, frequencies on CDs and DVDs.

Terminology for non-engineers.

FAQs about rife sessions, frequency selection and microbe response, Herxheimer response

How the frequencies work

Specific health conditions

Updates on Rife technology and treatments.

A Short Course on How to Give Yourself a Rife Session.

Photos of equipment includes LEDs, lasers, and the high-power Ergonom microscope with even better resolution than Rifes original, accompanied by microscopic views of one-celled organisms.

Chapter 5: Frequency Directory. Alphabetical, annotated, cross-referenced list of symptoms, diseases and frequencies for rife units. Along with single, stand-alone entries are the following: Arthritis and Joints. Bacteria. Blood Sugar Levels. Bone and Skeleton. Cancer. Candida, Fungi, Molds and Yeasts. Chemical Poisoning / Detoxification. Dental (Mouth and Gums, and Teeth). Ears. Eyes. Gastrointestinal Tract (Systemic Conditions, Colon / Large Intestine, Small Intestine, and Stomach and Esophagus). Glands (Adrenals, Pancreas, Parathyroid, Pineal, Pituitary, Thymus, Thyroid). Headache. Heart, Blood and Circulation. Injuries. Insect Bites. Liver and Gall Bladder (Liver, and Gall Bladder). Lymphatic System. Men (Penis, Prostate, Sexual Functioning, Testicles, Urinary). Mind and Emotions. Muscles. Nervous System and Brain. Parasites, Protozoa and Worms. Regeneration and Healing. Respiratory Tract (Lungs, Nose and Sinuses, Throat and Lymph Nodes, Vocal Chords). Skin. Tuberculosis. Tumors, Benign. Ulcers. Urinary Tract (Bladder and Urethra, and Kidneys). Viruses. Women (Breasts; Menstruation and Menopause; Sexual Functioning; Uterus and Cervix, Ovaries, and Fallopian Tubes; Vagina and Labia). Each Level 1 section also contains summary of how the body works and explanations of selected medical terms.

Chapter 6: Creating a Better World, Inside and Out. The trauma of illness and death. The five stages of dying and the implications of letting go. Doctor support or lack of it. When a privileged few control the world's wealth. When corporations govern (legal theft and criminal commerce). How to go beyond the dominator (dominant) paradigm. Cutting edge scientific research: the interconnection of quantum particles and the human as hologram. The power of prayer, long distance healing and group intention. The Unified Field, and healing with the heart. Studies on the physiological effects of meditation. Changing the structure of water and our own DNA. Love as a resonance.

Appendix A: Resources.

Appendix B: Legal Implications of Rife Sessions.

Appendix C: Healing with Electromedicine and Sound Therapies.

Appendix D: Selected Published Studies in Electromedicine.

Appendix E: Rife Research in the United States.

Biological Communications: Selected Articles, Experiments, and Patent Designs

**by L. George Lawrence, Michael Theroux,
Gerry Vassilatos, and Charles Allon**

Spiral-bound

Publisher: Borderland Sciences Research
Foundation (1997)

Language: English

ASIN: B01NBR0J0I

Size: 8.5 X 11 inches

Write to the editor John H. Reed

(joreed43@gmail.com) for availability. This book is not available for sale on Amazon, Abe books, or Ebay, or in any known library in the world, according to WorldCat.

This is an excellent handbook of research into the subject of biological or “biodynamic” communication. The book opens with an entire history of “Biocommunications” from the early experiments of Reichenbach, to the later researches of the Radionic pioneers. The subject of plant sensitivity and radionics is dealt with, along with the construction of bio-sensing equipment for the experimenter. The highlight of this research work is the complete inclusion of Dr. L. George Lawrence’s previously unpublished patent entitled, “Methods and Receiver for Biological Data Transport”.

USPA Generous Donor Recognition Page

The USPA would like to give special recognition on a continuing basis to people making generous donations to the United States Psychotronics Association. To do this, we are creating this special “USPA Generous Donors Recognition Page” that will be carried in each issue of the **USPA Journal & Newsletter**, beginning with the December, 2016, issue and going forward. New names will be added as other generous donations are received.

We wish to recognize the following individuals for their generosity:
(in alphabetical order)

Mary Hardy ([Temple of Sakkara](#))

Clement Jewitt

Ed Kelly ([Kelly Research Technologies](#))

Michael Leger ([Homeodynamics, LLC](#))

John H. Reed, M.D.

William Reeves (Print & Web Design - breeves66@gmail.com)

Arnold Reinhold

Eric Rowley

The USP wishes to extend our thanks and gratitude for their generosity.

To make a tax deductible donation to the United States Psychotronics Association (USPA) online, please go to the [USPA donations page and scroll down to the orange “Donate” button](#), where you can make a donation using your credit, debit card, or PayPal. For those who wish to make a donation by check, please make your check payable to USPA and mail it to the **USPA treasurer, Scott Beutlich, 525 Juanita Vista, Crystal Lake, IL 60014.**

USPA Psychotronics Periodicals Library Update

In order to do good psychotronics research of any kind, whether it involves radionics, radiesthesia, psionic medicine, dowsing, subtle energies, biophotons, or any other subject covered by psychotronics, one needs access to as much of the periodical literature as possible on these subjects.

To address this issue, the United States Psychotronics Association has resolved to identify and acquire every psychotronics related periodical that has ever been published anywhere in the world, and to retain copies in the USPA Library.

As a first step, we have developed the following list of periodicals that focused on or frequently had articles on psychotronics related subjects. But this is only a preliminary list, and we know that there are probably more psychotronics periodicals that have been published, but that we do not yet know about.

So please look over the following list and check your own personal physical libraries and your computers to see if you have any issues of the periodicals on this list. Even if you just have one issue, please let us know, because that may be the one we need to complete all the issues of a particular periodical. **Please write to me (John) at: joreed43@gmail.com, since I am the USPA librarian and archivist coordinating this effort,** and tell me what periodicals you have.

As a whole, the members of USPA have a huge “library” of periodicals, but it just happens to be “distributed” among its members at this point in time. However, we can work together, and if you would be willing to loan, donate, xerox, or as a last resort, sell copies of your periodicals for the USPA Library, then we will be able to build a large centralized library of all psychotronics periodicals. And all USPA members will then be able to use these periodicals in their research or for their reading enjoyment.

American Journal of Electromedicine: Daniel Kirsch Ph.D., developer of Alpha-Stim Craniotherapy Electrical Stimulation (CES) was the first editor; **The USPA Library needs all issues.**

American Journal of Electrotherapeutics and Radiology: This journal was published in New York, New York, by the American Electrotherapeutic Association. It began with Vol. 34, no. 1 (January, 1916), and continued to be published under this title through Vol. 44, no. 12 (December, 1926), when the title was changed to Physical Therapeutics. Editorship continued under William B. Snow, M.D., and journal numbering was also retained under the new title. The prior title had been Journal of Advanced Therapeutics. **The USPA Library needs all issues of this periodical.**

American Radio Therapy Society Journal: This was a periodical published in Hollywood, California, by the American Radio Therapy Society, which had been founded by Dr. Ruth Drown in 1949. This periodical began with vol. 1, no. 1 in June, 1949, and continued to be published for a period of time. However, it is not known when it ceased publication or how many issues were published, but presumably it ceased sometime before Dr. Drown's death in 1963. This journal focused on radionics psychotronics subjects, and had no interest in ionizing radiation therapies, such as x-ray therapy, which were also known as "radio therapy" at that time. The only library in the world that has copies of this periodical is the National Library of Medicine in Bethesda, Maryland. **The USPA Library needs all issues of this periodical.**

BEMI Currents: BEMI Currents was a quarterly journal published by the Bio-Electro-Magnetics Institute in Reno, Nevada, from 1989-1993. The editor was Dr. John Zimmerman. This journal began with vol. 1, no. 1 (Spring, 1989) and continued through Vol. 3, no. 4 (March, 1993), after which it ceased publication. **A total of 12 issues were published, and the USPA Library has all 12 issues in its collection.**

Bioeffects Newsletter: This was a periodical that was published by the "Physiology Program", Office of Naval Research, in Arlington, Virginia, and focused on the biological effects of electromagnetic fields. It probably began sometime in the 1977, because it is known that Issue #5 was dated April, 1978. The Bioeffects Newsletter is believed to have ceased publication when the Bioelectromagnetics Society (BEMS) was formed in 1978, because it was edited by Thomas Rozzell, who served as the editor of the BEMS Newsletter for the Bioelectromagnetics Society. This periodical is not found in any library of the world, but is undoubtedly in a number of private collections. **The USPA Library needs all issues of this periodical.**

Bioelectric Medicine: Journal founded in 2014, Kevin Tracey, M.D., President of the Feinstein Institute for Medical Research, which has established a Center for Bioelectronic Medicine; **The USPA Library needs all issues.**

BioElectroMagnetics: Published by John Wiley and Sons from Vol. 1, No. 1 (1980) to present. It is the **Journal of the Bioelectromagnetics Society**. We need all issues. All articles are freely available online at Johns Hopkins, back to 1980; **The USPA Library needs all issues.**

Bioenergetik (ISSN: 0933-6176): This was a periodical published in Bruchsal, Germany, by Energetik-Verlag. It focused on Kirlian Photography and bioelectrical diagnosis and therapy. This periodical began with issue No. 1 in 1986, edited by internationally known researcher Dr. Marco Bischof. Bioenergetik continued being published through issue No. 17 in 1991, when it ceased publication. **The USPA Library needs all issues of this periodical.** Only four libraries in the world are known to have this periodical in their collections: 1) National Library of Medicine in Bethesda, Maryland, 2) The Badische Landesbibliothek in Karlsruhe, Germany; 3) The Deutsche Nationalbibliothek in Frankfurt am Main, Germany; and 4) The Württembergische

Landesbibliothek in Stuttgart, Germany. If any readers live near any of these libraries, it would be greatly appreciated if you would xerox any of these issues that you can, and send them to the USPA Library. Please write to the editor (John Reed) ahead of time if you are willing to help: joreed43@gmail.com.

Bridges: This was the newsmagazine of the International Society for the Study of Subtle Energies & Energy Medicine (ISSSEEM) from 1990 through the present. **The USPA Library has a complete set of this periodical from vol. 1, no 1 (Spring, 1990) through the present.**

British Journal of Radiesthesia and Radionics. Published by the British Radiesthesia Association, 1953-1963. The original title was British Journal of Radiesthesia. **The USPA Library needs all issues.**

Clinical Bulletin (Electronic Medical Foundation): This periodical was published by the Electronic Medical Foundation in San Francisco, California, from 1945 into 1948, when it was absorbed by the Electronic Medical Digest. Clinical Bulletin No. 4 was published in mid-1946, but the exact date is unknown, because that issue is undated. However, Issue No. 17 is dated April, 1948, and it is known that an issue No. 18 was also published in 1948, before it was absorbed by the Electronic Medical Digest. **The USPA Library has issues No. 4 and No. 17, but needs all other issues including what is believed to be the final issue, No. 18.**

DeLaWarr Laboratories Newsletter: published by George and Marjorie DeLaWarr, and later their daughter Diana Di Pinto, from 1964-1986. **The USPA Library has a complete set of these, unless you know of any issues published after 1986.**

Dowsing Today: The journal of the British Society of Dowsters, published from 2000 to the present. Original title was Radio Perception, which began in 1933. **The USPA Library needs all issues.**

Earthpulse Flashpoints: This periodical was edited by Dr. Nick Begich and published by Earthpulse Press, Inc. in Anchorage Alaska. It focused on such subjects as Patrick Flanagan's neurophone, biohazards of ELF, living cells as electromagnetic units, and other psychotronic related subjects. It began with Series (Volume) 1, no. 1 in 1996, and continued until at least 1999, when the last known issue, Series 2, no. 3, was published. Only one library in the world has this periodical in its collection, the UAA/APU Consortium Library in Anchorage, Alaska. **The USPA Library needs all issues of this periodical.**

Electro and Magnetobiology: Published by Taylor and Francis from 1993-2002. Title was changed to Electromagnetic Biology and Medicine. **The USPA Library needs all issues.**

Electromagnetic Biology and Medicine: Published by Taylor and Francis from 2003-present. Former editor, Dr. Abe Liboff; **The USPA Library needs all issues.**

Electronic Medical Digest: published in San Francisco, California, by the College of Electronic Medicine, and then the Electronic Medical Foundation from 1946 - 1955, edited by Fred J. Hart. **The USPA Library needs all issues.**

Electrotherapy News: This was a periodical published in Hatfield, Hertfordshire, England, United Kingdom, by Professor Timothy Watson (University of Hertfordshire), who was also the editor. It focused on news about electrotherapy, energy medicine, and related subjects, as well as, bibliographic citations of articles on these subjects. This periodical began with Vol. 1, No. 1 (June, 2005)) and continued through at least Vol. 5, No. 1 (January, 2010), but it is uncertain if any issues were published after that date. **The USPA Library needs all issues of this periodical.** If you have any copies of this periodical, please write to the USPA editor: joreed43@gmail.com;

Electrus Newsletter on Bioelectronics: This periodical was published by the American Institute of Archives located in Keene, Texas, in the early 1990s. It was edited by Mark Simpso, author of the book, The Rife Way III, and focused on Royal R. Rife research and bioelectromagnetics. It began with Issue #1 (August, 1990) and published at least two issues, with the second being Issue # 2 (November, 1990). However, it is not known if any other issues were ever published. According to WorldCat, it is not held by any library in the world. **The USPA Library needs all issues of this periodical.**

Energy & Character - Journal of Bioenergetic Research: This was a periodical published by Abbotsbury Publications, Dorset, England, UK, and focused on psychotronic related subjects, especially orgone energy and Wilhelm Reich's research. It began with vol. 1, no. 1 (January, 1970), and continued publishing 3 times per year for 38 years, but ceased publication with volume 37 in 2009. **The USPA Library needs all issues of this periodical.**

Experimental Special Data Bulletin: This was a monthly periodical published in Kansas City, Missouri, by the Radiation Laboratories, Inc., headed by T. Galen Hieronymus. It began with Vol. 1, No. 1 (January, 1948) and continued through at least Vol. 2, No. 7 (July, 1949), but it is uncertain if any issues were published after that date. **The USPA Library needs all issues of this periodical.**

Extension Bulletin, Electronic Medical Foundation: This was a series of bulletins published by the Electronic Medical Foundation of San Francisco, beginning in the late 1940s. Thomas Colson was the editor, and at least three issues were published, No. 1, No. 2, and No. 3, which the USPA Library has, but they are undated. **The USPA Library needs any issues that were published after No. 3.**

Information Service Newsletter: This was a quarterly periodical published in Oxford, England, by the Delawarr Laboratories, Ltd., and the Radionic-Magnetic Centre Organisation. It focused on radionics, subtle energies, and related subjects. This periodical began with Vol. 1, No. 1 (Spring, 1973) and continued through at least the Winter, 1980, issue, but it is uncertain if any issues were published after that date. **The USPA Library needs all issues of this periodical.** No libraries in the world have this periodical in their collections. If any readers happen to have copies of this periodical in their personal library, it would be greatly appreciated if you would xerox these issues

and send them to the USPA Library. Please write to the editor (John Reed) ahead of time if you are willing to help: joreed43@gmail.com;

Interdimensional News: This periodical was edited by Peter Kelly, who founded what is now [Kelly Research Technologies \(KRT\)](#), and published by Interdimensional Sciences, Inc., in Lakemont, Georgia. It focused on radionics, energy medicine, effects of EM waves and fields, and other psychotronic related subjects. It began with Volume 1, no. 1 (Fall, 1983) and continued on until the final issue, Volume 3, no. 3 (May-June, 1986). **Through the generous donation of Ed Kelly, USPA Board member, and current CEO of Kelly Research Technologies (KRT), the USPA Library has a complete set of this periodical.**

Journal of Advanced Therapeutics: Published in New York, New York, by the American Electrotherapeutic Association. It began with Vol. 20, no. 1 (January, 1902), and continued to be published under this title through Vol. 33, no. 10 (December, 1915), when the title was changed to the American Journal of Electroherapeutics and Radiology. Editorship continued under William B. Snow, M.D., and journal numbering was also retained under the new title. The prior title of this journal had been Journal of Electrotherapeutics; **The USPA Library needs all issues of this periodical;**

Journal of Bioelectricity: Published by Taylor and Francis from 1982-1992. Title was changed to Electro and Magnetobiology. **The USPA Library needs all issues.**

Journal of Bioenergetic Research (JBR): This periodical was being published by the Royal Rife Research Society (RRRS) in Carlsbad, California, in the early 1990's. It is not known for certain when the JBR began publishing, but is believed to be in 1992, since vol. 1, no. 3 was for November, 1992. By 1995, it was no longer being published, and in correspondence by John H. Reed with the RRRS in August, 1995, the RRRS stated that no back issues were available. **The USPA Library needs all issues of this periodical.**

Journal of Electroceutical Medicine: founded by Richard Markoll, MD, PhD, Port d'Andratx (Majorca), Balearic Islands, Spain; **The USPA Library needs all issues.**

Journal of Electronic Medicine (Kirksville, Missouri): This was a periodical that was published by the Kirksville, Missouri, McManis Branch of Albert Abrams' College of Electronic Medicine, which was headquartered in San Francisco, California. This very rare journal focused on Albert Abrams' radionic methods of diagnosis and treatment, as well, as other energy and electronic methods of medical treatment. It began with Vol. 1, No. 1, probably in January, 1923, because it is known for certain that Vol. 1, No. 5 was dated May, 1923. This periodical ceased publication later in 1923, when the McManis Branch was closed, and it is not known whether there were any other issues published after issue No. 5. This journal is not listed in Worldcat as being held by any library in the world, but a single issue was recently discovered by John Reed and Daniel Taylor in the archives of the Museum of Osteopathic Medicine at A.T. Still University in Kirksville, Missouri. **The USPA Library has issue Vol. 1, No. 5, but needs issues Vol. 1 No. 1, 2, 3, and 4, as well as, any issues of this periodical that may have been published after No. 5 in 1923.**

Journal of Electronic Medicine (San Francisco, California): This was a continuation of Physico-Clinical Medicine, and ran from 1939-1945, published by Fred J. Hart and the College of Electronic Medicine. **The USPA Library needs all issues.**

Journal of Electrotherapeutics: Published in NY, New York, by the American Electrotherapeutic Association. It began with Vol. 1, no. 1 in 1883, and continued to be published under this title through Vol. 19, no. 12 (December, 1901), when the title was changed to the Journal of Advanced Therapeutics (see following title). Editorship continued under William B. Snow, M.D., and journal numbering was also retained under the new title. **The USPA Library needs all issues of this periodical;**

Journal of Paraphysics/International Journal of Paraphysics: Benson Herbert started his Paraphysical Laboratory in Downton, Wiltshire, England and began publishing the Journal of Paraphysics with vol.1, no.1 in 1967, and the name was later changed to International Journal of Paraphysics . Herbert published the Journal from 1967 until around 1989, with the last volume being vol. 23 in that year. Since the Journal and Lab were mostly the project of Herbert, they fell apart as his health failed and have become defunct. **The USPA Library needs all issues of this periodical.**

Journal of the American Electronic Research Association: Vol 1, No. 1 (January, 1924) through Vol. 13, No. ??? (1936), when it ceased publication; The USPA Library needs all issues.

Journal of the Bioelectromagnetics Society: see BioElectroMagnetics, above;

Journal of the British Society of Dowsters: Published by the British Society of Dowsters from 1956-2000. Prior title was **Radio Perception**. Succeeding title: **Dowsing Today**. **The USPA Library needs all issues.**

Journal of the Drown Radio Therapy: This was a periodical published in Hollywood, California, by the Drown Laboratory of Radio Therapy, headed by Dr. Ruth Drown. It focused on radionics and the Drown therapy methodology. This periodical began with Vol. 1, No. 1 (1940) and continued through at least 1948, but it is uncertain if any issues were published after that year. Only four libraries in the world are known to have this periodical in their collections: 1) The National Library of Medicine; 2) Library of Congress 3) New York Academy of Medicine, and 4) University of Chicago. Each of these libraries has only a few issues of this periodical, and the editor, with the kind help of Charlene Boehm was able to obtain copies of the only three issues at the University of Chicago. Those issues are now part of the USPA Library and Archives and are: Volume 2, No. 1 (June, 1941), Vol. 2, No. 6-7 (combined issue) (Nov.-Dec., 1941), and Vol. 2, No. 8 (June, 1942). If any readers live near the other three libraries, it would be greatly appreciated if you would xerox any issues other than the above issues and send them to the USPA Library. Please write to the editor (John Reed) ahead of time if you are willing to help: joreed43@gmail.com; Thank you for any help you can provide.

Journal of the United States Psychotronics Association. Published by the United States Psychotronics Association. Only six issues were published, and **the USPA Library has a complete set.**

JPI News: This periodical was being published by the Japan Psychotronics Institute in Tsukuba-shi Ibaraki, Japan, in the 1990's. It is known that there was a September, 1993, issue of this periodical, but it is not known when it was first published, or if it is still being published. **The USPA Library needs all issues of this periodical.**

Les Amis de la Radiesthesie (ISSN: 00031798): This is a quarterly periodical published in Paris, France, by the Association des Amis de la Radiesthesie (AAR): <http://www.lesamisdelaradiesthesie.fr/> . It focuses on radiesthesia, Lakhovsky's research, and related subjects. This periodical began with Vol.1, No.1 (December, 1930), and continues to be published by the AAR. Some images of the covers of a number of [issues of this periodical can be accessed here](#). The USPA Library needs all issues of this periodical.

Little Farm Journal: This periodical was published by Lutie Larsen and Little Farm Research in Pleasant Grove, Utah, and focused on agricultural radionics and related subjects. It began sometime before the first issue of The Radionic Homestead Report, which was published in May, 1988, because that issue referred to the Little Farm Journal. It is not known when it began publishing, how many issues were published, or when it ceased publication. This periodical is not found in any library of the world, but is undoubtedly in a number of private individuals' collections. **The USPA Library needs all issues of this periodical.**

Mind and Matter: published by George DeLaWarr of the DeLawarr Laboratories in Oxford, England from 1957-1967. **The USPA Library has a complete set of these very rare journals.**

NeuroQuantology: (ISSN: 1303-5150) This is a quarterly peer-reviewed journal published in Bornova, Turkey, by Suktan Tarlaci, M.D., a Turkish physician. It is published in English and focuses physical and quantum explanations for consciousness, psychic phenomena, entanglement, non-locality, mind-matter interaction, and related subjects. It began with Vol. 1, No. 1 in 2003 and has continued to be published through the present, with Vol. 15, No. 2 being published in 2017.

The USPA Library needs all issues of this periodical. Many issues are freely available to readers at:

<https://www.neuroquantology.com/index.php/journal/issue/archive>

New ERA Health Bulletin: This was a periodical published by The Abrams Institute (Radio Diagnostic Laboratory) at 24 Clark Street, Brooklyn, New York. It was originally edited by the leaders of this organization, Irving Platt Withington, M.D., medical director and William F. Hudgings, business manager. This periodical began with Vol. 1, No. 1 sometime in 1927, although the exact date is uncertain. It continued to be published through at least Vol. 1, No 2 published in November, 1927, but it is uncertain if any issues were published after that issue. **No library in the entire world has this periodical in its collection. If by chance any reader has issues of this periodical, please write to the editor (John Reed) at: joreed43@gmail.com;**

Newsletter of the Institute of Psionic Medicine. Published by the Institute of Psionic Medicine only from 1978-1979. **The USPA Library needs all issues.**

Newsheet of the Psionic Medical Society. Published by the Psionic Medical Society in the England only from 1975-1977. **The USPA Library needs all issues.**

New Zealand Society of Dowsing & Radionics Journal. Published by the New Zealand Society of Dowsing & Radionics from 1988-present. **The USPA Library needs all issues.**

Official Radionic Service Bulletin: This was a monthly periodical published during the 1930s and 1940s in Springfield, Missouri, by the Inter-National Radionic Association (spelled with a hyphen). It was originally edited by H.J. Rogers, and focused on radionics and the use of the White Light Radionic Instrument, which was manufactured (it is believed) by the Art Tool and Die Company in Detroit, Michigan. This periodical began with Vol. 1, No. 1 in 1934, and continued to be published into the 1940s, but it is uncertain when the final issue was. **The USPA Library has only one issue of this periodical, Vol. 7, No. 1 (October, 1940), and needs all other issues. No library in the world has this periodical in their collections, according to the WorldCat database,** so any existing issues must be in private collections. If any readers have issues of this periodical, it would be greatly appreciated if you would xerox these issues and send them to the USPA Library. Please write to the editor (John Reed) ahead of time if you are willing to help: joreed43@gmail.com;

Pathoclast News: This was a periodical published in Chicago, Illinois, by Ernest L. Fantus Co. It focused issues related to the use of the radionics device known as the pathoclast, as well as, other subjects related to radionics. It began publishing in the 1930s or 1940s and published several issues, at least up through vol. 4, No. 1, but this issue is not dated, and it is not known if any other issues were ever published. **The USPA Library needs all issues of this periodical.**

Pathometric Journal (Sometimes called the Pathoclast Journal): This was a periodical published in Chicago, Illinois, by the Universal Society of Pathometrists. It focused on issues related to the Pathoclast instrument, radionics, psychotronics, and related subjects. This periodical began with Vol. 1, No. 1 in 1929 and continued through at least Vol. 18, No. 3 (April, 1946), but it is uncertain if any issues were published after that date. In the late 1930s and early 1940s, it was called "Journal of the Universal Society of Pathometrists". **The USPA Library needs all issues of this periodical.** No known libraries in the world have this periodical in their collections. If any readers happen to have issues of this periodical, it would be greatly appreciated if you would xerox these issues and send them to the USPA Library. Please write to the editor (John Reed) ahead of time if you are willing to help: joreed43@gmail.com;

Pendulum: A Monthly Review of Radiesthesia: This was a monthly periodical published in London, England, by Markham House Press, Ltd. It was founded by F. A. Archdale and was edited by Egerton Sykes. It focused on all aspects of radiesthesia, pyramid energy, subtle energies, and related subjects. This periodical began with Vol. 1, No. 1 (October, 1950) and continued through at least Vol. 13, No.12 (September, 1963),

but it is uncertain if any issues were published after that date. **The USPA Library has most of the issues of this periodical, but is missing several issues. Please see the "Among the Missing" section for a complete list of the missing issues.**

Physico-Clinical Medicine: This journal was started in 1916 by the father of radionics, Dr. Albert Abrams, and continued to be published up through 1938, by Fred J. Hart, who took over the College of Electronic Medicine after Abrams died in 1924. **The USPA has all issues of this periodical, the only complete collection in the world.** The name was changed in 1939 to Journal of Electronic Medicine.

Psionic Medicine (ISSN: 0033-2585). This was a periodical published in Hindhead, Surrey, England, by the Psionic Medical Society. It was originally edited by Dr. Aubrey Westlake, and focused on psionic medicine, and related subjects. This periodical began with Vol. 1, No. 1 (Winter, 1969) and continued through at least Vol. 16, (2000), but it is uncertain if any issues were published after that date. The USPA Library needs most issues of this periodical. Only one library in the world has this periodical in its collection: The British Library, London, England. If any readers live near this library, it would be greatly appreciated if you would xerox these issues and send them to the USPA Library. Please write to the editor (John Reed) ahead of time if you are willing to help: joreed43@gmail.com;

Psychic Research Newsletter (Marcel Vogel): Volume 1, No. 1 (May-June, 1984) through Vol. 5, No. 4 (July-August, 1988) This is the periodical that Marcel Vogel published in the 1980's as part of his research organization, Psychic Research, Inc. in San Jose, California. The title of the periodical is really a misnomer, as is the name of his research organization, because the periodical deals almost exclusively with Vogel's and other's research on crystals and their use in healing, and very little with psychic matters. **The USPA Library has all known issues.**

Psychoenergetic Systems : This periodical was published by Gordon & Breach Science Publications in New York City, and focused on psychotronic related subjects. It began with vol. 1, no. 1 in December, 1974, and continued with this title until 1981, when the title was changed to "**Psychoenergetics**" (ISSN: 0278-6060) with the April, 1981, issue. It then continued under this title until 1988, when the title was again changed to "**Theoretical Parapsychology**" (ISSN: 0894-2528). However, only one issue (vol. 6, no. 1) was ever published under this title, after which it ceased publication. **The USPA Library needs all issues of this periodical.**

Psychotronik: This periodical was published in Innsbruck, Austria, and focused on radionics and psychotronics related subjects. It began with Vol. 1, No. 1 in 1977, but ceased with Vol. 3 in 1979. **The USPA Library needs all issues of this periodical.**

Quantum Medicine: This periodical was published by the Association of Eclectic Physicians in Savannah, Georgia, and focused on quantum related treatments of medical disorders. It began with vol. 1, no. 1 in 1988, but only a few issues were ever published before it went out of business. **The USPA Library needs all issues of this periodical.**

Radiesthesia. Published by the Dowser's Club of South Australia, and began in 1992. **The USPA Library needs all issues.**

Radio Perception. This was the original title of the Journal of the British Society of Dowsters, which began in 1933 and was published under that name until around 1956, when its name was changed to the Journal of the British Society of Dowsters, and continues today under the name, Dowsing Today. **The USPA Library needs all issues.**

Radionic - Magnetic Centre Newsletter: This was a quarterly periodical published in Oxford, England, headed by the Radionic-Magnetic Centre Organization, also known as the Radionic Centre Organization. It focused on radionics, subtle energies and related subjects. This periodical began with Vol. 1, No. 1 (Autumn, 1967) and continued through at least Winter, 1978, but it is uncertain if any issues were published after that date. **The USPA Library needs all issues of this periodical.** Only one library in the world has this periodical in its collection: The British Library. If any readers live near this library, it would be greatly appreciated if you would xerox these issues and send them to the USPA Library. Please write to the editor (John Reed) ahead of time if you are willing to help: joreed43@gmail.com;

Radionics Journal: Published by the Radionics Association in England from 1954 through the present. **The USPA Library has a complete set of these from Vol. 1, no. 1 (1954), through 2005, but needs all issues published after 2005.**

Radionics Network Newsletter: Vol. 1, No. 1 (January-February, 1993); Last Known issue: Vol. 4, No. 6 (November-December, 1996); Published by the Radionics Network, New South Wales, Australia; **The USPA Library has Vol.1, No.1 (Jan.-Feb., 1993) through Vol.5, No.1 (Jan.-Feb., 1997), but needs all issues published since then.**

Radionik Newsletter: This periodical is published by the German School of Radionics (GSR), an organization founded by Claudio Romanazzi in Germany in 1994. It is a monthly, and began with issue No. 1 in 2006, and has been published continuously since then. **The USPA Library needs all issues of this periodical.**

Research Report (Electronic Medical Foundation): This periodical was published by the Electronic Medical Foundation in San Francisco, California, beginning in the late 1940s, although the date of the first issue is unknown. Research Report No. 5 was published in 1949, but the exact date of that issue is also unknown, because it is undated. It is not known if any issues after No. 5 were ever published. **The USPA Library has only issue No. 5, and needs issues No 1 through No. 4, as well as, any issues that were published after No. 5.**

Resonance: Newsletter of the Bioelectromagnetics Special Interest Group (BEM SIG) of American Mensa during the 1980s and 1990s. **The USPA Library has a complete set of this rare periodical;**

Subtle Energies: (ISSN: 1084-2209) This was the original title of the periodical, **Subtle Energies and Energy Medicine**, when it began publishing in 1990. The title was changed to Subtle Energies and Energy Medicine in 1996.

Subtle Energies and Energy Medicine: Published by the International Society for the Study of Subtle Energies and Energy Medicine (ISSSEEM) from 1990 through the

present, with some interruptions. **The USPA Library needs most of the issues of this periodical;**

The Radiant News: Vol. 1, Issue 0 [zero] (March, 2001) through Vol. 1, No. 12 (May, 2002), after which it ceased publication. Published by Peter Lindemann of Clear Tech, Inc. **The USPA Library has all 13 issues.**

The Radionic Homestead Report: This periodical was a periodical published by Lutie Larsen and Little Farm Research in Pleasant Grove, Utah. It began with the first issue being May, 1988. It is not known how many issues were published, or when it ceased publication. **The USPA Library needs all issues, except the first issue (May, 1988) and vol. 3, no. 4 (August-September, 1990), which are the only two issues in the USPA Library.**

Transactions of the American Electro-Therapeutic Association (AETA): This was a periodical published in New York, NY, by the AETA. It focused on the activities of the AETA, especially the presentations and other activities at their annual meetings. This periodical began in 1891 and continued through at least 1909, but it is uncertain if any issues were published after that date. **The USPA Library needs all issues of this periodical.** Only one library in the world is known to have this periodical in their collection: The University of Michigan. If any readers live near this library, it would be greatly appreciated if you would xerox any of these issues that you can, and send them to the USPA Library. Please write to the editor (John Reed) ahead of time if you are willing to help: joreed43@gmail.com;

USPA Newsletter: Published by the United States Psychotronic Association from 1977 through present. **The USPA Library needs most of these issues.**

Visible Spectrum Researcher: This was a periodical published by the Visible Spectrum Research Institute in Malaga, New Jersey, USA. It was edited by Dinshah P. Ghadiali and was published monthly, focusing on color and light therapy. It began with vol. 1, no. 1 (January, 1955), and published issues through at least vol. 3, no. 1 (January, 1957). It is not known if any issues were published beyond that date. **The USPA Library needs all issues of this periodical.**

Zeitschrift fuer Radiaesthetie und Harmoniefindung (Journal of Radiesthesia and Harmonization) (ISSN: 2191-0103) This journal is published in Munich, Germany by Herald-Verlag, and focuses on radiesthesia and related subjects. It was founded in with Vol. 1, No. 1 in 1950 by Dr. Franz Wetzel (1888-1956), and continues to be published at present. The former title from 1950-2010 was: **Zeitschrift fuer Radiaesthetie** (Germany) (0044-3425). **The USPA Library needs all issues of this periodical.**

Zeitschrift RGS (Radiesthesia - Geopathie - Strahlenbiologie); (Journal of Radiesthesia, Geopathy, and Radiation Biology): This was a radiesthesia and radionics periodical published by the Schweizerische Gesellschaft für Radiästhesie (Swiss Society of Radiesthesia) in St. Gallen, Switzerland. It began publishing around 1949, although the date is uncertain, and the title was changed at some point to "Schweizerische Zeitschrift für Radiästhesie, Radionik, Geopathie, Strahlenbiologie" (Swiss Journal of Radiesthesia, Radionics, Geopathy, and Radiation Biology). It was

still being published in 2014, with issue No. 291 being published during that year. **The USPA Library needs all issues of this periodical.**

USPA Local Groups and Affiliates Update

As mentioned in the May, 2016, USPA Newsletter, one of our goals is to reactivate all of the former 24 USPA Chapters that once existed across the US and Mexico. In addition, we plan to establish new local groups of people interested in psychotronics and related subjects in other major cities in the US and other countries as well. All such local groups and affiliates will be independent, but will work together with the USPA in a mutually beneficial relationship to achieve our goals of advancing research and applications in psychotronics, radionics, subtle energy, and related fields.

So I would like to invite all of former USPA Chapters leaders and members to contact me (John Reed) at: joreed43@gmail.com and let me know if you would like to help reactivate your local chapter. In addition, if you are a leader or member of a psychotronics or related organization which was never a chapter of USPA, and we would welcome you as a USPA affiliated organization as well.

We will be establishing a USPA affiliated groups as traditional organizations and also via the Meetup.com online group platform. This will enable current and former members to more easily have local get-togethers, meetings, and other activities, and those activities, times, and other details can be posted online. So please let me know if you would like to be the leader of a group in your area.

If you do decide to use Meetup.com to establish your local group, you could do it quickly and easily by going to www.meetup.com , and clicking on the big red word **“Start”** in the upper left, and then just following the step-by-step procedures.

You can give your local group any name you want, but it should probably have a name that relates to psychotronics in some way. And if you need any help, please let me know, and I will help you in any way I can. Perhaps the most important thing is enthusiasm and determination, so write to me, even if you don't know any other USPA members in your area, and I will help you set up a local group: joreed43@gmail.com

Exchange Corner and Advertisements

The “Exchange Corner”, is a place where people can advertise to buy, exchange, or sell items of interest, or request information or other help in relation to something wanted. So if there is anything you want to buy, sell or trade that has to do with psychotronics, radionics, subtle energy, or related subjects, please contacted the Classified Ads manager at: joreed43@gmail.com. Advertisements are free of charge to USPA member within certain limits, but non-members will be charged for any classified or display ads. So please send your ads and wanted requests to: joreed43@gmail.com.

Wanted: Any articles, periodicals, books, devices, or other materials on psychotronic related subjects that you can donate or lend to the USPA for its library, archives, and museum. **The USPA is a nonprofit, 501(c)(3), tax exempt organization, and as such, you are able to make tax deductible donations to the USPA. Please email the USPA at: joreed43@gmail.com to make shipping arrangements. Thank you for your generosity.**

Mariette Picket has a friend that has a brand new unused Kelly Personal Analyzer that she paid \$2100 for, and is offering it for sale at only \$1600.00 Anyone interested call Mariette at: [317-773-0061](tel:317-773-0061)

Bruce Copen MARS III for Sale

I am a current USPA member and have a **Bruce Copen MARS III** for sale. The system is about 7 or 8 years old and in original, excellent condition. Sale includes original SCOPE analysis, database and broadcast software, HP laptop, comprehensive training manual and program disc, interconnects and boxes. I have always run it on XP with no issues; everything original as supplied by Copen.

All operations can be automated and multiple broadcasts can be run simultaneously, although Copen saw to develop this device so it could be used in many radionic styles and without computer control. The price is \$8500 USD roughly half the original cost. I prefer to not ship to a destination outside the USA. A limited amount of training by me, as I understand it, is available to a confirmed purchaser, as time and distance reasonably permit. Please contact: **Dr Robert Dixon, robertdixondc@gmail.com or call (304) 259-9439** Berkeley Springs, WV.

KRT Experimental Agricultural Radionic Analyzer for Sale

For Sale:

USED EXPERIMENTAL AGRICULTURAL RADIONIC ANALYZER

Manufactured by KRT (Kelly), this machine is a predecessor to their current Workstation model. The machine is clean and in good condition. For more information please see KRT's website: <http://www.kellyresearchtech.com>

Asking a very reasonable \$2499.00 plus \$100.00 shipping to the lower 48 states.

Please contact saminox@hotmail.com.

What Research and Subjects Does Psychotronics Cover?

The United States Psychotronics Association defines psychotronics as the science of mind-body-environment relationships, an interdisciplinary science concerned with the interactions of matter, energy, and consciousness. Psychotronics involves the study, research, and applications of the physics and technology of the mind, brain, spirit, consciousness, and the underlying forces of life and nature – hence the term “psychotronics”.

We believe that a true understanding of the universe must include the spiritual, as well as, the technical, and provide an opportunity for amateur researchers to present their findings along with the professionals. We stress research, with documentation of results, and practical applications, rather than personal experience and unsupported hypotheses.

Some Prominent People in the history of psychotronics research and application: Albert Abrams, Thomas Bearden, Robert C. Beck, Robert O. Becker, Jacques Benveniste, David Bohm, Harold Saxon Burr, George W. Crile, Ruth Drown, T. Galen Hieronymus, Vlail P. Kaznacheyev, Georges Lakhovsky, Wilhelm Reich, Royal R. Rife, Rupert Sheldrake, Nikola Tesla, Marcel Vogel, and others.

Some of the forces, fields, waves, and energies studied and researched in psychotronics include: bioelectromagnetism, biophotons, biopotentials, electromagnetic wave pollution and harmful effects; coherent emanations of DNA, emanations of matter, “free energy”, morphogenetic fields, non-hertzian waves, orgone energy, pyramid energy and power, qi (chi), quantum fields, scalar waves, subtle energies, ultra-weak radiation of living matter, zero-point energy, and others.

Some of the phenomena believed to be produced or involved with the above fields and energies: action-at-a-distance, the aura of the body and other living things, bioinformation, bioluminescence, chakras, consciousness, distant intercellular interactions, meridians of the body, mind-body interactions, non-locality, the placebo effect, quantum consciousness, spontaneous remission of cancer and other diseases, water memory, water structure, and others.

Related fields of study and research covering the above forces, energies, and phenomena of psychotronics: bioelectromagnetics, bioenergetics, biophotonics, biophysics, psionics, psychoenergetics, psychoneuroimmunology, quantum biology, radionics, scalar electromagnetics, and others.

Some practices, techniques, and applications related to psychotronics include: acupuncture, biogeometry, brain entrainment, clairvoyance, dowsing, energy healing and medicine, extrasensory perception, feng shui, homeopathy, kirlian photography, magnetic therapy, pendulum use and methods, prayer effects, psionic medicine, psychic healing, psychometry, qigong, radiesthesia, radionics, remote viewing, shamanism, sound and sonic healing, telekinesis, telepathy, and others.

Membership Benefits

So if you are interested in any of the above subjects, then the USPA is the place for you, where you can interact with, exchange ideas, and collaborate with other people who are interested in the same subjects. So sign up now for membership in the USPA using the form on the following page and start enjoying all of your membership benefits. These benefits include, but are not limited to:

1. **USPA Psychotronics Library:** Free access to copies of certain articles, periodicals, books, audio tapes, videos, and other materials in **USPA Psychotronics Library**. Please write to joreed43@gmail.com for whatever item(s) you are seeking;
2. **Your free subscription to the USPA Journal & Newsletter;**
3. **Your right to freely publish articles in the WISE Journal - The Journal of the World Institute for Scientific Exploration (ISSN 2381-1536),** enabling the world to see your ideas or research, and thereby enhance your resume and credentials;
4. **Your right to use the USPA Literature Research Service,** whereby we will find any article, book, or other item you are seeking on the above subjects, and provide it to you;
5. **Your right to participate in the USPA “Research Assistance Program”,** especially useful to professors, authors, and other researchers, who need extra help on their projects. USPA will help find volunteers to help you with your research project(s).
6. **Your right to be part of the USPA Project Participation Program,** whereby you can volunteer to help on numerous available USPA projects, or help researchers who are conducting research on psychotronics and related subjects.
7. **Your right to make oral or poster presentations at the annual USPA meeting,** with the approval of the Annual USPA Meeting Planning Committee.
8. **Your right to discounts** on the purchase of certain items and services made available for sale or provided by the USPA and its members.
9. **Your right to freely advertise in the WISE Journal,** which goes out to thousands of people.
10. **Your right to participate in the USPA Psychotronic Literature Preservation Program (UPLPP).** The USPA, via its Library and Archives, has established a “Literature Preservation Program” to preserve your personal papers, files, records, and collection of articles, periodicals, books, and devices on psychotronics and related subjects, noted above. You may no longer need or use some of these items that you have, and you can send them to the USPA, and we will preserve them in our library and archives, so that they can be of use to other researchers.

MEMBERSHIP INFORMATION

The U.S. Psychotronics Association (USPA), was incorporated in the District of Columbia in August, 1977, and is a nonprofit, 501(c)(3), tax exempt organization, and as such, you are able to make tax deductible donations to the USPA. It is empowered to enroll members in the parent organization throughout the United States, Canada, and other foreign countries. Membership is open to all people who wish to join with the USPA on the new frontiers of science in working constructively for the qualitative improvement of man and his environment. **Please remember the USPA in your annual charitable giving, especially if you want to advance research in the above subject areas, which can greatly benefit humans, animals, plants, and the environment.**

United States Psychotronics Association Membership Application

Please print the page, and complete the following information:

Date _____

Name _____

Email _____

Mailing Address: _____

City _____ St _____ Zip Code _____

County _____ Country _____

Phone _____ Cell Phone _____

I am interested in the following Fields:

☐ General ☐ Healing ☐ New Age Physics ☐ Radionics
☐ Dowsing ☐ Subtle Energy Research Other Interests (Please specify) _____

Do you want to be listed in the USPA Membership Directory? ☐ Yes ☐ No

Type of Membership desired:

☐ One Year @ \$35 ☐ 2 Years @ \$60 ☐ 3Years @ \$85

☐ Full Time Student @\$20

☐ Member of the Military @\$20

☐ Family Member Membership @\$30 per Person

2nd Family Member _____ Email _____

3rd Family Member _____ Email _____

4th Family Member _____ Email _____

Fees Payable to USPA in U.S. Dollars only:

Please complete, scan and email document to Membership@psychotronics.org
Or Mail to USPA c/o Phyllis Weiland, 535 Michigan Ave, Apt. G Evanston, IL 60202

Thank You!

USPA Catalog of Conference Lectures, 1978-1994

Now Available

A compilation of nearly 300 lectures given at the first 17 years of the United States Psychotronics Association (USPA) conferences, from 1978 through 1994 is [now available in a 30 page catalog \(click here\)](#).

There are talks by some of the most well known scientists of our age, including Andrija Puharich, Thomas Bearden, Marcel Vogel, Lynn Surgalla, Robert Beck, T. Galen Hieronymus, J.G. Gallimore, Elizabeth Rauscher, Christopher Bird, and many, many more.

There are also lectures specifically about radionics from some of the top practitioners: Robert Beutlich, Lutie Larsen, Jerry Fridenstine, Frances Farrelly, and others.

If you have an interest in the paranormal, the life of plants or zero-point energy, there are speakers here who are experts in the fields. How about dark-field microscopy, scalars, magnetic fields, or the Philadelphia Experiment? Yes, they are in here in this catalog too. Homeopathy, color-healing, use of crystals, structuring water, water memory, and Tesla's work are some of the other topics covered in this catalog.

As of this date, (April 15, 2017) they are available only by direct contact with USPA, but soon, they will be available online. The USPA home page is at <http://www.psychotronics.org> and we will have a linked site where purchase will lead to immediate download of the MP3, and payment can be made through Pay Pal.

Please note that [in the Catalog \(click here\)](#), most of the lectures are standard MP3s, are 30-45 minutes long, and priced at a very reasonable \$5.00 each. These have no marking in the right-hand column of the catalog listing. Other MP3s are one hour or slightly longer, and are marked "Prime" in the right-hand column, with a price of \$8.00 each. And a few of the MP3s are 90 minutes or longer, and are marked "Double", with a price of \$10.00 each. USPA members get 40% off.

However, if you just "can't wait," for the online order website, email us at uspsychotronics@gmail.com or contact our USPA Treasurer by snail mail at:

Scott Beutlich
USPA,
525 Juanita Vista
Crystal Lake, IL 60014
Email: uspsychotronics@yahoo.com

Until the online order site is ready, you can print out the last page of this PDF and fill it in. You can scan it and email it to us, or send it via snail mail. For now, payment is by Check, Money order, or Pay Pal.

Thanks for your interest, and good luck with your research.

The Board and Officers of USPA
USPA is a fully registered, 501 C(3) Non-Profit Organization
Donations are Gratefully Accepted, and are fully tax deductible

J.G. Gallimore's Five Rare Books Now Available for Sale

All five of J.G. Gallimore's rare books on psychotronics subjects and unusual energies have been reprinted by the United States Psychotronics Association (USPA) and are being made available at a fraction of the cost that used copies were being sold at online. So rare have these books been, that only a few libraries in the entire world had them in their collections, and some of Gallimore's books were being sold for several hundred dollars each online. However, with these newly reprinted volumes, each will be available for less than \$30.00. Each of Gallimore's books is described below with links to Amazon.com.

Jerry G. Gallimore was one of the founders of the USPA in 1975, and was a leading researcher in psychotronics and unusual energies until his untimely death in 1989.

The Handbook of Unusual Energies: Volume 1

by J. G. Gallimore

Paperback: 484 pages

Publisher: CreateSpace Independent Publishing Platform (March 22, 2017)

Language: English

ISBN-10: 1543024998

ISBN-13: 978-1543024999

Product Dimensions: 8.5 x 1.1 x 11 inches

[Available at Amazon.com](#)

This is J.G. Gallimore's first book of three volumes on unusual energies, and at 468 pages, it is a magnificent work. In this book, Gallimore discusses in depth the research, discoveries, and

inventions of all the major researchers in subtle energies, the aether, biological

fields, pyramid energy, radiesthesia, radionics, crystal transduction, and related subjects. These include the works of Baron Von Reichenbach's and his odic energy, Dr. Wilhelm Reich's orgone energy, Dr. Harold Burr's biological life fields, Kozyrev's time mirror, Edgar Cayce's transmission of energy, and related research done by many others. Of particular importance is Gallimore's 127 page chapter on radionics. In this chapter he discusses in depth the research and devices of Ruth Drown, T. Galen Hieronymus, Rho Sigma, Dr. L. P. Corte and other prominent people in the radionics field. But in addition, Gallimore provided diagrams showing how such devices are made and how they actually work.

Collected Properties & Writings of J. G. Gallimore: Volume 2 of Handbook of Unusual Energies

by J. G. Gallimore

Paperback: 258 pages

Publisher: CreateSpace Independent Publishing Platform (March 22, 2017)

Language: English

ISBN-10: 1543025048

ISBN-13: 978-1543025040

Product Dimensions: 8.5 x 0.6 x 11 inches

[Available at Amazon.com](https://www.amazon.com/dp/1543025048)

This is the second book in the “Unusual Energies” series that J.G

Callimore published. It covers Gallimore's research on Albert Abrams, the founder of modern radionics, psychological physics, psychic energy, thought resonance, subtle energies, crystals, and related subjects. In addition, a number of radionics devices are discussed, such as the De La Warr Diagnostic Instrument. And very helpfully, the rates are provided for substances, body organs, and medical diseases and disorders. A very interesting interview of Christopher Bird, conducted by J.G. Gallimore is provided, as well as a discussion of Walter Russell and his research.

Relationship Between Parapsychology and Gravity: Volume 3 of Handbook of Unusual Energies

by J. G. Gallimore

Paperback: 228 pages

Publisher: CreateSpace Independent Publishing Platform (March 22, 2017)

Language: English

ISBN-10: 1543024947

ISBN-13: 978-1543024944

Product Dimensions: 8.5 x 0.5 x 11 inches.

[Available at Amazon.com](https://www.amazon.com/dp/1543024947)

The Relationship Between Parapsychology and Gravity is Volume 3 of J.G. Gallimore's series of three handbooks of unusual energies. This book describes in depth the research and theories of J.G. Gallimore into the question of "parapsychology transmission" --the question of how such things as telepathy, remote viewing, ESP, and similar phenomena can physically occur. Gallimore discusses various explanation on how they occur, including the possibility that gravity waves may play a role. He also discusses the various emanations, radiations, and energy fields of all matter and life. This includes the ancient Chinese energy called "chi" (qi), the ancient Indian's prana energy, Reichenback's "odhic force", Gurwitsch's "mitogenic radiation", Wilhelm Reich's orgone energy, and other subtle energies of life and matter. Gallimore shows how all of these energies are the same or similar, how they interact, and how they are related to gravity. He also discusses crystals as transducers of these energies, and provides diagrams of devices that could potentially be used to harness or control these energies.

Transverse Paraphysics: The New Science of Space, Time, and Gravity Control

by J.G. Gallimore

Paperback: 374 pages

Publisher: CreateSpace Independent
Publishing Platform (March 21, 2017)

Language: English

ISBN-10: 1543024920

ISBN-13: 978-1543024920

Product Dimensions: 8.5 x 0.8 x 11
inches

[Available at Amazon.com](https://www.amazon.com/dp/1543024920)

This book covers the visionary research and theories developed by J.G. Gallimore about anti-gravity, space, time, and biophysics. He discusses in depth the dimensions of space, time, and gravity, and new discoveries in each of these areas. In addition, he covers research being done on anti-gravity and then discusses anti-gravity patents that have been obtained. He also discusses the intriguing concept of aura energy fields surrounding humans and other living things, and how extra-sensory perception (ESP) might be explained through biophysical principles.

Unified Field Theory Research Book: Using Subjective Response to Psi-Plasma for Analysis of Properties Neutral Charge Plasma Fields

by J.G. Gallimore

Paperback: 134 pages

Publisher: CreateSpace Independent
Publishing Platform (March 21, 2017)

Language: English

ISBN-10: 1543024831

ISBN-13: 978-1543024838

Product Dimensions: 8.5 x 0.3 x 11
inches

[Available from Amazon.com](https://www.amazon.com/dp/1543024831)

This book is about psychotronics, radionics, electromagnetic fields and waves, psi-plasma, plasma fields, subtle energies, bioelectromagnetic energy, and other unusual energies emitted by living and non-living things. It also is about how living things interact with and are affected by these energies, which may enhance health or harm health. The book covers the research of Wilhem Reich on orgone energy, of Baron Reichenback on the odic forces, as well as research done by Cazzamalli on brain radiations and Lakhovsky on using high frequency radiations to successfully treat cancer in humans. In addition, Lakhovsky used similar methods to enhance the growth of plants. Gallimore shows how these energies, forces, and fields are all inter-related and provides hypotheses and ideas on their possible unification.
