

**From the editor:** Well, it had to happen sooner or later. I published this newsletter with a big error in it. I am deeply sorry for any harm it caused and will redouble my efforts to be a better “edit-er” in the future. Please delete your previous copy and replace it with this one. Thank you, Gail Ruggles

**Please Note:**

John Reed, M.D., our wonderful previous Managing Editor has stepped down but has graciously offered to be on hand to help our new editor, Gail Ruggles.

**Editorial Office:** USPA Newsletter, Gail E. Ruggles, 2088 Maple Ridge Road, Newark, VT 05871. Email [aprilday@together.net](mailto:aprilday@together.net); Phone: 802-535-5173. After August 1, 2020, please address all newsletter inquiries to Gail. .

**For immediate assistance** regarding other USPA issues, contact Scott Beutlich, the secretary / treasurer of USPA at [uspsychotronics@gmail.com](mailto:uspsychotronics@gmail.com)

**Manuscript Submission:** Submit all manuscripts as word documents by the 12th of each month to [aprilday@together.net](mailto:aprilday@together.net) for review for possible publication in the next month’s newsletter. The Board of Directors monitors editorial decisions

**Enjoy unique information** about radionics, psychotronics and other related topics at USPA’s website at <http://psychotronics.org>  
USPA is on Facebook at: <https://www.facebook.com/uspsychotronics/>

**Back Issues** are available on the USPA website above.

## **Section I - The Basics**

### **What is USPA?**

The United States Psychotronics Association (USPA) is a nonprofit 501(c)(3) organization founded in 1975 to serve as a focal point for scientific and technical exploration of the universe of esoteric, spiritual, and psychic arts in the United States of America.

The USPA has been hosting annual conferences for its membership since its formation and has featured countless individuals with cutting-edge viewpoints, research, or theories to share, allowing any interested persons to openly discuss their work.

### **What is Psychotronics?**

USPA defines psychotronics as the science of mind-body-environment relationships, an interdisciplinary science concerned with the interactions of matter, energy, and consciousness.

Psychotronics involves the study, research, and applications of the physics and technology of the mind, brain, spirit, consciousness, and the underlying forces of life and nature – hence the term “psychotronics”.

We believe that a true understanding of the universe must include the spiritual, as well as, the technical, and provide an opportunity for amateur researchers to present their findings along with the professionals.

We stress research, with documentation of results, and practical applications, rather than personal experience and unsupported hypotheses.

### **A Letter from our Interim President, Jon Klimo**

11th of July, 2020,

This is intended to be my (Jon Klimo's) first interim USPA President Message.

Very briefly, as a former USPA President and current Vice President, I was on a USPA board and officer group conference call a while ago and took part in a discussion regarding what any of us should be doing, if anything, as part of the USPA and with our knowledge about current forward-edge science and technology to provide our perspective on today's events, particularly on the whole issue of the coronavirus pandemic we are all immersed within.

In that call, I took the tack that, both individually and as a group many of us in the USPA knew a lot about what could be called alternative biomedical approaches to diagnosis and treatment and that we are currently living through what could be called a global health crisis that cries out for new and better ways to look at and effectively work with the insidiously contagious Covid 19 virus. I, for one, said I felt a moral obligation to offer what I knew regarding alternative and innovative approaches to virus and viral infections, given the many thousands of us continuing to die throughout the world. I said I felt moved to speak out and share what I knew.

That board and officer conference call soon shifted, as I recall, to a debate between those of us who felt we should not share what we knew with others outside the USPA and those of us, who felt we needed to say something especially if it might positively affect the statistics of those infected with and even dying of the coronavirus infection.

Enough time has passed since that discussion for me to remember less clearly what actually happened and was said; but I do remember that then-USPA-President others did not at all agree with what I was saying

I remember a number of years ago being with my good friend the late Peter Moscow, then USPA President. Peter told me that a noted guest speaker at the upcoming USPA conference that year called him a few weeks before the conference telling him that he had been visited by strangers who clearly threatened him if he went ahead with his presentation about an innovative new approach to cancer treatment. He ended up not giving the talk because they threatened his family as well. So, you can see the connection of that story to our current situation. These threatening people apparently had a serious vested interest in traditional approaches to science and healing and saw things like radionics as being a real threat to what they believed in and had their money in.

For many years I had heard discussions about the USPA possibly losing its nonprofit 501C3 status if it was not careful enough about monitoring everything from claims of efficacy being made by conference presenters to for-profit motives in the selling of devices. This has always made sense to me; the USPA can ill afford the loss of its nonprofit status. But in the throes of my righteousness, I think in that earlier conference call that I just forgot the possible jeopardizing of our nonprofit status, while others were responsible enough not to lose sight of that.

Since that meeting two things have become clear to me: 1.) that I want to be in accord with, not in opposition to others in the USPA who take a more careful, even defensive, tack with regard to how we come across to those outside of the USPA, especially those with ideological and financial vested interests more aligned with mainstream established science and research; and 2.), I want to work as part of a team to develop a workable approach to how the USPA (and other organizations like it) can best interface its knowledge, interests, and activity with the established scientific, academic, and financial community. This will take careful and practical thinking.

Of those two things just mentioned, the second particularly interests me at the moment because, as I see it, it involves an assortment of much-needed coordinated strategic moves in the interpersonal, organizational, economic, and political arena. Probably at the heart of it lies language itself-- the public rhetoric used on behalf of what one would like to have happen in the world. At 78, I've spent the last 50 years trying to help bring about a paradigm shift in how we humans see reality, and what the scientific community believes in, understands, and is open to.

As part of this paradigm shift, I concur with Thomas Kuhn in his *Structure of Scientific Revolutions* who sees the anomalous as having a key role in how revolutionary change occurs in the evolution of our global scientific thinking and doing. I have been drawn to the anomalous all my life, given that the anomalous is whatever at the time does not fit in with or make sense to the established mainstream scientific and academic community. Whereas one would think that scientists would be naturally drawn by their curiosity to things that don't yet fit in, what so many of us in the USPA community find exasperating is that almost the opposite seems to be the case: The more that things appear to be inexplicable to current mainstream science, the less interest scientists seem to have in being open to and pursuing it.

Ever since the original pioneering work in radionics of Albert Abrams in the early 20<sup>th</sup> century, those of us in the USPA today chose to carry on the positive, pioneering tradition of radionics theory and practice in agricultural, veterinary, and human areas. But woe unto you if you dare bring radionic pursuits into working with fellow human beings or make public claims about its efficacy. Frankly, that is an outright illegal endeavor and has been for decades. The FDA, the AMA, and affiliated organizations

stand ready to clamp down on and even imprison radionics practitioners and others using non-radionic but no less anomalous approaches to biomedical healing and wellness maintenance familiar to those of us in the USPA and attending its conference presentations. The field of radionics seems to have been one long slog through the ignorance and derision of others, especially of those in power in the scientific community and biomedicine in particular.

Many of you are familiar with the unfortunate record of Morris Fishbein, M.D., officer with the AMA and editor of the Journal of the American Medical Association. He was notorious in the early part of the 20th century for working to hound natural healers and practitioners of alternative medicine out of existence, and he was alas very good at his work. He took on the genius of Royal Rife and his innovative microscope and frequency treatment device and made his life and work pretty miserable in spite of the fact there was widespread evidence of the undeniable effectiveness of Rife's work.

I just happened to reread parts of my copy of the 2005 USPA book, *Energetic Processes: Interaction Between Matter, Energy and Consciousness, Vol II*, Peter Moscow et al., eds, and I was particularly drawn to Christopher Bird's contribution, "*The Case of Antoine Priore and His Therapeutic Machine*" (presented at the USPA conference, 1984). Similar to the case of Rife, Priore suffered at the hands of a Prof. Lachapele, director of the noted Bergonie anticancer foundation in France. Subsequently, Bird also wrote a thorough study of yet another USPA-related scientist, martyred at the hands of established science: *The Prosecution and Trial of Gaston Naessens: The True Story of the Efforts to Suppress an Alternative Treatment for Cancer, AIDS, and Other Immunological Diseases*. For the cases of Rife, Priore, and Naessens, I think Bird has done a masterful job in speaking up for the put-upon, underappreciated underdog in such underdog/topdog situations that unfortunately all too often populate the history of mainstream science.

I think we can probably agree that the USPA has been, from its inception in the mid-1970s, in the role of underdog vis a vis the top dog that is mainstream vested-interest scientific and academic theory, practice, and resources. It is in light of this context that I am revisiting my current role as acting interim President of the USPA and what I have shared with you in this message. And finally I want to reiterate my earlier desire, "to be part of a team to develop a workable approach to how the USPA (and other organizations like it) can best interface its knowledge, interests, and activity with the established scientific, academic, and financial community."

Wishing you all health and safety,  
Jon Klimo

## Section II - What's New at USPA?

### We're redesigning things to cope with Covid-19:

Just as many other organizations, we struggled over the decision to cancel this year's conference. Early on, we felt it was not wise to expect that the pandemic would be at a point where we could expect volunteers, speakers, vendors and attendees to come from all over the country and be safe.

### So, We're adding new features:

To keep in touch with our membership and others interested in the field, we are adding new features to our website. Classic USPA videos on MP4 will be in our members only area and some for sale in our shop under products. We are planning a number of online presentations, videos and interviews. Most of these will be free of charge to our members, with perhaps a small fee for non-members.

If you personally would like to be considered for our new project, or, if you know of any scientist, speaker or presenter you would like us to contact, PLEASE get in touch with our editor, or contact us through our "contact" page on our website or through Scott Beutlich at [uspsychotronics@gmail.com](mailto:uspsychotronics@gmail.com).

### Our Seventh Webinar (First of 2020) Was Well Received:

Many of you attended our first online presentation on July 9, 2020 "The Perils of Fifth Generation (5G) Wireless" Hosted by Dr. Beverly Rubik. As our first foray into this mode of presentation, it was a great success. Thanks for your participation!

### The next webinar will feature Dan Taylor's 2016 talk on The Physics of Radionics

Dan Taylor's "Physics of Radionics" will be presented as the next masterclass on SAT, Aug 15th @ noon. Emails will be sent out prior to the webinar with easy links to the presentation. All webinars and some bonus webinars are posted in our members only area.

### USPA Conference Recordings 1978 to 1995, 2015 – Available for purchase on mp3

Since the founding of USPA in 1975, top speakers have made presentations at our annual conferences. These speakers are involved in the leading edges of science, especially

<https://www.psychotronics.org/uspa-conference-audio-recordings-1978-to-1995-2015/>

the Phenomena of Mind-Body and technology. USPA Conference Audio Recordings offer over 1400 of our speakers under various formats during 38 of our 41 annual conferences.

When we started recording talks in 1978, we only had audio cassettes tapes. The first eighteen years of these cassette recordings have now been converted to MP3 audio digital format (plus 2015). *These MP3 files can be ordered and transferred via email.* See order sheet on the last page of this document. Individual lectures are \$6.00 each; \$5.00 each for purchase of ten or more in one order. Sets are priced separately.

Video recordings using VHS tapes started in 1982 and ran thru 2002. DVDs started in 2003 until the latest format MP4 digital Audio / Visual format began in 2015. Many of these VHS tapes have been converted to DVDs; some are converted to MP4s. We're also working to bring more online, including sets of our favorites, grouped by speaker or subject.

A revised list will be available soon with ALL 38 years of speakers and their talks. Keep checking our website ([psychotronics.org](http://psychotronics.org)) to see what new talks are available for online

download. See the Shop / Product page on our website and when you join USPA; see the “members only” area for free online viewing of selected materials.

### Section III - What Are Others Up To?

#### Four awards were presented

“By Order of the Board of Directors,” the following people received awards at the July 2019 USPA conference in Chicago:

**The J.G. Gallimore Award for Theory and Experiment was presented to Dr. Dietrich Klinghardt, M.D., Ph.D.** in recognition of his outstanding contributions to phototherapy and integrative health and wellness, both as a clinician and scholar.

**The J.G. Gallimore Award for Theory and Experiment was presented posthumously to Elizabeth Rauscher, Ph.D.** in recognition of her 12 years of dedicated service on the Board of Directors; her contributions in theoretical physics; and her pioneering research on science and consciousness. (Elizabeth passed away just before conference on July 3<sup>rd</sup>.) A memorial message for Elizabeth can be found in the July 2019 issue of the USPA newsletter :

<https://www.psychotronics.org/wp-content/uploads/2019/07/USPA-Journal-and-Newsletter-vol-5-no-7-July-2019.pdf>

**The Marcel Vogel Service Award was presented to Dr. John Reed, M.D.** in recognition of his dedicated service and generosity to the USPA, through serving on the Board of Directors since 2015, as Main Editor of the USPA Newsletter, and for organizing a library for all the USPA archives.

**The Hieronymous Award was presented posthumously to Phyllis Weiland** in recognition of her outstanding service over many years to the USPA on the Board of Directors, as Secretary, and as Conference and Membership Coordinator. She faithfully supported the USPA in many ways to help the organization succeed. (Phyllis passed away March 9<sup>th</sup>, 2019) (Memorial for Phyllis is later in this issue.)

## Section IV – Articles of Interest

### **Keeping the ‘Child Mind’**

by Marty Lucas 7/15/2020

We have reached a point in our radionic and energy work where we are pretty good. We know how to address issues and we know how to get results. Now that we have some level of competence we come into a dangerous period in our work. We risk becoming ‘experts’.

Here is what I have noticed about experts, (myself included). We start to see that the best way and perhaps the only way to resolve an issue is *our* way. Then we risk becoming embedded in our expertness and rigid in our approaches.

The trick for all of us is to somehow hang onto that ‘child-mind’ way of looking at things. We need to stay in the beginner mindset where all things are possible and where there is much more to learn if we can keep our minds open.

Over the last several years I watched a friend slowly turn into an ‘expert’ (not in radionics, but in energy work). Throughout the transition I saw her becoming more closed to outside ideas and outside help. In the end, she learned that while she considered herself an expert, the rest of us did not. That realization truly hurt her feelings.

It is like when you go to a metaphysical fair and someone tells you they are the reincarnation of Cleopatra, or Caesar or some pharaoh or other. Maybe they are the reincarnation of an angel. Whatever their claims, the discerning mind quickly realizes there must be hundreds of Cleopatras and Napoleons. Maybe the real issue is that they have allowed their egos a little too much rein....

I am not saying there isn’t reincarnation; I am saying that just because my ego tells me something, it may not be true. Of the 7 ½ BILLION people on this Earth it is highly unlikely I am one of the five who is ushering in the ascension. Chances are I have never been a Caesar, Attila the Hun, or Zarathustra.

Of the possibly billions of planets and quadrillions of sentient beings, it is even more unlikely that I am the reincarnation of some interdimensional demi-god.

So, I started adding up the personalities that I have known: One claimed to be the 2<sup>nd</sup> or 3<sup>rd</sup> best dowser in the world and he claimed the one better than him was another fellow I know (this is a fellow I showed how to dowse.) Several are reincarnated famous historical figures. Some had even more fantastic stories. Sadly, all too often their daily conduct would indicate they were NOT who they claimed to be.

That would mean either I am extremely lucky to be in contact with all of these ‘white’ and English-speaking celebrities from the United States, OR somebody’s ego has gotten a little carried away. Which is more plausible?

That is not to say I am so arrogant that I will question someone else’s spiritual experience. But perhaps it isn’t the experience that is iffy; perhaps it is the interpretation of that experience. I would love to think I am somehow a reincarnated rich guy that buried his wealth and all I must do is remember where the treasure is...but that is my ego speaking.

I see it in my radionic work. Throughout the history of radionics we run across the occasional expert in all things great and small. We see their work (much of which is very good) but we also see they are no longer seeking new information. Perhaps they even see the advances that others are making to be somehow not ‘real’ radionics.

I (of course) use the best instruments and no other instrument can compare for quality and power... (LOL). My approach is the ONE that works so if you want REAL results, it is my way or nothing... (sigh). Or better yet, this is how it is laid out in a book from forty years ago, so that must be the right way to do it.

Does this sound familiar, perhaps even too familiar? When we surround ourselves with professionals from many specialties, we quickly learn that they have things that work better. They also learn that some of your work is valuable as well.

That is one of the treasures of the USPA. The diversity of experience and approaches is fertile ground for learning even better ways of doing things. My equipment is good. My methods are excellent. BUT there is so much more to learn and I

## Al's Alternative Energy Corner

I have been studying alternative energy for decades. We all know about wind, solar, hydroelectric, wave energy, biofuels, geothermal, biomass, tidal energy, hydrogen and water fuel, and so called "free energy" devices.

Each month, I will give one source of alt-energy information for you to study. The first one I will give, is <https://revolution-green.com/>  
This site has a lot of good info on it. Enjoy.

Al Kacperski / Board member

While there are things I am good at, there are many more things I don't have a clue about. So, while I offer what help I can, I try not to be the expert guru. That is because I simply do not know what I do not

won't learn it unless I am willing to keep an open mind and listen.

The Beginner Mindset looks at everything as if it may be possible. While it doesn't dismiss what works, it also doesn't exclude new possibilities.

know.

In addition, I learn much faster when I ask more questions!

## Letter to the Editor and Book/Documentary Review

July 18, 2020

Subject: New David Bohm Documentary

Dear Gail,

In 1980, physicist David Bohm published a popular book titled *Wholeness and the Implicate Order*, stemming from his efforts to probe the "puzzles" presented by quantum mechanics, such as wave/particle duality, nonlocality, and the inconsistencies with general relativity. He described the explicate order of reality that we perceive as "unfolded," and arising from a deeper and more fundamental implicate or "enfolded" order. As described by his friend and physicist David Peat, Bohm thought that what we consider to be comprising "reality" are merely "surface phenomena, explicate forms that have temporarily unfolded out of an underlying implicate order."<sup>1</sup> In other words, the implicate order is the ground from which our observed reality emerges or unfolds...

Needless to say, this book release did not fall upon "deaf ears" in the radionics communities. While it is not difficult to observe *that* radionics appears to work, explaining *how* it might be working continues to be widely debated.<sup>2</sup> Many in our USPA community have suggested that our "consciousness / intention / tunings or rates" might be acting at a level influencing this "implicate" order described by Bohm, thereby shifting the probabilities in "preferred" directions for the explicate order emerging or "manifesting" as a result. These notions or variations have been entertained by many radionics inventors, researchers, and authors ever since...

<sup>1</sup> F. David Peat, *Non-locality in nature and cognition*, pp. 297–311. In: M.E. Carvallo (7 March 2013). *Nature, Cognition and System II: Current Systems-Scientific Research on Natural and Cognitive Systems Volume 2: On Complementarity and Beyond*. Springer Science & Business Media. p. 304. ISBN 978-94-011-2779-0.

<sup>2</sup> For radionics as "Art," consider *The Secret Art* by Duncan Laurie. For radionics as "Magic," consider *Radionics: Science or Magic?* by David Tansley. For radionics as "Science" consider *Radionics: Action at a Distance* by Tom Bearden.

Since we have a long “history” with Bohm, I thought our readers might like to know that a new documentary about his life and work has recently been produced, titled *Infinite Potential: The Life and Ideas of David Bohm*. Not only that, but due to some generous grants, this documentary can be viewed entirely for free online, at this address:

<https://www.infinitepotential.com/watch/> Happy viewing!

Kind regards,  
Daniel Taylor  
USPA Board Member

## **Infoceuticals**

by Glen Rein, PhD  
Quantum-Biology Research Lab

For years people have been fascinated by the ability of water to change in response to external stimuli, the ability of water to store information and the ability of biological systems to read the information we put into water. Water memory is a well-known phenomenon because most people know about homeopathy where water remembers the information associated with the chemical or herbs we add to it.

In homeopathy the information is stored in certain dilutions of chemical/water mixtures whereas other dilutions do not contain any information. Although we don't know why this selectivity of water exists in the real world but we do take advantage of this phenomenon when we make a homeopathic remedy.

But when we consider how many alternative methods are available, other than serial dilution (used in homeopathy), and how many different substances can be used to imprinting water, then things start to get complicated. Since the focus of this research is to develop new healing modalities, we consider here the use of infoceuticals for healing. Like nutraceuticals which use nutrients to heal the body, infoceuticals use information and energy.

Unlike homeopathy, where the source of the information is a chemical, in infoceuticals, energy is the source. And as most people know, there are many types of energy. The scientific community started down this rabbit hole relatively recently by using electromagnetic (EM) fields as the source of energy in infoceuticals. This new area of the interaction of EM fields with water was started by a Russian scientist who wondered what the role of water, which surrounds all cells, when cells are treated with an EM field. Sure enough they discovered you treat the water first and then treat the cells. This indirect method of information transfer between an EM field and the cells was only slightly less effective than treating the cells directly. The informed water still had an effect on the cells - days, even weeks after the EM signal was removed. Thus, water was storing the information.

In the case of EM fields, the information is in the frequency and phase properties. Although virtually no research has been done with phase information and biological systems, frequency information is slowly being studied. That is to say scientists are just starting to measure energy signatures, in terms of frequencies, of chemicals and biochemicals. Jacques Benveniste spearheaded this whole new approach which he called Digital Biology. He published numerous articles in peer-reviewed scientific journals demonstrating that energy imprints of certain biochemicals produced the same biological effects as the original biochemical. He was so far ahead of his time, that although the journals couldn't turn down his articles on scientific grounds, his research was buried and only now 50 years later are the applications of his research being pursued, i.e. infoceuticals.

Then Emoto came along and introduced the world to the idea that mental energy can influence water and ultimately be stored in water. Emoto showed that words, thoughts and emotions influence

crystallization patterns water forms when frozen. Although not done scientifically, this idea was verified by Dean Radin who studied the water patterns more scientifically.

Now crystallization patterns are being used by water scientists to study the influence of subtle energies on water. The effect of subtle energies on water is the realm of radionics. The dogma in the field is that type of energy used to transmit information in radionic devices is scalar energy. Although technically a misnomer, because physicists use scalar fields in their theories, but they don't mean the type of scalar energy Tom Bearden and Eldon Byrd talked about so many years ago. So the best word to use these days to describe radionic energies is longitudinal scalar waves because of the longitudinal propagation of these fields, ie they don't vibrate perpendicular to the direction of propagation, but vibrate horizontally. But there are so many different types of subtle energies; the author prefers to use the term non-classical EM energies.

Only classical EM fields obey the basic laws of physics as laid out in Maxwell's equations (not to be confused with Maxwell's hammer). Subtle energies, like those used in Radionics, do not obey Maxwell's equations, but instead are described by the Schrodinger equation which is used to describe quantum fields. This, of course, indicates the radionic fields also have quantum properties, like travelling faster than the speed of light.

The effects of subtle energies on water, like longitudinal scalar waves, have been studied by the author in terms of their efficacy to imprint water. In this case the changes in the electrical properties (e.g. conductivity) of water were measured after treatment with different types of fields.

Although EM and longitudinal scalar waves have about the same effect on water, when the two fields are used together, their efficacy doubles. Actually, the results are even more complicated because different types of classical and non-classical energy fields had different effect on water, some act faster, some last longer and some don't appear to have any effect on water.

So now have at least two ways of imprinting water with information to make infoceuticals. One involves imprinting specific frequencies, associated with healing or associated with specific chemicals and the other is to imprint the entire essence of a chemical or an herb into the water. The later method was originally used by Benveniste and is currently being used by Russian scientists to create infoceuticals.

In fact it was the Russians who coined the name for this new field - informational pharmacology. This means we don't use the pharmaceutical drugs, but we use the information of the drug. This information can be transferred from the chemical or herb directly into a computer software program which stores the chemical information like it stores digital information.

The information signatures of several drugs are available for free on the internet. The Russian company doing this research calls these signatures informational copies. All you have to do is download them onto your computer and then then play them back. The information can then be transferred to a blank CD disk. Water placed on top of such an imprinted disk will absorb and remember the information on the disk. Thus, you can create your own infoceuticals relatively easily. Drinking the water is one method to consume the information of the chemical. Although we don't know how long it stays in the water, if you drink it right away you will get the benefits.

The Russian based company offering informational copies of drugs online for free, has also done some biological research indicating that biological systems can read the information on the disks and respond to them accordingly. Similar experiments have been done with the water treated with the informational copies. Someday we won't need to transfer the information on the computer to CD's or to water, but we will be able to sit in front of our computer and bathe in the healing energies associated with specific drugs or herbs.

Perhaps someday we will be able to treat ourselves even as the harmful energies of from our computers are being neutralized by the healing energies of the information copies. Although, so far, only pharmaceutical drugs have been tested, there is no reason we can't use the same technology for recreational drugs. That someday is not far off - check out their website at [www.bodyfreq.com](http://www.bodyfreq.com).

## **An Analysis of GT6**

by Nick Franks

July 20, 2020

### **ORIGINS**

Once again we find a concept originating with the Radionics master Malcolm Rae (1913 - 1979). From somewhere I obtained an article by the late Margaret Belsham, a close colleague of Rae, which I have put up on my website.<sup>3</sup> This article, amongst other things, describes how Rae originated and developed his concept of the GROUP TREATMENT. To set the scene I quote from this article at length:

“For our researches we assumed that immediately after a patient had received the correct Radionic treatment he was 100% in balance. We then measured the rate of decline from 100% which in most cases was very rapid. Malcolm then thought that if a treatment could be given on a regular basis which would consolidate the individual treatments being given to patients, this would reduce the rate of fall away from the theoretic 100%.

The first Group Treatment card was produced with the intention of treating, Radionically, all detrimental constitutional predispositions (diatheses). We connected a large circular brass disc to a Simulator<sup>4</sup> and Interrupter<sup>5</sup> and placed all our patients' witnesses on the brass disk and projected this card to them every fourth hour. (Malcolm had established radiesthetically that the interval of timing of this projection was extremely important and that every fourth hour was optimum). However, we soon found out that by this method, the patient who had the most energy received all the benefit from this projection and the less energetic got weaker, and we realised that each patient has to have his own moment in space and time when receiving a Radionic projection. Each patient's witness had to be completely isolated when receiving treatment and in order to achieve this a 35mm automatic slide projector<sup>6</sup>, using a circular cassette of slides, was used with the lens being replaced with a brass disc fixed to the end nearest the slides when in the projecting position. The patient's witness was placed in a conventional 35mm slide holder keeping them unconnected with any other patient's witness in the cassette. The Group Treatment card was used in a separate instrument which controlled the operation of the projector in the desired four-hour cycle.

This proved most satisfactory in its Radionic performance but being mechanical it suffered in time from wear and tear with repair becoming increasingly difficult. Eventually, a suitable supply at an economical price became impossible and we had to replace it with a more reliable system. We now have a fully electronic instrument which overcame all these difficulties.

---

<sup>3</sup>. [www.radionics.co.uk](http://www.radionics.co.uk), in the section RADIONIC INSTRUMENTS

<sup>4</sup>. Rae's primary treatment instrument - see photo on my Rae webpage or below.

<sup>5</sup>. Used during treatment. A simple electronic device (a relay) connected to the Simulator which switched the Radionic treatment on - off more or less rapidly (adjustable) in order to stimulate the patient's response.

<sup>6</sup>. In the age when film cameras were the norm colour slides (transparencies) suitable for projection on to a screen were commonplace. Rae appears to have ingeniously adapted a slide projector for the purpose of giving General Treatments.

Over the next 7 years the concept of the G.T. card was extended and I give below some of the additions which were added to and built into the evolving G.T. card:-

- Total symptoms due to adaptation throughout the entity to improvements in health
- Total symptoms due to adaptation throughout the entity to deterioration in health
- Autogenerated allergies - Misalignment with Vivaxis<sup>7</sup>
- Freedom from all unacceptable sensation, real and imagined
- Current and residual detrimental effects throughout structure, reserve structure and functioning throughout the entire entity
- Resistance against being cured of disease
- Resistance against being healthy
- Fatigue
- Exhaustion
- Weariness
- Consciously and subconsciously believed need for the disease
- Reasons preventing, delaying, limiting and rendering only temporary, the curing of all disease and the establishment and maintenance of perfect health
- All functional and structural detrimental effects of....(he would incorporate such disorders as asthma, measles and other common disorders).

From these few examples I believe you will understand Malcolm's "thinking" behind the Group Treatment card. Of course each patient will need individual treatments as well as receiving regular Radionic projections of the Group Treatment Card.

During the years 1969 to 1977 when Malcolm had his Radionic Practice he continued to research and develop instrumentation and Simulator cards as he believed it was necessary to keep a balance between theory and practice. Other models of Simulators were produced and the repertoire of Simulator cards was increased. I know Malcolm intended to write a book on his researches and understanding regarding Radionics, but sadly he died before he could write it."

Kodak slide projector with the slide carousel on top and the lens at the front left. For illustration only. The device Rae used was probably not this one.

## GROUP TREATMENT BECOMES GENERAL TREATMENT

I mulled over Rae's Group Treatment concept for some years. With the development and evolution of my own instruments - mostly notably LRI-ULTRA - it appeared to me that giving such treatments might become not only

<sup>7</sup>. I found this definition of the word Vivaxis on amazon for the book *The Vivaxis Connection* by Judy Jacka. 'The Vivaxis is your life axis, your energy "umbilical cord" to the planet. It is the place where you plug into the Earth and its life-supporting energies. Discovered by Canadian researcher Fran Nixon in the 1960's, the Vivaxis connection is fundamental to human life and health. It sustains and renews and affects every aspect of our lives - it even affects how we digest food and resist illness. This unsuspected link between our body and a particular spot on the Earth can make all the difference between health and illness, says Dr. Judy Jacka, the world's leading authority on the new science of Vivaxis. But your Vivaxis connection can be harmed, polluted or distorted. It can be damaged by chemicals, electromagnetic fields, even lightning. A disturbed Vivaxis connection can make you ill, but restored and vibrant, your Vivaxis connection can keep you healthy.'

possible (given the number of components in the treatment) but also useful. However, since LRI-ULTRA has massive capacity in terms of both patient handling and application of treatments to large numbers of patients, a different approach seemed feasible. Rae's idea is to support many patients against multiple detrimental general background Factors using what appears to be a 'one size fits all' approach; this while leaving room for individualised, or specific, treatments to be applied as the practitioner determines through his or her own efforts. My idea was to create a range of general treatments which handle the background to problems in various different regions of the human subtle and parapsychical anatomies. These, in addition to individualised treatments determined by the practitioner, could then be applied as needed. As usual the road has been long and I am not there yet. You will note Margaret Belsham's comment 'over the next 7 years'. Although I would typically like to complete everything yesterday, preferably even the day before yesterday, I cannot really differ from this indication of just how long things can take.

At the moment some ten General Treatments are under development. I feel confident in presenting GT6 here, which is concerned with Nutrition & Absorption. GT6 was originated on 17.9.2018 so it is a relatively recent addition. I will first present the details of the Therapeutic Commands used in GT6 and then append a micro-Atlas of Rates which may be useable by those who do not have the LRI-ULTRA instrument.

**GT6 NUTRITION & ABSORPTION** includes the following therapeutic commands:

1. Correct Assimilation of All Nutrients
2. Correct Transport of All Nutrients
3. Correct Absorption of All Nutrients
4. Correct Utilization of All Nutrients
5. Elimination of All Vitamin, Mineral, Enzyme and Micro-Nutrient Deficiencies
6. Hormone Linkage to Digestive Processes - All Aspects
7. Hormone Linkage to Appetite Control - All Aspects
8. Hormone Linkage to Blood Sugar Regulation - All Aspects
9. Digestive Enzymes - Normalization
10. Gut Dysbiosis - Elimination and Repair
11. Colon Function - Normalize All Aspects & Normalize To Field Matrix
12. Metabolic Processes - Normalization to Field Matrices
13. Coordination of Ensemble of Pancreatic, Liver and Gall Bladder Processes
14. Interface between Digestive Tract and Cellular Reproductive Systems
15. Interface between Small Intestine and Cellular Reproductive Systems
16. Interface between Digestive Tract and Cellular Energetic Systems
17. Interface between Small Intestine and Cellular Energetic Systems
18. Gut Biome and Microbiome - Normalize To Individual Template
19. Gut Biome and Microbiome - Normalize To Group Template
20. Gut Biome and Microbiome - Normalize To Human Template
21. Mouth & Teeth - Normalize All Aspects & Normalize To Field Matrix
22. Larynx & Trachea - Normalize All Aspects & Normalize To Field Matrix
23. Stomach & Esophagus - Normalize All Aspects & Normalize To Field Matrix
24. Small Intestine - Normalize & Normalize To Field Matrix
25. Digestive Tract - Valves & Sphincters - Normalize All Aspects & Normalize To Field Matrix
26. Appendix - Cleanse & Normalize
27. Colon - Normalize All Aspects & Normalize To Field Matrix

The above list should be apparent as to its meaning but just a few definitions might be in order:

By NORMALIZE I mean 'to make function normally'. For example the various organs of the body all have typical operational parameters and many of these are defined by and often used as standard tests by orthodox medicine. In short, using conventional yardsticks: make organ, tissues, cells, etc function normally.

By NORMALIZE TO FIELD MATRIX we enter rather more esoteric territory. Here I mean 'conform to archetypal pattern', typically, that which is found in the human Etheric Body and related fields. By the same measure this broadly applies to the animal and vegetable kingdoms.<sup>8</sup>

By TEMPLATE (numbers 16 to 18) I mean a lower subdivision of FIELD MATRIX. Here I refer to a pattern specific to, respectively, humans as individuals (16); as a group (for example racial or ethnic characteristics<sup>9</sup>) (17); and humans (as opposed to animals) (18). Obviously some of these boundaries might have a very wide threshold of applicability given the worldwide change in diet, notably due to the processed foods which are apparently destroying us all with diabetes, obesity, heart disease and related pathologies.

Numbers 11 and 25 may seem very similar but one refers to Colon function and the other refers to Colon structure.

## USING GT6

GT6 is primarily intended for use with my LRI-ULTRA instrument, which itself does not use Rates, cards, codes etc. The actions possible with the instrument are programmed into a substantial and expanding field which contains many tens of thousands of Locations, Factors, Treatments etc. The witnesses of many patients can also be stored in the LRI field for present or future use.

The instrument itself - the black box - is, in effect, a communications unit which gives the user a rock-solid connection to the LRI field. Bhattacharyya in *Teletherapy* informs us that "name and form are the same thing", which I think means that 'things' are inseparable from the names we humans give them. Thus instead of using Rates or other Radionic codes I have transferred the whole process into the field, allowing us to address and use instrument via normal language.<sup>10</sup> LRI responses are read by pendulum movements which are interpreted via the means of Charts which display the basic internal structure and parameters (Location, Factor, Treatments, etc.) of the LRI field. These Charts have also been translated into various languages. LRI-ULTRA is simply addressed in your own language e.g. English, Chinese, Dutch, French, Italian, Japanese, Portuguese, and so on, using mentally-given instructions. In short you think to it - although you can of course speak to it if you wish - the process is basically the same since thought, hopefully, comes before speech in the order of things.

If pendulum analysis indicated that a patient required treatment with GT6, the user would a) take a percentage reading (with the pendulum) indicating how much GT6 was needed, and would then b) simply ask LRI-ULTRA to apply GT6 to patient X until such as time as the treatment was completed. The reading should decrease in the normal way until the process is complete. If a number of patients required the GT6 treatment, the practitioner would simply ask LRI-ULTRA to give treatment GT6 to patients 1 through N. There is no need for multiple instruments, slide projectors, etc. - LRI-ULTRA allows the user to make and apply large-scale analysis and treatment - relatively easily.

I emphasize that using GT6 with LRI-ULTRA would tend to be more effective than using Rates, for two reasons. In first place, uninhibited by the limitations of Rates, LRI can give a more detailed

---

<sup>8</sup>. If I recall correctly Alice Bailey informs us that 'the physical body is not a principle', which I take to mean that the physical body is passive, a creation, the result of impression by the etheric body and related fields to produce the physical body in all respects. Comments to this effect can be found, I think, in *Esoteric Healing* and *A Treatise on Cosmic Fire*.

<sup>9</sup>. For example lactose intolerance is considered to be fairly widespread in China. My understanding is that milk and dairy were not often found in the Chinese diet over the millennia and hence it is a relatively new food to which the gut biome is not yet well-accustomed or well adapted - so the Taiwanese wife of a friend of mine informs me.

<sup>10</sup>. You may rightly presume that I have done an enormous amount of 'programming' work over the last 16 years to bring the LRI field up to its current capability.

version of all the vibrational characteristics required to accurately represent the various commands. Secondly, LRI-ULTRA can sequence and apply the treatments (timing, potency etc) in accordance with the patient's needs.<sup>11</sup>

Note that GT6 is intended as a general background support treatment. It is not a replacement for more specific treatments for Gastro-Intestinal pathologies such as Crohn's disease, Cancers, infections, Ulcerative Colitis, etc.

## USING GT6 WITH OTHER INSTRUMENTS

Clearly, with 27 elements in the complete set, GT6 is quite an extensive treatment. It would be a lengthy process to administer all 27 elements as Rates with a standard dial instrument. Each of the 27 Rates would need to be set up in turn, the treatment given, the next treatment entered, given, and so on - quite time-consuming and tedious. An alternative is to create a single Rate which attempts to describe the whole treatment - see in the list below. However, as I see it, doing this greatly reduces the efficiency of the treatment; and with 29 numbers in the single Rate, it would be difficult to find an instrument which could handle this. Nevertheless, since GT6 is comprised of 27 separate treatments, it would also be possible to use only those which are needed. These can be extracted from the list or Atlas of Rates provided here.

Rae's solution was to create a group treatment card which represents all the components of the treatment. Presumably Rae had one of his Simulator instruments feeding the Radionic 'signal' to the brass disk in the projector unit. This card apparently subsumes all the treatments set out by Margaret Belsham in the text above. Here it is, along with Rae's contact details:

## MICRO-ATLAS OF RATES

Here the number 10 (ten) is shown as .10. Gaps where placed in Rates are split points. If the Rates are used in written form (for example with my MRI instrument) then the gaps can be used to split up the Rate over one or more lines; otherwise these Rates should not be used with other gaps or arbitrarily-inserted spaces.

<sup>11</sup>. Earlier in my Radionic career (25 years this year) I spent quite some years manually adjusting timing, potency, stop-start, treatment changes etc using multiples of my (card based) ANT instruments. This process went on day and night to continually and best align the treatments with the patient's needs. This in fact rather tedious process goes out of the window with LRI-ULTRA, which does it all for you.

## **Is 5G Implicated in the Covid-19 Pandemic as a Possible Co-Factor?**

by Beverly Rubik, Ph.D. Institute for Frontier Science  
July 21, 2020

5G (the fifth generation of wireless technology) is designed to enable the Internet of Things (IoT) along with a range of new technologies, such as autonomous driving, virtual reality, and augmented reality. To provide the enormous bandwidth and capacity needed for these functions, much higher frequencies are required, ranging from 600MHz to 90GHz, adding lower and higher frequency slices of the electromagnetic spectrum to the existing 3G and 4G bands. The desired high data rates can only be practically achieved using the millimeter wave part of the 5G spectrum above 24GHz.

Since such high frequencies are readily absorbed by building materials, foliage and even heavy rain, the 5G network requires an unprecedented densification of antennas to ideally have at least one transceiver (transmitter and receiver) no further than 1,000 feet (305m) from a user. Essentially, a line-of-sight is required between a 5G antenna and a user. To reduce interference and increase network capacity, massive MIMO (multiple in - multiple out) architecture is implemented, necessitating beam collimation and rapid beam steering. To properly direct a collimated beam the 5G network must know the exact geo-location of the user. The mobile millimeter wave 5G network is not a stand-alone network. It relies on densification of the existing 4G network for uninterrupted service and to provide exact geo-location of a user device.

Thus, 5G will be added to existing networks but not replace them, while 4G will be augmented. All of this means that considerably more microwave and new millimeter wave radiation will be added to our present wireless radiation exposure.

The Covid-19 pandemic arose shortly after 5G was installed in various locations around the world, with some 5G antennas, and in space, with some 5G satellites that were launched to lower earth orbit. Here we explore the possible relationship of the 5G rollout to the pandemic.

### **RESULTS OF INVESTIGATION**

**1. FACT:** Wuhan, China, where the pandemic began, is also considered to be the initial site of the most intense implementation of 5G wireless technology on earth. 5G went live in Wuhan on October 31, 2019, shortly before the pandemic began. *This indicates a possible correlation, not necessarily a causation, between the pandemic and 5G.*

2. **FACT:** This was followed by the disease outbreak in other sites where 5G had been implemented on the land to a lesser degree: South Korea, Northern Italy, New York City, etc. *This indicates another possible correlation between the pandemic and 5G.*
3. **FACT:** Some of the 42,000 planned 5G satellites have already been launched since 2019, and some may already be operational, irradiating the earth with 5G frequencies. This would imply that the entire earth, to some extent, is receiving 5G frequencies from space, even though full terrestrial 5G coverage has not yet been attained. Alongside this, the Covid-19 pandemic has been spreading worldwide, even in countries where no 5G antennas have been installed, such as in Africa. *This indicates a possible correlation between the proliferation of 5G frequencies broadcast from space and the pandemic.*
4. **FACT:** Historically other viral pandemics correlated with the widespread proliferation of a new electromagnetic technology. See the Table below. *This indicates another possible correlation between the proliferation of 5G and the pandemic.*

<u>Year</u>	<u>Technology Proliferation</u>	<u>Pandemic</u>	<u>Cases</u>	<u>Deaths</u>
1890	Electric power lines	Russian flu		1 M
1918	Powerful radio stations	Spanish flu, H1N1	500 M*	50 M
1957	Powerful radar stations	Asian flu, H2N2		2 M
1968	Military satellites	Hong Kong flu, H3N2		3 - 4 M
2019	5G antennas, stations, & satellites	Covid-19	1.35 M**	74,769**

\*1/3 of world's population; M=million

\*\*Statistics as of April 6, 2020

5. **FACT:** Numerous studies indicate that exposure to radiofrequencies disrupts the immune system. Disrupting the immune system can mean either increased activity or decreased activity (suppressed immune function). Hyper-reactivity of the immune system can result in tissue damage and organ stress. This includes the possibility of cytokine storms, for example, which are believed to be involved in serious cases of Covid-19 disease. Suppression of the immune system can result in more infections and more chronic illness. Numerous studies showing disruptions from radiofrequency exposure of the immune system are shown in the reference section of this article.
- This indicates that 5G could disrupt the immune system, possibly to increase susceptibility of infection and also to cause excessive immune reactions including cytokine storms with Covid-19.
6. **FACT:** Human exposure to radiowave frequencies causes a large variety of unhealthy effects including inflammation and pathological changes. These are considered in part due to changes in cell membrane permeability (porosity), allowing more calcium to enter the cells, which leads to cellular calcium overload. Since intracellular calcium is an important regulator that controls numerous functions, this leads to many biological and health effects, including an increase in oxidative stress, sperm and testicular damage, central nervous system changes, cardiac changes, endocrine changes, changes in programmed cell death (apoptosis), red blood cell damage, and more. This also includes the release of peroxynitrites, chemicals that cause biochemical inflammation and further tissue damage. *Taken collectively, a large number of studies from around the world show that there are a wide variety of unhealthy effects on humans from microwaves, including red blood cell damage and other pathological changes.*

7. **HYPOTHESIS AND MEDICAL OBSERVATIONS:** Pandemic patients are apparently not suffering from viral pneumonia, but from the inability to absorb and carry oxygen in the blood. They have oxygen deprivation. *This suggests that although patients are suffering and dying from lack of oxygen, this disease is not conventional pneumonia.*
8. **HYPOTHESIS AND MEDICAL OBSERVATIONS:** The disease apparently involves destruction of hemoglobin molecules in red blood cells, dissociating the iron and destroying hemoglobin's oxygen-carrying capacity, resulting in oxygen deprivation in patients. *This suggests that Covid-19 patients are suffering from lack of oxygen due to destruction of hemoglobin, the molecule in red blood cells that binds and transports oxygen in the body.*
9. **FACT:** Exposure to microwaves can be disruptive to blood parameters. Mice exposed to 10 GHz microwaves for 30 days, 2 hours/day, showed a decline in hemoglobin and red blood cells as well as pathological changes in the red blood cells. Mice are the standard model system for predicting biological effects on humans. *This shows that 10 GHz radiation causes loss of hemoglobin, reduced number of red blood cells, and other pathological changes in red blood cells of mice.*
10. **FACT:** Studies show that wireless radiation from devices cause rouleaux formation in the blood, where the red blood cells clump together like a stack of coins. Moreover, the clumping of red blood cells severely compromises microcapillary blood flow because these cells must pass in single file through the tiniest vessels. And since 85% of the body's tissue depends on capillary blood flow, it is plausible that most tissues will be starved for oxygen and nutrients while metabolites and toxins cannot efficiently be removed. *This is evidence for a possible role of wireless radiation in the pandemic in that microcirculation is compromised, which would make oxygen uptake and delivery to tissues difficult and could lead to oxygen deprivation.*
11. **MEDICAL OBSERVATIONS:** Numerous Doctors (Dr. Dietrich Klinghardt, Dr. Vladimir Zelenko, among others) are using anti-malaria drugs to treat Covid-19 patients with some success. President Trump has said publicly that this should be the treatment of choice and has authorized stockpiles of the drugs. These drugs include hydroxychloroquine among others. By comparison, malaria is a disease in which a parasite enters red blood cells and destroys hemoglobin. Anti-malaria drugs work to prevent this destruction. This suggests that these drugs work in a similar way to prevent Covid-19 attack on hemoglobin. *This is further evidence that destruction of hemoglobin is occurring in the Covid-19 disease.*
12. **SPECULATION:** 60 GHz of 5G affects the oxygen molecules in air, which has been a proposed cause of the pandemic. Some sources claim that the 5G frequency of 60GHz, which is strongly absorbed by the oxygen molecule, changes the molecule's valence electrons such that it cannot be absorbed by the hemoglobin in the blood cells, and the target person suffers hypoxia. However, we found no scientific studies supporting this claim.
13. **SPECULATION:** 5G exposure may lead to Brillouin precursors deeper in the body that may cause cell membranes to open up and allow microbes such as viruses to penetrate and infect. It was found that the phased arrays of 5G emit very fast pulses, and these fast pulses generate so-called Brillouin precursors when impinging on tissue that allow electromagnetic energy to penetrate much deeper into the body than predicted by conventional models. According to Professor Kurt Oughstun at the University of Vermont, "A single Brillouin precursor can open small channels through the cell membrane because, as it passes through the membrane, it can induce a significant change in electrostatic potential across that membrane." This effect is known as "electroporation."

## CONCLUSION

We find indirect evidence that 5G may be involved in the pandemic as a causal factor. We suspect that Covid-19 involves oxygen deprivation brought on by viral attack on the hemoglobin in red blood cells. 4G and 5G can also cause unhealthy changes in the blood according to the scientific and health literatures. We maintain that 5G can possibly exacerbate the virulence of Covid-19 by: (1) disrupting the immune system; (2) disrupting oxygen uptake and transport by the hemoglobin in red blood cells; and (3) by disrupting the integrity of cell membranes to allow the virus to enter and infect cells more readily.

It must be said that our collective knowledge of this particular pandemic and its causal factors has only just begun. As time passes we will learn more, and perhaps then we can ascertain more clearly the role of wireless radiation.

Pandemics are rarely due to singular causes; there are typically multiple factors that underlie them according to epidemiology. At the biological level, there is the germ (virus), and then there is the “terrain”, the soil of the body. Louis Pasteur, who gave us the Germ Theory, is reputed to have said on his deathbed, “The germ is nothing, the terrain is everything.” Yet conventional medicine is focused almost entirely on the germ! It is not addressing the multiple factors that underlie a pandemic as they should.

Treatment of this widespread disease and mitigation of the pandemic require that we pay close attention to all of the underlying factors and alleviate them at all levels. Our evaluation leads us to apply the precautionary principle: we recommend an immediate worldwide moratorium on 5G.

## Friends We've Lost

### Phyllis Kathleen Ann Pinkous Weiland 1944-2019

Editor's note: Phyllis was a much loved and longtime volunteer for USPA. She helped with our conferences for many years and helped drag us into the computer age. She had boundless energy, immense patience – I know; I tried it on occasion- and she was truly remarkable. In the space of an hour she could be a problem solver, form creator, sympathetic shoulder, referee, and cheerleader for anyone who needed support. She was one of the most genuine people I have ever had the good fortune to count among my friends. I will miss her the rest of my days. *G.R.*

Phyllis was born December 5, 1944 to Cecil Pinkous and Maria Stephani. She died March 9, 2019. She is survived by her 4 children, John Weiland, Tim (Toni Meder) Weiland, Andy (Amy) Weiland and Jennifer (Jeff) Schaffer, as well as 7 grandchildren, 9 siblings and many, many nieces and nephews.

She was known by many names and wore many hats, Tiny, Phyllis, daughter, mom, sister, grandma, friend, teacher, guide, or healer. We knew her as mom, but watched her help or take in all who needed help. She gave all of herself to the very end to heal, guide or just sit with you and hold your hand. She had a way of seeing you without judgement. She accepted you unconditionally. She looked to her insights and always had something to guide you.

She had religion and spirituality and saw them as interchangeable. Phyllis had many careers along her path. The one she loved the most was taking care of children. She loved and cared for them for most of her life. We grew up in her day care and watched her continue caring for children until she was 73. She dabbled in the corporate world for a few years, but soon returned to caring for children. Mom enjoyed sewing, wood working, crafts, meditation, and many other things. She participated in many groups, most of which helped her grow as a teacher or mentor.

Despite her busy schedule of caring for children she found a way of making time for her second love, and that was her spirituality. The list of people she helped throughout her life is equal only to the number of children she has cared for.

No matter how you knew Phyllis, you loved her. She will be missed.

### Dr. G. Patrick Flanagan 1944 - 2019

Dr. G. Patrick Flanagan, inventor of the Neurophone, MegaHydrate and Crystal Energy, died at Age 75. Revered for his life and inventions, Dr. Flanagan was treasured for his generosity and kindness and was an international icon in the New Age community.

Author of the 1973 best seller book Pyramid Power, he is considered a 'Father of the New Age' movement through his health and wellness inventions. His early work with Henri Coanda led him to breakthroughs in hydration that helped countless people.

Aged 75, he died December 19, 2019 in his home in Loja province Ecuador after battling complications from a fall and three years of dealing with a disabling stroke that occurred in 2016.

## **Section IV - Our Sponsors**

### **USPA Generous Donor Recognition Page**

The USPA would like to give special recognition on a continuing basis to people who have made generous donations to the United States Psychotronics Association.

This special “USPA Generous Donors Recognition Page” will be carried in each issue of the USPA Journal & Newsletter,

New names will be added as other generous donations are received.

The USPA wishes to recognize the following individuals and extend our gratitude for their generosity: (in alphabetical order):

George B. Alder, II  
Scott Beutlich  
Mary Hardy (Temple of Sakkara)  
Clement Jewel  
Ed Kelly (Kelly Research Technologies)  
Michael Leger (Homeodynamics, LLC)  
John H. Reed, M.D.  
William Reeves (William Reeves Design)  
Arnold Reinhold  
Eric Rowley  
Daniel Taylor

To make a tax deductible donation to the United States Psychotronics Association (USPA) online, please go to the

[\*\*USPA Donations Page\*\*](#)

and use your credit card, debit card, or PayPal.

For those who wish to make a donation by check, please make your check payable to “USPA” and mail it to

USPA Treasurer, Scott Beutlich,  
525 Juanita Vista, Crystal Lake, IL 60014

*~ With Our Thanks! ~*

## Section V – Classifieds

**If you have any “related items” to sell**, (books, radionic machines, etc.) we charge 20 cents per word, 20.00 per half page with supplied artwork or photos or 35.00 per whole page. Your paid ad will run in the next three issues of the newsletter, or until you let us know your item is no longer for sale.

**If you would like to publicize an event for a non-profit organization**, USPA will advertise for you up to 750 words free. We ask for mutual links to our website from yours.

**If you would like to publicize a “for profit” event**, USPA will charge standard advertising rates. Please contact Scott Beutlich at [uspsychotronics@gmail.com](mailto:uspsychotronics@gmail.com). to discuss this well ahead of time.

(We will have a disclaimer on the page saying that USPA is not responsible for the content or condition of items sold from this newsletter, nor does it back any treatment, modality or veracity of presentation. It does not back any claim of medical efficacy of machines or treatments. USPA will not recommend specific radionic practitioners, or offer radionic treatments from its board or officers.

### J.G. Gallimore’s Five Rare Books Are Now Available for Sale!!

Jerry G. Gallimore was one of the founders of the USPA in 1975, and was a leading researcher in psychotronics and unusual energies until his untimely death in 1989.

All five of J.G. Gallimore’s rare books on psychotronics subjects and unusual energies have been reprinted by the United States Psychotronics Association (USPA) and are being made available at a fraction of the cost that used copies were being sold at online.

So rare have these books been, that only a few libraries in the entire world had them in their collections, and some original Gallimore’s books were being sold for several hundred dollars each online. However, with these newly reprinted volumes, each will be available for less than \$30.00. All are: [Available at Amazon.com](http://Available at Amazon.com)

<b>The Handbook of Unusual Energies: Volume 1 of Handbook of Unusual Energies</b>	ISBN-10: 1543024998 ISBN-13: 978-1543024999	The first book of three volumes on unusual energies	468 Pages
<p>Gallimore discusses in depth the research, discoveries, and inventions of all the major researchers in subtle energies, the aether, biological 62 fields, pyramid energy, radiesthesia, radionics, crystal transduction, and related subjects.</p> <p>These include the works of Baron Von Reichenbach's and his odic energy, Dr. Wilhelm Reich's orgone energy, Dr. Harold Burr's biological life fields, Kozyrev's time mirror, Edgar Cayce's transmission of energy, and related research done by many others.</p> <p>Of particular importance is Gallimore's 127 page chapter on radionics. In this chapter he discusses in depth the research and devices of Ruth Drown, T. Galen Hieronymus, Rho Sigma, Dr. L. P. Corte and other prominent people in the radionics field.</p>			
<b>Collected Properties &amp; Writings of J. G. Gallimore: Volume 2</b>	ISBN-10: 1543025048 ISBN-13: 978-1543025040	The second book of three volumes on unusual energies	258 Pages
<p>This is the second book in the “Unusual Energies” series that J.G. Gallimore published. It covers Gallimore's research on Albert Abrams, the founder of modern radionics, psychological physics, psychic energy, thought resonance, subtle energies, crystals, and related subjects.</p>			

In addition, a number of radionics devices are discussed, such as the De La Warr Diagnostic Instrument. And very helpfully, the rates are provided for substances, body organs, and medical diseases and disorders. I very interesting interview of Christopher Bird, conducted by J.G. Gallimore is provided, as well as a discussion of Walter Russell and his research

<b>Relationship Between Parapsychology and Gravity: Volume 3</b>	ISBN-10: 1543024947 ISBN-13: 978-1543024944	The third book of three volumes on unusual energies	228 Pages
--	--	---	--------------

This book describes in depth the research and theories of J.G. Gallimore into the question of "parapsychology transmission" -the question of how such things as telepathy, remote viewing, ESP, and similar phenomena can physically occur.

He discusses the various emanations, radiations, and energy fields of all matter and life including the ancient Chinese energy called "chi" (qi), the ancient Indian's prana energy, Reichenback's "odic force," Gurwitsch's "mitogenic radiation," Wilhelm Reich's orgone energy, and other subtle energies. He shows how all of these energies are similar, how they interact, and how they are related to gravity.

He also discusses crystals as transducers of these energies, and provides diagrams of devices that could potentially be used to harness or control these energies.

<b>Transverse Paraphysics: The New Science of Space, Time, and Gravity Control</b>	ISBN-10: 1543024920 ISBN-13: 978-1543024920		374 Pages
--	--	--	--------------

This book covers the visionary research and theories developed by J.G. Gallimore about anti-gravity, space, time, and biophysics.

He discusses in depth the dimensions of space, time, and gravity, and new discoveries in each of these areas. In addition, he covers research being done on anti-gravity and then discusses anti-gravity patents that have been obtained.

He also discusses the intriguing concept of aura energy fields surrounding humans and other living things, and how extra-sensory perception (ESP) might be explained through biophysical principles.

<b>Unified Field Theory Research Book: Using Subjective Response to Psi-Plasma for Analysis of Properties Neutral Charge Plasma Fields</b>	ISBN-10: 1543024831 ISBN-13: 978-1543024838		134 Pages
--	--	--	--------------

This book is about psychotronics, radionics, electromagnetic fields and waves, psi-plasma, plasma fields, subtle energies, bio-electromagnetic energy, and other unusual energies emitted by living and non-living things. It also is about how living things interact with and are affected by these energies, which may enhance health or harm health.

The book covers the research of Wilhelm Reich on Orgone energy, of Baron Reichenback on the odic forces, as well as research done by Cazzamalli on brain radiations and Lakhovsky on using high

frequency radiations to successfully treat cancer in humans. In addition, Lakhovsky used similar methods to enhance the growth of plants. Gallimore shows how these energies, forces, and fields are all inter-related and provides hypotheses and ideas on their possible unification.
