P.S. - Please Let Me Know - By Email That You Received The Plans I would Hope Not That There Would Be <sup>NE</sup> Interference By The Snoops of your Mail

Here Are Photocopies 5 Pages of The Plans of Srinavasan's Free Energy Motor And 5 Pages of His Maths And Explanation of Same

The Key He Stresses Is Triggering The Background Quantum Energy Field, Expanding It And Extracting The Energy

Gopal Srinavasan Says This Method Is The Simplest And Easiest Way Of Harnessing The Zero Point Quantum Energy Field.

Please Pass This Info On To People You Can Trust Who Would Be Interested In Duplicating Srinavasan's Motor Or Improving On It.

Or Better Still Installing A Free Energy Device In A Car With An Electric Motor And Driving It Around For Days Weeks, Look No Fossil Fuels Needed.

So Please Spread This Info To All Those Interested With Every One Having Free Energy Devices For There Cars, Homes, Office, Factories, All Public Transport etc - It Will Truly Be An Energy Revolution - Energy Independence For The World.

This Will Lead To The De Centralization of Economic And Political Power - A True Revolution

So If Your Friends Do Try To Build Srinavasan's Motor motor tell them to Be Careful there Life could Be In Danger From Those Who Dont Want Free Energy To Be Successful - A Friend In The Bottle.

P.S. Tell The Free Energy Devices Are Up & Running We Have To Go In The Meantime With Improving Solar Panels And Wind Turbine Power.

① THE FREE ENERGY MOTOR BUILT IN 1986 AND DEMONSTRATED IN HANOVER GERMANY IN 1986 - THE FULL DETAILS PUBLISHED IN THE INDIAN EXPRESS NEWSPAPER 24TH NOV/87 ON THE EXTRACTION OF ENERGY FROM SPACE BY TRIGGERING IT INTO AN EXPANSIVE STATE

First Verse of Shloka of The Rig Veda

In Sanskrit :

AGNIMILE PUROHITUM YAJNASYA DEVAMRITVAJAM, HOTARAM RATNADHATAMAM.

(AGNIMILE)-1 (PUROHITUM)-2 (YAJNASYA)-3

(Through expansion)--1 ( from theorising)-2 (by triggering)-3

(DEVAMRITVAJAM)-4, (HOTARAM)-5 (RATNADHATAMAM)-6

(fundamental space-matter)-4 (extraction of)-5 (extraordinary output)-6

The holistic translation is as follows:

Expanding into a theorem ;

① By theoretically triggering the fundamental field of matter in space into expansion, the extraordinary output of free energy can be obtained.

Free Energy over unity

By inference the triggering process must of necessity be less than that required for an output and brings in the concept of overunity energy production. Input less than output. It is the realm of the impossible in current scientific thinking. Is it really impossible ? It depends on our concept of the universe. If we can accept the fact that the universe always existed and the dynamic state was the only state, then it is not difficult to see that we are only tapping an infinitesimal amount from an infinite ocean of energy that already exists and will always exist and therefore HAS to be **FREE**. In the vedic treatise space is considered to be matter itself in its most fundamental form and NOTHING or EMPTINESS does not exist in the absolute sense as these words can be used only meaningfully in a relative sense. Maharishi Kapila has established the holographic nature of the Substratum of space through impeccable logic in the Sankhyakarika.

Has to be Free Energy

Verse  
The sloka is a formula . Expansion of a volume involves an increase in the surface area and the radius is the controlling parameter in a spherical volume which is the predominant shape in a fundamental matter field. Triggering involves a time aspect that is of a relatively short duration. Putting these ideas into a mathematical framework we get a formulation giving a numerical result which is presented in the sloka as a numerical code using the letters of the sanskrit language as numerical symbols, shown below.

Triggering of short duration

The most astounding part, the answer gives the cubic volume occupied by an expanding sphere of light or electromagnetic wave in cubic yards per second.

What The Answer Gives

"35531286185134564886226965"

"AG NI MI LE- PU RO HI TH'M - YA JNA AS YA - DE VA MRI TH VA JAM,- HO IHA RAM - RA THNA DHA THA M'M. "

1st Theorem Shloka or Verse Over Unity Energy Production

Putting These Ideas Into A Mathematical Framework

2

AG NI MI LE PU RO HI TH'M YA JNA AS YA DE VA MRI TH VA JAM, HO THA RAM RA THNA DHA  
THA M'M. " [ sloka ]

[number value]

3 5 5 3 1 2 8 6 1 8 5 1 8 4 5 6 4 8 8 6 2 2 6 9 6 5  
( 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 )

[ digit number ]

The 26 syllables

The sloka has 6 words and 26 syllables, each with a defined numerical value. The number is accurate to 25 decimal

Digits. As shown below it forms the expanding rate of a relative cubic volume of space, when it is triggered into

when I: is triggered

Expansion by a specific theoretical process. It is cubic yards. Taking only the first 15 digits and converting it into

Metres / cycle gives as the radial value ::  $(3.5531286185184564E+25)^{1/3} \times .9144 = 3.00612148 \times 10^8$  m/cps

The number of daily cycles in a year at that time was 365.7388. Therefore the additional

Incremental volume in a year was  $1/365.7388$ . Using the velocity of light as 299792458

(as measured today) the additional time cycles in terms of light speed is

$$299792458 / 365.7388 = 8.1969 \times 10^5$$

Therefore the Vedic value of the number of cycles of unit wavelength is

$$3.00612148 \times 10^8 - 8.1969 \times 10^5 = 299792458$$

✓ The value of light speed then is exactly as measured today. ✓

Next the derived value of light speed as number of cycles of unit wavelength

using the principle of simultaneity (which is self-similar and scale invariant

In confined spaces) gives :

$$Y = 2 / ((1+2^3)^{1/2} - 2) / 2 = 8.4721 \text{ and } 10^{8.4721} = 296575967$$

Taking the log (10) ratio of difference between measured and derived value as

(3)

# The Expansion Process From The Triggering

$$\text{Log}[299792458 / 296575967] = 4.6847 \times 10^{-3}$$

The ratio of the Solar Radius to the Earths orbital radius is

$$6.986 \times 10^8 / 1.4912 \times 10^{11} = 4.6847 \times 10^{-3}$$

This is identical to the Vedic calculation. The Vedic concept of the Field of space was different from current views in physics.

The field in space YIELDS FREE ENERGY WHEN IT'S SYNCHRONISED AND COHERENT STATE IS UPSET SUDDENLY BY A TRIGGERING FORCE.

*When upset suddenly By Triggering Force*

*The 2nd Sloka Expansion Yields Benefits*

(2) The second sloka gives the historical development of the first formulation. Expansion is a fundamental property that yields numerous benefits whereas the opposite is totally devoid of benefit. Expansion occurs by itself if obstruction is removed while compression requires, not only the removal of obstruction but needs additional inputs to make it happen. In Sanskrit:

AGNIH : PURVE-BHIRSI-BHRIDYO NUTANAIRUTA, SA DEVAM EHA VAKSATI.

(AGNIH :-)1 (PURVE-BHIRSI-BHIRIDYO)-2 (NUTANAIRUTA)-3,

(Expansion :-)1 (axiomatic- reasoning-theorising)-2 (original and creative forms)-3

(SA)-4 (DEVAM)-5 (EHA)-6 (VAKSATI)-7

(with)-4 (natural laws)-5 (core)-6 (provides creative solutions)-7

The holistic translation is as follows:

Expanding:

*The 2nd Sloka*

EXPANSION: IT IS THE FUNDAMENTAL CAUSE OF PROVIDING THE BASIC LOGICAL THINKING PROCESS IN THE MIND BY CREATING NEW or VARIED FORMS or THOUGHTS THAT PROVIDE CREATIVE SOLUTIONS.

As stated in the first sloka commentary, space is fundamental matter and is also the substance in human and all other minds. Expansion of space causes various forms to be created and the human mind differentiates these forms to structure the logic of thinking.

*The Expansion of Space continually creates the cause Basis of consciousness*

IN OTHER WORDS THE EXPANSION CHARACTERISTICS OF SPACE THAT CREATES VARIATIONS IN FORM CONTINUALLY IS THE CAUSE OR BASIS OF CONCIIOUSNESS AND THE BRAIN DECODES THIS DYNAMIC CODE. If there was no quality of expansion there would be no consciousness or thinking process or logical thought! While this theorem brings in the concept of dynamic geometry of spacial matter as the very fundamental process of

*Note contin*

C  
U  
P

4

# Triggering By High Frequency Energy Pulses

consciousness or thinking, it also implies that the dynamic aspect of expansion with changing forms produces a spacial matter field structure that can only be explained today by an holographic process. The interference produced by the changing forms also created recognizable patterns that the human mind understood by decoding through structured logic.

The Basis For the Theory of Meditation The 3rd Sloka

This sloka forms the basis for the whole theory of meditation and the genetic connection between meditation and the process of reviving genetically encoded information in subsequent generations. The Atharva veda deals with this aspect in the first four slokas. The numerical value is a complex parameter and will be dealt with in a later chapter.

3. The third sloka emphasizes the importance of applying dedicated motivation and skill in inquiring and furthering knowledge on the expansive quality of the fundamental matter field and putting it to use of man.

Putting The Matter Field to use

In sanskrit:

AGNINA RAYIM-ASHNAVAT-POSHAM-EVA DIVEDIVE YASHASAM VIRAVATTAMAM.

(AGNINA)-1 (RAYIM-ASHNAVAT-POSHAM-EVA)-2

(Expansive property)-1 (with speed --Suddenly like a flash of lightning--energy input--only)-2

DIVEDIVE)-3 (YASHASAM)-4 (VIRA VATTAMAM)-5.

(progressively) -3 (extraordinary)-4 (power beyond input) -5

The holistic translation is as follows:

Expanding:

A CONTINUOUS AND CONSISTENT EFFORT AT MAINTAINING THE EXPANSIVE QUALITIES (OF SPACE OR FUNDAMENTAL MATTER) BY TRIGGERING IT WITH AN INPUT OF ENERGY IN FLASHES ONLY, CAN PROGRESSIVELY YIELD EXTRAORDINARY RESULTS OF INCREMENTAL POWER BEYOND & OVER THE INPUT.

Triggered It with Energy In Flash only

It is an extra-ordinary theorem. Triggering with flashes (like lightning or sparks) of energy continuously and consistently will progressively result in an incremental output of energy greater than the input. Triggering by high frequency energy pulse inputs will yield continues power of lower frequency energy flow incrementally greater than the input from space. Space is a storehouse of energy accumulated over eons that can be extracted by this technique. It is a superconductive state.

Space A Store House Energy

(The Tesla coil is an example. The laws of electromagnetism is based on this principle but man has yet to learn to tap it directly to get the incremental output, for the present electrical system is inefficient and absorbs energy.)

The Tesla Coil  
Nikola Tesla  
The Super Genesis

Triggering By High Frequency Energy Pulse Inputs

5

# The Triggering Process

The 4th Sloka

4. The fourth sloka very consistently indicates the process and nature of this incomparable or extraordinary form of energy and how it is transmitted for the user to benefit by its propagation. The reader is requested to take note of the consistency with which the subject of expansive quality we now identify with energy, is connected with every sloka and this connection can be evident ONLY THROUGH HOLISTIC DECODING. In Sanskrit:

The holistic translation is as follows:

AGNE YAM YAJNAM-ADHVARAM VISVATAH: PARI-BHU-RASI SA IDDEVESU GACHATI.

(AGNE)-1 (YAM)-2 (YAJNAM-ADHVARAM)-3 (VISVATAH)-4

(Expansion itself)-1 (which)-2 (input energy trigger --specific or as required)-3 (universal)-4

(PARI-BHU-RASI)-5

(excessively or abundantly-rising increasing multiplying-essence or core or foundation)-5

(SA)-6 (IDDEVESU)-7 (GACHATI)-8.

(with)-6 (space)-7 (propagates or spreads or promotes)-8.

Expanding:

THE PROPAGATION OF ENERGY THROUGH TRIGGERING EXPANSION OF SPACE IS SELF REGENERATIVE AND THE EXPANSION PROCESS ITSELF TRIGGERS THE CORE TO MULTIPLY OR INCREASE ITS CONTENTS ADEQUATELY ENOUGH TO RADIATE IT UNIVERSALLY.

A number of important ideas are present in this theorem. Expansion is regenerative and due to regeneration it provides the additional potential or motivating force to propagate universally and implies distance is not a limitation. Triggering the core releases energy and this process is self motivated due to the extra energy available due to expansion. There is a mechanism by which the potential to propagate to any distance is made adequate, implying an instantaneous connection that evaluates the limit of this potential to make it adequate and thereby indicating that no wastage is involved or energy is always conserved and in TOTAL BALANCE. Radiation is a continuous process and therefore a potential gradient is established from the core or center to the periphery.

The electro-magnetic energy propagation laws are based on the same principles but the observed polarization of the field with electric and magnetic properties with time delays produced a number of conceptual problems that forced the current scientific community to eliminate the very fundamental matter field with the ludicrous concept that all manifestation comes out of nothing and energy radiation takes place without a fundamental substratum.

Where current science failed to grasp

The 4th Sloka

# THE FREE ENERGY MOTOR

# THE FREE ENERGY MOTOR

Direction of motion Of Magnetic rotor

# THE FREE ENERGY MOTOR

# THE FREE ENERGY MOTOR

4

# THE FREE ENERGY MOTOR

A major advantage of having centralized ring magnets over individual super magnets is that the radiating field is not contained or conserved. The keeper discs with prongs distribute the magnetic field lines with maximum intensity along paths that have low reluctance. In a rotating magnetic field the field lines would 'short out' at maximum intensity along paths that provide a magnetic 'short circuit' condition. In the ten prongs and ten magnets configuration, since all ten coils and prongs would provide 'short circuit' conditions simultaneously, the distributed effect would require a lower level of polarity reversing current simultaneously. There after the field would virtually lock into the 'short circuit' mode till the next coil is approached. That is a 36 deg. Period.

Canada

Here are photocopies, six pages of the plans of Srinivasan free energy motor and five pages of his maths while you and explanation of same.

The key he stresses is triggering the background quantum energy field, spending it and extracting the energy.

Gopal Srinivasan says this method is the simplest and easiest way of harnessing the zero point quantum energy field.

Please pass this info on to people you can trust to would be interested in duplicating Srinivasan's motor or improving on it.

Or better still, installing a free energy device in a car with an electric motor and driving it around for days or weeks. Look: no fossil fuels needed.

So please spread this info to all those interested. With every one having free energy devices for their cars, homes, offices, factories, all public transport etc. – it will be truly an energy revolution- energy independence for the world.

This will lead to the decentralization of economic and political power – a true revolution! So if your friends do try to build Srinivasan's motor, tell them to be careful- their life could be in danger from those who don't want free energy to be successful. A friend in the bottle.

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26

[Margin Note: the 26 syllables]

[Digit number]

The sloka has 6 words and 26 syllables, each with a defined numerical value. The number is accurate to 25 decimals.

Digits. As shown below, it forms the expanding rate of a relative cubic volume of space, when it is triggered into

Expansion by a specific theoretical process. It is cubic yards. Taking only the first 15 digits and converting it into

Metres / cycle gives as the radial value::  $(3.5531286185184564E +25)^{1/3} \times .9144 = 3.00612148 \times 10^8 \text{ m/cps}$

The number of daily cycles in a year at that time was 365.7388. Therefore, the additional incremental volume in a year was  $1/365.7388$ . Using the velocity of light as 299792458

(as measured today) the additional time cycles in terms of light speed is  $299792458 / 365.7388 = 8.1969 \times 10^5$

Therefore, the Vedic value of the number of cycles of unit wavelength is  $3.006-12148 \times 10^8 - 81\,969 \times 10^5 = 299792458$ .

The value of light speed then is exactly as measured today.

Next the derived value of light speed as number of cycles of unit wavelength, using the principle of simultaneity (which is self-similar and scale invariant in confines races) gives:

$$Y = 2 / ((1+2)^{1/2} - 2) / 2 = 8.4721 \text{ and } 10^{8.4721} = 296575967$$

Taking the log (10) ratio of difference between measured and derived value as

$$\text{Log} [299792458 / 296575967] = 4.6847 \times 10^{-3}$$

The ratio of the Solar Radius to the Earth’s orbital radius is

$$6.986 \times 10^8 / 1.4912 \times 10^{11} = 4.847 \times 10^{-3}$$

This is identical to the Vedic calculation. The Vedic concept

of the field of space was different from current views in the physics.

The field in space YIELDS FREE ENERGY WHEN IT'S SYNCHRONIZED

AND COHERENT STATE IS UPSET SUDDENLY BY A TRIGGERING FORCE. [Side margin note: when upset suddenly by triggering force.]

The second sloka gives the historical development of the first formulation. Expansion is a fundamental property that yields numerous benefits, whereas the opposite is totally devoid of benefit. Expansion occurs by itself if obstruction is removed while compression requires, not only the removal of obstruction, but needs additional inputs to make it happen. In Sanskrit:

AGNIH: PURVE-BHIRSI-BHRIDYO NUTANAIRUTA, SA DEVAM EHA VAKSATI.

(AGNIH):- 1 (PURVE-BHIRSI-BHRIDYO)- 2 (NUTANAIRUTA)- 3

(Expansion):-1 (axiomatic- reasoning- theorizing)- 2 (original and creative forms)- 3

(SA)- 4 (DEVAM)- 5 (EHA)- 6 (VAKSATI)- 7

(With)- 4 (natural laws)- 5 (core)- 6 (provides creative solutions)- 7

The holistic translation is as follows:

Expanding:

EXPANSION: IT IS THE FUNDAMENTAL CAUSE OF PROVIDING THE BASIC LOGICAL THINKING PROCESS IN THE MIND BY CREATING NEW OR VARIED FORMS OR THOUGHTS THAT PROVIDE CREATIVE SOLUTIONS. [Side margin note: The 2<sup>nd</sup> Sloka]

As stated in the first sloka commentary, space is fundamental matter and is also the substance in human and all other minds. Expansion of space causes various forms to be created and the human mind differentiates between these forms to structure the logic of thinking.

IN OTHER WORDS, THE EXPANSION CHARACTERISTICS OF SPACE THAT CREATES VARIATIONS IN FORM CONTINUALLY IS THE CAUSE OR BASIS OF CONSCIOUSNESS AND THE BRAIN DECODES THIS DYNAMIC CODE. [Side margin note: note continually] If there was no quality of expansion there would be no consciousness or thinking process or logical thought! While this theory, belongs in the concept of dynamic geometry of spatial matter as a very fundamental process of consciousness or thinking, it also implies that the dynamic aspect of expansion with changing forms produces a spatial matter field structure that can only be explained today by an holographic process. The interference produced by the changing forms also created recognizable patterns that the human mind understood by decoding through structured logic.

[Side margin notes: the expansion of space continually creates the cause basis of consciousness. Second note: triggering by high-frequency energy pulses]

This sloka forms the basis for the whole theory of meditation and the genetic connection between meditation and the process of reviving genetically encoded information in subsequent generations. The Atharva veda deals with this aspect in the first four slokas. The numerical value is a complex parameter and will be dealt with in a later chapter.

[Side margin note: The basis for the theory of meditation.]

3. The third sloka rep emphasizes the importance of applying dedicated motivation and fill in the wiring and furthering knowledge on the expansive quality of the fundamental matter field and putting it to the use of man.

In Sanskrit:

AGNINA RAYIM-ASHNAVAT-POSHAM-EVA DIVEDIVE YASHASAM VIRAVATTAMAM.

(AGNINA)-1 (RAYIM-ASHNAVAT-POSHAM-EVA)- 2

(Expansive property)- 1 (with speed-- suddenly, like a flash of lightning-- energy input-- only)- two

(DIVEDIVE)- 3 (YASHASAM)- 4 (VIRAVATTAMAM)- 5

The holistic translation is as follows:

Expanding:

A CONTINUOUS AND CONSISTENT EFFORT AT MAINTAINING THE EXPANSIVE QUALITIES (OF SPACE OR FUNDAMENTAL MATTER) WILL BY TRIGGERING IT WITH AN INPUT OF ENERGY IN FLASHES ONLY, CAN PROGRESSIVELY YIELD EXTRAORDINARY RESULTS OF INCREMENTAL POWER BEYOND & OVER THE INPUT. [Side margin note: the 3<sup>rd</sup> Sloka]

It is an extra-ordinary theorem. Triggering with flashes, (like lightning or sparks) of energy continuously and consistently will progressively result in an incremental output of energy greater than the input. Triggering by high-frequency energy pulse inputs will yield **continues (continuous?)** Power of lower frequency energy flow, incrementally greater than the input from space. Space is a storehouse of energy accumulated over eons they can be extracted by this technique. It is a superconductive state.

[Side margin notes: triggering by high-frequency energy pulse inputs;-a storehouse of energy.]

The Tesla coil is an example. The laws of electromagnetism are based on this principle, but man has yet to learn to tap it directly to get the incremental output, for the present electrical system is inefficient and absorbs energy.

[Side margin note: The 4<sup>th</sup> sloka]

4. The fourth sloka very consistently indicates the process and nature of this incomparable or extraordinary form of energy and how it is transmitted for the user to benefit by its propagation. The reader is requested to take note of the consistency with which the subject of expansive quality we now identify with energy, is connected with every sloka and this connection can be evident ONLY THROUGH HOLISTIC DECODING.

The holistic translation is as follows:
