# WHAT IS PSYCHOTRONICS?

Beverly Rubik, Ph.D.  
President, USPA

Psychotronics originally referred to the mind (*psycho*) operating devices (*tron*) with thought. This term came out of parapsychology in the 1960s in Czechoslovakia. The early psychotronics researchers conceived of and built psychotronic generators—sacred geometrical forms composed of pyramids and cones along with crystals, copper coils, and other materials. Unlike most machines, these devices were “operator dependent”—having various effects depending upon the operator and the directed intention—and demonstrated positive effects on people, animals, plants, and processes.

Today our interests are more broadly based. The US Psychotronics Association (USPA) investigates and applies science and technology to interactions of mind, matter, spirit, consciousness, and the underlying forces of life and nature. Psychotronics challenges the dominant scientific worldview because it deals with the power of consciousness to interact directly with the physical world, which is not considered in mainstream science. However, numerous lines of scientific and other evidence point to severe limitations of the dominant paradigm, which holds that consciousness is only a passive observer. We are among those mavericks shaping the new worldview in which consciousness plays an active role in generating physical reality.

Our membership is quite diverse and fascinating. Some USPA members are frontier scientists conducting research on the effects of intention and subtle energy healing on systems such as structured water and its memory, plant growth, and the integrity of DNA. We are also concerned about the impact of electromagnetic pollution from the proliferation of wireless devices in our environment and how to protect ourselves. Other members are practitioners and teachers of radionics, using directed intention to assess and improve the well-being of living systems through the use of radionics devices, pendulums, and dowsing rods. Still others practice energy therapies ranging from hands-on healing to use of sound and light therapies, homeopathy, Oriental medicine, and other complementary modalities. Some members are skilled intuitives who can assess the biofield and subtle energy directly, without any tools. Still others are exploring psychotronics for personal growth and evolution. Despite our differences, we have much in common as we are all open-minded persons focused on expanding our understanding of nature, consciousness, and the full human potential. We enjoy camaraderie and sharing our new learning with one another.

One main focus of the USPA is the existence of a cosmic energy or bioenergy, also called *qi* in Oriental medicine and *prana* in Ayurveda—associated with the biofield

or life force. Energy may be mobilized with directed intention, which corresponds to the principle of ancient Eastern philosophy—“where mind goes, the *qi* flows.”

Psychotronics devices may serve as resonators or conduits of a cosmic energy affecting living systems at a physical level. The biofield, the energy field of each organism, is also fundamental.

Is this cosmic energy an aspect of science that has somehow been overlooked, or a new form of energy? We are taking a deeper look at the science of Nikola Tesla, among other pioneering scientists, who have been largely ignored. We are also revisiting the “aether” in physics that was displaced by a materialistic worldview, but may actually be the quintessence underlying physical reality, and the etheric body in radionics, to expand the scientific perspective.

# 2019 RADIONICS SYMPOSIUM

## Taught By The Masters

### Symposium Schedule

DAY 1

FRIDAY, OCTOBER 24, 2019 - 8AM TO 5PM

7:15AM - 8AM

#### Registration

8AM - 8:30AM - **DR. RON BARONE**

#### Introduction

8:30AM - 9:30AM – **SUE KELLER**

**The HUMAN side of Radionics.** Where you are on the vibrational scale and how it affects your thoughts, words, actions and the ability to help yourself and individuals. Identifying how an unhealthy ego-state affects the full potential for ourselves and others. How working to remove energy blocks gets us one step closer to our true God-given identity and increases our Radionic powers.

**Sue Keller** enjoyed a successful 30+ year Corporate career retiring in 2008. She spent many years in process improvement; leaning out processes, eliminating bottlenecks, creating efficient work flow which lead to cost and time savings. In 2015, due to health challenges, Sue personally experienced what was possible in regards to Radionics and started to embrace her own Radionic journey in order to help others.

9:45AM - 11:15AM – **STEPHEN QUONG**

**Fine-Tuning the Ultimate Radionics Instrument—You!** Discussion to include Nootropic Nutritional Supplements to Enhance Cognitive Processes, Simple Yogic Techniques and Energetic Tools for Getting Centered and Self-Clearing, How to Combine Finger-Style Muscle Testing with Dial-Based Scanning for Rates, Testing Your Level of Harmony with Your Radionics Instrument, Clearing the Witness Well with Violet Light (visualized, LED or laser, Energetic Activation of the Pineal Gland for Enhanced Intuition and Discriminative Intellect, And much more...

**Stephen Quong** has been practicing and teaching dowsing, radionics, and various forms of energy healing since 1972. He was a guest speaker at the 2017 and 2018 Radionics Symposiums, and a guest speaker at the 2018 US Psychotronics Association Annual Conference. He is also a world renown Vedic Astrologer and senior level instructor for Qi-Mag Feng Shui and Tao Geomancy. A complete bio is available at: [jyotisha.com/bio.html](http://jyotisha.com/bio.html)

12:45PM - 2:15PM, 2:30PM – 4:00PM – **HUGH LOVEL**

**Soil and Crops: How Nature Works.** With radionics we have tools that work best when we find the cause behind the cause behind the cause. Lovel teaches how nature works to generate life and fertility in soils as well as vigor in crops. His first session points out the key components, common to all farms, that go ignored and even are opposed while we return again and again to fertilizers that have been applied to soils for over 100 years along with steadily declining fertility. The most important changes we have to make are in our own understanding of how nature works. Session two will deal with remedies and possibilities that we can explore and how radionics can help focus the forces of nature in a provident direction. This will include ameliorating droughts and floods.

# 2019 RADIONICS SYMPOSIUM

## Taught By The Masters

**Hugh Lovel** is a farmer and an international consultant to dairy farms, graziers, broadacre grain growers and fruit and vegetable producers. As a multidisciplinary scientist, Hugh has introduced comprehensive soil testing using both the Albrecht approach and a total acid digest test that more clearly reveals what is actually present in soils. Above all he has been a leading pioneer of the new science of Quantum Agriculture. Hugh Lovel is the author of *A Biodynamic Farm for Growing Wholesome Food* and *Quantum Agriculture: Biodynamics and Beyond*. He is the original designer of the Field Broadcaster quantum technology and the Quantum Radionic Analyser. His articles appear in "Acres USA", related organic farming periodicals such as "Acres Australia" and biodynamic journals around the world. Initially, Hugh gained 30 years of broad experience in biodynamic farming while operating a market garden farm and the first CSA in Georgia. His farm was home to the annual South-East Biodynamic Conferences for 12 years. Hugh migrated to Australia in 2005 to teach, consult and write. Hugh served for 6 years on the national board of Biodynamic Agriculture Australia. He and his wife Shabari Bird are the founders of Quantum Agriculture Consultancy and live in Australia and the US.

4:15PM – 5:00PM – **BRIAN BESCO**

**Heart-based Consciousness and the Quantum Field.** Learn to utilize consciousness and intention to influence the quantum field of your radionic transmission. We will begin with simple journey work, and learn how this influences our energetic and physical realities. We will then add this to the quantum field of Radionics, to create results that are greater than the sum. We will also discuss Tensor Technology as a supplement to the radionic field.

**Brian Besco** is the leader in research and development of Tensor Technologies. He considers the Tensor tools to be a combination of the physical sciences and spiritual technologies. He is a published author and manufacturer of the Tensor tools, and spoke at the 2013 Tesla Technology Convention on the Tensor Fields. 8:30AM - 9:30AM— **TIM LIPPERT**

**Why I Do Radionics.** The path of life is often filled with pot-holes, troubles, tripping stones, and unseen dangers. Remember the movies / comics when you were young of the X-ray glasses that allowed people to see things hidden? Radionics is like having those glasses with Super Powers. Tim will share examples of how Radionics has solved real world problems.

9:45AM - 11:15AM— **DAN MANGUM**

**Color, Light, and Radionics.** Colors are some of the most powerful aids to radionics work, and there is more to the nature of color and light than most people are aware of. An expanded knowledge of this can only help us be more successful in radionics and related methodologies. This presentation will cover the Dinshah Spectro-Chrome healing system (and how to use it radionically, including a new rate sheet). The use and properties of the Dinshah colors and cathedral glass as reagents. Goethes theory of color and light vs Newtons. An explanation and demonstration of some of my color and light research.

**Dan Mangum** is a radionic researcher who uses radionics to maintain a garden, greenhouse, fruit and nut trees, honeybees, a handful of horses and shetland sheep, and his dogs. He also makes and sells reagents, and an external antenna/rubplate of his own design. His background includes studying mysticism, magic, and world religions, rife machines, orgone accumulators, homeopathy, biodynamics, and an organic diet. Dan is a licensed electrician who occasionally installs off grid solar power and lives off grid himself.

12:45PM - 2:15PM— **AIMEE WHALEN AND ED KELLY**

## **Netherlands Man Needs Urgent Help to Fight the Oak Processionary Caterpillar/Moth**

The following email was recently forwarded to the editor by Dr. Andrew Michrowski, a long time leading member of the USPA, and is being published here with permission.

Rudolph Gevers is a man living in the Netherlands who is seeking help using radionics or related methods to fight the infestation of oak trees in the Netherlands by the oak processionary caterpillar/moth. In addition to damaging the oak trees, this pest causes numerous health problems in people. If you can help Mr. Gevers in any way, or offer him advice, please write to him at: [rudolph.gevers@gmail.com](mailto:rudolph.gevers@gmail.com)

Att Dr. Andrew Michrowski

Dear Dr. Michrowski,

You do not know me, I live in The Netherlands.

From Internet I learned about your involvement in the use use of Radionics in eliminating the Spruce Budworm. I read with great interest your text pronounced at the Standing Committee on Health on May 9, 2002

We need your urgent advice.

We have a serious health problem in the Netherlands due to the OAK PROCESSIONARY CATERPILLAR/MOTH. This insect can only be found in the oak tree and as in Holland one out of every five trees is an oak. In some municipalities even 80% is oak, this mono culture has very serious consequences. This plague is doubling each year

Each Processionary caterpillar has 700.000 very tiny toxic hairs which trigger allergic reactions and skin irritation. So it has become a national health problem.

As you may know the forests of J.D.Irving Ltd. in New Brunswick in Canada were badly infested during many years by the Spruce Budworm, when in 1976 the

**J.D.Irving Company decided to use Radionics instead of pesticides, in fact with great success.**

**Although it is a long time ago, possibly you could give us more information in the use of Radionics, we may use this in solving our problems with the Oak Procession caterpillar/moth.**

**Are there today still people using the Radionics instrument in forestry? Or in agriculture whom we could contact? Is it worthwhile to contact J.D. Irving Ltd.?**

**Thanking you for your cooperation,**

**Best regards,  
Rudolph Gevers**

## Short News, Notes, and Queries

(If anyone would like to make a short news announcement, report something, has a question about anything related to psychotronics and related subjects, or has any information or comments about any of the following notes and queries, please write to the editor, John Reed at: [joreed43@gmail.com](mailto:joreed43@gmail.com))

### 1. Member Needs Help to Service Delawaar Instruments, and also Wants to Purchase Peggotty Board

USPA member, John Czernek, has a Delawaar diagnostic instrument and a 12-dial Delawaar treatment instrument that need to be serviced. Is there anyone who could provide serving of these instruments for John, either in person, or through providing advice via phone or email?

In addition, John would like to purchase a Peggotty Board, a radionics device originally developed by Darrell Butcher. [Berkana Labs](#) sells a version of the Peggotty Board, but John may be interested in purchasing an original model. If you can help John with either of the above, please email him at: [osteo321@yahoo.com](mailto:osteo321@yahoo.com)

### 2. Seeking Psychotronic and Radionics Device Instruction Manuals and Designs for USPA Library

Recently, the USPA has had several requests for help to repair old models of radionics machines, or to get them operating properly. In addition, the USPA museum has numerous radionics machines that we would like to eventually restore to running order. Many of these devices have been acquired by gift or purchase and did not have instruction manuals included.

Because of this, we have decided to seek and obtain instruction manuals and machine designs for all known psychotronics and radionics devices from the original Abrams devices of the 1920s to the present. If you happen to have any instruction manuals or blueprint designs for any radionics or psychotronics devices of any kind, whether old or recently produced, please contact the editor, John H. Reed at: [joreed43@gmail.com](mailto:joreed43@gmail.com) , or call 443-858-0757.

### 3. Energy Healing Practitioners in Canada Needed to Test New Device

A new energy healing device, based in part on Lakhovsky, Priore, and Rife technologies, is being built in Canada to provide some degree of safety from certain well known US government agencies. The developers of this device also plan to do

trials and testing in Canada, where the use of energy healing devices is completely legal. They are seeking energy healing practitioners anywhere in Canada, but preferably in Alberta or British Columbia, who would be willing to test this device. If you are a Canadian practitioner, **or know someone who is**, and who has experience using energy healing devices to treat people or animals, **please write to the editor, John H. Reed, M.D., at: [joreed43@gmail.com](mailto:joreed43@gmail.com)**

#### 4. Excellent Article on 5-G Negative Effects

The whole subject of 5-G wireless technology and its potentially negative effect on the health of humans, animals, and plants is a subject of much debate. USPA Board member Daniel Taylor has found and sent to the editor an excellent article on this subject by Claire Edwards, a United Nations staff member who worked at the UN from 1999-2017. Titled **[“5G Is War on Humanity” \(available here\)](#)**, Edwards gives details on much research that has already been done that shows the potential deleterious effects of 5-G on many life forms, including humans. It is heavily reference, and links to many other sources of information are provided. **This issue will be addresses at the 2019 USPA, where Dr. Beverly Rubik and Harry Jabs will make a presentation titled, “Wireless Radiation, 5G, and Our Health”.**

#### 5. Seeking Help to Repair a Digitron D Spectrometer

please write to her at: [srowe@ruraltel.net](mailto:srowe@ruraltel.net) Sharon is also seeking to purchase a Mattioda frequency instrument, so if you have one that is in good running order, please let her know.

We recently received an email from USPA member Sharon Rowe, who has a Digitron D Spectrometer that is in need of repair. This device, a photo of which appears at left, was invented in the early 1980s by Bill Lawson, also known as “Willard Frank”, and is reported to be the forerunner of the SE-5. Does anyone have a Digitron D Spectrometer, which they have used, and who could possibly help Sharon? If so,

**6. Seeking Help on Operating the Gallimore RAU #2 Radionics Instrument**

USPA member, Paul Johnston from Australia needs help to get his Gallimore RAU #2 radionics instrument working (pictured below). In a recent email to USPA, Paul wrote: **“The equipment I have is Gallimore's RAU #2. I'm a bit confused by the dials. Most of the radionics gear I have looked at have up to eight dials which all start at zero and go up to 10. On the gear the first dial goes from zero to 100, so I'm not sure about how to set rates here. I have Gallimores "Volume 2 of Handbook of Unusual Energies", which lists the rates, but I'm not sure how to set them on this machine. The instructions that come with it claim that two rates can be used at once with this gear. It has a top bank and a bottom bank of dials (16 in total) with a switch to flick from one to the other so I'm trying to work out how it all goes together. If any of your members can help with this it would be much appreciated.”** If you can help Paul in any way, please contact him at: [pauljohnston61@gmail.com](mailto:pauljohnston61@gmail.com)

**7. Seeking Information from Users of the IMRS 2000 PEMF System**

USPA member Robert Conway is seeking information from users of the IMRS 2000 Pulsed Electromagnetic Field (PEMF) system. He is aware of the IMRS 2000 website, where the various IMRS devices and systems are described in great detail. However, Bob would like to hear from people who have actually used these devices, especially the IMRS 2000 Professional Set. If you have any experience with these devices, please write to Bob directly at: [bob10841@gmail.com](mailto:bob10841@gmail.com)

8. **Italian Translator Needed for Book by Dotto Ring Inventor:** The Dotto Ring was a medical device invented by Dr. Gianni Dotto in the 1970's, and is said to have been used to successfully treat a number of diseases, including cancer. The device was also said to have the ability to slow or reverse aging in mammals. At that time, Dr. Dotto, wrote a 37 page book in Italian, that described how the machine was built, operated, and was able to achieve these remarkable results. However, there are no known English translations of this extremely rare book, which a member of the USPA has a copy of. Is there anyone who speaks Italian fluently who would be willing to translate this short book into English? If so, please contact, John H. Reed, M.D. at [joreed43@gmail.com](mailto:joreed43@gmail.com)
9. **Trevor James Constable Book or Manuscript about Ruth Drown Wanted:** Does anyone happen to know about, or possess, a book or manuscript about Ruth Drown that was written by Trevor James Constable? It is not certain if this book was ever published, so it may be only in manuscript form. It is well known that Constable wrote a chapter about Ruth Drown in his book, The Cosmic Pulse of Life. However, there is a report that he also wrote an entire book about Drown. If that book exists, it is not known to be library in the United States, Canada, or Europe.
10. **Neurophone Devices Wanted:** Does anyone have any old neurophones that they would be willing to sell, rent, or lend for research and application purposes? The neurophone was originally invented by G. Patrick Flanagan in the 1950's, and enabled people who were completely deaf to hear. This non-invasive device was somehow able to bypass the auditory nerve, and interact directly with the auditory region of the brain, allowing a deaf person to hear. This device is needed to treat a patient of a colleague of John H. Reed, M.D. Please write him at: [joreed43@gmail.com](mailto:joreed43@gmail.com) if you have such a device or know someone who does.
11. **Seeking Radionics Practitioner in Ohio:** Rebecca Cotterman is looking for a radionics practitioner in Ohio. If you are a practitioner in Ohio, or know one in Ohio, please contact Rebecca at: [cotterman@hotmail.com](mailto:cotterman@hotmail.com)
12. **Does anyone know anything about a man named William Lehr (1933-1996), who lived in Scammon, Kansas, and who developed several energy and healing devices, and made a reproduction of the T. Henry Moray energy device?** In addition, Lehr is said to have created a high-powered spark-gap device for healing purposes that cured a man who had been sent home to die, as well as, a huge

bibliography of articles and books dealing with new energy sources and energy medicine and treatment.

13. **Does anyone know the whereabouts and/or contact information of Dr. Robert N. Miller?** At the 1978 USPA Conference, Dr. Miller gave a presentation with Pierre Paul Sauvin titled “ Methods of Detecting and Measuring Healing Energies.” That was the only time that Dr. Miller ever spoke at a USPA conference, and we would like to follow up with him on any research he has done since that time.

14. **We have been recently informed that one of the radionics devices that Jerry Gallimore invented in the 1970's or 1980's used a GSR meter in place of a stick plate.** Does anyone happen to have or know anything about this particular device? Such a device would be very significant, because if there is a such a radionics device that can be successfully used without a stick plate, which depends on the sensitivities and subjectivity of the user, it would enable nearly anyone to use that radionics device. One of the problems that beginners in radionics often have is the detection of the “stick”, on the stick plate, and some people are never able to develop this ability.

15. **Do any of you know anyone who has ever owned, used, or did research on the Dotto Ring?** This was an electrotherapy treatment device, pictured at left, developed by Dr. Gianni Dotto back in the 1970's and is said to have been was used successfully to treat cancer and other diseases in humans and animals. In addition, the Dotto Ring was also said to be able to slow down the aging process and even rejuvenate individuals to some degree.

16. **Does anyone have video tapes of the presentations that Andrija Puharich made at the 1982 US Psychotronics Association Conference?** The title of Dr. Puharich's first presentation was: “Chemical Compounds: Receptors of Artificial ELF”, and was sold for a period of time on the USPA website with this title and catalog number F6. The second presentation that Dr. Puharich made at the 1982 USPA Conference was the Keynote Address at the Awards banquet. The Title of this presentation was “Kindling + 1” and had catalog number F7. If anyone has either or both of these tapes, please contact the editor, John Reed at: joreed43@gmail.com.

## **Among the Missing, (and Updates): A Column about Missing People, Organizations, Periodicals, Books, Artifacts, and Collections in the Psychotronics Field**

**by John H. Reed, M.D**

This is a new “column” or section of the USPA Newsletter, and will be an ongoing part of every issue, with the purpose of helping the USPA, as well as, our members and research associates locate people, organizations, periodicals, books, artifacts, devices, collections, and other items that have seemingly disappeared, or have been extremely difficult to find. **Updates will be added, and each missing item will be retained in future issues until it is found or otherwise resolved, since some readers may not have seen prior issues of the USPA Newsletter or the original notice of the missing item.**

**In addition, this will also serve as a “People Locator Service”** to help find authors and researchers on psychotronics, radionics, subtle energies, energy medicine, and related subjects, who have “disappeared” or have died long ago, and whose relatives you may be trying to find in order to preserve the research papers and collection of that person.

In our research and reading, we all have encountered people, organizations, periodicals, books, articles, or other things that we have tried to find, and some people have searched for years to find something, but have not yet found it, despite the vast resources of the Internet. However, with our large USPA membership, we can all help one another find what we have been searching for. Some of you may have experience in genealogical research, or private investigation, law enforcement, or even intelligence work which you could utilize to help each other, or perhaps just make suggestions on how or where to search for something.

**So if there is anything you have been searching for and need help to find, please write to me, John H. Reed, M.D. at: [joreed43@gmail.com](mailto:joreed43@gmail.com), and I will include your search help request in the next and subsequent issues of the USPA Newsletter. And if you have any information about an item that is listed in “Among the Missing”, please write to the same email address and share what you know or your suggestions. If there is something that is confidential, your confidentiality request will be honored and protected.**

### **Where Are the Missing DeLaWarr Camera Plates?**

As is well known, George DeLaWarr, founder of the DeLaWarr Laboratories in Oxford, England, invented a type of radionic camera that could make diagnostic images of internal organs and other anatomical structures that were said to be as good, or better than x-rays.

DeLaWarr patented this device (below) in the 1950s, and over the years until his death in 1969, produced thousands of images on plates of glass and other materials which would show the images. It has been claimed that as many as 12,000 image plates were produced by DeLaWarr and others.

**However, these image plates have disappeared, and the whereabouts of even a single image plate is unknown.** After the DeLaWarr Laboratories closed in the 1980s, it is said that several thousand plates had been purchased by an American. But based on an investigation in 2017 in England by Daniel Daylor and John H. Reed, it was determined that those plates were never picked up in England nor sent to the US. In addition, no image plates were found at the location where the DeLaWarr Laboratories once operated.

**If anyone has any information on where these DeLaWarr Camera image plates are or might be located, please write to the editor, John H. Reed, M.D. at: [joreed43@gmail.com](mailto:joreed43@gmail.com)**

### **Missing Person: Willard Frank , also known as Bill Lawson**

We are trying to find any relatives or other people who personally knew Willard Frank, also known as Bill Lawson, who was the developer of the radionics device called the Digitron. This device, a photo of which appears at left, was invented by Willard Frank in the early 1980's, and is reported to be the forerunner of the SE-5, which Don Paris has developed into one of the finest radionics devices in the world.

**Willard Frank is reported to have died in 2009**, and there is some question as to whether his real name was Willard Frank or Bill Lawson. If any reader knew Willard Frank, or where he lived, or any of his relatives, please contact the editor, John Reed at: [joreed43@gmail.com](mailto:joreed43@gmail.com).

**The USPA would also like to obtain one of the Digitron devices for the USPA Museum.** If anyone has a Digitron (or knows someone who does) and would like to donate it to the USPA or sell it for a reasonable price, please contact the editor.

### **Missing Inventions: The Missing Invention of Arthur H. Matthews to Control Insect Pests, Microbes, and Diseases at a Distance**

**Where are the patent and invention by Arthur H. Matthews, a Canadian, who in his own words stated "This refers to my invention of selective control – at a distance – with no physical contact – to control any form of germ – any sickness – all kinds of insect[s] which cause damage to forest, garden and human[s]."** Those words appeared in Matthews' own hand writing at the bottom of a reproduced letter on Appendix page A-10 of his book, *The Wall of Light*, which he published in 1971. But the

big mystery is that the Canadian Patent Office database of patents does not show this invention or any other invention by Arthur H. Matthews.

Interestingly, correspondence of the Canadian Commissioner of Patents shows the title of the invention as “ Methods for the Control of Insect Pests” and the patent **application** number of: 510,626, but not the number of the patent, if it was ever granted. So the question arises: What happened to this wonderful invention by Mr. Matthews, and why does the Canadian Patent database have no record of this device whatsoever in its database of patents?

Further details on this mystery are available in an article titled, “Among the Missing” Special: The Missing Invention of Arthur H. Matthews to Control Insect Pests, Microbes, and Diseases at a Distance” in the [February, 2018, issue of the USPA Journal and Newsletter, pages 24-27, available here.](#)

If anyone has any information about this invention by Arthur H. Matthews, please write to the USPA editor, John H. Reed, M.D. at: [joreed43@gmail.com](mailto:joreed43@gmail.com).

### **Missing Device: Marcel Vogel’s Omega- 1 Radionics Instrument**

In a 1987 meeting presentation, [YouTube Video, available here, beginning about 4:20](#), Marcel Vogel states that he had been trying to find a way by which he could measure the subtle energies and fields in the crystals he was working with, and that he prayed to God to give him an instrument to make such measurements. Marcel says that about two months later, a man named Daniel Perkins, apparently guided by higher forces to build such an instrument, came to Marcel’s door and said, “Here is your instrument, the Omega-1. You will know how to use it,” and walked away. **But where is that particular Omega-1, and were any other Omega-1 instruments built?** It is known that other Omega models of radionics instruments were produced, especially Omega-5 instruments, but it is not known if the company that built them still exists. **In addition, does anyone know who Daniel Perkins is, and where he is located?** Anyone who can shed light on this mystery, please write to the editor at: [joreed43@gmail.com](mailto:joreed43@gmail.com).

### **Missing Psychotronics Device:**

**The AGRAD Machine:** In the 1970’s Mankind Research Unlimited, Inc.(MRU), headed by Dr. Carl Schleicher, was offering for sale a device called the AGRAD Machine. It was intended to be used in the electromagnetic treatment of crops and the control of insect populations, and sold for \$390.00. MRU claimed that AGRAD machines had been used for several years by MRU researchers to conduct experimental applications of the type described in **The Secret Life of Plants** by Christopher Bird and Peter Tompkins, and **Report on Radionics** by Edward W. Russell. Theoretically, the AGRAD machine was intended to produce effects through electromagnetic wavefronts that would interact with and control insects by disturbing the insect sensor mechanisms. A photo of the device and additional information appeared in one of MRU’s publications [which you can access here](#). If you have any information about this device, please contact John H. Reed, at [joreed43@gmail.com](mailto:joreed43@gmail.com)

# LONGITUDINAL WAVE THERAPEUTIC DELIVERY MODALITIES

**Dr. A. Michrowski**

**The Planetary Association for Clean Energy, Inc., Ottawa, Canada<sup>1</sup>**

---

(Originally published in USPA Proceedings, Vol. 3, 1994, pp.164-177)

A review of known therapeutic modalities using radially propagating, non-Hertzian (scalar) electromagnetic signaling defines the nature of biological significance offered by these.

The modalities include: Microwave resonance therapy (**MRT**) developed in the Ukraine and Russia, the **Prioré** system developed by **Antoine Prioré** in France, the **Teslar** device developed by Dr. **Andrija Puharich** in the United States, the **PAP-IMI** device developed by Prof. **Panos T. Pappas** in Greece, as well as various experimental solenoid configurations (*Caduceus* coils). Extensive laboratory and *in-vivo* research -- in Russia by five teams headed by Drs. **S. P. Sitko**, **V. V. Gishko**, **V. D. Zhukovskij**, **Yu. A. Petushkov**, **V. F. Kiseljov** and **S. I. Kokhanaya** and -- in US. by Drs. **Glen Rein** and **T. Gagnon** define the following effects on living systems:

- 1) *information, not power is propagated;*
- 2) *decrease in skin's electrical response;*
- 3) *frequency-dependent onset of changes may be delayed;*
- 4) *"self-matching information fields" are produced which counteract non-equilibrium biochemicals to "leave" afflicted areas;*
- 5) *electric charges are induced in dielectrics e.g.: electroporation of transmembrane potential of ill cells;*
- 6) *induction of structural changes in albumen and water measurable by UV spectroscopy or chemical tests;*
- 7) *reinforcement of muscle contractibility;*
- 8) *rehabilitation of the immune system (lymphocyte proliferation);*
- 9) *recovery of interferon production;*
- 10) *inhibition and neutralization of sarcoma development.*

This is a promising, "soft", non-invasive, inexpensive treatment and optimization avenue for therapeutics.

The existence of special and advanced electromagnetic modalities using radially propagating, non-Hertzian (scalar)<sup>2</sup> signaling indicates some of the biological effects of electromagnetic energetics. In a sense, the evidence precedes theory.

Among the most important biological activity that can be induced is cellular de-differentiation and re-differentiation. Electromagnetically induced cellular changes -- *both are genetic changes* -- can be self-targeted toward reversal of specific damage condition, even though several successive genetic changes may be necessary to reach the ultimate cellular genetic form required for healing. This regenerative effect has been explained in detail -- leading to a patent -- by the Nobel Prize Nominee **Robert O. Becker, M.D.**<sup>3</sup>. His breakthrough work proves even picoamperes of localized electrical DC (direct current) are sufficient to cause, even repetitively, cellular de-differentiation and re-differentiation in red blood cells, which first de-differentiates to more primitive cells and the process has been successfully effectuated for both cartilage and bone cells.

### **The bi-directional nature of potentials**

What is little appreciated in this technique is that DC voltage has been proven to be equivalent to two bi-directional electromagnetic traveling waves<sup>4</sup>. Now, it is well known among physicists engaged in foundations research<sup>5</sup> that electromagnetic in the vacuum are *longitudinal*, not transverse as we are led to believe. That is, they are *non-Hertzian* and therefore are *waves of rarefaction and compression of the medium*. (What are measured in probes as "electric" and "magnetic" events are actually electron activities in free electron gas in the conductors of such instruments -

- and not the all-important *non-material potentials in the vacuum*.) In modern quantum mechanical theory, it is known that potentials are the causes of all EM (electromagnetic) phenomena<sup>6,7</sup>.

The bi-directional wave mechanism was noted as early as 1898 by **Carl Barus**<sup>8</sup> who specified a solution that, "made the wave run backward" -- in effect, a time-reversed wave solution. As will be seen from the examples presented herewith, the bi-directional waves can cancel tumorous and pre-tumorous states extant in living systems, carrying direct *information* capability to and from cells. Inasmuch as many cellular difficulties are electromagnetic in nature, these may be rehabilitated through electromagnetic engineering.

### The Prioré device

Before these aspects of electromagnetics were comprehended as they are today, the French inventor, **Antoine Prioré** designed and developed a number of apparati<sup>9</sup>, in the 1960's, for the treatment of cancer and tumors. The modalities achieved macroscopic regression of tumor growth, lymph node metastases, without relapses. This work was strongly supported and encouraged by the permanent Secretary for Chemical, Natural, Biological and Medical Sciences and their applications Section of the **French Académie des Sciences**, **Robert Courier**<sup>10</sup>, and the eminent French scientists, **A. N.** and

The machine was so successful in cancer treatment that an evaluation by **Dr. J. B. Bateman** on behalf of the **United States Navy, Office of Naval Research**, London Branch <sup>12</sup> discouraged the development of larger Prioré machines because the system worked very effectively for the treatment of cancer *as it already was*. The system was also supported in the United States by the Nobel Laureate expert in plasma physics, **Dr. William Phelps Allis** at the **Massachusetts Institute of Technology** and by the magnetohydrodynamics physicist, **Dr. Jean Carstouiu**<sup>13</sup>.

Antoine Prioré mixed some 17 frequencies in a rotating plasma (of Argon gas) in a giant tube. The emissions penetrated living tissues for therapeutic purposes, without destroying enzymes. It is now known that plasma such as he generated produce a longitudinal return wave, also known as a "phase conjugate"(since clearly demonstrated by the Russian physicist, **A. V. Chernetskii** <sup>14</sup>and co-workers with self-generating discharges from plasma). The emissions from Prioré's devices were modulated upon -- coupled to -- a "rippling magnetic field" of strengths of near 1,000 Gauss. This "ripple" in the magnetic field permitted penetration of atomic nuclei and interaction with them by means of nuclear magnetic resonance (NMR) phenomena.

In a way, it may be postulated that the device could inform an EM antidote<sup>15</sup>, causing -- by means of a return, bi-directional, response -- a neutralization of a cellular de-differentiation countersignal, enabling the eventual cancellation of tumorous and pre-tumorous states existing in the body. Organisms would start with a "clean state" insofar as long-term cumulation of cancer-inducing

### **The MRT - "Microwave Resonance Therapy" breakthrough**

Microwave resonance therapy (**MRT**) was developed and researched in the Ukraine and Russia<sup>16</sup>. Extensive laboratory and *in-vivo* research -- by five teams headed by **Drs. S. P. Sitko, V. V. Gishko, V. D. Zhukovskij, Yu. A. Petushkov, V. F. Kiseljov and S. I. Kokhanaya** -- involving several hospitals and tens of thousands of clinical patients. During a 1989 symposium, dozens of medical researchers from several republics reported 8,242 MRT-associated cures (330 addictions, 625 asthma, 192 atherosclerosis, 200 cerebral vascular, 315 encephalopatia, 110 immunodeficiency, 772 paralysis, 670 bone, and 3,076 ulcer cases). More than 100 pathologies were successfully treated, including several types of cancer. This extensive application of the technology indicated that a longitudinal EM wave modality demonstrated unusual biological affects. These are<sup>17</sup>:

1) *information, not power is propagated.*

"MRT emissions stabilize the proper coherent fields which regulate the cellular division and differentiation." If cells are in pathological non-equilibrium biochemical pumping discordance, emitting deflective electromagnetics, these tend to "leave" afflicted areas;

2) *decrease in skin's electrical response.*

The MRT's longitudinal waves tend to decrease the skin's electrical response -- from 1.2 to 10 times within ten to 60 seconds of exposure;

- 3) *frequency-dependent onset of changes may be delayed.*

**Drs. R. E. Garibov and A. V. Ostrovsky** of the **Institute of Biophysics, U.S.S.R. Ministry of Public Health** reported that such changes could start sometime after the longitudinal wave emission source is turned off -- and even the persistence of these observable changes after the emissions are shut off. This indicates the bi-directional nature of the waves involved;

- 4) *"self-matching information fields" are produced which counteract non-equilibrium biochemicals to "leave" afflicted areas.*

The MRT longitudinal waves seem to provide self-matching "information" fields that change as the MRT-exposed cell types, organs and tissue forms change;

- 5) *electric charges are induced in dielectrics.*

Scientists from the **L'vov Polytechnic Institute, Yu. A. Petushkov, Ya. V. Sanotskiy and B. I. Stadnik** noted that the information fields from the longitudinal waves may induce electric charges in both organic and inorganic materials, the degree of induction and polarity varying according to sample. If the longitudinal wave's information field of an oil, water, chemical solution, plant, metal and dielectric appears. This electret can change its charge on repeat placement of "information";

- 6) *induction of structural changes in albumen.*

Two teams, one in Moscow's **M. S. Lomonosov State University** and another in **Tyumen State University** examined how distilled water, irradiated with longitudinal waves, modified its ability to absorb protein such as albumen from the serum of human blood. They attributed these modifications to protonic influence in the hydrogen atom spins;

- 7) *reinforcement of muscle contractibility.*

Researchers **Ya. V. Pantyukun, S. I. Kokhanaya and M. V. Zavolzhansky** of the **Rostov State Medical Institute** noticed that the MRT's longitudinal waves compensate the violations of muscular nutritive patterns and that their magnetic fields travel in the direction

of lines of force along living tissues (rather than perpendicularly). This is extremely important in heart muscle treatment, and useful in chiropractic pre-manipulation treatment;

8) *rehabilitation of the immune system.*

Several Kiev clinics reported that longitudinal waves from the MRT rehabilitate the immune system. Immunoreactivity is not affected in healthy individuals. Immunodeficiency in no matter what stage of cancer would see an increase of the quantity of T-cells (42% to 49%) and T-lymphocytes (from 25% to 27%);

9) *recovery of interferon production.*

Also reported by the Kiev clinics;

10) *inhibition and neutralization of sarcoma development.*

The MRT technology involves impulse wave (highly non-linear spark) generators. Longitudinal waves are produced as side-effects in the high-voltage, very fast rise time and very short duration emissions.

It is likely that the MRT technology was based on prior work of **Dr. S. S. Nehru** (brother of the former Prime Minister of India) who in 1933 used automobile spark plugs (radiofrequency Tesla coils) as sparkers for the healing of the majority of his clinic's patients, whether humans or veterinary subjects. Dr. Nehru found that his sparkers were most effective when held close, but not in contact, to certain acupuncture points. He described these results in his "True rural uplift educator" book published in 1934.

### **The Teslar device**

The **Teslar** device's technology was developed by **Dr. Andrija Puharich, M.D.** in the United States over the years 1976 - 1984<sup>18</sup>. Examining the generally predatory nature of low-level electromagnetic radiation as well as that emanating from the resonant frequencies of a number of toxic chemical substances, sometimes with the aid of a dark-field microscope (which

permits a resolution of 15 nanometers or 150 Angstrom at 140,000X magnification) developed by **Gaston Naessens** of Sherbrooke, Québec, he observed *in vivo* that certain frequencies were in effect capable of reversing nefarious cellular developments<sup>19</sup>. A singular beneficial frequency is the planetary magnetic resonance frequency of near 8 Hz, observed in success healing procedures. Dr. Puharich defines healing as "an organizing and repair operation on biological systems"

The foundation of this effect lies in the nuclear magnetic resonance of each atom, molecule or compound in the body. The proton-proton coupling constants in H<sub>2</sub> between adjacent hydrogen atoms H in a molecule all fall within the frequency range of extremely low frequency (ELF) range. For example, a known carcinogen molecule, ethylene oxide shows a 3.2 Hz resonance in the J trans mode. The same EM frequency, irradiated on a mouse, produces skin cancer within 24 hours.

On the other hand, 8 Hz may represent a centre frequency. Inasmuch as harmless lympotropic viruses can be switched with specific ELF frequencies to become the HLTV III virulent forms, while another frequency switches the HLTV III virus back to an innocuous form<sup>20</sup>. The same bi-directional, atom-penetrative wave is active because the ELF generator Dr. Puharich developed<sup>21</sup> produces scalar EM longitudinal wave propagation with the application of moebius strip solenoids.

Eventually, such moebius strips were coupled to an existing quartz watch movement, leading to the Teslar shielding device product. Numerous anecdotal case reports from many individuals wearing the Teslar device suggested significant biological effects. **Dr. Eldon Byrd**, of the **United States Naval Surface Weapons Center** observed a decrease in overall amplitude and a shift toward lower frequencies in EEG recordings from individuals

wearing the Teslar device<sup>22</sup>. Since such frequency recordings have been shown by **Dr. Cyril W. Smith** of the **University of Salford** <sup>23</sup> and **Dr. William J. Rae** of the **Environmental Health Center** in Dallas, Texas <sup>24</sup> to clinically indicate which resonant frequency (electromagnetic or chemical) affects an environmental sensitive individual. Their conclusive studies show that in any given environmentally sensitive individual, susceptibility may develop to any frequency, and produce reactions. Hence, the shifts in frequency emissions from individuals reported by Dr. Eldon Byrd with the Teslar device would be equivalent to the displacement and/or elimination of allergenic response while decrease in amplitude would be equivalent to decrease in sensitivity to any related electromagnetic or chemical NMR emission. It is then only natural that among the greater portion of Teslar device users are the environmentally sensitive population.

**Dr. Glen Rein** formerly with **Stanford Medical School** designed a series of *in vitro* experiments using nerve cells grown in tissue culture to test the Teslar device in an objective way. The results showed that the moebius strip emissions had more profound and generally more beneficial results than simple EM emissions on neurotransmitters (*norepinephrine*) uptake, and via a similar mechanism as tricyclic antidepressants<sup>25</sup>. Likewise, *lymphocytes* exposed to the Teslar showed a 76% increase in proliferation as compared to *lymphocytes* exposed lacking the moebius strip configuration (137% proliferation over 34 % increase with simple EM 8 Hz signalling).<sup>25 26</sup>

This shows that the presence of a 8 Hz longitudinal wave caused a more profound enhancement of immune function than observed by an 8 Hz linear EM field. Other researchers have also shown that weak EM fields can stimulate *lymphocyte* proliferation<sup>27</sup>.

Dr. Puharich reported<sup>28</sup> that a study conducted under his guidance at the **Max Planck Institute** in Germany indicated that *E. coli* microorganisms exposed to the 8 Hz longitudinal fields increased activity of the RAD-6 gene which codes for proteins involved in DNA repair.

It would seem that the biological effects of longitudinal / scalar wave modalities are frequency specific. The MRT operates at near 10 Hz pulses. The Prioré machine modulates pulses at a cardiac (.5 to 2 Hz) rhythm.

### **Optimizing longitudinal wave modalities**

The evaluative research by Dr. Glen Rein led to a systematic examination of the various aspects of longitudinal wave propagation methods and in consequence, their biological effects. A variety of solenoid types, frequency modulation and capacity were observed for their biological properties on cell cultures.<sup>29</sup>

Non-Hertzian fields remain through generation of two EM fields 180 degrees apart in order to cancel their EM vectors. An example are *Caduceus* coils as introduced and discussed by the Canadian communications engineer, **Wilbert B. Smith**<sup>30</sup>, also known as the *Smith* coil.

In non-linear optics, EM vectors are cancelled using four-wave mixing and phase conjugation. In four-wave mixing, an EM field is introduced into a vector cancelled space, thereby generating a non-Hertzian wave with a greater amplitude than that of the EM field the that triggered in the

reaction<sup>31</sup>. Similarly, in phase conjugation experiments, an time-reversed EM field is reflected off of a non-linear mirror. This generates a non-Hertzian field that is referred to as a phase conjugate replica of the original EM vector, which is time-reversed, traveling backward in time, retracing the path taken by the EM vector<sup>32</sup>. Time-reversing a single wave means that only the single wave is seen by the external observer to be affected by the reversal process. The observer sees (in his own forward time) a successive series of spatial positions of the reversing wave while the rest of universe is seen moving forward in time in a normal fashion<sup>33</sup>. This particular technique was apparently first used by **Dr. Raymond R. Rife** in the 1930's when he built his high-powered (60,000 X) Rife microscope<sup>34</sup>. The microscope utilized the convergence property of phase conjugate waves, thereby minimizing distortion normally associated with conventional EM fields -- which diverge as they move away from their source.

Another method of generating non-Hertzian waves, used commonly in non-linear plasma physics, is to abruptly pulse a plasma<sup>35</sup>. Plasmas are complex macroscopic structures composed of several types of EM fields and non-Hertzian fields, including light, circularly polarized Alfvén waves and ion acoustic waves. Plasma theory has described well the complex non-linear interaction among these plasma waves and their non-linear propagation via a self-focusing mechanism. Vortex ring structures associated with plasmas have been observed experimentally<sup>36</sup>. Antoine Prioré's machine uses plasma in releasing non-Hertzian emissions and Dr. Rife's beam ray tube is another case in point.

With **T. A. Gagnon** of **Dynamic Engineering**, Dr. Glen Rein conducted a series of experiments with a modified *Caduceus* coil, made with two concentric coils with a transducer carrying current in opposite (anti-parallel) directions<sup>37</sup>. With higher power (3 milliAmps) and varying frequency ranging from 2 kHz to 6 kHz, the non-Hertzian longitudinal waves stimulated a 20X (1921.8%) stimulation of freshly isolated human *lymphocyte* cells in the absence of chemical growth factors. Non-treated *lymphocytes* showed no growth rates. Conventional EM treatment of *lymphocyte* cells shows 1X or less response (in a different signal)<sup>38</sup>. Experimental controls confirmed that the effect was due to the non-Hertzian propagation <sup>39</sup>.

Non-Hertzian frequency information can be stored in water for further re-utilization at a later date. Cells exposed to water treated with higher power (9 milliAmps), also showed significant stimulation -- even months after the water irradiation treatment -- demonstrating that the information pattern of water could be restructured by non-Hertzian emissions. Subsequent emissions of previously "charged" water could, depending on the protocol, inhibit or stimulate cellular growth patterns.

Another series of experiments, using a standard *Caduceus* coil with a repetition rate of 30 kHz a novel analysis tool, UV (ultraviolet) spectroscopy, indicated that in the water "charged" by the coil, the oxygen atom's electronic activity was increased -- or "energized" . The non-Hertzian effect may have occurred at the level of the O--H bond, where effects have been previously reported with subtle energy from a healer's hand (and detected by Raman spectroscopy). Decidedly, UV spectroscopy is a unique tool for detecting the nature of effects on substances resulting from non-Hertzian wave emissions.

tension is transformed into high current magnetic burst with a very intense, short duration, modulated non-radiative magnetic pulse<sup>40</sup>. Developed by **Prof. Panos T. Pappas** of the **Technological Educational Institute of Piraeus** (Athens), Greece, the device can, after short applications extinguish malignant and non-malignant tumors.

The therapeutic results are attributed to the enhancement of low transmembrane potential characteristic of ill cells, through the induction of the needed ions across cell membranes, a phenomenon known as "electroporation". The PAP-IMI device induces and restores the missing ionic charge, permitting aged or ill cells with electrical difficulty to re-power cells' sodium-potassium pumps, which in turn provide for cellular ionic concentration. Cells are driven into higher chemical states and ATP composition.

The output is in the 1 - 250 MHz range in plasma borne by ambient air and involves radar pulsed technology. Maximum energy output ranges between 40 to 60 Joules/second in bursts of approximately 0.001 seconds, within range of electroporation process initiation. The device is limited by the United States Federal law to investigational use and clinical tests to date note the restoration of cancer cells to normal effectiveness, with the relief from related pain and inflammatory conditions. Other therapeutic indications include: skin allergy, herpes, hemorrhoids, sciatica, tissue oxygenation, help for *AIDS* patients, asthma, burn recovery, pneumonia, emphysema, chronic obstructive lung diseases (*asbestosis, silicosis*).

The method involves high-intensity, short duration longitudinal wave forms, generated in plasma.

With the above sampling, a review is made for an encouraging, little-known and little-understood, "soft", non-invasive, inexpensive treatment and optimization avenue for therapeutics.

This review is only preliminary and hardly exhaustive as many other longitudinal wave modalities exist or have existed. Nevertheless the case is

## HEALING DISEASE USING PATTERN PHYSICS

by  
Dan A. Davidson

A previous article, entitled "Pattern Physics", that I wrote created some interest in the details of what was behind the cancer healing mentioned in that article. This article is based on the current level of research which I have proven in the laboratory.

Here is a partial quote from that article regarding the cure:

"Acquaintances of mine have friends who were cured by treating them with the Violet Flame projector. One man had a cancer the size of a soccer ball. My friend had a picture of the person before he had cancer and put that picture on the Violet Flame projector I had sent to him. Within one day the patient's cancer shrunk to the size of a baseball. The doctors were dumbfounded. He was declared completely cured of cancer by his doctors 5 weeks later. Even the doctors said the man had a miracle cure."

Occasionally I get information downloaded in the form of clear visions of inventions, the future, etc. The Violet Flame projector mentioned refers to a device shown to me in a vision several years ago including exact details of the various components. I ended up calling it the Personal and Planetary Purifier or P3 for short. This device has been tested extensively here in the lab and by many others. It is a projector of a Sacred Fire activity known as the Violet Flame.

The Violet Flame has many miracle attributes but mainly for its ability to transmute negative or destructively qualified energy and return the energy to its pristine purity. It is called into action by students of the Higher Law to transmute their negative energies from the past, their Karma, and progress into higher levels of consciousness.

Several friends in various parts of the world got the P3 from me to try out and use on themselves and help bless the world. In my own research I found that the energies on the inner aetheric level were much better within a 5 mile radius of my home than they were downtown that usually has a lot of psychic turmoil and garbage patterns on this lower plane of consciousness. So this triggered me into research and asking for guidance from the Masters for making another device designed mainly as a Violet Flame Projector. I labeled this the Personal and Planetary Purifying Projector or P4 for simplification. A few of these were built and sent out to friends to test and use. The original P4 was designed to put in your car to radiate for a 5 mile sphere around the car. Subsequent trips downtown with the P4 operating were a much more pleasant experience as the device cleaned up the psychic garbage as it made tunnels of the Violet Flame wherever we went. If you are advanced enough you can just have your Higher Self keep you surrounded with the Violet Flame but most are not. So the P4 is a great help. We found that even advanced students of the Light benefited greatly from the P4 use.

The Personal Planetary Purifier (P3), in a healing mode, will send Violet Flame in and around anything anywhere on the earth. It operates on the aetheric or sub-quantum level and utilizes Pattern Physics. Any pattern or picture of some object energized by the P3 will put this Divine Energy around actual object no matter where on the earth. This utilizes the basic Law that any picture or drawing of an object is always in tune with the object on the aetheric or sub-quantum level. Thus, energizing the picture of the cancer victim with the Violet Flame put the Violet Flame around the person. Since the picture was taken of the person before they had

cancer the aetheric pattern would be energized to manifest that in the person and the bad pattern of the cancer would be removed.

The first version of the P4 was the portable version and would run off the car battery using the cigarette lighter port. It radiated in a 5 mile sphere of Violet Flame on the aetheric plane around the car. Later versions were much larger and designed primarily for house use but could also run in the car. The Mega P4, the latest version, radiates 10,000 miles on the aetheric plane.

Radionics utilizes pattern physics; however most radionic machines I have seen are not made of purified materials. Thus, the impure patterns of these devices end up getting sent to the radionics patients as well as the operators. There are many cases of radionics operators getting sick or even dying from their use of these basically defective devices.

The basic simple design of the P3 and P4 device used to heal is shown in the following diagram. The key is in the crystal tuning and the Violet Flame Frequency which operates on the highest plane of the aether.

A picture of the P3 and small P4 is shown below.

P3

Car P4

The current version of the P4 is the Mega P4 and is used by many for personal and planetary purification. Just having the P4 running in the house raises the consciousness vibration level to amazing heights. Because this level is so high it has taken advanced students of yoga and others in spiritual disciplines a period of adjustment. Several advanced students of the Ascended Masters have told me they were transported into their Christ self in meditation with the Mega P4 running in their homes or on their property. It takes the body time to get purified to the state whereby the person can comfortably stand these high energies of the Violet Flame. It has been said that when the student is ready the Masters will appear. Much of the

“getting ready” is getting purified. The high energies of an Ascended Master would wipe out most people so They do not appear to them.

The Mega P4 to the left is about a foot high and 2.4 inches in diameter with the base 6 inches in diameter. Pictures of persons, places, and things can be put under the wide base for purification and blessing.

The purified and tuned crystal inside the transparent tube is 2 inches diameter and over 8 inches in length. Clairvoyants have tested and it radiates the Violet Flame for 10,000 miles and is equivalent to 1.3 million people decreeing 24X7. The special light is the exact wavelength specified in my vision. This is crystal technology at its finest. The crystal is necessary to augment the energy level of the light to a high power. Without the crystal the unit would have scant effects.

The Violet Flame and all the other Rays of the Sacred Fire are contained in an aetheric pattern complex radiated throughout the Galaxy and contain all the patterns of perfection necessary to create anything on the aetheric or lower vibration levels such as our physical level. This pattern complex is called the Master Power Flame (MPF) and contains patterns for things like atoms, DNA, human bodies, larger objects like moons, suns, on up the scale of size to galaxies. Everything perfect is created from the aetheric from those perfect patterns of the MPF and also imperfect patterns created by humans such as distorted DNA, hate, and other dark energies. The use of the Sacred Fire energies are necessary to correct these distorted patterns and return the energies back to their pristine purity.

All my crystals are special man-made of the purest chemicals and; hence, of the highest energy level. Natural crystals are impure due to the fact they have been grown in the low vibration level of planet earth and have picked up impurities on various levels. There is much disinformation in the alternative science community regarding natural versus synthetic and other aspects of crystals. Anyone who is a true clairvoyant and can see the difference knows pure synthetic crystals are vastly superior.

There are 3 states of crystals.

1. Raw Crystals – Not tuned and have had nothing done to them to remove any manufacturing stresses or psychic patterns.
2. Purified Crystals – Still not tuned but free of all manufacturing imperfections and psychic impurity.
3. Tuned Purified Crystals – These crystals have been tuned in special energy devices related to the MPF technology and are tuned to the highest energy levels of the Galaxy.

This P3 and P4 technology is not limited to what can be treated. All disease is an aberrational pattern. All imperfection is an aberration. To that extent, much of what exists on this level needs purifying. Disease, finances, people all need purifying and correcting so our world can operate in a healthy, happy, safe, and sane environment. Cancer is basically a DNA aberration and needs correcting or eliminating since it is not a perfect basic MPF pattern. In

healing, the P3 projection of the Violet Flame to the person's body helped it to reject the cancer cells and was healed.

Advanced scientists working on energy devices that operate on the aetheric level have found that having the P3 and/or P4 operating in their labs enable their energy experiments to function according to theory; whereas, without the P3 and/or P4, the experiments would not function properly or even at all. Agriculture flourishes on a bath of the Sacred Fire energies like the Violet Flame. We all need as much of this loving energy as we can get.

The P3 and P4 might be classified by some as radionic devices. But they are far different in basic physics and etheric physics design. Also, my devices only utilize the etheric Laws stated in the teachings of the Ascended Masters and utilize the Sacred Fire for purification and healing.

**This book offers amazing articles on vibrational medicine, biophotons, scalars, reversing blindness, effects of intention, ether energy, homeopathy, crystal energy, prayer, and nonlocal biocommunications.**

**Said one reviewer:**

**“Visionary scientists and Nobel laureates have declared that the most profound challenge to science in this century is human consciousness, the processes by which humans transact with the energy fields and happenings of the universe. It is no longer acceptable to relegate the dynamic complexity of human consciousness to philosophers. We dedicated, disciplined scientists who work only with rigorous facts must move forward with new research explorations, like these presented in this book. I salute the researchers and editors who present these startling facts to the world to lead us onward.”**

**Psionic Medicine heralds the dawn of a new era in medical practice, with health-maintaining and curative potentials that are a significant addition to the repertory of treatment developed in biochemical medicine by Big Pharma.**

**In Psionic Medicine, the critical factor is not chemistry and surgical intervention - although such methods remain indicated in some cases, but subtle “informational” inputs that affect the patient's biofield. And the emphasis is on treating the causes of diseases and disorders, instead of just the symptoms, which often are the only things that current medications treat.**

**This excellent book provides a remarkably clear and concise overview of what psionic medicine is, how it works, and why it deserves the kind of attention that presently only molecular and genetics-based therapies are accorded. It merits serious and urgent attention by the general lay public and medical professionals alike.**

## USPA Psychotronics Periodicals Library

In order to do good psychotronics research of any kind, whether it involves radionics, radiesthesia, psionic medicine, dowsing, subtle energies, biophotons, or any other subject covered by psychotronics, one needs access to as much of the periodical literature as possible on these subjects.

**To address this issue, the United States Psychotronics Association has resolved to identify, acquire, and digitize copies of every psychotronics related periodical that has ever been published anywhere in the world, and to retain copies in the USPA Library.**

**As a first step, we have developed an [online list of psychotronics related periodicals \(click here\)](#) that focus on or frequently have articles on the psychotronics subjects** noted above. This is a growing list, since we know there are probably other psychotronics periodicals that have been published, but that we do not yet know about.

Please look over the online list and check your own personal physical libraries and your computer files, thumb discs, and other external hard drives to see if you have any issues of the periodicals on this list. Even if you just have one issue, please let us know, because that may be the one we need to complete all the issues of a particular periodical. **Please write to me (John Reed) at: [joreed43@gmail.com](mailto:joreed43@gmail.com), since I am the USPA librarian and archivist coordinating this effort,**and tell me what periodicals you have.

**As a whole, the members of USPA and other interested non-members, have a huge "library" of periodicals, but it just happens to be "distributed" among these people** at this point in time. However, we can work together, and if you would be willing to loan, donate, xerox, or as a last resort, sell copies of your periodicals to the USPA Library, then we will be able to build a large centralized library of all psychotronics periodicals. And all USPA members will then be able to use these periodicals in their research or for their reading enjoyment.

## USPA Local Groups and Affiliates Update

As mentioned in the May, 2016, USPA Newsletter, one of our goals is to reactivate all of the former 24 USPA Chapters that once existed across the US and Mexico. In addition, we plan to establish new local groups of people interested in psychotronics and related subjects in other major cities in the US and other countries as well. All such local groups and affiliates will be independent, but will work together with the USPA in a mutually beneficial relationship to achieve our goals of advancing research and applications in psychotronics, radionics, subtle energy, and related fields.

So I would like to invite all of former USPA Chapters leaders and members to contact me (John Reed) at: [joreed43@gmail.com](mailto:joreed43@gmail.com) and let me know if you would like to help reactivate your local chapter. In addition, if you are a leader or member of a psychotronics or related organization which was never a chapter of USPA, and we would welcome you as a USPA affiliated organization as well.

We will be establishing a USPA affiliated groups as traditional organizations and also via the Meetup.com online group platform. This will enable current and former members to more easily have local get-togethers, meetings, and other activities, and those activities, times, and other details can be posted online. So please let me know if you would like to be the leader of a group in your area.

If you do decide to use Meetup.com to establish your local group, you could do it quickly and easily by going to [www.meetup.com](http://www.meetup.com) , and clicking on the big red word “**Start**” in the upper left, and then just following the step-by-step procedures.

**You can give your local group any name you want, but it should probably have a name that relates to psychotronics in some way.** And if you need any help, please let me know, and I will help you in any way I can. Perhaps the most important thing is enthusiasm and determination, so write to me, even if you don’t know any other USPA members in your area, and I will help you set up a local group: [joreed43@gmail.com](mailto:joreed43@gmail.com)

## Exchange Corner and Advertisements

The "Exchange Corner", is a place where people can advertise to buy, exchange, or sell items of interest, or request information or other help in relation to something wanted. So if there is anything you want to buy, sell or trade that has to do with psychotronics, radionics, subtle energy, or related subjects, please contacted the Classified Ads manager at: [joreed43@gmail.com](mailto:joreed43@gmail.com). Advertisements are free of charge to USPA member within certain limits, but non-members will be charged for any classified or display ads. So please send your ads and wanted requests to: [joreed43@gmail.com](mailto:joreed43@gmail.com).

**Wanted:** Any articles, periodicals, books, devices, or other materials on psychotronic related subjects that you can donate or lend to the USPA for its library, archives, and museum. **The USPA is a nonprofit, 501(c)(3), tax exempt organization, and as such, you are able to make tax deductible donations to the USPA. Please email the USPA at: [joreed43@gmail.com](mailto:joreed43@gmail.com) to make shipping arrangements. Thank you for your generosity.**

## What Research and Subjects Does Psychotronics Cover?

The United States Psychotronics Association defines psychotronics as the science of mind-body-environment relationships, an interdisciplinary science concerned with the interactions of matter, energy, and consciousness. Psychotronics involves the study, research, and applications of the physics and technology of the mind, brain, spirit, consciousness, and the underlying forces of life and nature – hence the term “psychotronics”.

We believe that a true understanding of the universe must include the spiritual, as well as, the technical, and provide an opportunity for amateur researchers to present their findings along with the professionals. We stress research, with documentation of results, and practical applications, rather than personal experience and unsupported hypotheses.

**Some Prominent People in the history of psychotronics research and application:** Albert Abrams, Thomas Bearden, Robert C. Beck, Robert O. Becker, Jacques Benveniste, David Bohm, Harold Saxon Burr, George W. Crile, Ruth Drown, T. Galen Hieronymus, Vlail P. Kaznacheyev, Georges Lakhovsky, Wilhelm Reich, Royal R. Rife, Rupert Sheldrake, Nikola Tesla, Marcel Vogel, and others.

**Some of the forces, fields, waves, and energies studied and researched in psychotronics include:** bioelectromagnetism, biophotons, biopotentials, electromagnetic wave pollution and harmful effects; coherent emanations of DNA, emanations of matter, “free energy”, morphogenetic fields, non-hertzian waves, orgone energy, pyramid energy and power, qi (chi), quantum fields, scalar waves, subtle energies, ultra-weak radiation of living matter, zero-point energy, and others.

**Some of the phenomena believed to be produced or involved with the above fields and energies:** action-at-a-distance, the aura of the body and other living things, bioinformation, bioluminescence, chakras, consciousness, distant intercellular interactions, meridians of the body, mind-body interactions, non-locality, the placebo effect, quantum consciousness, spontaneous remission of cancer and other diseases, water memory, water structure, and others.

**Related fields of study and research covering the above forces, energies, and phenomena of psychotronics:** bioelectromagnetics, bioenergetics, biophotonics, biophysics, psionics, psychoenergetics, psychoneuroimmunology, quantum biology, radionics, scalar electromagnetics, and others.

**Some practices, techniques, and applications related to psychotronics include:** acupuncture, biogeometry, brain entrainment, clairvoyance, dowsing, energy healing and medicine, extrasensory perception, feng shui, homeopathy, kirlian photography, magnetic therapy, pendulum use and methods, prayer effects, psionic medicine, psychic healing, psychometry, qigong, radiesthesia, radionics, remote viewing, shamanism, sound and sonic healing, telekinesis, telepathy, and others.

# **USPA Catalog of Conference Lectures, 1978-1994**

## **Now Available**

A compilation of nearly 300 lectures given at the first 17 years of the United States Psychotronics Association (USPA) conferences, from 1978 through 1994 is [now available in a 30 page catalog \(click here\)](#).

There are talks by some of the most well known scientists of our age, including Andrija Puharich, Thomas Bearden, Marcel Vogel, Lynn Surgalla, Robert Beck, T. Galen Hieronymus, J.G. Gallimore, Elizabeth Rauscher, Christopher Bird, and many, many more.

There are also lectures specifically about radionics from some of the top practitioners: Robert Beutlich, Lutie Larsen, Jerry Fridenstine, Frances Farrelly, and others.

If you have an interest in the paranormal, the life of plants or zero-point energy, there are speakers here who are experts in the fields. How about dark-field microscopy, scalars, magnetic fields, or the Philadelphia Experiment? Yes, they are in here in this catalog too. Homeopathy, color-healing, use of crystals, structuring water, water memory, and Tesla's work are some of the other topics covered in this catalog.

As of this date, (April 15, 2017) they are available only by direct contact with USPA, but soon, they will be available online. The USPA home page is at <http://www.psychotronics.org> and we will have a linked site where purchase will lead to immediate download of the MP3, and payment can be made through Pay Pal.

Please note that [in the Catalog \(click here\)](#), most of the lectures are standard MP3s, are 30-45 minutes long, and priced at a very reasonable \$5.00 each. These have no marking in the right-hand column of the catalog listing. Other MP3s are one hour or slightly longer, and are marked "Prime" in the right-hand column, with a price of \$8.00 each. And a few of the MP3s are 90 minutes or longer, and are marked "Double", with a price of \$10.00 each. USPA members get 40% off.

However, if you just "can't wait," for the online order website, email us at [uspsychotronics@gmail.com](mailto:uspsychotronics@gmail.com) or contact our USPA Treasurer by snail mail at:

# J.G. Gallimore's Five Rare Books Now Available for Sale

All five of J.G. Gallimore's rare books on psychotronics subjects and unusual energies have been reprinted by the United States Psychotronics Association (USPA) and are being made available at a fraction of the cost that used copies were being sold at online. So rare have these books been, that only a few libraries in the entire world had them in their collections, and some of Gallimore's books were being sold for several hundred dollars each online. However, with these newly reprinted volumes, each will be available for less than \$30.00. Each of Gallimore's books is described below with links to Amazon.com.

Jerry G. Gallimore was one of the founders of the USPA in 1975, and was a leading researcher in psychotronics and unusual energies until his untimely death in 1989.

This is J.G. Gallimore's first book of three volumes on unusual energies, and at 468 pages, it is a magnificent work. In this book, Gallimore discusses in depth the research, discoveries, and

inventions of all the major researchers in subtle energies, the aether, biological

fields, pyramid energy, radiesthesia, radionics, crystal transduction, and related subjects. These include the works of Baron Von Reichenbach's and his odic energy, Dr. Wilhelm Reich's orgone energy, Dr. Harold Burr's biological life fields, Kozyrev's time mirror, Edgar Cayce's transmission of energy, and related research done by many others. Of particular importance is Gallimore's 127 page chapter on radionics. In this chapter he discusses in depth the research and devices of Ruth Drown, T. Galen Hieronymus, Rho Sigma, Dr. L. P. Corte and other prominent people in the radionics field. But in addition, Gallimore provided diagrams showing how such devices are made and how they actually work.

This is the second book in the “Unusual Energies” series that J.G

Callimore published. It covers Gallimore's research on Albert Abrams, the founder of modern radionics, psychological physics, psychic energy, thought resonance, subtle energies, crystals, and related subjects. In addition, a number of radionics devices are discussed, such as the De La Warr Diagnostic Instrument. And very helpfully, the rates are provided for substances, body organs, and medical diseases and disorders. A very interesting interview of Christopher Bird, conducted by J.G. Gallimore is provided, as well as a discussion of Walter Russell and his research.

## **Relationship Between Parapsychology and Gravity: Volume 3 of Handbook of Unusual Energies**

The Relationship Between Parapsychology and Gravity is Volume 3 of J.G. Gallimore's series of three handbooks of unusual energies. This book describes in depth the research and theories of J.G. Gallimore into the question of "parapsychology transmission" --the question of how such things as telepathy, remote viewing, ESP, and similar phenomena can physically occur. Gallimore discusses various explanation on how they occur, including the possibility that gravity waves may play a role. He also discusses the various emanations, radiations, and energy fields of all matter and life. This includes the ancient Chinese energy called "chi" (qi), the ancient Indian's prana energy, Reichenback's "odhic force", Gurwitsch's "mitogenic radiation", Wilhelm Reich's orgone energy, and other subtle energies of life and matter. Gallimore shows how all of these energies are the same or similar, how they interact, and how they are related to gravity. He also discusses crystals as transducers of these energies, and provides diagrams of devices that could potentially be used to harness or control these energies.

# **Transverse Paraphysics: The New Science of Space, Time, and Gravity Control**

**by J.G. Gallimore**

**Paperback:** 374 pages

**Publisher:** CreateSpace Independent  
Publishing Platform (March 21, 2017)

inches

[Available at Amazon.com](https://www.amazon.com/dp/1543024920)

This book covers the visionary research and theories developed by J.G. Gallimore about anti-gravity, space, time, and biophysics. He discusses in depth the dimensions of space, time, and gravity, and new discoveries in each of these areas. In addition, he covers research being done on anti-gravity and then discusses anti-gravity patents that have been obtained. He also discusses the intriguing concept of aura energy fields surrounding humans and other living things, and how extra-sensory perception (ESP) might be explained through biophysical principles.

## **Unified Field Theory Research Book: Using Subjective Response to Psi-Plasma for Analysis of Properties Neutral Charge Plasma Fields**

**by J.G. Gallimore**

**Paperback:** 134 pages

**Publisher:** CreateSpace Independent  
Publishing Platform (March 21, 2017)

**Language:** English

**ISBN-10:** 1543024831

**Product Dimensions:** 8.5 x 0.3 x 11  
inches

**[Available from Amazon.com](https://www.amazon.com/dp/1543024831)**

This book is about psychotronics, radionics, electromagnetic fields and waves, psi-plasma, plasma fields, subtle energies, bioelectromagnetic energy, and other unusual energies emitted by living and non-living things. It also is about how living things interact with and are affected by these energies, which may enhance health or harm health. The book covers the research of Wilhem Reich on orgone energy, of Baron Reichenback on the odic forces, as well as research done by Cazzamalli on brain radiations and Lakhovsky on using high frequency radiations to successfully treat cancer in humans. In addition, Lakhovsky used similar methods to enhance the growth of plants. Gallimore shows how these energies, forces, and fields are all inter-related and provides hypotheses and ideas on their possible unification.
