Section I - What's Happening SOON:

August 13, 2022, Jerry Gin presents USPA Masterclass # 32
Science, Subtle Energies and Spirituality: A Path to I AM

Click [HERE](#) to reserve
your **FREE** spot!

In this presentation, we learn about these subtle vibrational energies, how to detect and measure them and how our thoughts interact with them. The energies listen to our thoughts. We can move them, even copy them. The energies can be used to structure water.

Jerry Gin has spent more than 50 years in the pharmaceutical, diagnostic, laboratory medicine, and biotechnology industries (founded ChemTrak, Oculex Pharmaceuticals, Livionex, Nuvora, and Visionex).

Through experiments with magnets and GANS (Gas in Nano State), we learn more about the nature of the energies and the nature of matter

His passionate interests have been in the areas of mind-being, consciousness, and the nature of reality. Jerry is Chairman/CEO of the Foundation for Mind-Being Research (<https://FMBR.org>); author of *The Seeker and The Teacher of Light* and Science, Subtle Energies, and Spirituality: A Path to I AM.

Section III - USPA Free Masterclass #31

8-13-2022 USPA Masterclass # 3: Jerry Gin

This Masterclass will focus on: Science and Subtle Energies – A Path to I AM and Introducing a New Powerful Subtle Vibrational Energy

Subtle vibrational energies are ubiquitous. As with the electromagnetic spectrum which can be characterized using wavelengths, there is a subtle vibrational energy spectrum which can be characterized by wavelength as detected by resonance. The science of detection and measurement is reproducible. Detection is dependent on the observer. This is analogous to quantum physics where the observer is integral to whether a particle or a wave is seen in the famous double slit experiment.

In this presentation, we learn about these subtle vibrational energies, how to detect and measure them and how our thoughts interact with them. The energies listen to our thoughts. We can move them, even copy them. The energies can be used to structure water. Through experiments with magnets and GANS (Gas in Nano State), we learn more about the nature of the energies and the nature of matter.

It turns out the most powerful subtle vibrational energy can be generated by I AM. We will learn how to generate this energy. We will also learn how our own vibrational energy level increases when we realize our I AM essence level. We can detect and see our vibrational level increase and we can experience the center of stillness with Affirmations which bring us to our I AM essence.

About Jerry Gin

Jerry Gin has spent more than 50 years in the pharmaceutical, diagnostic, laboratory medicine, and biotechnology industries (founded ChemTrak, Oculex Pharmaceuticals, Livionex, Nuvora, and Visionex). Section IV - In Case You missed it:

Masterclass # 31: - Pineal Stimulation for Higher Health and Consciousness

- Ellen's Masterclass chat will be posted later in this newsletter.
- Ellen's Masterclass pdf. is now in member section of the website.

What this Masterclass focused on:

The Pineal gland is both a spiritual and physical doorway to the divine. It is the source and regulator of a wide array of cosmic and chemical messengers that transverse the universe of Darkness and Light.

The Pineal is an erectile organ, which expands consciousness, while it regulates sleep, sexual and circadian cycles. Physical and spiritual outpourings of sacred fluids, such as melatonin, pinoline, psychoactive DMT, and meditative Divine Nectar are attributed to its mysterious actions, which support lucidity and the evolution of thought forms into physical manifestations.

In this session Ellen Kamhi PhD RN, The Natural Nurse, www.naturalnurse.com, will review the physical and spiritual aspects of the holy grail pineal gland, and how to decalcify and activate its actions via the use of specific foods, herbs, dowsing and radionics techniques.

About Ellen Kamhi

Ellen Kamhi, PhD, RN, AHG (RH), AHN-BC is a leader in the herbal nutraceutical industry, recognized as a consultant specializing in regulatory issues, formulation and product education. She is a professional member of the American Herbalist Guild (AHG), nationally board certified as a holistic nurse (AHN-BC), and is a medical school instructor in botanical pharmacology, and author of many books. She offers online/on ground CE approved Herbal Certification Programs and www.EcotoursForCures.com to experience shamanic healing traditions in indigenous areas of the world. Ellen is a wild-crafting intuitive herbalist, and is adept at radionics and dowsing.

She is on the Peer Review Editorial Board of several journals/organizations, including: Alternative Therapies in Health and Medicine, Natural Medicine Journal, Natural Standard Database. Dr. Kamhi educates professionals and consumers about how to care for themselves Naturally! Her blog is recognized by Newsmax among the Top 100 Health Blogs in the country.

Her passions include sharing her 5 decades of in depth herbal and nutritional knowledge with individuals who will carry natural healing arts forward into the next millennium.

Find more about Ellen at www.naturalnurse.com or www.facebook.com/NaturalNurse

Section V - Great Lectures Planned in our Continuing Master Class Series:

September 17, 2022 Masterclass #33 PMH Atwater - Author and Researcher on Near-Death Experiences

October 15, 2022 Masterclass #34 David Oates presents “Reverse Speech”

November 12, 2022 Dennis Stilling presents “The Archaeus Project”

Keep an eye out for Masterclass email invitations so you don't miss your favorite speakers!

Section VI – Articles of Interest

Seeking Millionaire Sponsor

USPA is beginning a search for a lifetime patron of the organization, one who will help establish a small permanent library site. USPA has thousands of books in storage, currently under the care of John Reed.

He has scanned many of them to PDF to guard against the loss of their information, but in the interest of guarding the digital information against loss, a permanent safe place is needed for the physical books and materials.

This would require the gift of a small building, and the funding of a stipend for a part time secretary as well as utilities and upkeep of the building. It is a big dream, but somewhere there must be someone who can help! Contact Scott at uspsychotronics@yahoo.com

From Glen Rein: ExtraOrdinary Technology Conference

2022 ExtraOrdinary Technology Conference is being held this weekend (August 10-14) at the Crown Plaza in Albuquerque, New Mexico. Here is the Program link:

<https://teslatech.info/ttevents/2022conf/program2022.html>; several of the speakers are among those who have spoken at USPA Conferences.

From Dennis Stillings: DOD Announces Establishment of the All-Domain Anomaly Resolution Office

Per the Department of Defense, Deputy Secretary of Defense, on July 20, 2022 (see establishment memorandums below the press release below): [ed: This is a Black Vault finding at

<https://www.theblackvault.com/documentarchive/dod-announces-the-establishment-of-the-all-domain-anomaly-resolution-office-july-20-2022/>

On July 15, 2022, Deputy Secretary of Defense Kathleen Hicks, in coordination with the Director of National Intelligence (DNI), amended her [original direction](#) to the Under Secretary of Defense for Intelligence & Security by renaming and expanding the scope of the Airborne Object Identification and Management Group (AOIMSG) to the All-domain Anomaly Resolution Office (AARO), due to the enactment of the National Defense Authorization Act for fiscal 2022, which included a provision to establish an office, in coordination with DNI, with responsibilities that were broader than those originally assigned to the AOIMSG.

Today, USD(I&S) Hon. Ronald S. Moultrie informed the department of the establishment of AARO within the Office of the Under Secretary of Defense for Intelligence and Security, and named Dr. Sean M. Kirkpatrick, most recently the chief scientist at the Defense Intelligence Agency's Missile and Space Intelligence Center, as the director of AARO.

The mission of the AARO will be to synchronize efforts across the Department of Defense, and with other U.S. federal departments and agencies, to detect, identify and attribute objects of interest in, on or near military installations, operating areas, training areas, special use airspace and other areas of interest, and, as necessary, to mitigate any associated threats to safety of operations and national security. This includes anomalous, unidentified space, airborne, submerged and transmedium objects.

The AARO Executive Council (AAROEXEC), led by Under Secretary of Defense for Intelligence & Security (USD(I&S)) Ronald Moultrie, will provide oversight and direction to the AARO along these primary lines of effort:

1. *Surveillance, Collection and Reporting*
2. *System Capabilities and Design*
3. *Intelligence Operations and Analysis*
4. *Mitigation and Defeat*
5. *Governance*
6. *Science and Technology*

AI's Alternative Energy Reading Corner

AI's Alternative Energy Reading Corner

Hi Readers,

This is a very good video on crop circles and the work of Dr. Levensgood on changes to the seeds from the formations. **"Michael Jaco, Patty Greer and Penny Kelly Discuss Crop Circles, Plasma & Consciousness"** at <https://www.youtube.com/watch?v=6rx-eO0rQIM&t=3s> It is a long discussion, about one and a half hours long, so get comfortable.

Then, venture over to the Crop Circle Connector Webpage at <http://cropcircleconnector.com/interface2005.htm>

And you'll find hours and hours of fascinating stuff to watch and read.

Happy Reading/ Viewing,
AI Kacperski

Beverly Rubik, PhD will be speaking at The IAACN Symposium in September

The IAACN (International & American Associations Of Clinical Nutritionists) Symposium: “Biochemical and Physiological Disruption from Viral Inoculations with Clinical Nutrition” is being held on September 15-17, 2022 at the Renaissance Hotel, 15201 Dallas Parkway, Addison, TX 75001

Beverly Rubik, a USPA board member, is listed as the first speaker and her topic is “Adverse Effects of Novel Viral Gene-Based Vaccines and How Radiation from Wireless Devices May Exacerbate Them.”

Her lecture is based on the COVID vaccines, their constituents, their toxic effects, and how these toxic effects are exacerbated by exposure to wireless communication radiation (4G, 5G). For more information, click on their website, here: <https://iaacn.org/2022-scientific-symposium/>

Beverly recently spoke at the July 30th SSE Online Symposium

Beverly Rubik spoke at the July 30th Online Symposium: Measuring the Biofield: Exploring the Science of Energy Healing, sponsored by SSE –Society for Scientific Exploration. Her talk was “Biophoton Measurements from Human Subjects in Health and Healing.”

SSE is a non-profit organization; its website is <https://www.scientificexploration.org>. It shares many of its presentations on YouTube at <https://www.youtube.com/c/SocietyforScientificExploration>.

Rubik’s abstract: The ultra-weak light known as “biophotons” emitted from organisms may convey information central to life. To explore this, we designed and built a custom photon counting detector system with a walk-in dark closet that can sit 3 persons comfortably.

This system uses a conventional photomultiplier tube with customized electronics to count photons emitted from various regions of the human body or other organisms. We studied single subjects and also subjects engaged in energy healing inside the dark chamber. Our experiments show that certain regions of the human body, including the palm of the hand, forehead, heart, and abdominal regions, emit photons in the visible spectrum at an extremely low rate (less than 100 counts per min), in line with published values.

We measured the light emitted from mind-body practitioners of qigong, meditation, yoga, and various types of energy healing, such as Reiki, and external qi, among other forms.

What Is Shungite and Does It Have Healing Properties?

(In her USPA Masterclass on July 16, 2022, Ellen Kamhi mentioned the use of Shungite)

In recent years, healing crystals have become increasingly popular. These stones are believed to possess qualities that can enhance the health of your mind, body, and soul in various ways.

Healing crystals are generally used as a form of complementary and [alternative medicine](#). Complementary medicine is a practice that’s used in combination with standard therapies, while alternative medicine is used instead of it.

There are many types of healing crystals, but some are exceptionally unique. One example is shungite, a rare stone that’s said to work against pollutants, free radicals, and harmful germs. There are also claims that it may help shield you from [electromagnetic field](#) exposure.

Let’s take a closer look at shungite and its uses. We’ll also explore what the

What is shungite?

Shungite is a rare black stone made of up to 99 percent carbon. It’s mainly found in Shunga, a village in Karelia, Russia.

The stone has a unique composition. It contains fullerenes, or 3-D spherical molecules made of 60 carbon atoms. These molecules are hollow and sometimes called buckyballs.

Along with fullerenes, shungite consists of nearly all the minerals on the periodic table.

The origin of shungite is a mystery. Typically, materials made of carbon come from decayed organic substances like old forests. But the stone is thought to be at least 2 billion years old. This is before organic life existed on the planet.

Some theories of shungite's origins include:

- a large meteorite collided into Earth and deposited shungite into the ground
- shungite formed due to microorganisms in nearby water
- the composition of organic matter in sedimentary rocks changed over time

Although scientists are unsure of how shungite was formed or where it came from, they attribute the stone's potential benefits to its fullerene content.

Does it have any benefits?

To date, there's little scientific evidence on the benefits of shungite — many are anecdotal or need more solid research. We outline the purported benefits of shungite below.

Kills bacteria and viruses

Fullerenes, which are found in shungite, are a type of carbon nanostructure (CNS). CNSs are different physical forms of carbon.

According to a [2017 review of studies](#)[Trusted Source](#), CNSs can destroy harmful pathogens. They reportedly work by damaging the cell walls of bacteria and viruses. Additionally, when CNSs interact with microbes, the microbes lose electrons and die.

However, it's unclear what this means for human disease. More studies are needed to understand how the fullerenes in shungite can specifically affect pathogens.

Purifies water

Since ancient times, shungite has been used to purify water. This is due to its alleged activity against bacteria and viruses.

A [2018 study](#) states that shungite can filter water by removing contaminants and organic substances like pesticides. A [2017 study](#) also found that carbon from shungite can remove radioactive compounds from water.

Reduces oxidative stress

According to a [2017 animal study](#)[Trusted Source](#), shungite has antioxidant properties.

Researchers exposed mice to [ultraviolet B radiation](#) for 2 days. This caused skin damage and oxidative stress in the mice's skin. [Oxidative stress](#) is caused by reactive oxygen species, or molecules that damage healthy cells. Then, for 7 days, the researchers applied a shungite solution to the mice's damaged skin. This decreased ROS production and increased the activity of antioxidant enzymes.

These results may seem promising, but it's important to remember that the study was only done in mice. Additional research is needed to understand shungite's antioxidant potential for humans.

Reduces inflammation

In the above-mentioned 2017 animal study, shungite was found to reduce [inflammation](#). The researchers measured lower levels of inflammatory markers, including cytokines, or proteins involved in inflammation.

Because of this benefit, the scientists speculated that shungite may be useful for inflammatory diseases. Again, more research is necessary.

Eases physical ailments

Traditionally, water infused with shungite has been used for:

- allergies
- sore throats
- asthma
- gastric issues
- arthritis
- kidney problems
- liver problems
- gallbladder issues
- autoimmune disease
- pancreatic dysfunction

Theoretically, it's believed that if shungite has [antioxidant](#) and anti-inflammatory properties, it could help these conditions.

However, research is lacking in this area, and there's currently no clinical evidence to support the theory that shungite-infused water can help treat these conditions. As such, it's safer to follow standard medical treatment protocols instead.

Shields electromagnetic field (EMF) emissions

Users of shungite say the stone has the ability to shield you from EMF emissions.

Many people refer to an old [2003 study Trusted Source](#), where shungite reportedly protected rats against electromagnetic irradiation.

Yet, the study is outdated and only involves animals. This phenomenon has some support theoretically, but more research is needed to see if there's any benefit for humans.

Relieves stress

According to anecdotal reports, shungite is helpful for relieving stress. It's believed to soak up negative energy and balance emotions.

How to use shungite

- **Infuse your water.** Historically, shungite is used to purify water. You can use a shungite filter or place the stones in water for 2 to 3 days.
- **Wear it as jewelry.** Like other stones, shungite is available as beads or pendants.
- **Carry it in your bag.** This allows you to benefit from shungite's healing properties when you're on the go. Another option is to place the stone in your pocket.
- **Place it near EMF sources.** Some people put the stone near electronic devices, like microwaves and Wi-Fi routers, to shield them from EMF.
- **Display shungite in your home.** It's recommended to put the stone near your bed to help you destress and improve your sleep.
- **Meditate with the stone.** You can meditate near the stone or place it on your bed.

Masterclass Sponsor Drive

The Radionic Association in England is offering an Online Course: Introduction to Radionics

Click the following link for information and registration: [A PRACTICAL FIVE WEEK ZOOM COURSE](#) Mondays 19 & 26 September And 3, 10, & 17 October 2022 7 – 8.30 Pm

ONLINE INTRODUCTION TO RADIONICS

A PRACTICAL FIVE WEEK COURSE

MONDAYS 19 & 26 Sept and 3, 10 & 17 October 2022

Discover radionics' unique approach to improving health. This course is designed to enable everyone to help their family and friends and also to give practitioners in other therapies useful tools to obtain a more in-depth approach to their work.

YOU WILL LEARN:

- The important role of our subtle bodies in health
- How to ground and protect yourself
- The powerhouse of chakras & the endocrine system
- How to complete an in-depth analysis
- Frequent causes of illness and how to ease them
- Basic treatments to improve health with rates, and using Bach Flower remedies and colour

Note: It is essential to be able to dowse before starting this course.

ADDITIONAL DOWSING TUTORIAL ON 12 SEPTEMBER

Contact: The Radionic Association

Tel: 01869 338852

email: secretary@radionic.co.uk

<https://www.radionic.co.uk/online-introduction-to-radionics/>

Extra Dowsing Session on 12 Sept 2022

The five week course will be led by tutors of the School of Radionics and is equally important for those who would like to be able to help their family and friends and therapists from other modalities who wish to have a better understanding of their clients.

Each session will consist of a practical tutorial of about one hour followed by 30 minutes of Q&A. On completion of the six weeks you will have sufficient information to carry out a basic analysis and to give simple treatments to support health and wellbeing. It is necessary to be proficient at dowsing before commencing the course as this is the basis of radionic work. If you have any doubts about your ability please attend the dowsing session on Monday 12 September. All are recorded.

After confirmation of your booking on the course you will be emailed a detailed pdf manual to guide you through the sessions. You will receive a small DT10 instrument on which to broadcast your treatments and a pack of colour gels. You will need to buy a pendulum and to have a timer.

From Scott Beutlich: THE HOUSE OF WONDER | BY UPTON SINCLAIR

Scott commented, "Apparently the AMA hired Sinclair to bash Adams and he turned out to support radionics!"

An Account of the Revolutionary Discovery of Dr. Albert Abrams, the Diagnosis of Disease from the Radio-Activity of the blood, by Upton Sinclair (Reprinted from Pearson's Magazine for June 1922)

For some fifteen or eighteen years I have had the good fortune to count among my friends one of America's greatest poets and most lovable of men, George Sterling. For ten or twelve of these years I have been

accustomed to read in his letters extravagant statements concerning a certain San Francisco physician. He would say, "I should never again be afraid of getting any disease, Abrams would cure it in a week or two." He would say, "My friend Abrams continues to work new miracles, so rapidly that the medical professions have been frightened away from him." These statements were so extreme, that I failed to take them as seriously as I should. I wish now to profit by that blunder and tell what I have to tell as cautiously and conservatively as possible, so as not to frighten the reader away.

A few months ago I received from George Sterling a letter from which I quote a couple of paragraphs:

"I am glad to see you're interested in Dr. Abrams, and wish I could orally discuss him with you. He has utterly revolutionized medicine, and henceforth nine operations out of ten will be unnecessary, especially those where Bacilli are concerned. I send you one of his quarterly pamphlets, which he publishes for the many physicians who have taken his course. There are always a lot of them in his laboratory, and they tell me that his diagnoses are 100 percent correct. In this quarterly read especially the article by Sir James Barr, late president of the British Medical Association; realizing meanwhile what it means for a conservative English physician to make such statements! And Barr is going to be convinced even as to cancer. I know of many cases that Abrams has cured lately, four of them personal friends of mine. And tuberculosis is nothing to him. To me, he seems the greatest man ever born...."

So I decided to go to San Francisco and investigate. I planned to spend a day or two, but what I found there held me a couple of weeks, and it might have been months or even years if urgent duties had not called me home. I think the best way for me to present to you the work of Dr. Albert Abrams is

to take you into his clinic and let you see what I saw at my first visit, without any preparation or explanation. It is a two-story building on Sacramento street, and after I had visited it a few times, I took to calling it "The House of Wonder," for I saw in it such miracles as I had ever dreamed of in this world.

You are in a physician's laboratory, with rows of raised chairs along one side of the wall. These chairs are occupied by a score or more of physicians, who have come from all over the country to study Abrams' work. In the center of the room is a long table containing some electrical apparatus. One of the wires from this apparatus ends in an electrode, and in front of the table, upon the grounded plate, stands a young man, stripped to the waist, and with the electrode pressed to his forehead. Dr. Abrams sits on a chair before the young man, and taps with his finger upon the latter's abdomen, a method known to physicians as "percussion". To save you unnecessary bewilderment, I explain at once that this young man is no the patient being examined; this young man known as the "subject", and his body is merely one of the instruments which Abrams uses in his examination. The patient is in Toronto, or Boston, or Mexico City, and all that Dr. Abrams has is half a dozen drops of his blood upon a bit of clean white blotting paper.

is

"Next specimen," says Dr. Abrams, and his assistant takes from an envelope a blood specimen which has come in that morning's mail, and puts it to the right size and puts it in a little box which connected by wire with a rheostat, in turn, connected with the body of the subject.

The doctor's assistant hands him a letter which has come with the specimen, and the doctor reads it to his clinic: "I send the blood of Mrs. J., age 46 years." That is all. "No symptoms!" grumbles Abrams. : They want to try me out, of course, and I can't blame them, but it is a waste of my time to begin at the beginning in each case. All right, gentlemen, we set the instrument at 49, which is the vibratory rate of human blood. I don't happen to know this doctor who sends the specimen, and there are people trying to play tricks on me all the time. If this specimen contains human blood, the vibratory rate will come through on the body of the subject, and we shall have a dull area on this spot if it is a male." The doctor indicates a line just below the navel, and about an inch to the left. "If it is a female, the dull area will be on the corresponding spot to the right. Now listen."

He presses the second finger of this left hand against the abdomen of this subject, and with the second finger of his right hand, used as a little hammer, he begins to tap. He starts a couple of inches off from the correct spot, and you hear a slightly resonant sound. He moves his finger, and when he comes upon the correct spot you notice a difference in the sound—at least you come to notice it after you have listened through several sessions of the clinic and your ear has become practiced. The sound is duller – the same difference you would notice if you were percussing a table to a spot over one of the legs.

"It is human blood, female," says Abrams. "In order to verify it, I set the rheostat at 50, and you notice that the dullness disappears. I set it back at 49, and the dullness returns. I call your attention to the fact that the subject is facing west. I turn his body slightly out of the line, so, and you note the dullness is gone, even at 49. I have to impress upon you, again and again, the importance of these minute details. I do not know why it is necessary to face west; it must have something to do with the magnetic currents of the earth, of course. All I know is that if you face the west you get these reactions, and if you face any other way, you don't get them. All this work of mine is empirical, you understand.

I experiment and find out what happens. I try one way, and then I try another, so little by little, I am groping my way to these secrets of nature.

“Now we have here a specimen of a woman’s blood, and without being given any symptoms we are asked to find the disease if there be a disease. We begin with the most common of all diseases, that is to say, congenital syphilis. There are latent syphilide conditions in the blood, which can be recognized only by this method of electronic analysis. We find that an enormous percentage of human beings have a hereditary syphilitic affection, and this prepares the body soil for numerous other diseases, such as tuberculosis and cancer. We now set the rheostat at 57, which is the vibratory rate for congenital syphilis. If this vibratory rate is present in the blood, it will come through and manifest itself upon the body of the subject in what we call the ‘dumbbell area’, extending across the upper portion of the abdomen. Now listen.” And the doctor begins to tap. “You hear?” He says. “Congenital syphilis.

We will now determine the strain. If it is bovine, there will be an area of dullness here.” He indicates a spot above the navel of his subject. “Yes, bovine strain. Vaccination, as usual! We will next determine the virulence of the disease. We will set this dial of the rheostat at 30 ohms as a guess. It comes through, you see. We try 35 ohms. A very severe case. 37 ohms, 38 ohms. At 38 you notice that the dullness disappears. We set it back to 37. It comes through at 37. We will now examine the specimen for tuberculosis. We set the rheostat at 42. No reaction. We will try cancer, 50; the dull area should be here. Ah! You notice? Unmistakable! To show you the difference, I set it at 49. At 49, you see, there is the reaction for human blood, at this spot by the navel, but no reaction in the cancer area. We set it back at 50 and the dullness returns at once.

“We have now to determine the location of the disease. Cerebro-spinal? That should come through here. No cerebro-spinal. Digestive? Yes. Cancer of the digestive tract. Where? We try here and here. Ah, yes, cancer of the pylorus. We will determine the ohmage. Five ohms? It comes through. Ten ohms? Again! A very severe case. Twelve ohms, yes. It has passed the stage where it is operable. In a case of this sort, gentlemen, we are in a position to destroy the malignancy of the disease, but we cannot remove the growth, nor can we correct any structural changes which may have taken place. This specimen comes from Detroit, and we are asked to telegraph the diagnosis. We telegraph that we find congenital syphilis, 37 ohms, bovine strain; also cancer of the pylorus, 12 ohms. We prescribe treatment with the oscilloclast at the rates of 2 and 5. Next specimen”

The assistant takes the blood specimen from the little box and throws it into a trash basket. She touches the top and inside and cover of the box with a little horse-shoe magnet to destroy the radioactivity of the last specimen, and puts in another specimen, this time marked from a physician in Boston. This specimen is marked “male, age 62”

“Another physician I do not know,” says Abrams. “And again, no symptoms given. It seems that we have to spend the whole morning doing this a-b-c work; every physician in the country has to be separately convinced – and then they aren’t convinced! All right, no help for it. First, is it human blood? We set the dial at 49. Forehead, please.”

The subject places the electrode upon his forehead, and Dr. Abrams begins to tap. “Aha!” he says. “A practical joker. Not human blood! You see, gentlemen, it is clear and unmistakable. The area for human blood is precisely here. Now listen carefully; there is no difference whatever in the sound. Neither male nor female! About once a week we have someone trying to play this silly joke upon us. Just for fun, let us determine what kind of blood it is.: And the doctor sets the rheostat at one figure after another. “Cows blood? No. Dog’s blood? No. Chicken’s blood? No. Monkey, cat, sheep – ah yes, sheep’s blood. He has pressed the paper against his Sunday dinner before it went into the oven. All right, we will waste no more time upon that.” The doctor takes the envelope, and the vehemence of his pencil, as he writes the words “sheep’s blood” ought surely, if there be anything in his theory of radio-activity, to convey a vigorous shock to the doctor in Boston who has played the trick.

“Next specimen.” And so we proceed. Another sample is put in, and the tapping beings, and we are told that this person has 25 ohms of tuberculosis, located in the spinal cord and left kidney. We are told that the disease is of 12 years standing, also that there is “strep”, that is to say, streptococci or puss infection in the teeth on the lower left-hand side. We are told that the next specimen, which comes from a town in Texas, indicates a tumor located on a certain precise spot of the brain.

The next specimen comes without any indications whatever, and we are told that it is a woman 52 years of age, and that she is suffering from acquired syphilis of 14 years standing, and that the lesion will be located on the right forefinger. Some of these findings are made in two or three minutes. None of them take more than ten minutes, and after you have watched the work for an hour, you find yourself with one clear-cut conclusion in your mind: this eager and excitable little Jewish doctor is either one of the greatest geniuses in the history of mankind, or else one of the greatest maniacs. You are not quite sure which and you go on day after day, and still, you cannot be sure, because the thing unveiled to you is so amazing, you cannot make it real to yourself.

But one thing quickly becomes clear to you. The hypothesis of fraud must be excluded. This man is passionately, even furiously convinced of the reality of his phenomena; also he is a reverent scientist, working in the highest traditions of the healing art. He is a much over-worked man, irritable and nervous. Things go wrong with his apparatus; the wires get in his way, or his assistants make blunders, and he says “Damn it!” and has to apologize to the lady doctors. But present him with a new idea, some way to verify or perfect his work, and he pounces on it like a cat. He is a veritable incarnation of Nietzsche’s phrase about the human soul, which “hungers for knowledge as the lion for his food.” There is no experiment he will not try; you suggest an idea to him one morning, and discover the next day that he has slept only two hours – he was working the rest of the time on that idea. There is hardly any subject of human thought about which he has not read and has not something vivid and vital to say. Incidentally, he is a warm-hearted, lovable man, whose work it is a personal pleasure to aid.

He has a marvelous acquaintance with the human body. He calls it the most delicate scientific instrument in existence, and he has not merely that knowledge of its structure and functions which other physicians and surgeons possess – he has gone on to explore the radio-activity it manifests, and the infinite variety of reactions resulting therefrom. Many years ago this man was known in the medical profession as the discoverer of “the reflexes of Abrams.” He studied the nervous system of the body, racing out each minute thread of nerve, and showing exactly where disturbances in the functions and structure would manifest themselves. It is this knowledge about nerve reactions which he has now turned to use. The nerve threads all carry different vibrations, and if radio-activity is introduced into the body, they instantly sort it out and manifest it at a certain area, which can be found.

You decide that the man is not a fraud, and then you begin to wonder, can it be that he is deceiving himself and that he only imagines he is getting these reactions? You talk with the physicians who sit watching. “Why did you come here?” you ask, and the answer is, “I sent Abrams some blood specimens, and found his diagnoses were right every time.” You ask another and get the same response. You ask a third and he says, “He diagnosed my cancer while I was in Illinois, and cure it, so I came to learn about it.” Half the physicians here have been cure of something, you find, and several are in the process of cure.

One came in while I was there, and I watched an entertaining little drama. He was an elderly gentleman, retired from practice because of a nervous breakdown. His case had been diagnosed at a certain famous sanitarium, so he knew all about himself, and you could see that he was highly suspicious of these electronic gymnastics. He told me that his mind was open to any new truth; but my wife, who is a judge of character, remarked to me, there hasn’t anything new got into his mind in twenty-five years.” Abrams examined his blood and found tuberculosis, cerbro-spinal, and you could see that the old gentleman was not satisfied. Evidently, he said, for next morning he was on hand

again, and Abrams said, "I have told Dr. So-and-so that I will locate for him the precise spot where he suffers intense pain, and he agrees that if I and do that he will feel reassured about my method."

Dr. So-and-so has stripped to the waist and sits facing the west, with his arms stretched out and his feet on grounded plates. An assistant takes an electrode and places it on Dr. S-and-so's spine below the waist. Abrams, meantime, remains I his seat before the subject; for strange as it may seem, he learns more about the patient from the subject's body than from the patient's body! "Drawdown the curtain, please." He says, and a shade is drawn, separating the patient from the subject and from Abrams. "I do this," he explains, "in order to exclude the personal equation. I might be influenced by watching the patient, and I want to convince him that these tests are dependent upon nothing but the radio-activity of the disease. We set the dial at 42, which is the vibratory rate of tuberculosis. My assistant will move the electrode up the spine of the patient, and when it comes to the seat of the disease, the dull area will manifest itself on the body of the subject here and here. I want you to listen for the sound. My assistant will move the electrode slowly. Each reaction takes twelve seconds, and if you move too quickly I do not get the reactions properly, or I confuse one area with another. Now, ready"

The doctor begins to tap upon the abdomen of his subject, and the assistant moves the electrode, covering a new spot each time. Finally, the dull sound is heard, and Abrams cries, "Stop! Mark it please." The assistant takes a pencil and marks a mark about the electrode. "That is where you have the pain, Dr. Sp-and so," says Abrams, and Dr. Sp-and-so looks bewildered and answers, "Yes, that is the spot."

"Now," says Abrams, "We will begin at the top and work down the spine and I will tell you when you come to the same spot." This is done. "And now," says Abrams, "I am going to show you how this experiment may be entirely separated from the personal equation. I am going to demonstrate it with the pith ball." He takes from the drawer a rod, having a ball of dried pith about the size of your little finer-nail suspended by a thread. The assistant takes a flannel cloth and a rod of hard rubber, and rubs it vigorously, to electrify it, and touches the pith ball with it several times. The pith ball now carries a light charge of electricity. "You see that leaps away from the rod. Like repels like. Bu the radio-activity of disease is of the opposite polarity and will attract this pith ball. I press the end of the rod upon the body of the patient so that the pith ball hangs about one inch away. I put it here, where there is no disease, and you note that it hangs perfectly motionless, but now I put it over the spot which is marked, and we wait a few seconds for the reaction, and you see the pith ball moves in. It is drawn in unmistakably, sometimes it touches the skin; and we can check it up by putting electrode at the seat of the disease, and bringing the pith ball over to the body of the subject; at the dull are we see it moves."

I assume that the reader is skeptical concerning these miracles. It is proper that he should be. Someone may point out that the little drama with Dr. So-and-so might easily have been arranged in advance, after a fashion understood in the "medium parlors," where you talk with the spirit of your deceased grandmother for the sum of two dollars. But I sat in this clinic twice a day for a couple of weeks, and in that time I saw several hundred blood specimens examined, and letters and telegrams sent to physicians all over the United States. Abrams has examined to date over 12,000 blood specimens for other physicians, and the fact that letters continue to arrive by special delivery can only have one meaning – that the physicians find his diagnoses correct. Also, I saw in this clinic more than a hundred patients who had been treated or were being treated, by Abrams' methods, and he must have been a stage manager of supernatural skill to have taken all this variety of people, men, and women from a dozen races and of ages varying from eight to eighty, and taught them to play the strange roles which they played before the critical audience! Again and again, I saw Abrams make a diagnosis from the blood, and then bring in the patient, and invite some physician in the clinic who happened to be a specialist, to make an examination and see if he could find signs of the disease. Once it was adenoids, again it was a tumor of the thigh, again tuberculosis of the skin, again epithelioma.

Here, for example, is an Irish lady with a vigorous temperament. She has been treated in one of the largest hospitals of San Francisco for cancer of the breast. Six physicians diagnosed her case, and when she refused to lose her breast, one of them threatened to have a certificate signed by all six of them declaring her insane. She defied them and came to Abrams, and had been treated by him a couple of weeks. "Do you believe in him?" asked my wife; and she answered, "Believe in him? He saved my breast!" She states that all the pain is gone, and the enlargement is reduced by one-half.

And here is a Greek boy, who has been almost totally blind from acquired syphilis. He is feeling good, and the doctor, who likes to "jolly" his patients, lets him display himself. "How well can you see now, Joe?"

"As good as ever I could in my life, doctor."

"You don't mean it, Joe!"

"Can you see me, Joe?"

"Sure I can see you."

"And what have I in my hand?"

"You got a silver dollar."

"Don't you wish you had it, Joe?"

"I reckon I could use it if I had it."

"And you really couldn't see at all two months ago? You couldn't have seen this dollar?"

"No, sir, I couldn't have seen it if you had held it before my eyes."

And here comes an actor, who has had a tumor on the brain, and had lost the power to make connected sounds, and was rapidly losing the power to walk. Now, after two months' treatment, he can both talk and walk again, and his stage ambitions have revived. He is a tall, black-coated figure, presenting a weird appearance because a part of his treatment has consisted of shaving his head and painting it a vivid red, some substance whose vibratory rate corresponds to that of sarcoma.

"Now, show us how you can walk," says Abrams. "Can you stand on your toe?"

"Yes, sir," says the actor, and he toddles around.

"You couldn't do that a few weeks ago?"

"I fell on my face every time I tried it."

"And now on your heels. You couldn't do that?"

"No, sir, if I got up on my heels when I got out of bed, I fell back on the bed helpless."

"And your voice is coming back alright?"

"Well you can hear it," says the actor proudly. His voice still falters, but he tells us how in the old days he acted in England, and how someday he is going to do Richard III. He shows us how he will do it, with many expansive gestures.

"Now is the winter of our discontent made glorious summer by this sun of York!"

What is the principle upon which these marvels are based? Let us bear in mind, to begin with, that all our explanations in this matter are guesses. What Abrams has done is to find out what happens. He has done this by twenty years of minute and painstaking experiment. Having found out, he tries to account for the happenings, to rationalize them, but if all his guesses are wrong, that does not alter the facts.

Let us begin with first principles. Modern physical science has discovered that all matter consists of electrical energy. Each molecule of matter is composed of millions of minute electrical charges. This is not a theory of Abrams, but something which is taught in all school text-book of physics. No eye has ever beheld these "electrons," they are millions of millions of times smaller than anything the microscope can reveal; but it has been found possible by various devices to photograph or otherwise record the effects of their activity, and if you are curious you may find such photographs reproduced in modern text-books of advanced physics. These electrons constitute universes in themselves; the tiny electrical charges revolve about a central nucleus just as our planets revolve about the sun. Some of the

electrons are thrown off, and this constitutes what is known as radio-activity. It is known that all matter has radio-activity, and Abrams has proven by many interesting experiments that the human body is an infinitely complicated electronic machine, with a vast variety of radio-activities.

Every high school boy knows that water consists of two molecules of hydrogen and one of oxygen, and if it varied from that composition, it would be something else than water. In the same way, Abrams has discovered experimentally that every disease has a radio-activity peculiar to itself, and uniform and invariable. He calls this the “vibratory rate” of the disease; but you must bear in mind that this term is purely arbitrary, a name which he gives to certain effects which he has observed and measured, though he does not know what they are or how they came to be. Tubercular tissue, and the tubercle bacillus and every drop of blood from a body which contains the tubercle bacillus – all these substances produce a reaction when the rheostat is set at 23, and if the reaction does not come through at this point, there is no tuberculosis in that body. That this is amazing and new does not in any way alter the fact that it is so. It has been demonstrated over and over again scores of times every day in his clinic, and it can be demonstrated by anyone who will take the trouble to understand his method.

It would be impossible to exaggerate the revolutionary nature of this one discovery. It gives us for the first time an infallible method for diagnosis of disease; it gives us also a means of exploring disease and understanding its real nature. By this method we learn that many of the principal diseases exist in forms hitherto not recognized; also that some diseases, supposed to be entirely separate and distinct, are in reality different symptoms of the same disease. For example, the so-called pernicious anemia, or deficiency of red corpuscles in the blood, turns out to be a symptom of congenital syphilis affecting the spleen, with cancer grafted thereon. Neurasthenia in all of its forms turns out to be congenital syphilis, human or bovine, of cerebro-spinal activity. Cancer and tuberculosis turn out to be consequences of syphilis, either congenital or acquired; that is, you never find blood in which there is either carcinoma, sarcoma, tuberculosis, or dementia, that you do not also find the reaction of some form of syphilis. This disease turns out to be the source of our worst troubles; lurking in our blood in forms hitherto unrecognized, and in places not accessible to other researchers. As Abrams phrases it, picturesquely: “Realized pathology is syphilitized pathology. Our sainted ancestors were tainted ancestors.” He has obtained the reaction of syphilis, both congenital and acquired, from the bones of Egyptian mummies three thousand years old.

Human blood contains many vibratory rates; it contains not merely the vibratory rates of disease, it contains other rates dependent upon age and sex, others upon race, and others upon family. All these things Abrams has worked out by elaborate and painstaking experiment, and he provides you with tables so that by examining a drop of blood you can determine whether it contains a Negro strain, a Japanese, or Indian, or what you will. He has also an infallible method for determining paternity. He finds a number of different vibratory rates in the blood of the child and then he tests the blood of the father and finds the same rates. This aspect of his works brings him notoriety because it has to do with court proceedings, and scandals, appealing to the newspapers. It is a curious commentary upon our journalism that it telegraphs all over the country the news that Abrams has pronounced a certain child to be illegitimate, while it says not a word about the fact that there come to his clinic every day people who have been cured of all three of the dread scourges of our race, syphilis, tuberculosis, and cancer.

I repeat disease in all its manifestations, its germs, the poisons produced by these germs, and the body tissues in which these germs have been active, all yield the same invariable vibratory rate. Abrams has specimens of all the various diseases in test-tubes bearing the label of a well-known laboratory. With his divine patience, he will stop his work and show you that if you place a tube near the instrument you get the same reaction that you get from the blood of a diseased person. He will take in his clinic a patient suffering from cancer and show you the reaction. He will show you that his reaction comes through at the number 50, and does not come through at the number 51. He will bring

samples of healthy blood or will put the electrode upon a patient who has no cancer, and show you that no reaction comes through. He will show you that certain persons are immune to cancer; that is to say, samples of their blood place between the cancer specimen and the instrument, will cancel the cancer rate, and there will be no reaction. Abrams himself is one of these immune persons, and he proved it long ago. He was one of six physicians in a certain hospital who experimented with X-rays in the early days. All the other five died of cancer, and Abrams shows you the scars upon his hands, which would have turned to cancer had he not possessed the natural immunity. It happens that he has been twice married, and both his wives died of cancer, which accounts for some of the energy with which he has gone at the problem of the disease. He has undoubtedly conquered it. He can produce immunity in the blood and will demonstrate that immunity to you.

Now to continue: it is impossible as yet to measure these infinitely minute vibrations, millions of millions of times smaller than anything our sense can perceive. There had to be an instrument to sort them out and manifest them, and the most subtle instrument Abrams could find was the human body. That accounts for his curious practice of using a "subject." He explains that the nervous system of the body consists of millions of minute fibers and lines of communications, and these apparently correspond to different vibratory rates. At any rate, he has observed that if he poses an electrode to the forehead of a human being, and admits to that body radio-activity of a certain vibratory rate, that activity will affect certain nerve channels and no others; it will travel through the body, and will manifest itself at certain nerve ends, locations which can be detected by patient search. Wherever the impulse goes, there will be a minute increase in the activity of the cells; a little more blood will flow to that spot, the cells will dilate, and there will be what physicians know as a "dull area," to be discovered by percussion.

So here is Abram's technique of exploring the human body; first, the specimen of blood, placed in a box connected with an electrode; second, an instrument which stops all electrical manifestations from this blood, except those at one certain rate; third, the body of the "subject," which takes the vibrations coming through, and turns them into cell activity at a certain area. In Abrams' practice, the subject first places the electrode upon his forehead, and the reactions appear upon the abdomen. He then places the electrode a little further upon his head, and the reactions appear upon the back. He then places the electrode upon the top of the head, just back of a line between the ears, and the reactions again appear upon the abdomen, but at a different area than when the electrode was upon the forehead.

The method of determining these reactions by percussion is an unsatisfactory one. Percussion is to some extent a lost art, and few physicians have the necessary skill to recognize the dull area. Abrams himself, I think, would never have made a mistake if he were not hurried, if the work piled upon him were not several times too much for one man. But it should be understood that if his facts are correct, there are not in the least invalidated by errors in practice; any more than, for example, the method of wireless telegraphy is invalidated by sunspots or a drunken operator. What is wanted is an instrument that will record the reactions from the body automatically: perhaps by the minute increase of heat at the "dull area," or the still more minute increase of moisture. If such an instrument can be contrived, the method will be "fool-proof" and Abrams can die in peace. He has been robbing his sleep in order to seek this instrument. He hoped to find it in the pith ball, but this depends too much upon the electrical conditions of the room and other accidental factors. He hoped to find it in a vibrating wire, but such wires have their "nodes", their own "dull areas" not dependent upon the radio-activity of the blood. I carry in my mind the image of this devoted and heroic man staggering under his too heavy burden, and I feel like calling out to all the inventors of the world to come and help him solve this problem – to find some way of recording minute changes of vascular activity upon a dial.

Meantime, until the inventor comes, Albert Abrams must continue to spend his precious hours tapping, tapping, tapping upon the bare skin of a bored young man, and people in Boston, Toronto, and Mexico City waiting anxiously to know from what deadly disease they are suffering are dependent in

part upon the fact that this young man may have eaten too many waffles for his breakfast. I see Abrams wrinkling up his forehead with exasperation and exclaiming, "Oh, your reactions are very poor this morning!" He takes the flat of his hand and pounds upon the seventh cervical vertebra of the bored young man. There will be perhaps twenty-five blood specimens to examine that morning, and as many patients to be interviewed, each one a desperate case demanding compassion from a man who is tender-hearted as a child; and if in the midst of all that pressure he should make one slip, and miss the reaction at 49, then some vulgar ridiculer will call the newspaper reporters and proclaim the fact he sent Abrams a specimen of his own blood and got a diagnosis of animal blood.

Up to a few years ago, Albert Abrams was one of the most eminent practitioners in San Francisco, the head physician of large hospitals, recognized as the author of important discoveries. But now, when you mention his name, the average San Francisco physician shakes his head and says, "Oh, Abrams! He's crazy!" And if you ask why he is crazy, you will be told, first, he claims to locate disease from a drop of blood; second, he claims to tell paternity from a drop of blood; third, he claims that cattle have syphilis and that you can get it from vaccination. You see what has happened. He has gone ahead a little too fast, and so they say about him what they said about Harvey, who discovered the circulation of the blood, and about Lister, who discovered antiseptics – "He's Crazy!"

Why should cattle not have syphilis? For nearly two centuries now we have been inoculating them with the virus of human smallpox. We know that cattle can take that disease; we know also that they can take tuberculosis. Why should they not have taken syphilis, and developed a form of this disease which can be re-inoculated in the human body? Whether or not this happens is purely a matter for experiment. Abrams finds that he gets a reaction of bovine syphilis, and he has the courage to say so; also he has the patience to take you in his clinic and show you the reaction. He will show it on your vaccination scar; he will have someone move the electrode up your arms and tell you when it gets to that spot. And you go to a drug store, and buy some vaccination points, and put them in front of the electrode, and Abrams will show you the vibratory rate of 57 in five cases out of six. If you want to have yourself inoculated by one of these points, he will show you the reactions some hours later in your own blood. If he is mistaken in all this – if, for example, it is some other disease which yields this rate – somebody is free to prove it, but that somebody will have to start on the basis of Abrams' findings.

George Sterling said to me, "When the anti-vaccinationists get on to Abrams' work, what a howl they will raise!" But Abrams has found a method of destroying the syphilitic proclivities of these vaccination points. All that is necessary to purify the virus is to expose it for five minutes to the influence of blue light, which destroys the activity of the spirochetes; and then to expose it to yellow lights, which destroys the tuberculosis factor. If you doubt this, Abrams has his ever-ready answer. He will put a tube of bovine syphilis to the electrode and show you the reaction; and then he will have his assistant throw a blue light on the tube – and behold the reaction is gone!

This brings us to the most important aspect of Abrams' work – the cure. It means, of course, a great deal to physicians to be able to diagnose infallibly but to the patient, it is cold comfort to be told that he has some deadly disease, if he has to go on having it. Abrams claims to cure, and here again, we have two things to consider: first, the fact, and second, the theory. The theory may be wrong, but the facts are beyond dispute. Having ascertained the vibratory rate of cancer, it occurred to him in his grouping to find out what would be the effect upon a cancer specimen of continued exposure to that same vibratory rate. He constructed an instrument called the "oscilloclast," which breaks up ordinary alternating current of electricity into various vibrations. He measured these by the same instrument that measures the radio-activity of the disease: and when he had got a rate which gave the same reaction as the cancer specimen, he applied this rate to the cancer specimen, and discovered that the effect was to destroy the cancer reaction. After such treatment had been given, you might put the cancer specimen near the electrode, but you would get no dull area. What could this mean? Could it mean that the

cancer was no longer cancer? Imagine the state of mind of a physician who has seen two wives and many of his colleagues die of this hideous disease, and suddenly discover that he can destroy its vibratory rate! How quickly he would hasten to get some animal that was suffering from cancer and try the experiment upon it. And then to take some human subject, in the last stages of the disease, and make the final, all-important test!

What happens? I have just read a letter, written by Dr. Wm. G. Doern, of Milwaukee, describing a case of cancer of the pylorus, the opening from the stomach into the small intestine. This was a far advanced case, and the patient was treated by the oscilloclast, and the malignancy of the disease destroyed; but the digestive disturbances continued, because of the mass blocking the stomach, and so an operation was performed. It was found that this cancer had degenerated, and around the edges, the body had begun changing it into connective tissue, or what in everyday language is known as gristle. In a case of sarcoma of the leg bone, the size of two fists, it was found that the mass could be scooped out by the handful, and all around the edges, the body was turning it into fibrous tissue. As you may know, cancer and malignant tumors are the mysterious turning of human tissue into a lower form of unorganized cell life; those lower forms of cells begin to eat up the body. But here, suddenly, the process was reversed; the mysterious power of the evil cells was gone, and the body was eating up the cancer!

What happened in these cases of cancer happens with every form of germ infection. Ascertain in the vibratory rate of the disease, ascertain what current will cancel that reaction, and then pour into the body a current of that rate, and you destroy the activity of the germs. You can not, of course, always restore tissue: if a lung has been eaten up by tuberculosis, you cannot build a new lung. But arrest the course of the disease, and take good care of yourself, and often you will be astonished to see how far the healing forces of nature can rebuild what has been ruined. I have known this from ten years' experience, watching what the body can do after the blood has been purified by a long fast. Here in Abrams' clinic, you see it happening, and you feel as if you were watching the old-time Bible miracles. The blind begin to see, deaf begin to hear, the lame begin to walk! I speak the literal truth when I say that after I had sat for a week in Abram's clinic I had lost all feeling of the horror of the three dread diseases, tuberculosis, syphilis, and cancer.

Why does the same vibratory rate destroy the disease activity? Abrams makes a guess, and the guess is interesting. He tells how he once saw a Caruso, at a dinner party, tap upon a wine glass and determine the musical note at which it vibrated, and then sign that musical note at the glass and shatter it to fragments. You can see how this happens. The vibration is reinforced by new energy, its violence is continually increased as a swing is made to go farther and farther by each additional shove. You know that soldiers marching over a bridge always have to break step, otherwise they would bring down the bridge. In my wife's family, they tell a well-authenticated incident of an old gentleman who caused a stampede in a country church by his absent-minded habit of sitting with his legs crossed and one foot shaking persistently up and down. They thought it was the first earthquake in the history of Mississippi! Abrams believes that this is what happened to the disease germs, or rather to the millions upon millions of whirling electrons which compose the molecules of these germs. The vibrations are intensified, the electrons are flung apart, and that which was disease germ becomes something else. This guess may sound fantastic, but it happens to be closely in line with what we know about radio-activity. One of the first developments was the breaking down of the atom. The so-called "elements" were discovered not to be permanent; they could be changed into one another. Radium was a product of the degeneration of uranium and was degenerating into a form of lead. Scientists of eminence, such as Sir William Ramsey, announced that the transmutation of metals had become a fact. So do not be over-skeptical when Abrams suggests that by means of a current he can change the atoms of cancer into the atoms of some other substance.

I asked him if these same vibrations might not injure living tissue, but he answers that there is nothing in the normal body which yields the same vibratory rate as disease. He knows this because he has tried tens of thousands of experiments. He knows it because he has had many thousands of patients, sitting with the electrode of his oscilloclast pressed to some portion of their body, and he has yet to learn of anything being injured except the hostile invaders. You have no sensation whatever from the instrument; you can have it brought to your home, and take the treatment all night while you sleep. I know of one case where it was used for eleven consecutive hours and completely cured a case of acute appendicitis. Dr. Abrams has ascertained that pain has a certain vibratory rate, and if you have a pain he can locate it; also he found the rate that cancels pain, and has taken the oscilloclast to a dentist's office and demonstrated to several dentists that work otherwise agonizing could be done practically with no sensation. He has even made it possible to perform a surgical operation on the rectum, an extremely painful matter, without anesthetics. I asked him, "what about childbirth?" and he answered, "I should like to know, but I can't get time to find out!"

For the last few years, a great part of the resources of modern science has been devoted to the destruction of human life in a way. If today any foreign enemy should invade our land, we have airplanes with which to fly over him, and bombs to drop upon him, releasing clouds of deadly gases which will poison and entirely destroy whole armies. Billions of dollars we have been spending upon this kind of activity, and how we feel that our country is safe from invasion. But meantime, here are these deadly germs which invade our individual bodies, multiplying to an extent we cannot express in figures and causing atrocious suffering, disfigurement, and death to whole populations. And here in a little laboratory in San Francisco, a lonely scientist has been working to give us the mastery of these germs. He tells us how we can destroy them once for all, rout them out of our systems and build barriers against them. He presents us with this knowledge, the fruit of many decades of toil, and for this service, he will take rank in future times among the greatest benefactors of the human race. I am one who believes in honoring men while they are alive, and I pay to this great scientist the tribute of my love and admiration.

There has been founded in San Francisco by some of Abram's pupils an International Association for Racial Purification. Abrams, who happens by rare good fortune to be a man of independent means, has pledged the sum of fifty thousand dollars to its purpose which is to advocate that every child upon entering school shall be examined by the electronic blood test before the ravages of congenital syphilis have made headway in the body. The treatments which remove the hideous disease take only three of four hours and the child does not know what is happening. The "oscilloclast" costs about \$200 to manufacture, and it can be used day and night without limit. I wrote to Dr. Abrams about the commercial aspect of this matter, explaining that I could not advertise a device which might be used for money-making. His reply was: "Any instrument in my possession will be donated freely to any institution that demands it. If I could get someone to establish an institution, I would give up all my present work and devote the rest of my life freely to further the work." This statement is as satisfactory as anyone could ask, and on the basis of it, I urge all earnest men and women to find out about the Abrams blood test, so that its benefits may be spread without delay, and years of pain and misery spared our children.

Masterclass # 31: Chat from the Ellen Kamhi Zoom Presentation:

" Pineal Stimulation for Higher Health and Consciousness "

| | Ellen Kamhi's USPA Masterclass #31 Pineal Stimulation |
|----------|--|
| 00:22:09 | Derk M: Awesome |
| 00:23:14 | Derk M: Thanks for sponsoring! |
| 00:26:14 | Derk M: It's really good here... |
| 00:28:26 | Sabine H: yes |

| | |
|----------|---|
| 00:31:37 | Constance G: Can we have the slides I would love to study the graphs again thanks you Constance |
| 00:38:00 | U.S. Psychotronics Association: we will P the slide show in members area, if Ellen agrees to share. |
| 00:42:53 | Emmanuel F: I remember petitioning a stata council years ago to not install new bollard lights that had a high color temperature. It took some work, but they did eventually install lights with a lower color temperature |
| 00:43:20 | Emmanuel F: It also disrupts the photo cycle of plants too |
| 00:44:05 | U.S. Psychotronics Association: Thanks everyone for attending today. Please support the USPA by becoming a member and or donating to our mission of educating people on cutting edge science. |
| 00:44:36 | Emmanuel F: f.lux is great! |
| 00:45:05 | Emmanuel F: I also change color themes to eliminate blue wherever possible. I also use dark themes when it's available |
| 00:55:03 | Amber H: I've heard that studies show that radio frequency radiation (RF) from Wifi, cell phones, etc has the same effect as visible light on the body at night, and also disrupts melanin production. What's your opinion on this? |
| 00:55:22 | Eileen B: QUESTION: I saw things when I was a child ... that I described as "fairies." Could that be because of an unadulterated pineal gland? |
| 00:57:01 | Gene G: why are LEDs worse than incandescent lights? Thanks. |
| 00:57:42 | Amber H: I meant to say melatonin production, not melanin. |
| 00:58:04 | Emmanuel F: white LEDs are actually constructed from a blue LED that has a yellow phosphor over it. There's always going to be some blue light with high photon energy that leaks through |
| 00:59:44 | Emmanuel F: color temperature is also important too. "warm white" (2700K - 3500K) has less blue light than "cool whilte" (4100K +). "daylight" spectrum is the worst (5000k - 6000k) |
| 01:00:51 | Tina C: Good for you! I love Oyster Bay. |
| 01:00:58 | Emmanuel F: Daylight spectrum is meant to reproduce the color spectrum of the Sun at high noon. It's often used in environments where color accuracy is used (design studios etc) |
| 01:02:47 | Emmanuel F: For dealing with blue LEDs on electronics, I use red tinted tail light repair tape, that you can get at the auto parts store. Two layers is enough to knock out a substancial portion of blue light, and you can still see the LED status as a dull magenta color |
| 01:04:04 | Emmanuel F: Another technique I've used is to paint the blue LEDs with a thick layer of orange luminescent paint. It'll glow an amber color instead. The phosphors do wear out over time |
| 01:04:23 | Emmanuel F: I've also desoldered blue LEDs and replaced them with amber ones |
| 01:04:42 | Allan P: Mayways Cordyceps is the best, if you are a practioner and can get an account with them, Their C4 |
| 01:09:18 | Emmanuel F: For cheap blue light glasses, you can get some amber tinted safety glasses for tool supply and hardware stores. The good ones should make blue colored object appear green |
| 01:09:55 | Allan P: sure , or on Amazon |

| | |
|----------|---|
| 01:11:31 | Emmanuel F: the dedicated blue light blocking glasses specialize in bandpass filtering blue light. They work better, but also cost more. |
| 01:14:34 | Emmanuel F: quercetin is the active ingredient in hydroxychloroquine |
| 01:23:30 | Ilene F: Thank you very much!!! 🙏❤️🙏 |
| 01:23:40 | Daniel T: Would you say a few words about Pineal calcification and decalcification please? |
| 01:24:16 | Sky D: Honoring this magnificent presentation. |
| 01:24:54 | Kevin K: Can you have drug interactions using Radionics |
| 01:25:55 | Gail W: https://www.ifm.org/ |
| 01:26:18 | Jerry Gin: if you want me to describe what happens with seeing with 3rd eye when you undergo kriya training, I can describe that. Jerry |
| 01:26:44 | MARGARET M: having internet issues |
| 01:27:32 | Emmanuel F: There's geomancy tools like BioGeometry that you can use to harmonize harmful radio frequencies |
| 01:27:38 | Eileen B: HAVANA EFFECT? |
| 01:27:41 | Andy H: at old age melatonin production stops. What can we do then. |
| 01:28:29 | Constance G: so that is what is wrong with Biden!!! |
| 01:28:42 | Susan B: yes, "Havana Effect" |
| 01:28:44 | Emmanuel F: 2.4 GHz is a neuroactive frequency (also used for cell network, Wifi & Bluetooth signaling) |
| 01:28:51 | Amber H: I meant microwaves, not waves from radios. |
| 01:31:14 | Eileen B: Movie: A BEAUTIFUL MIND |
| 01:33:26 | Eileen B: FLICKER |
| 01:34:15 | Janet S: please repeat that article name |
| 01:34:25 | Sharon J: what is the name of the nasal expanderss and blue blocking eye glasses |
| 01:34:50 | L A D: can u talk more about discernment of spiritual visions vs technological assault Havana syndrome etc |
| 01:35:02 | Janet S: article on effects on LED lights |
| 01:35:04 | Emmanuel F: Incandescent bulbs are also a full-spectrum light source. They produce low wave IR that is also beneficial for health |
| 01:35:44 | Jill van der Veen: friends of mine say they have no difficulty getting to sleep, but don't stay asleep after the first sleep cycles. Any reason you could advance for this ? They lie awake for hours. |
| 01:35:45 | Susan B: And snow flake obsidian |
| 01:36:33 | Charleene C: Any guidance for aggressive prostate cancer? |
| 01:36:44 | Eileen B: Be sure to authenticate your shungite. |
| 01:37:15 | Julia S: How do you authenticate? |
| 01:37:34 | Janet S: Everyone please check out Nano Soma. Dr. Rhagu discovered/created it. just sugar cane not separated from molasses. proven to trigger the body to heal all 4,448 diseases known to man. Kerry Cassidy interviewed him |
| 01:39:44 | Janet S: https://projectcamelotportal.com/2021/11/02/nano-soma-path-to-health-2/ |
| 01:42:54 | Jani Estrada: How can we guard against "flicker rate" on screens? What is it doing to our eyes and brain? |

| | |
|----------|---|
| 01:43:14 | Sharon B: How did she say to use the Shungite? |
| 01:45:21 | Derk M: Thanks awesome! |
| 01:45:29 | Julia S: Brilliant presentation thank you so much for sharing |
| 01:46:17 | Amber H: Wonderful information, thanks so much! |
| 01:46:19 | Eileen B: Thanks so much Ellen. I LOVE your beautiful energy! |
| 01:46:34 | Gayle N: Thank you! that was wonderful. |
| 01:46:35 | Allan P: thankyou so much!!! |
| 01:46:36 | Susan B: "young, young, young, dead". ahahaha! :-) |
| 01:46:37 | Daniel T: Thank you so much, Ellen! |
| 01:46:50 | Derk M: Appreciate y'all! Carry on... |
| 01:47:00 | Susan B: Thank you for this talk! |
| 01:47:05 | Jill V: Thank you for a fascinating presentation. I've learnt a lot more than I already knew. |
| 01:47:08 | Constance G: God bless cg |
| 01:47:10 | Stephen Q: Thanks for the presentation! |
| 01:47:31 | Nora R: Thank you ! |
| 01:47:32 | Denise H: Thank you very much. Awesome!!! |
| 01:47:33 | MARGARET M: Blessings to all |
| 01:47:48 | Ermion Pierre: Thank you so much for this wonderful presentation! |
| 01:47:54 | Daniel T: Thanks, Scott! |
| 01:48:01 | Emmanuel F: Thank you so much!! |

Linda Orr Easthouse: One Woman's Journey into the Field of Radionics

Hi, I'm Linda Easthouse. I thought you'd enjoy hearing a little bit about how I got into radionics and why I love helping people with this technology so much.

I've always been into natural health stuff. My family has a long history of natural health. My grandmother was actually one of the first women Canadian chiropractors – she was in the first class that graduated women. So I've come from a long tradition of working naturally to heal the body and gain functionality and form, in many aspects of our lives through these kinds of technologies.

Back in 2002, we had just moved to Canada. I have two boys, both of whom had been sick most of their lives. A colleague of mine said he'd gotten this new technology that was really amazing. It was a nonlinear sequencing (NLS-Bioresonance) technology that allowed the body to receive a signal, process it and send back where the body was different from the original. That allowed them to see where the body was having problems. You could feed in a perfect signal of a liver or a kidney or a lung, or whatever, and it would process that signal and come back with how close the person's actual body signal was to the perfect one. It allowed us to have a very exact imprint of what's going on in the body. That was my first introduction to the bio-resonance side of it.

I had heard about radionics for a long time. I had read a number of things about it in the general agricultural use, but for the most part I hadn't really experienced it. And then another colleague said that he had a radionics machine and so I decided I needed to try it out. He started running some things on me and explaining to me how it all worked. I absolutely loved it and got amazing results from it very quickly. We were working more on some attitudinal things, and some emotional things which got very quick results. That very much impressed me.

So I started studying radionics. I took the course from the Canadian Radionics Association and some courses out of the UK. I did a tremendous amount of reading and then a lot of experimenting. I have three different radionics machines and each one has its own strengths and weaknesses. Each one works in a little bit different way, but I find that with all three of them it gives me a broad range of being able to address all the issues that I want to address, whether they're physical, emotional, illness, performance, or function.

I do a lot of work with people in the area of improving their business, because I can put in all sorts of vibrations and frequencies around their business being successful. For example, [I work to help them] in attracting the right clients, having the right sales, choosing the right products, and those kinds of things. A lot of performance fine tuning can be done with this.

I also find that it's a wonderful way to just keep a background cleaning going for people – like people who live in high stress environments. They can just have this background cleaning running all the time for them, which helps them tremendously.

All of these different kinds of approaches over the years, I've practiced and fine-tuned until I feel really comfortable that I can help almost anyone with whatever it is that they want to do via radionics. It is an amazing technology.

There is a difference between radionics and bio-resonance. Bioresonance is more the reading of the frequencies that are going on in the body, turning them into a picture on the screen where you can see what's going on. And then, testing different possibilities for correcting that against them to figure out which one's going to work the best and then feeding that into their body to help the body correct it.

So the bio-resonance is really working on the body's frequencies and waves and ways to enhance that to produce the greatest healing within the system.

Radionics also does that, just in a slightly different way. But radionics also has the much broader possibility of working on performance and attitude and emotions and all these other issues that are so much a part of our daily lives.

I really encourage you to try some radionics. Join me in this journey and hopefully we'll be able to give you the results you're looking for through a very gentle yet very powerful process of sending waves into your system, into your environment, into your business, into your family, wherever you want them. That will then begin to integrate and create change and open up new possibilities and allow things to just move into a new direction and a new outcome that you want.

Section VII – Come to the Website – Visit the Everchanging USPA [Library](#)

The new USPA Library tab is the place to go for Newsletters, (new and old), donations of articles, PowerPoint presentations by our Masterclass Speakers, The Toby Grots Collection, pdf lists of audio and videos available in the store, and much more.

The Library Lion: John Reed

The backbone of this work is John Reed, USPA's Master Librarian, (former Newsletter Editor and Current Board Member.) John is adding out of print, open copyright books to the library for anyone to download.

John is hoping a Publications Packrat like him will have what is missing. He is creating a digital library by scanning every out of print book, series of newsletters and magazine articles that he can lay his hands on relevant to psychotronics, radionics and sister fields. As his database grows, he will share updates via this newsletter and our website.

From John:

Missing Newsletters of USPA Chapters

The USPA national organization started in the late 1970's, and over the years, at least 25 local chapters were formed. Some, but not all, of these chapters published a newsletter telling about the activities of the local chapter. The USPA Library is attempting to identify all of the chapters that published newsletters, and to obtain copies of all issues of the chapter newsletters that were ever published.

We only have a few issues of such newsletters in the USPA Library, from such chapters as the Eugene Chapter in Eugene, Oregon; the Phoenix Chapter in Yellow Springs, Ohio; the Zenith Chapter in Cleveland, Ohio; the Northern California chapter in Yuba City, CA, and the New York City Chapter.

If you have copies of any USPA chapter newsletters, please write to the USPA Librarian and Archivist, John Reed at: joreed43@gmail.com. If you have issues of chapter newsletters, but wish to keep them, please make a xerox copy, scan, and send it to John at the above email address. If you wish to have the physical copies preserved in the USPA Library, please let John know, so that shipping arrangements can be made. All shipping costs will be paid for by the USPA Librarian.

“Our Library is Your library!”

Section VIII - USPA Publications: Proceedings and Journals are Digitized and in the Shop!!

Quick Background of our Proceedings Evolution

Since its first meeting in 1975, hundreds of top scientists, educators and researchers have made presentations at USPAs annual conferences. They are from the leading edges of their fields, especially regarding the phenomena of Mind-Body connection, energy and emerging technologies. The first audio recordings were made in 1978.

Then, in 1985, USPA produced a perfect-bound Proceedings book for its tenth conference. The proceedings went through quite an evolution, much like our audio and video presentations. In 2010 they went through a “final” stage and the proceedings are now produced as pdf documents.

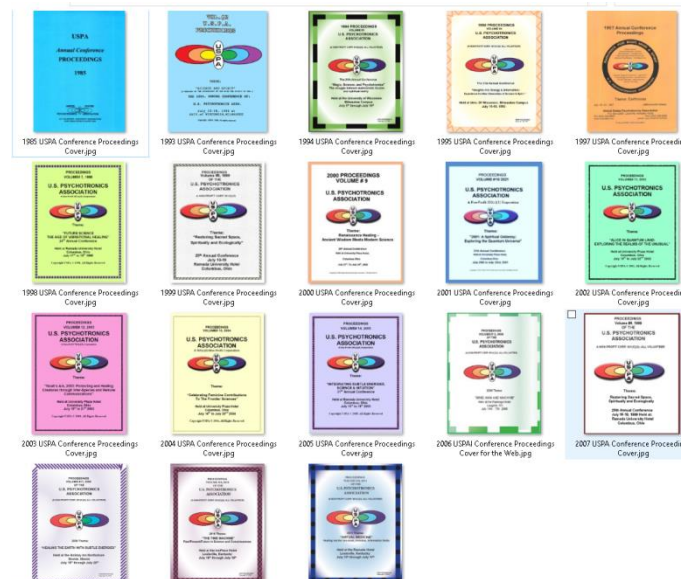

REWARD ..OFFERED

Attention bounty hunters!

To help our librarian, John Reed in his quests for missing journals, newsletters, articles and manuals, **a reward of one free audio or video download from the USPS shop** is offered per item captured.

There is no limit on receiving this bounty as many, many items will be added to this list. Your participation in the search is highly participated appreciated!

contact: joreed43@gmail.com

1995 Proceedings Table of Contents

6 USPA Journals and 18 out of 19 Proceedings are now available for purchase.

The 6 USPA Journals and 18 of our 19 Annual Proceedings can be purchased in pdf format from our webstore at: <https://www.psychotronics.org/product-category/uspa-publications-journals-proceedings/>

All USPA publications are copyright protected and are property of the USPA. They may not be reprinted without permission of the Board of USPA.

You can download the Tables of contents for the Proceedings here:

<https://www.psychotronics.org/pub/pro/all-uspa-conference-proceedings-toc.pdf>

and the table of contents for the Journals here

<https://www.psychotronics.org/pub/j/six-journals-tables-of-contents.pdf> [Shop Here!](#)

Each month, the Newsletter will feature the table of contents of one of the USPA Conference proceedings.

This month: Featuring 1995 USPA Proceedings

 Categories are now click through – Join online! Nothing to download, fill in or mail!)

Section X - What Are Others Up To? They are wondering What YOU want to do!

USPA sent out a survey July 24th asking about everyone's preferences regarding an in-person conference. We can't publish the results of the survey just yet. As of this newsletter printing, out of 2,458 that we sent the survey to, **only 57 people actually answered it!**

Please, check your inbox, trash or spambox for the USPA July 24th email with subject line **“We'd Love Your Feedback.”** It is only 15 multiple choice questions. It would take you less than five minutes to respond.

We really need to know if people are interested in coming to an in-person conference. It takes massive amounts of time and LOTS of money to present a conference. We can't even think of doing it if we won't have enough people who want to come.

Meantime, thanks and double thanks to those who have already responded!

Section XII – Have You Heard?

Branson-backed Company Captures Mega Tons of Carbon Injected Into Concrete

The second-most abundant manmade material in the world is being employed by a start-up to ‘jail’ carbon dioxide produced by factories before it’s sent into the atmosphere.

The material? Concrete. The startup: CarbonCure, and as well as sequestering carbon and reducing emissions, it solves a major longevity issue within concrete—strengthening the material and reducing production costs.

With so many merits, it’s as unsurprising as it is exciting to see that private sector giants like Amazon, Alibaba Group, and Mitsubishi are all pouring money into the small, understated Halifax firm which launched over a dozen years ago.

“CarbonCure is on its way to achieving 500 megatons of CO₂ reductions annually, helping to decarbonize the built environment while positioning the concrete industry to lead the transition to the new low-carbon economy,” CarbonCure CEO and Founder Robert Niven said in a statement.

How much is 500 megatons? Let’s talk about equivalents. One megaton in the metric system represents 1 million metric tons. CarbonCure are on track to remove 500 million metric tons of carbon annually.

According to the EPA, 500 million metric tons is equivalent to 126 coal plants firing non-stop for a year, or 91 million homes’ electricity consumption over a year. In smaller figures it’s what 109 million passenger vehicles create per year from driving, or the total emissions from vaporizing 56 billion gallons of gasoline.

It’s unsurprising then that with this incredible potential, CarbonCure won the 2020 American Cleantech Company of the Year by San Francisco’s Cleantech Group.

How it works - A small and easily retrofitted device, colloquially known as the “box,” links a CO₂ tank with a concrete mixture. Inside is the company’s secret tech, which injects CO₂ in such a way as to turn it from a gas back to a solid.

A water-based solution triggers the CO₂ to create carbonate ions early in the mixing process. The cement within the concrete, the key ingredient responsible for its thousands of years of use but also its heavy emissions profile, contains calcium ions which the carbonate binds to, creating calcium carbonate. Read More here: <https://www.goodnewsnetwork.org/canadian-carbon-capture-technology-sequesters-co2-inside-concrete/>

What is USPA?

The United States Psychotronics Association (USPA) is a federally recognized, nonprofit 501(c)(3) organization founded in 1975 to serve as a focal point for scientific and technical exploration of the universe of esoteric, spiritual, and psychic arts in the United States of America.

The USPA has been hosting annual conferences for its membership since its formation and has featured countless individuals with cutting-edge viewpoints, research, or theories to share, allowing any interested persons to openly discuss their work.

What is Psychotronics?

USPA defines psychotronics as the science of mind-body-environment relationships, an interdisciplinary science concerned with the interactions of matter, energy, and consciousness.

Psychotronics involves the study, research, and applications of the physics and technology of the mind, brain, spirit, consciousness, and the underlying forces of life and nature – hence the term “psychotronics.” A true understanding of the universe must include the spiritual as well as the technical. USPA provides an opportunity for amateur researchers to present their findings along with the professionals. USPA stresses research, with documentation of results, and practical applications, rather than personal experience and unsupported hypotheses.

Section XIV - Our Donors

USPA Generous Donors Recognition Page

The USPA would like to give special recognition on a continuing basis to people who have made generous donations to the United States Psychotronics Association in past years.

This special “USPA Generous Donors Recognition Page” will be carried in each issue of the USPA Journal & Newsletter, and new names will be added as donations are received.

Donors 2022

HONORING MY FATHER & MOTHER by Samm Simpson

HONORING MY FATHER & MOTHER

by Samm Simpson

ISBN 9781645508120

Sam began as a radio broadcaster in the 1970s. Television followed, along with seasons of political and social activism. She's written thousands of TV and radio scripts, produced and directed hundreds of TV and radio broadcasts and penned a bevy of unpublished short stories and poems. This is her first book. As a child, she was acquainted with a love for truth. She was acquainted with grief. Both polarities endured. Sam remains a child, working out her own salvation with fear and trembling

Samm Simpson says,

"On the thirty first day of the first pagan month in the year numbered 2019, my mother, Lila Lee Simpson, said goodbye to this bountiful Earth, a destiny awaiting all living beings. Her body shone luminous and the day was miraculous. I had the honor and privilege of being with her and laying her body to rest as it should be – intact, whole, no embalming, no cremation, no funeral industry chemicals, body plugs, wires, glues or make up. The story grew much larger than a simple descriptive narrative. It morphed into a tale of my idyllic childhood, seen through the lens of America's self-destruction and fall from grace.

You will read of miracles as well as be exposed to difficult or uncomfortable topics. At the time of this writing, they were not yet banned. You are under no obligation to believe what I've written. But, while a semblance of freedom to think independently still exists, I urge you to do your own research until books are burned and Big Tech fully sanitizes the internet."

One reader commented: "I loved how it weaved an America that used to be, with miracles of an amazing death and burial, along with hard core truths that help explain the madness of today's culture."

Another wrote: I would make this required reading for students. This book is about a different time, not so long ago in our society where we lived and played as family and neighbors. The title alone tells you what has long been forgotten, as so many don't even know who their parents are in this life. Those who do their parents are sons and daughters of the greatest generation. This is what broke our society. This is a book that demonstrates those who understand what has been lost, and how they chose to honor their parents in life as well as when they left our world.

This book will be cherished by all who read it, those who also honor their mother and father. Hopefully broken families will understand what it takes to break this cycle and will want to, after reading this book.

Section XV Classified Ad Section – continued

Personal Ads: If you have any “psychotronic related items” to sell, (books, radionic machines, etc.) we charge 20 cents per word, 20.00 per half page with supplied artwork or photos or 35.00 per whole page. Your paid ad will run in the next three issues of the newsletter.

If you would like to publicize an event for a non-profit organization, USPA will advertise for you up to 750 words free. We ask for mutual links to our website from yours.

If you would like to publicize a for-profit event, or a business USPA charges reasonable ad rates. Link to the ad rates is posted on our Donate page of the website, or [CLICK HERE](#)

Please Note: USPA is not responsible for the content or condition of items sold from this newsletter by any private person or company, nor does it back any treatment, modality or veracity of presentation. It does not back any claim of medical efficacy of machines or treatments. USPA cannot recommend specific radionic practitioners, or offer radionic treatments from its board of directors or officers.

Section XV – J.G. Gallimore’s Five Rare Books Are Now Available!

Jerry G. Gallimore was one of the founders of the USPA in 1975, and was a leading researcher in psychotronics and unusual energies until his untimely death in 1989.

All five of J.G. Gallimore’s rare books on psychotronics subjects and unusual energies have been reprinted by the United States Psychotronics Association (USPA) and are being made available at a fraction of the cost that used copies were being sold at online.

So rare have these books been, that only a few libraries in the entire world had them in their collections, and some original Gallimore’s books were being sold for several hundred dollars each online. However, with these newly reprinted volumes, each will be available for less than \$30.00. All are:

[Available at Amazon.com](#)

| | | | |
|---|--|--|--------------|
| The Handbook of Unusual Energies: Volume 1 of Handbook of Unusual Energies | ISBN-10: 1543024998 ISBN-13: 978-1543024999 | The first book of three volumes on unusual energies | 468 Pages |
| <p>Gallimore discusses in depth the research, discoveries, and inventions of all the major researchers in subtle energies, the aether, biological 62 fields, pyramid energy, radiesthesia, radionics, crystal transduction, and related subjects.</p> <p>These include the works of Baron Von Reichenbach's and his odic energy, Dr. Wilhelm Reich's orgone energy, Dr. Harold Burr's biological life fields, Kozyrev's time mirror, Edgar Cayce's transmission of energy, and related research done by many others.</p> <p>Of particular importance is Gallimore's 127 page chapter on radionics. In this chapter he discusses in depth the research and devices of Ruth Drown, T. Galen Hieronymus, Rho Sigma, Dr. L. P. Corte and other prominent people in the radionics field.</p> | | | |
| Collected Properties & Writings of J. G. Gallimore: Volume 2 | ISBN-10: 1543025048 ISBN-13: 978-1543025040 | The second book of three volumes on unusual energies | 258 Pages |
| <p>This is the second book in the “Unusual Energies” series that J.G. Gallimore published. It covers Gallimore’s research on Albert Abrams, the founder of modern radionics, psychological physics, psychic energy, thought resonance, subtle energies, crystals, and related subjects.</p> <p>In addition, a number of radionics devices are discussed, such as the De La Warr Diagnostic Instrument. And very helpfully, the rates are provided for substances, body organs, and medical diseases and disorders. I very interesting interview of Christopher Bird, conducted by J.G. Gallimore is provided, as well as a discussion of Walter Russell and his research</p> | | | |

| | | | | |
|--|---|---|--|---|
| Relationship Between Parapsychology and Gravity: Volume 3 | ISBN-10: 1543024947 ISBN-13: 978-1543024944 | The third book of three volumes on unusual energies | 228 Pages | |
| <p>This book describes in depth the research and theories of J.G. Gallimore into the question of "parapsychology transmission" -the question of how such things as telepathy, remote viewing, ESP, and similar phenomena can physically occur.</p> <p>He discusses the various emanations, radiations, and energy fields of all matter and life including the ancient Chinese energy called "chi" (qi), the ancient Indian's prana energy, Reichenback's "odic force," Gurwitsch's "mitogenic radiation," Wilhelm Reich's orgone energy, and other subtle energies. He shows how all of these energies are similar, how they interact, and how they are related to gravity.</p> <p>He also discusses crystals as transducers of these energies, and provides diagrams of devices that could potentially be used to harness or control these energies.</p> | | | | |
| Transverse Paraphysics: The New Science of Space, Time, and Gravity Control | ISBN-10: 1543024920 ISBN-13: 978-1543024920 | | 374 Pages | |
| <p>This book covers the visionary research and theories developed by J.G. Gallimore about anti-gravity, space, time, and biophysics. He discusses in depth the dimensions of space, time, and gravity, and new discoveries in each of these areas. In addition, he covers research being done on anti-gravity and then discusses anti-gravity patents that have been obtained.</p> <p>He also discusses the intriguing concept of aura energy fields surrounding humans and other living things, and how extra-sensory perception (ESP) might be explained through biophysical principles.</p> | | | | |
| Unified Field Theory Research Book: Using Subjective Response to Psi-Plasma for Analysis of Properties Neutral Charge Plasma Fields | ISBN-10: 1543024831 ISBN-13: 978-1543024838 | | 134 Pages | |
| <p>This book is about psychotronics, radionics, electromagnetic fields and waves, psi-plasma, plasma fields, subtle energies, bio-electromagnetic energy, and other unusual energies emitted by living and non-living things. It also is about how living things interact with and are affected by these energies, which may enhance health or harm health.</p> <p>The book covers the research of Wilhelm Reich on Orgone energy, of Baron Reichenback on the odic forces, as well as research done by Cazzamalli on brain radiations and Lakhovsky on using high frequency radiations to successfully treat cancer in humans. In addition, Lakhovsky used similar methods to enhance the growth of plants. Gallimore shows how these energies, forces, and fields are all inter-related and provides hypotheses and ideas on their possible unification.</p> | | | | |
