

## **Masterclass #49 Zoom Transcript Balancing the Elementary Particles; an experiment in Radionics with Marty Lucas (via AI)**

00:06:43.000 --> 00:07:00.000

Different analysis sheets. And then we would balance the things that were, you know, out of bounds and then we go through the analysis again and balance and and we just kept on that treadmill, until either the situation was resolved.

00:07:00.000 --> 00:07:05.000

Well, we got tired of doing the work and we moved on to another project. And I found that to be just.

00:07:05.000 --> 00:07:12.000

My money. And so for the last 20 years, I've been looking to find what that caused.

00:07:12.000 --> 00:07:25.000

Behind the cause behind the cause is and ultimately my goal is to find that Magic bullet, if you will, so that I can dial it in, push the button and all the problems go away.

00:07:25.000 --> 00:07:44.000

I'm not there yet. But I keep working and, and this is some of the research that I've done recently and I want to share it with you so that not, to tell you what a great job that I'm doing but hopefully to a great job that I'm doing but hopefully to inspire some of you to take this research to the next level.

00:07:44.000 --> 00:07:49.000

And to find out some of the other stuff that we just don't know yet. And just some disclaimers here.

00:07:49.000 --> 00:08:00.000

I am not a doctor. Hello, medical device and I'm not qualified to do so. I do my own research and I'm self-funded.

00:08:00.000 --> 00:08:09.000

And frankly, if you're better at this kind of research. Please do it. And my conclusions are based upon what I have found.

00:08:09.000 --> 00:08:11.000

What I have found that works for me. And for me, what works is more important than why it works.

00:08:11.000 --> 00:08:25.000

And oftentimes even here in the the lab this morning. There's things that just leave me completely dumbfounded that I don't know exactly why.

00:08:25.000 --> 00:08:33.000

They do work, but when they do, I run with it. And for those that are using different radionic type instruments, I'm using the.

00:08:33.000 --> 00:08:38.000

Kelly Research, Technologies Instruments, the Hieronymus type. 2 dial instruments.

00:08:38.000 --> 00:08:48.000

I'm not currently using any of the computerized instruments. I'm not using any of the, automated ones either.

00:08:48.000 --> 00:09:01.000

Now, the idea where this particular line of research from. Is it comes back to the idea that each of us is manifesting our daily lives.

00:09:01.000 --> 00:09:06.000

And so we manifested the, you know, our homes. We manifested our cars. We manifested our relationships.

00:09:06.000 --> 00:09:16.000

You know, and all of the things that are around us. And it seems to me that if we're doing that manifesting, what we really want to do is find out.

00:09:16.000 --> 00:09:24.000

How do I get to the part of that manifestation and how do I find out how I can perfect that process.

00:09:24.000 --> 00:09:38.000

And I know that humans have been doing that for thousands if not tens of thousands of years and there's many people on this call that are probably much more advanced spiritually in doing some of this research than I am.

00:09:38.000 --> 00:09:46.000

But in my own way, You know what I'm looking for is a way to get better results for my clients.

00:09:46.000 --> 00:09:53.000

And for me to have a better understanding of what's going on. And so I try to take things down to the basics so that I can.

00:09:53.000 --> 00:10:01.000

Figure things out for myself. And it seems like that if we're going to be manifesting something here in the In the physical world, we have to have intent.

00:10:01.000 --> 00:10:07.000

And then we have to have the energy. And then we have to have the matter.

00:10:07.000 --> 00:10:12.000

And so if we don't have any one of those, then of course there's gonna be, some.

00:10:12.000 --> 00:10:16.000

Some interference there and and I've got entire classes on crafting and focusing intent and that's you know pretty straightforward stuff.

00:10:16.000 --> 00:10:28.000

And and I think we probably got some stuff here on the USBA that's recorded and I know I've got some stuff on my website that's recorded and I know I've got some stuff on my website that's recorded as well.

00:10:28.000 --> 00:10:34.000

The idea being that the more focused your intent, the less energy it's going to take to manifest it.

00:10:34.000 --> 00:10:51.000

Now the other. Side of intent is that as you get good at this. You very often will manifest what you're thinking about and, they say one of the greatest curses you can give somebody is give them what they want.

00:10:51.000 --> 00:11:07.000

And so when you're crafting your intent and you're focusing that energy, make sure that you are asking for what you really want because the universe simply provides and, and really doesn't have judgment on what it provides.

00:11:07.000 --> 00:11:13.000

So we better focus, it takes less energy. Now energy can come from the person that's holding that platform.

00:11:13.000 --> 00:11:22.000

It can come from the rituals and come from the instruments. You know, any one of those things.

00:11:22.000 --> 00:11:32.000

And as for the matter, you know, that's the stuff that's all around us. That's the the molecules, the electrons, the protons, the neurons.

00:11:32.000 --> 00:11:47.000

Neutrons and that's really what brought me to the elementary particles. A few years ago I was working with some different radionics folks and we were using radionics to change the pH in a liquid.

00:11:47.000 --> 00:11:52.000

And for those that have been bouncing around radiotics for very long at all, That's something that we do on a fairly regular basis.

00:11:52.000 --> 00:12:00.000

So it's not like, oh my gosh, can this be done? I mean we we can change pH with radionics.

00:12:00.000 --> 00:12:15.000

We do it. Well, pH is a measure of the parts of hydrogen in that solution. Hydrogen ions I should say and that hydrogen ion is basically the H plus which is a proton.

00:12:15.000 --> 00:12:33.000

So if I am changing the pH of a solution. I am changing the concentration of those. H plus ions, I'm changing the concentration of those protons that are floating around.

00:12:33.000 --> 00:12:47.000

Well, protons are made up of elementary particles. And if I can change pH, that means that I can start doing some of the work and maybe I can start looking at the elementary particles and see where we can take it further.

00:12:47.000 --> 00:12:59.000

And for most of our radionic research, we typically don't get much further than, you know, balancing different chemicals or molecules or sometimes balancing pH, certainly balancing the different energies.

00:12:59.000 --> 00:13:06.000

But I haven't run across the time where we really got into the elementary particles.

00:13:06.000 --> 00:13:16.000

No, I'm not a physicist. And so my understanding of the elementary particles is based upon my work with them.

00:13:16.000 --> 00:13:23.000

And it may be at odds with what you understand with your physics degree or what you understand from quantum.

00:13:23.000 --> 00:13:28.000

And that's absolutely okay. I'm just gonna share with you what I found is working.

00:13:28.000 --> 00:13:41.000

And hopefully those of you that have more experience in dealing with, you know, some of these, esoteric properties can really fill in some of the details that I'm missing.

00:13:41.000 --> 00:13:58.000

Now, according to the internet, there are 12 elementary particles. And there's up quarks and down quarks and electrons and bottom quarks and muons and gluons and I know nothing about them except what they show on the internet.

00:13:58.000 --> 00:14:11.000

But what I found that was really interesting is that you know, of all these little bits and pieces that are supposed to make up the reality that we live in this physicality that we enjoy.

00:14:11.000 --> 00:14:19.000

They only use 3 of them to you to build the matter that is all around us and that's the electron the up quark and the down quark

00:14:19.000 --> 00:14:31.000

And according to what I've read that photons are what is the molecules and the elementary particles used to communicate with each other.

00:14:31.000 --> 00:14:37.000

And the statement in the book that I read just kind of threw that out there and then kind of left it, you know, on its own.

00:14:37.000 --> 00:14:45.000

And I'm thinking, okay. What does that really mean when a work is communicating with another court?

00:14:45.000 --> 00:15:07.000

You know, is this businesses telling me that these these elementary particles are sentient. or is he trying not to say that they're sentient and certainly there's entire philosophies that will tell you that everything in our reality is sentient but you know that's neither here nor there so we've got electrons up quarks and down quarks.

00:15:07.000 --> 00:15:15.000

And then photons seem to make it all work together. Okay, I'll go with that. That seems to work for me.

00:15:15.000 --> 00:15:27.000

And so. With the electrons and the protons and then the neutrons and then we and those are what we build all the molecules out of.

00:15:27.000 --> 00:15:41.000

Okay, so far so good. Okay, this is what eighth grade chemistry or eighth grade science. And then, and then we've got the the photons that act as the communication links between the particles.

00:15:41.000 --> 00:16:02.000

Again, in our radionic work, we have balanced with Bio photons and certainly if you've worked with the soma t and you work with structured water and you've done some of the study, then you understand about the bio photons and the bio photons, which is a lifelike particle, are what the cells used to communicate with.

00:16:02.000 --> 00:16:06.000

And in my view, a bio photon is simply a differentiated photon. Okay, a different flavor of photons.

00:16:06.000 --> 00:16:19.000

If you will, or part of that photon family. And so one of the first things I started doing was balancing with photons to see what would happen.

00:16:19.000 --> 00:16:33.000

You know, the preachers tell us that we are beings of light. And if we're white, then it seems to me that if I had more light, then I would have more health and that would be more better.

00:16:33.000 --> 00:16:42.000

And in many areas of my life, I absolutely subscribe to the moron theory. You know, if a little bit's good, let's put a little more on.

00:16:42.000 --> 00:16:50.000

Well, anyway, so I start balancing with the with the photons and I wanted to find out what all those other.

00:16:50.000 --> 00:16:58.000

Elementary particles did. You know, from the reading that I've done and I'm not a physicist.

00:16:58.000 --> 00:17:05.000

It doesn't seem that Maine's team stream science knows much about what those other particles do.

00:17:05.000 --> 00:17:13.000

But as we start looking at those other particles, maybe they are dealing with consciousness. Maybe they are interdimensional.

00:17:13.000 --> 00:17:22.000

No, in my view. We're living in this polygon of light and everything around us is light and it's different forms.

00:17:22.000 --> 00:17:30.000

And that light is controlled by consciousness. So maybe as we break down the pieces and parts in this polygraphic reality.

00:17:30.000 --> 00:17:37.000

Some of those pieces and parts may actually deal with consciousness itself. Which I think is really, really cool.

00:17:37.000 --> 00:17:42.000

So. On I go.

00:17:42.000 --> 00:17:47.000

Now the thing is, Radionics, I don't have to know what all those pieces and parts do.

00:17:47.000 --> 00:17:57.000

The way our systems are set up when we measure something. It gives us a reading that is based upon General Vitality.

00:17:57.000 --> 00:18:14.000

So general vitality is a measure of the overall coherence of the energy of the system. And if I add something that increases that coherence, then it's generally considered good if I add something that that lessens that coherence, it's generally considered bad.

00:18:14.000 --> 00:18:24.000

And so when I have a rate and I do an analysis for that rate, It typically gives me a reading based on general vitality.

00:18:24.000 --> 00:18:29.000

So that general vitality is the benchmark. If it's less than general vitality, then it means some more.

00:18:29.000 --> 00:18:34.000

If it's higher than general vitality, then there's something that's holding gender vitality down.

00:18:34.000 --> 00:18:44.000

And so with that in mind, I don't need to know what bosons and luons and charm quarks and all those things do.

00:18:44.000 --> 00:18:51.000

I can measure them and by measure them that I can find out, okay.

00:18:51.000 --> 00:19:03.000

What happens to my subject when I start balancing on these things? Now, just as an aside, those people that really know me know that I do.

00:19:03.000 --> 00:19:09.000

Most of my work and I would say probably 99% of my work balancing with reagents.

00:19:09.000 --> 00:19:21.000

I do almost no balancing with rates. Because I find that a rate is sometimes a hundred times less effective than using a complex reagent.

00:19:21.000 --> 00:19:29.000

And I've gotten entire class on how to build those reagents to make them that powerful. But in this experiment, I didn't want to.

00:19:29.000 --> 00:19:38.000

Show a bunch of work that couldn't be replicated. So in this experiment when I did the balancing I balanced using just rates.

00:19:38.000 --> 00:19:49.000

And then in my lab work here, what I do is I use. Reagents to do that balancing because, well, it just works better.

00:19:49.000 --> 00:19:58.000

And so that's one of the things. And as I'm thinking about balancing these. Elementary particles.

00:19:58.000 --> 00:20:08.000

Since matters composed of elementary particles then if I'm going to manifest something, I'm going to have to have enough of this stuff.

00:20:08.000 --> 00:20:19.000

And so, you know, let's say that. I want to build a house. If I want to build a house, well, I've got to get the site for the house.

00:20:19.000 --> 00:20:20.000

I've got to get the plans. I've got to get the workmen out there. I've got to get the equipment.

00:20:20.000 --> 00:20:27.000

I've got to get all of the all of the tools and all the supplies and all the rest of that stuff.

00:20:27.000 --> 00:20:36.000

And I've got to have enough money to make it all happen. Now if I have everything I need to build that house.

00:20:36.000 --> 00:20:44.000

But I'm only getting one box of nails a day from the Home Depot. It's gonna take forever for me to.

00:20:44.000 --> 00:20:53.000

Manifest the construction of that house. Because there is that choke point where I simply don't have enough.

00:20:53.000 --> 00:20:59.000

Nails or screws in order to complete the project. And I'm wondering as I do my work.

00:20:59.000 --> 00:21:08.000

Is how much of our manifestation is being hampered by a lack of sufficient

00:21:08.000 --> 00:21:14.000

Whatever. You know, do I have enough charm quarks? Do I have enough?

00:21:14.000 --> 00:21:22.000

Bottom quarks, do I have enough blue ones? Do I have enough? Bosons do I have enough of whatever that is?

00:21:22.000 --> 00:21:30.000

And so my idea being that if these are the building blocks of matter. And I'm trying to manifest.

00:21:30.000 --> 00:21:39.000

Then I wanna make sure that I have enough of that stuff on hand to be able to do it so that I can go ahead and manifest whatever is that I'm thinking about.

00:21:39.000 --> 00:21:50.000

And then when I had enough stuff on me. And the manifestation is gonna go much faster. And most of the work that I do in my lab, I'm not.

00:21:50.000 --> 00:22:00.000

Necessarily manifesting, you know, new cars or houses or whatever. What I'm working to do is manifest health and wellness for my clients.

00:22:00.000 --> 00:22:09.000

Yeah, and so I wanna make sure that if they're going to be manifesting health and wellness, they have everything they need to do that.

00:22:09.000 --> 00:22:24.000

And some years ago I read that. Some physicists believe that these elementary particles are coming into our reality and going out of our reality through that 0 point energy field.

00:22:24.000 --> 00:22:33.000

And it's the consciousness that actually holds them here. It's the consciousness that coagulates them and forms them into matter.

00:22:33.000 --> 00:22:48.000

And since I know that we can change the pH of. Liquids with the radionics, then it struck me that maybe I can capture some of these elementary particles bring them into this reality.

00:22:48.000 --> 00:22:56.000

And use them to help my clients. Manifest their health and wellness.

00:22:56.000 --> 00:23:02.000

And that way they can manifest it. At the rate that they want.

00:23:02.000 --> 00:23:11.000

And the other idea being is if I can figure out how I can manifest this stuff directly out of the.

00:23:11.000 --> 00:23:19.000

0 point energy field. Then that is going to make it much simpler for me to get things done.

00:23:19.000 --> 00:23:38.000

And it will also make it easier for that client. Now traditionally the science will teach us that we get all of our energy and all of our nutrition directly from you know the reality that's around us and so we get our nutrition from our food and we get the oxygen from the air, etc, etc, etc.

00:23:38.000 --> 00:23:50.000

No, for those of you that are dowzers and for those of you that have your instruments handy, I asked this question for you and you use this information however you want to.

00:23:50.000 --> 00:24:04.000

What percentage of your nutrition and energy are you pulling directly from the ether right now? What percentage of the your energy and information?

00:24:04.000 --> 00:24:17.000

Your energy and nutrition, are you pulling directly from the ether right now? Now when you pull out your Dowser and you start checking to see what that percentage is.

00:24:17.000 --> 00:24:24.000

If that percent is anything other than 0.

00:24:24.000 --> 00:24:36.000

That means that you are pulling a certain amount of energy and nutrition directly from the Ether directly from that 0 point energy field.

00:24:36.000 --> 00:24:43.000

And if you can pull a certain amount out of there, what's stopping you from pulling everything that you need from that 0 point energy field.

00:24:43.000 --> 00:24:53.000

And before you think that I've really stepped off the deep end. You know, ghost look at these people that tell us that they are breath.

00:24:53.000 --> 00:25:13.000

They're the people that live without eating. Now I've met one or 2 of them and I don't know if they sneak us snickers every once in a while, but the point isn't that the point is that throughout history there have been many many people that have said that they've lived without eating.

00:25:13.000 --> 00:25:29.000

It's been well documented and even if it happened only once that means it's possible if it's possible then we can figure out how and with your dousing right now you may have already figured out that you know you're pulling some of your energy and information directly from the ether even as we speak.

00:25:29.000 --> 00:25:38.000

And if that's the case, then you are manifesting right out of thin air, if you will.

00:25:38.000 --> 00:25:45.000

And for those that have studied nutrition and studying different systems, you know that your body will go after the things that are most important first.

00:25:45.000 --> 00:25:55.000

And so as you work to figure out how to. Optimize your ability to manifest. Your energy and nutrition.

00:25:55.000 --> 00:26:06.000

Then perhaps you don't need to be as concerned about all of the vitamins and minerals and the state of the food that we're currently eating.

00:26:06.000 --> 00:26:15.000

So these are the type of questions that I start asking and I start pondering and that's one of the advantages of being in a in a small, rural area where I spend a lot of time by myself and I can think about these sorts of things.

00:26:15.000 --> 00:26:24.000

Now on the other hand, for the outside world, they think that I'm a little bit nuts.

00:26:24.000 --> 00:26:33.000

Well, a little bit nuts is probably not all bad. So, so here we are. I want to find out how I can maximize that.

00:26:33.000 --> 00:26:38.000

Manifestation.

00:26:38.000 --> 00:26:45.000

I'm gonna find out how I can grab onto those particles as they're coming out of that 0 point energy field.

00:26:45.000 --> 00:26:58.000

I wanna know how I can mold them and coagulate them into matter. And I wanna know how I can change things, you know, right in real time.

00:26:58.000 --> 00:27:07.000

Not, We'll see for counting these elementary particles for our work. And that was really the project that I brought on here.

00:27:07.000 --> 00:27:16.000

So the part, this following part is part of analysis sheet where I track my work. The metrics that I use are the ones that I find useful.

00:27:16.000 --> 00:27:21.000

You will probably have different metrics that are useful for you. I'm not offering this as the be all and all gold standard written in stone.

00:27:21.000 --> 00:27:33.000

This is the way to do it. I'm offering this as a way for you to take a look at your own work.

00:27:33.000 --> 00:27:42.000

And see, okay, what happens if I balance this? How do I keep track of that? How do I analyze and see what's really going on.

00:27:42.000 --> 00:28:02.000

And so what I do is I have a fairly standard. Spreadsheet and along the top I have the different either rates or different reagents that I use and along the side, you know, I have the different things that I check.

00:28:02.000 --> 00:28:09.000

And then when I get that data, then I can start graphing some of it to see, you know, what I've done.

00:28:09.000 --> 00:28:18.000

For those of you that are PowerPoint warriors and that are really good into Excel, you may notice that there's a whole bunch of graphs that I could have made that I didn't.

00:28:18.000 --> 00:28:23.000

And you may say, hey, you know what, there's different ways to look at this data and you're absolutely right.

00:28:23.000 --> 00:28:29.000

But what I want to show you is what I've got. And what's working.

00:28:29.000 --> 00:28:37.000

And so here is a fairly standard, analysis sheet that I use. And you'll see across the top, I've got the different quarks.

00:28:37.000 --> 00:28:47.000

You know, the up quark, the down quark, the electron, the electron, the retina, the charm part, and you'll see the rates that are there and I'll share the rates with you in the chat after bit.

00:28:47.000 --> 00:28:54.000

And then along the side are some different things that I like to check. And I use these for my metrics.

00:28:54.000 --> 00:29:05.000

And I've actually the metrics that I typically use is probably about twice that many. Don't worry if you don't really understand what some of these metrics are.

00:29:05.000 --> 00:29:06.000

Again, I use them internally. In my lab and I certainly teach my students how to use them.

00:29:06.000 --> 00:29:17.000

But, in this case, what I wanted to see was just you know, what happens is I'm making these changes.

00:29:17.000 --> 00:29:22.000

And I think most of you are probably very familiar with the general vitality of the white light and the oral distortion.

00:29:22.000 --> 00:29:31.000

Those are really good ones to, look at as we start and then we'll get into some more interesting stuff later.

00:29:31.000 --> 00:29:43.000

Okay. When you're doing this research, use the metrics that work for you. Now I'll give you, you know, you know, one of the advantages that I have.

00:29:43.000 --> 00:29:52.000

Is that I've probably got the largest collection of the Kelly super tuners of anybody in the country.

00:29:52.000 --> 00:29:58.000

And what that allows me to do is preset.

00:29:58.000 --> 00:30:08.000

Nearly any of the rates that I want to check. And so as I'm doing this kind of analysis, I don't have to do the Stuy Pencil.

00:30:08.000 --> 00:30:23.000

I'm smiling and dialing it is very simply throwing the switch check check the check the reading throw the switch check the reading throw the switch and check the reading and that allows me to do a lot of analysis and a lot allows me to do a lot of comparative analysis.

00:30:23.000 --> 00:30:30.000

If all you're doing is working this with a 2 bank unit. Or maybe a 3 bank unit.

00:30:30.000 --> 00:30:37.000

It's going to be much more of a challenge for you to do this kind of research. You can still do it and still get good results.

00:30:37.000 --> 00:30:47.000

But what I find is the more metrics that I check. Yeah, the more those things along that one edge that I check.

00:30:47.000 --> 00:30:56.000

The more insight I can get into what is going on with that particular project.

00:30:56.000 --> 00:31:08.000

It tells me what works and what doesn't work. It tells me how different things go together. And it also shows me that sometimes general vitality can go down, but you're still making good progress.

00:31:08.000 --> 00:31:14.000

And so this is the type of analysis that I encourage all of you to use if you're doing this kind of research.

00:31:14.000 --> 00:31:21.000

So that you can see what's really happening. General vitality is not.

00:31:21.000 --> 00:31:30.000

Everything when it comes to balancing when it comes to doing radionics. What you will find as you get good at this.

00:31:30.000 --> 00:31:40.000

Is that there will come a point in your work where general vitality is no longer a useful metric.

00:31:40.000 --> 00:31:55.000

It will simply be so high, it's not giving you any more useful information. And so you will need some of these other metrics in order to see what kind of progress you're making.

00:31:55.000 --> 00:32:00.000

Now, here's another thing that I have found and again this one put it in the back pocket.

00:32:00.000 --> 00:32:07.000

But every time you run an analysis, you collapse the wave of probability.

00:32:07.000 --> 00:32:21.000

I have proven that every time I analyze something, I lock in that reading. I don't know if this works for radio for the automated radionics or if it takes consciousness to collapse the way.

00:32:21.000 --> 00:32:29.000

But what I do know is that if I simply run a series of rates or series of reagents.

00:32:29.000 --> 00:32:41.000

I will not get as good a result. As if I run a reagent. And analyze run another reagent and analyze run another reagent and analyze.

00:32:41.000 --> 00:32:53.000

That analyzation is very important. Now the other thing is I don't know how much of that analyzation is actually changing the values.

00:32:53.000 --> 00:33:09.000

On how much the actual work is changing the values. And that is something that is one of those interesting questions that's in the back of my mind all the time, but you know in the case of radionics what I do know for sure is that a watched pot does indeed boil.

00:33:09.000 --> 00:33:18.000

So if you aren't doing it now. When you run any kind of work. Run an analysis after you do the work.

00:33:18.000 --> 00:33:27.000

Even if you're only checking, you know, 3, 5 or a dozen different things, you know, run your broadcast, check those things.

00:33:27.000 --> 00:33:35.000

Run the broadcast, check those things because as you do, you're collapsing that wave of probability and you're locking in results.

00:33:35.000 --> 00:33:44.000

Now here is the, here is the. Experiment that I was running. Now this subject has been with me for several months, relatively good health.

00:33:44.000 --> 00:33:56.000

You know, have some tinnitus issues. The animal analysis that a lot of us use from Kelly Research Quit providing me any useful information.

00:33:56.000 --> 00:34:09.000

By that I mean that when I looked at the front page of the animal analysis everything was well balanced When I looked at the back, all the toxins had gone to 0.

00:34:09.000 --> 00:34:17.000

And when I looked at the client. I saw that there was still work that needed to be done.

00:34:17.000 --> 00:34:28.000

If the work that you are currently doing is not getting you to the point where the animal analysis is no longer providing you useful information.

00:34:28.000 --> 00:34:40.000

You need to step up your game. Because that animal analysis is a great place to start. It's a wonderful place for beginners to learn about radionics, but if you really want to push this to the next level.

00:34:40.000 --> 00:34:53.000

What you will find is with the tools we have available today. That animal analysis will balance up. Very quickly.

00:34:53.000 --> 00:35:06.000

Okay. Now for those of you that are data warriors. You know, as you start looking at some of this stuff, you're going, oh yeah, oh great, a spreadsheet with lots of numbers on it.

00:35:06.000 --> 00:35:16.000

For those of you in the real world, you're looking at this and okay I can see a few of you starting to nod already so this is the data that I gather.

00:35:16.000 --> 00:35:26.000

So each one of those numbers is an individual reading. The column on the one side are the metrics that I that I chose to check.

00:35:26.000 --> 00:35:39.000

And the one across the top are all the different. Elementary particles. You know, the top and the bottom and the top and, and the order that I balance them in.

00:35:39.000 --> 00:35:51.000

I got that by dousing. Do I know that that is the ideal order? No. I know that it could be a, you know, a completely different order would work better?

00:35:51.000 --> 00:36:06.000

Absolutely. What I do know is this is the work that I did and as I continue to progress. I will be changing the order that I do this balancing, you know, as I see things change.

00:36:06.000 --> 00:36:16.000

When I mentioned to you that the general vitality become no longer is particularly useful. You know, take a look.

00:36:16.000 --> 00:36:23.000

You know, I started off with a general vitality of around 3,000. When I started Radionics, if somebody had a journal vitality of 3,000.

00:36:23.000 --> 00:36:30.000

As a teacher, we would go back to them and try to figure out where they were going wrong. That was not something that we particularly ever saw.

00:36:30.000 --> 00:36:41.000

This is something that I see regularly throughout the lab all the time now. And that is due to the quality of the tools that we have available.

00:36:41.000 --> 00:36:46.000

So you'll see across the top as the general vitality. Okay, it's skipping along.

00:36:46.000 --> 00:36:52.000

It's not moving much. It's not moving much. You know, and then we go to Charmed Quark.

00:36:52.000 --> 00:36:57.000

And gem of vitality nearly doubled.

00:36:57.000 --> 00:37:01.000

White light more than doubled.

00:37:01.000 --> 00:37:08.000

And as we keep on going further, what you're seeing is that you know, that general vitality continues to climb.

00:37:08.000 --> 00:37:32.000

Yeah, 8,888 8,900 white light of 24,000. So you start seeing these numbers and you know, you would hope that with those kind of numbers, you know, the person is, you know, completely healthy and has no issues and hunky-dory and everything and what I'm finding is that no that's not the case.

00:37:32.000 --> 00:37:44.000

But I wanna also drop down to, you know, down there in the middle of the page, the one that is not bolted there, the one that is the intracellular gel structure.

00:37:44.000 --> 00:37:51.000

This one takes some explaining, but it also will show you some of the most exciting. Data that'll come with this.

00:37:51.000 --> 00:37:59.000

And, and I know that looking at this, the spreadsheet, you know, and you're going exciting.

00:37:59.000 --> 00:38:20.000

Hello, my god. But trust me, it really is. Intracellular gel structure. The protoplasm in the cell must be highly structured in order for the organelles in the cell to be able to communicate with each other with biophotons.

00:38:20.000 --> 00:38:30.000

For those of you who have studied structured water, You understand that in order for water to structure, it must be extremely pure, ultra pure in fact.

00:38:30.000 --> 00:38:36.000

If it's got toxins in it, if it's got contaminations in it, it doesn't structure properly.

00:38:36.000 --> 00:38:48.000

And so the more highly structured the protoplasm is in that cell. The better the insides of that cell work.

00:38:48.000 --> 00:38:59.000

Now where this becomes interesting. At least for me. Is that heavy water. Doesn't structure.

00:38:59.000 --> 00:39:14.000

Now heavy water is a result of natural and artificial radiation that's in our environment. And our body has a natural ability to get rid of heavy water.

00:39:14.000 --> 00:39:22.000

And so for our cells to be able to function properly. They must be able. Sure, how heavy warm.

00:39:22.000 --> 00:39:33.000

They must be able to so that the protoplasmic structure properly. Look what happens. As we're going with that intracellular stell structure.

00:39:33.000 --> 00:39:38.000

When I balanced with the charm quark.

00:39:38.000 --> 00:39:48.000

Suddenly. The protoplasm in that cell. Became much more highly structured than it was before.

00:39:48.000 --> 00:40:00.000

That means that for that to happen that heavy water could not be in the cell.

00:40:00.000 --> 00:40:06.000

That means that that heavy water was no longer heavy water.

00:40:06.000 --> 00:40:16.000

That means that Something is happening. At. Quantum level that is changing that heavy water.

00:40:16.000 --> 00:40:24.000

Into normal water so that it can structure properly.

00:40:24.000 --> 00:40:29.000

How cool is that?

00:40:29.000 --> 00:40:34.000

So as we start doing this work and you may start thinking, okay, where else do they use heavy water?

00:40:34.000 --> 00:40:45.000

Well, let's say that you've got Billy Bob the terrorist decides he wants to start making his own nuclear weapons and he's re and he is suffering out heavy water.

00:40:45.000 --> 00:40:54.000

Oh, a picture of his property. Now you can broadcast charm quarks to the property and you can watch the level of the heavy water go down.

00:40:54.000 --> 00:41:02.000

How cool is that? That's the power that we've gotten Radionics. Okay, now we start looking at.

00:41:02.000 --> 00:41:17.000

At the graphs in the charts. And this is what really helped me see what was happening. And on this particular chart, all I've done is just the general mentality, the white light and the intracellular gel structure.

00:41:17.000 --> 00:41:24.000

So you got, blue is general vitality. Red is the white light. And then the green is the intracellular gel structure.

00:41:24.000 --> 00:41:28.000

So, yadda yadda yadda yadda yadda. Everything's pretty fine.

00:41:28.000 --> 00:41:36.000

00:43:37.000 --> 00:43:45.000

It also has effects on the Sour notes on holy agreements and non beneficial cords.

00:43:45.000 --> 00:43:59.000

Unholy agreements. Is not, you know, your, you know, some contract you've signed in blood with Satan himself and I'm a holy agreement is an agreement that you have that is contrary to your highest and best.

00:43:59.000 --> 00:44:09.000

That is contrary to your true self. So an unholy agreement is something that's going on mentally, something that's going on perhaps even spiritually with you.

00:44:09.000 --> 00:44:17.000

So as I'm balancing charm quarks, I'm seeing changes in unholy agreements and non beneficial cords.

00:44:17.000 --> 00:44:30.000

I'm seeing changes in some of those interpersonal relationships that are interfering with the with the healing

00:44:30.000 --> 00:44:37.000

How cool is that? And sour notes and in the data, you know, if you decide to, like to take a look at the data.

00:44:37.000 --> 00:44:48.000

Sour notes is again, that's my notation. The idea being that we are a collection of frequencies and that's what makes our system work is this great collection of frequencies.

00:44:48.000 --> 00:44:57.000

If those frequencies are musical notes, then some of those musical notes, if they are out of tune, either sharp or flat, then they would be a sour note.

00:44:57.000 --> 00:45:04.000

And so if that frequency is not. Right on, then it's not providing the energy and information that we need.

00:45:04.000 --> 00:45:08.000

And so I basically a measure sour notes.

00:45:08.000 --> 00:45:18.000

Strange quarks drive white light. Drive white light without affecting the general vitality and the impersonal gel structure tends to lag behind.

00:45:18.000 --> 00:45:25.000

But light light and general vitality.

00:45:25.000 --> 00:45:32.000

I can't tell you how excited I was to see what was happening with that intracellular gel structure.

00:45:32.000 --> 00:45:40.000

For those of you that have studied. With the different, healing modalities that we've perhaps all been introduced to.

00:45:40.000 --> 00:45:51.000

We know that good health starts in the cell. If I can get the individual cells working properly. And working optimally.

00:45:51.000 --> 00:46:02.000

Then that makes everything else I do much much easier. And it doesn't make any difference whether that cell is in a plant, an animal, a 4 legged or a 2 legged.

00:46:02.000 --> 00:46:06.000

This stuff works across the long.

00:46:06.000 --> 00:46:15.000

So we're seeing the possible atomic transmutation that's happening with the heavy water that's in the system.

00:46:15.000 --> 00:46:25.000

Now we also know that we don't know exactly what's going on with the astrological, or the sign of the moon.

00:46:25.000 --> 00:46:34.000

If you study by dynamic farming, if you studied, even the farmers almanac. Are you studying any of the other spiritual systems?

00:46:34.000 --> 00:46:42.000

You know that the astrological signs and the sign of the moon can very much deeply affect our work.

00:46:42.000 --> 00:46:55.000

I have not taken that into account with this work so far. But I have noticed across the board that there are times of the month when balancing happens much faster and much easier than at other times.

00:46:55.000 --> 00:47:02.000

The other thing that I don't know is, you know, how long these effects are going to last.

00:47:02.000 --> 00:47:12.000

I know some of them last a lot longer than others. But it is my feeling that you know, as we're doing this balancing, it takes some time for the body.

00:47:12.000 --> 00:47:31.000

To get into the. Habit for lack of a better word. Of being healthy and so on several occasions I have to go back and revisit and do this work again in order to get things back up to where they.

00:47:31.000 --> 00:47:36.000

No, I've still got questions about, you know, what happens as we're moving from octave to octave.

00:47:36.000 --> 00:47:49.000

And that really is another class in and of itself. And the idea being, again, that if we are resonating at a certain frequency.

00:47:49.000 --> 00:48:05.000

Then only those things within our resonance window are gonna be able to affect our frequency. And the picture I have is of the piano keyboard where you have middle C and then you've got the octaves that they go up and then you've got the octaves as they go down.

00:48:05.000 --> 00:48:12.000

And so as you're looking at that, if you're up. Resonating at a certain octave.

00:48:12.000 --> 00:48:19.000

And there's a pathogen that is resonating at another octave. Now, if you're fair enough.

00:48:19.000 --> 00:48:30.000

Along that keyboard away from it, that pathogen isn't going to affect you. And that's exactly what I'm finding is that as I am balancing all of this other stuff.

00:48:30.000 --> 00:48:39.000

As I am opening up those manifestation pathways. Those things that interfere with health and wellness.

00:48:39.000 --> 00:48:43.000

Seem to go away.

00:48:43.000 --> 00:48:50.000

I graph the data so that I can see the relationships clearly. I am not an Excel spreadsheet guru.

00:48:50.000 --> 00:49:02.000

And it is absolutely like pulling T for me to get a graph to look the way, you know, I want to so that I've got the data in the right columns and so that I get the the right information out of it.

00:49:02.000 --> 00:49:08.000

I have not done statistical analysis on the data. As far as seeing what the means and the norms and the rate of change and all the rest of that is.

00:49:08.000 --> 00:49:24.000

That can all come later. But with that kind of analysis, I'm gonna learn a lot more about what's happening as I'm doing this, yeah, balancing with the.

00:49:24.000 --> 00:49:32.000

Elementary particles. And just as a disclaimer, the balancing that I'm doing with the elementary particles in my lab right now, I'm doing it with reagents and not rates.

00:49:32.000 --> 00:49:47.000

And again, because I find that the reagents are much more effective than the rates. And so, you know, that data is certainly going to be somewhat different than what, I presented here.

00:49:47.000 --> 00:49:57.000

But what I've got here for you today is something that you can take home and use in your instrument and do the work in your lab.

00:49:57.000 --> 00:50:05.000

The rates and I get them posted and you can do them and measure them across any metric you want to.

00:50:05.000 --> 00:50:08.000

And that way, you know, if you find other things that I haven't found, you know, I would encourage you to share.

00:50:08.000 --> 00:50:15.000

So that we can all grow together.

00:50:15.000 --> 00:50:31.000

I love balancing with photons. And you know, I, for those again that know me, you know, I don't listen to preachers very much, but every once in a while they say something that actually makes sense and they tell us that we are beings of light.

00:50:31.000 --> 00:50:42.000

As you bring more light as you bring those photons into balance, It allows the body. To manifest quicker.

00:50:42.000 --> 00:50:49.000

Now, if they are still thinking about manifesting all the terrible things in their life, those things will manifest.

00:50:49.000 --> 00:50:56.000

And so typically I don't like to balance those things until I've got many of the emotional and the other blockages out of the way.

00:50:56.000 --> 00:51:00.000

But again, I've learned that the hard way.

00:51:00.000 --> 00:51:10.000

What I found is those people that had been in my lab, that have been diagnosed by a white coat, as having a long COVID.

00:51:10.000 --> 00:51:21.000

I find that their elementary particles seem to be depressed across the board.

00:51:21.000 --> 00:51:28.000

Now, one of the other things I've noticed, I like to I like to track the length of the telomeres.

00:51:28.000 --> 00:51:37.000

And one of the things I've noticed is that as healing gets kicked into high gear, the telomere length can go down for a short period of time.

00:51:37.000 --> 00:51:45.000

And so as you're doing this work, if you're measuring telomeres and they're at 80% or 80% or 80% and then they go to 70%.

00:51:45.000 --> 00:51:57.000

That could mean any that could mean a couple of things. It could mean you did something wrong. It could mean that they did something wrong, or it could be that they're moved into a high rate of healing.

00:51:57.000 --> 00:52:08.000

And so that's something, to keep in mind. The other thing to keep in mind is as the person heals their need to detoxify increases dramatically.

00:52:08.000 --> 00:52:21.000

I have seen. Incredible detox issues with emotional release. And one of the strongest detox reactions that I see in my lab.

00:52:21.000 --> 00:52:30.000

Is when somebody releases So as you're working with people and even working at the elementary particle level.

00:52:30.000 --> 00:52:40.000

You know, as you are looking at this, be cognitive, of the fact that as the person is healing, you know, those toxins have to go away some way.

00:52:40.000 --> 00:52:54.000

Either they're going to have to be expelled through the expression organs. They're gonna have to be chemically changed or they're gonna have to be transmuted.

00:52:54.000 --> 00:53:09.000

Another thing I like to measure is the ability of that person to manifest and I've got a rate and I use that rate the manifestation rate to see how well they are healing.

00:53:09.000 --> 00:53:16.000

Now it is my belief. And again, I'll get into my belief structure a little bit because that's certainly flavors, you know, my research.

00:53:16.000 --> 00:53:28.000

That living beings are here because we are supposed to manifest. And that manifestation, it may even be a measurement of how alive something is.

00:53:28.000 --> 00:53:40.000

And if you think about what we would typically think of living or non living things. You know the person that's sitting you know next to you in the restaurant you know is manifesting all the time.

00:53:40.000 --> 00:53:52.000

The person there at the cemetery is not so much. And the other thing you'll notice is that people that are not manifesting tend to be dying.

00:53:52.000 --> 00:53:56.000

So you walk into a, nursing home. And you see the people that are there in storage.

00:53:56.000 --> 00:54:05.000

You know, they're really not learning. They're really not manifesting and you're just watching them die right.

00:54:05.000 --> 00:54:09.000

Right in front of you. And so perhaps that's what our life purpose is, is to manifest.

00:54:09.000 --> 00:54:14.000

And if it follows that if our life purpose is to manifest, then creating is is critical to our healing and wellness.

00:54:14.000 --> 00:54:25.000

And is even critical to our our happiness. How's that?

00:54:25.000 --> 00:54:32.000

What we know is that when you quit taking in more information, then you're losing, you age and die and that's called entropy.

00:54:32.000 --> 00:54:40.000

And we see that, you know, all around us. And as you know, especially, you know, as I've, you know, reached that magic age when the government wants to send me a check every month.

00:54:40.000 --> 00:54:56.000

I notice that many of my contemporaries, you know, have basically, you know, just kicked it into neutral and are just, you know, slowing down, slowing down.

00:54:56.000 --> 00:55:06.000

They're not taking in more information. They're no longer manifesting. They're no longer creating.

00:55:06.000 --> 00:55:13.000

So I think that we're all supposed to create. And I hope that that's what my work does for a lot of people is is hope.

00:55:13.000 --> 00:55:19.000

Is to help you create. And again, I am looking for that.

00:55:19.000 --> 00:55:27.000

Magic bullet. You know, I don't have the magic bullet yet. I may have a I may have a silver bullet.

00:55:27.000 --> 00:55:28.000

I may have, you know, several silver bullets, but I don't have that.

00:55:28.000 --> 00:55:48.000

Magic bullet yet, but I'm certainly working on that, you know, so that I can find out what I, what is that ultimate cause behind the cause behind the cause that I can use so that every time that I go to work, I can go ahead and.

00:55:48.000 --> 00:55:58.000

You know, make those changes and return my client or my customer. Or my friend, back to the health and wellness that they deserve.

00:55:58.000 --> 00:56:07.000

I just posted in the chat, the rates for the, elementary particles as I have, as I'm putting together.

00:56:07.000 --> 00:56:22.000

And, the, see there's a question, how do I measure, How do I major the the length of the of the

00:56:22.000 --> 00:56:28.000

Of the telomere? Well, I do that with a rate.

00:56:28.000 --> 00:56:35.000

And so for. For Linda, there's the rate.

00:56:35.000 --> 00:56:44.000

One Linda, there is the rape for the. For the telomere lane.

00:56:44.000 --> 00:56:51.000

So that's Yeah, I'm a I'm a firm believer that you know as we're doing this work.

00:56:51.000 --> 00:56:56.000

You know. The answers are easy. Our instrument will give us the answers.

00:56:56.000 --> 00:57:08.000

It's the questions that are difficult. And that's the more of a challenge and the better questions that we can ask and the more questions that we can ask the closer we're going to get to finding out you know, what that is.

00:57:08.000 --> 00:57:18.000

What is the manifestation rate? Oh, I gotta find it. I had it here. A while ago I don't have it.

00:57:18.000 --> 00:57:24.000

I don't have the manifestation rate in front of me. I'm sorry.

00:57:24.000 --> 00:57:25.000

Where did it go?

00:57:25.000 --> 00:57:29.000

Is it right below GP and Higgs?

00:57:29.000 --> 00:57:32.000

It could be.

00:57:32.000 --> 00:57:33.000

Oh, that'd be it. Is the rate there?

00:57:33.000 --> 00:57:37.000

It says manifesting. 12 week. 12.6 dash 5.1.

00:57:37.000 --> 00:57:42.000

Perfect. Thank you. Thank you, thank you. Alright.

00:57:42.000 --> 00:57:43.000

So.

00:57:43.000 --> 00:57:51.000

We had another question a little farther up that's been out there for a while. And it says you don't use rates, but you are using reagents often.

00:57:51.000 --> 00:58:04.000

Many rates together make one reagent. Can you explain that? Process your protocols.

00:58:04.000 --> 00:58:12.000

Absolutely. Think of. Think of a rate as. One note.

00:58:12.000 --> 00:58:19.000

Of a cord. And you can get a lot of information from that one note of the cord.

00:58:19.000 --> 00:58:27.000

But if you add the other notes of that chord. Then it's going to be much more powerful.

00:58:27.000 --> 00:58:36.000

And the work that I do. Yes, I'm building a reagent, I will start off with the basic rate, whatever that is.

00:58:36.000 --> 00:58:46.000

And then I will add the perfect fifth harmonic to that rate. Then I will add the fractal layers above and below onto that rate.

00:58:46.000 --> 00:58:55.000

And so what I'm trying to do is build not only a cord, but perhaps build an entire symphony from that from that rate.

00:58:55.000 --> 00:59:11.000

So yes, you're right. A reagent is built, on rates. But as you're building, you know, the more powerful reagents, you know, a lot of times, you can have a reagent that will have a hundred or more rates in it.

00:59:11.000 --> 00:59:23.000

And so instead of, going out there with a pea shooter you know you're really using cluster bombs So.

00:59:23.000 --> 00:59:26.000

I guess I've been watching too much news lately, huh? Okay.

00:59:26.000 --> 00:59:31.000

Yes. You're falling back into your officer mode, sir.

00:59:31.000 --> 00:59:38.000

There is that there is that.

00:59:38.000 --> 00:59:49.000

So was was that completely off the wall too weird and. Or was it explained so brilliantly that nobody has any more questions?

00:59:49.000 --> 00:59:56.000

Yeah, we've seen that before where we're just all like, just so full that it's hard to get out.

00:59:56.000 --> 00:59:57.000

Yeah.

00:59:57.000 --> 01:00:05.000

We had a talk like that a couple months back and it was like and then the question started coming in after.

01:00:05.000 --> 01:00:15.000

Which which I know that you'll be glad to answer and we can post it in the newsletter and so on.

01:00:15.000 --> 01:00:21.000

So now, now you've woken up the beast and we're gonna be here 3 days.

01:00:21.000 --> 01:00:22.000

So,

01:00:22.000 --> 01:00:27.000

Now we can do it. Now we can do it. When I build a reagent, I just use a single intent statement.

01:00:27.000 --> 01:00:38.000

And so what I want, with that reagent or when I'm doing a cold scanning even, I want that intent to be very, very sharply focused.

01:00:38.000 --> 01:00:45.000

And ideally, as you're building an intent statement as, as you're trying to find something to cold scan.

01:00:45.000 --> 01:00:56.000

You know, I like to douse every word of that intent. To make sure that it is at least 99 98% optimal.

01:00:56.000 --> 01:01:06.000

So that when I am crafting that reagent or crafting that intense statement or cold scanning, I want to be absolutely spot on.

01:01:06.000 --> 01:01:17.000

But the tighter your focus, the less energy you need and the easier it is to manifest.

01:01:17.000 --> 01:01:22.000

Okay, is there a place where we can know more about it? Documents, articles, etc.

01:01:22.000 --> 01:01:33.000

No, no, this is this is beginning research. This is the this is the research that's coming out of my lab here in southeast Iowa.

01:01:33.000 --> 01:01:45.000

And I encourage you to take this and run with it. Dan Mangum, emailed me just the other day that said, if you think it's fun working with elementary particles.

01:01:45.000 --> 01:01:56.000

He says, have you thought about adding, some of the, Fourier series and some of the other.

01:01:56.000 --> 01:02:05.000

Basically the the other formulas that are coming from physics so I have.

01:02:05.000 --> 01:02:06.000

And.

01:02:06.000 --> 01:02:12.000

So Marty, I'm I've made an observation just from. this.

01:02:12.000 --> 01:02:23.000

Program here that we have all these rates that are practitioners use and you use to deal with different

01:02:23.000 --> 01:02:41.000

Ailments and problems organs of the human body. Now what your work is doing is you're going fundamentally Beyond that to the particles and the pieces that make all these things up.

01:02:41.000 --> 01:02:45.000

And so you're going at a

01:02:45.000 --> 01:02:49.000

A fundamental

01:02:49.000 --> 01:03:02.000

Shining light on these elementary particles so that they can fundamentally provide with your intent even more health to your clients.

01:03:02.000 --> 01:03:15.000

Exactly. You know, if these particles are susceptible to consciousness. So if I can bring a sufficient number of them into the Construction site.

01:03:15.000 --> 01:03:26.000

Then that allows that. That healing, you know, intent to really go to that, that next level.

01:03:26.000 --> 01:03:30.000

Oh my gosh, here's a, here's a, here's a great question.

01:03:30.000 --> 01:03:40.000

With the Kaiser out and capturing the torsion waves. Oh yeah, that is a great question.

01:03:40.000 --> 01:03:41.000

Do I have an answer? Oh no, but that is a great question.

01:03:41.000 --> 01:03:47.000

Can, can you, can you repeat, read that? Cause not all of us are able to track which one you're.

01:03:47.000 --> 01:03:48.000

Just work by the Russians businesses, Kozarat. And he's the guy that did the Kosovo.

01:03:48.000 --> 01:03:56.000

Of Mir, which by the way is if you haven't played with one, I really encourage it because it's just an absolute hoot.

01:03:56.000 --> 01:04:03.000

Said that you could capture the. That. Meg entropy and entropy in torsion waves.

01:04:03.000 --> 01:04:12.000

And could the make entropy entropy be a magic bullet to inform the body? Of the intent for the order.

01:04:12.000 --> 01:04:19.000

So maybe. Probably. But the issue that we run across as we're getting close to that.

01:04:19.000 --> 01:04:34.000

Magic bullet, if you will. Is that the consciousness of the individual is really what is responsible for their current state of health and wellness.

01:04:34.000 --> 01:04:43.000

And so if you haven't got for those of us that. That have watched cool hand loop if they haven't got their mind right.

01:04:43.000 --> 01:04:53.000

What you can be doing is just pouring gasoline on the fire. And so before I really get them to the point where I really want them manifesting.

01:04:53.000 --> 01:05:11.000

You know, what I really want to do is make sure that You know, there. Energy field is in a place where they will manifest, you know, the health and wellness that they want and deserve and not the fears that the people have been telling them about.

01:05:11.000 --> 01:05:19.000

What is my What is your analysis, mental structure, or process?

01:05:19.000 --> 01:05:25.000

Boy, you're asking a guy that spends an awful lot of time alone. What is process is?

01:05:25.000 --> 01:05:43.000

And I read and study a tremendous amount. Not so much in depth into the, you know, the quantum science and the mathematics and the, you know, and all the rest of that is I'm looking for.

01:05:43.000 --> 01:05:59.000

I'm looking for patterns and I'm looking for places where I can ask better questions. And so I guess if I was to have a process, I would say my process is to find a way to ask better questions.

01:05:59.000 --> 01:06:09.000

And. You know, just recently. I had, I had 3 cases where, people had some of the same.

01:06:09.000 --> 01:06:32.000

Issues if you will and they were interpersonal issues with with the significant others in their lives. And one of my friends says, well, here the problem is that he was hurt so bad from his last relationship that he just put a wall up and he wouldn't let anybody in and by not letting anybody in he wasn't able to feel love.

01:06:32.000 --> 01:06:43.000

And, and I thought, oh gosh, where have I read about emotional heart walls before? I and so what I found is that very most of us have emotional barriers.

01:06:43.000 --> 01:06:50.000

You know, and I'm calling it an emotional heart wall and I found that by dismantling those emotional heart walls, they heal quicker.

01:06:50.000 --> 01:07:02.000

That's my process. I don't know what can't be done. And since I don't know what can't be done, I will try anything once and some things.

01:07:02.000 --> 01:07:11.000

Are there some products or processes that you can run based on your learning?

01:07:11.000 --> 01:07:13.000

Oh my gosh, there's. The Kelly research tech website has a tremendous amount of resources.

01:07:13.000 --> 01:07:32.000

Certainly the USPA website has a tremendous amount of resources. The American society a dowsers again a lot of really good resources my website you know has some good stuff on it.

01:07:32.000 --> 01:07:41.000

One of the biggest things that you can do if you're really wanting to push ahead is find a way to associate with people like her on this call.

01:07:41.000 --> 01:07:50.000

If you can get to the different events that are around the country. And certainly I'm biased for the ones that I'm involved with, of course.

01:07:50.000 --> 01:07:57.000

But there's a lot of other. Different flavors, if you will, of radionics around the country.

01:07:57.000 --> 01:08:10.000

Start rubbing shoulders with people that are doing this work. And you will learn much faster than Doing it the hard way or, you know, listening to people that say that it can't be done.

01:08:10.000 --> 01:08:11.000

And there's

01:08:11.000 --> 01:08:13.000

And finding out their questions, right? Which is what you said is the hardest thing.

01:08:13.000 --> 01:08:24.000

Absolutely. Yeah, and one of the things that I found, there are certain people that put themselves across as, gurus.

01:08:24.000 --> 01:08:31.000

In my opinion, and this is my opinion all only. I feel like we're all in second grade.

01:08:31.000 --> 01:08:36.000

And there are some of the second graders that are a little farther ahead than the other second graders.

01:08:36.000 --> 01:08:45.000

But there are any grad students in this class. And so if somebody is coming across as a guru that know all that knows all and has done all.

01:08:45.000 --> 01:08:55.000

I would probably take a look at them fairly closely. Because Yeah, I'm finding new things every day.

01:08:55.000 --> 01:09:11.000

And I'm relearning old lessons every day. And part of the reason that I have my my weekly zoom classes is because I learn and the questions that come from that class is, because I learn and the questions that come from that class help me to ask for better questions.

01:09:11.000 --> 01:09:15.000

So I, you know, I hope that helped a little bit.

01:09:15.000 --> 01:09:20.000

Right above the question that we read about the the Russian physicist, there are 3 other questions there.

01:09:20.000 --> 01:09:36.000

One is, going from depth with laser focus rather than broad spectrum focus. I guess they wanted a little expansion on that.

01:09:36.000 --> 01:09:44.000

Well, I'm a firm believer in making a big change in a small area.

01:09:44.000 --> 01:09:54.000

Because if you make a big change in a small area, it is likely to spread. But if you try to make a change over a large area.

01:09:54.000 --> 01:10:08.000

With the amount of power that we have available. And with the forces, that are out there that, want to maintain the status quo, it just takes a tremendous amount more energy than we currently have available.

01:10:08.000 --> 01:10:15.000

And the story I use is here in Iowa, of course, they use a lot of salt on the roads.

01:10:15.000 --> 01:10:21.000

And so anybody who's got a vehicle that's over just a few years old, there'll be a little rough spot on the fender.

01:10:21.000 --> 01:10:27.000

And as you look at that rough spot early in the in the winter, it's not bad enough for you to do anything about.

01:10:27.000 --> 01:10:33.000

And so you just kinda let it go. And in the next winter, it's a little bit bigger and there's another one right next to it.

01:10:33.000 --> 01:10:38.000

But again, it's really not enough for you to do anything about. Because it's not that bad.

01:10:38.000 --> 01:10:43.000

And then by the time you realize that your whole fender is rusted off, it's too late to do anything about it.

01:10:43.000 --> 01:10:49.000

And so when you make a big change in a small area, you don't get much push back.

01:10:49.000 --> 01:10:57.000

And that, small thing that you did. Can act as a beacon that spreads very, very quickly.

01:10:57.000 --> 01:11:01.000

So I really like tight focus. I know there's other folks in the radionic community, the like do big projects.

01:11:01.000 --> 01:11:11.000

But that's just, that's not my style. So. Follow your heart on that one.

01:11:11.000 --> 01:11:14.000

You're into planning a seed.

01:11:14.000 --> 01:11:18.000

I love planting seeds.

01:11:18.000 --> 01:11:29.000

Okay, another question above there. Can you? Repeat please and it asked for the slide but what gillian drive the  
What do Gillian drive?

01:11:29.000 --> 01:11:37.000

I don't know if that's misspelled. It's from Beth Kiddo.

01:11:37.000 --> 01:11:40.000

A couple above the Russian question.

01:11:40.000 --> 01:11:51.000

Beth, could you send that one out again? I'm not, maybe there was a, maybe there was a typo or or you know  
maybe Maybe I wanted off during the presentation.

01:11:51.000 --> 01:11:52.000

Not sure what you're asking.

01:11:52.000 --> 01:12:02.000

And then another question in between that. Do you have rates handy for, the column with white light oral distortion, etc.

01:12:02.000 --> 01:12:07.000

Why? Yes I do!

01:12:07.000 --> 01:12:17.000

I am glad you asked. Here we go.

01:12:17.000 --> 01:12:21.000

And I, and I do discuss.

01:12:21.000 --> 01:12:31.000

What these rates are in my classes, you know, so you have an understanding about what they are because you look at some of them you're going, okay.

01:12:31.000 --> 01:12:41.000

I don't know what this guy is smoking, but I want some of that. But there actually is some method to the madness there.

01:12:41.000 --> 01:12:47.000

And I don't know why it doesn't. Why it doesn't format properly in the chat.

01:12:47.000 --> 01:13:01.000

But, if you email me at, well, or what I can do is I will send the, I will send the sheets to, Scott and, and then Scott can make them available for folks.

01:13:01.000 --> 01:13:02.000

How's that?

01:13:02.000 --> 01:13:23.000

We'll make it in the, we'll put it in the members area for those of you that want to replay this and we'll also put it in the Gail, distribute the chat and she can also add on forms and we also put the chats in the newsletter at some point too.

01:13:23.000 --> 01:13:28.000

Alright, and it looks like we've got somebody that is, is ready to be part of the crew.

01:13:28.000 --> 01:13:35.000

Got a master's in integrative nutrition. All right, now we're in there. Yeah.

01:13:35.000 --> 01:13:40.000

Some of our people are on the call. I like it.

01:13:40.000 --> 01:13:55.000

So if you scroll back there, there's a question from Janet and then Beth did, note that her question got missed, and she repeated it, up there.

01:13:55.000 --> 01:14:01.000

So if you slide back up, I don't know if you can see Janet Lee. Messenger.

01:14:01.000 --> 01:14:09.000

Oh, there we go. Analyze the toroidal field of the physical manifestation and find the issue.

01:14:09.000 --> 01:14:21.000

Okay, that must be blue ones. Okay. You know what? I didn't know that I could analyze the Toronto field.

01:14:21.000 --> 01:14:28.000

That's not a question I've ever asked. Thank you. That gives me, that gives me more questions.

01:14:28.000 --> 01:14:39.000

That that toroidal field is your. That shape that's manifested geometrically into the 0 point.

01:14:39.000 --> 01:14:40.000

I have not tried to analyze the Yes.

01:14:40.000 --> 01:14:59.000

That's the process. Well, but. But you talk about the wave collapse.

01:14:59.000 --> 01:15:00.000

Yeah, collapsing the probability weight.

01:15:00.000 --> 01:15:04.000

What is the, what did you say was the, your process in getting the collapse but by a collapsing away field you mean to put manifestation your manifestation into physical form.

01:15:04.000 --> 01:15:12.000

Yeah, yeah. And so that now I do know that with the heartmap people and those people, they've done some work with the with the T.

01:15:12.000 --> 01:15:23.000

Field and I know there's a lot of rates out there and I played with some of those rates to to, to measure the Toronto field, but I have not applied that to the manifestation.

01:15:23.000 --> 01:15:40.000

Yeah, that there's just so much to learn and this is so much fun. I am so lucky to be involved with Radionics at this time because there's just Yeah, if you, if you can think of the question, you can find an answer for it.

01:15:40.000 --> 01:15:47.000

Yeah, how cool is that? let's say Linda's got a question.

01:15:47.000 --> 01:15:52.000

Is it fair to say the changing or removing a negative belief system. Creates more light in the energy body?

01:15:52.000 --> 01:15:58.000

Yes. And what are the other predictable effects that you've seen from the shift in the beliefs?

01:15:58.000 --> 01:16:06.000

Oh my gosh. You know, all the healing happens faster. Not only does our attitude squared away, but the healing happens a lot faster.

01:16:06.000 --> 01:16:20.000

It's like that the more of that negativity that you hang on to mentally and emotionally, the more toxins you also hold physically.

01:16:20.000 --> 01:16:33.000

In your system and so as you start dumping that Junk. And getting more light in the system, basically you'll start dumping toxins as well.

01:16:33.000 --> 01:16:41.000

The question, Says, my husband, Jim and I were led to hands on.

01:16:41.000 --> 01:16:51.000

Energy work. And they've often noticed instantaneous results. Have you ever measured someone doing hands-on healing?

01:16:51.000 --> 01:17:01.000

I have not done, I have not made them while they're doing the work. And that I know there's other people that have done that kind of work.

01:17:01.000 --> 01:17:10.000

You know, honestly, probably the, expert on that kind of thing where that I would go to, would be Stephen Quam.

01:17:10.000 --> 01:17:16.000

You know, that is, yeah, the magic that he does with his hands on healing is just.

01:17:16.000 --> 01:17:27.000

You know, out of this world. And there's a question about using red light. I know there are people that use the different colored lights, typically in my class what I do is I'll program the light with different frequencies.

01:17:27.000 --> 01:17:38.000

And so again, light is just another way to carry that photonic information.

01:17:38.000 --> 01:17:42.000

And so, so certainly red light will carry different information than the yellow or the green.

01:17:42.000 --> 01:17:58.000

And then you can push it to the next level and go, okay, what other information do I want that red light to carry and with radionics you can actually program your light to carry those other those other frequencies as well.

01:17:58.000 --> 01:18:04.000

So, which is really kinda cool. We, do that in, my intermediate class.

01:18:04.000 --> 01:18:13.000

And so we we get a bunch of flashlights from the, harbor freight sales, and then we program those flashlights with different healing frequencies.

01:18:13.000 --> 01:18:24.000

And, and it's an absolute hoot. But, you know, what it does, it just shows you how easy it is to make really valuable healing tools.

01:18:24.000 --> 01:18:35.000

So suppose you have a, you know, one of these \$3 flashlights and, and you want to and you want to help somebody that's got some muscle pain.

01:18:35.000 --> 01:18:42.000

And so you program the flashlight with aspirin. Of course, I know there are better things to program it with an aspirin, but I'm just using it as an example.

01:18:42.000 --> 01:18:48.000

So you program it with aspirin and just take that fly flight and shine it over the affected area.

01:18:48.000 --> 01:18:54.000

And basically you're taking that aspirin energy and imprinting it right into the tissues.

01:18:54.000 --> 01:18:59.000

Now would a laser work better? Yes. Would a red light work better? Probably.

01:18:59.000 --> 01:19:03.000

Are you gonna find anything cheaper than a \$3, harbor freight sales flashlight?

01:19:03.000 --> 01:19:08.000

Probably not.

01:19:08.000 --> 01:19:13.000

And how do you program those? Lights.

01:19:13.000 --> 01:19:14.000

In in the well.

01:19:14.000 --> 01:19:28.000

Because, because, scalar information is carried by light, what you can do is you can pull the batteries out of any battery powered appliance and then you can go ahead and potentize that with your radionic instruments.

01:19:28.000 --> 01:19:38.000

And the counting instruments are set up specifically so that with the potent and a replicator, you can add those frequencies or add those reagents right to those batteries.

01:19:38.000 --> 01:19:47.000

So you think about all the things that you have batteries. So not only can you program, you know, your light, but certainly you could program the kids toys.

01:19:47.000 --> 01:19:56.000

You could program their, the, the battery in your cell phone. You know, the list just goes on and on and on.

01:19:56.000 --> 01:20:07.000

And, you know, so every time that that. Life slide is turned on, you are broadcasting whatever frequencies that you have imprinted into that battery pack.

01:20:07.000 --> 01:20:19.000

I wanted to add on that A. RP, A A RP, just had a nice article about studying long lifers.

01:20:19.000 --> 01:20:30.000

Those things that you were talking about with your. Friends who just put it into neutral. And aren't manifesting or creating.

01:20:30.000 --> 01:20:56.000

In So many words that's what they were talking about in this article they were looking at people in their ninetys who were active and working changed their career had focus and intention and so exactly what you are saying is getting back out into the mainstream.

01:20:56.000 --> 01:21:11.000

World but I think work like yours and showing everyone the potentials that we all have. A key to us helping people.

01:21:11.000 --> 01:21:18.000

Agreed. There's a question. Do I try these methods on myself and what significant improvements have I noticed?

01:21:18.000 --> 01:21:28.000

Absolutely. I am, I am my, own, first guinea pig. And since I do this work every day.

01:21:28.000 --> 01:21:41.000

And it's, and it's a pleasure to do it every day. What I have noticed is that I am absolutely as happy as I've ever been in my entire life.

01:21:41.000 --> 01:21:49.000

And many of you at 1 point in your life or another have been in those periods when you were in the flow.

01:21:49.000 --> 01:21:53.000

Imagine living in the flow.

01:21:53.000 --> 01:22:04.000

And that's what Radionics has done for me. You know, health wise. You know, except for, you know, moderate obesity and, and those things that are self imposed, one of which is an occasional cigar.

01:22:04.000 --> 01:22:16.000

You know what? I just, I don't have health issues. I don't worry about anything.

01:22:16.000 --> 01:22:21.000

You know, it's, you know, it's the almost that, Buddhist.

01:22:21.000 --> 01:22:35.000

Of you know, goal of the non-attachment and having enough it is it is absolutely a superb way to live and I would recommend that to anybody.

01:22:35.000 --> 01:22:42.000

There was a question. Do I have, Stephen Quam's, contact information?

01:22:42.000 --> 01:22:43.000

Okay.

01:22:43.000 --> 01:23:06.000

But let me, yeah, let me answer that. If you don't mind, because Stephen is here on the call with us, the master class today, and he's going to be sponsoring our next master class with Jerry Wills, who does some similar work to Stephen, but you'll be seeing Steven's seven's Stefan Kwang's.

01:23:06.000 --> 01:23:18.000

personal website and some details about his work and before the next master class we'll have a little couple minute set of information about his work.

01:23:18.000 --> 01:23:31.000

And then maybe Stephen, if you want to give us a little more just right now, will add you in here if you don't mind Marty.

01:23:31.000 --> 01:23:44.000

I just wanted to thank Marty for another. Very inspiring and useful. Presentation of his research. Every time I hear on that show a presentation, I'm already doing something new.

01:23:44.000 --> 01:23:55.000

Which I can incorporate into my own practice. So thank you, Marty. And, and I can just type in my email in the message box, but I will be having.

01:23:55.000 --> 01:24:00.000

Little ad for the next master class. So. You can find easily there. Let me get to the bottom of the.

01:24:00.000 --> 01:24:05.000

Of the chat and I'll just type that in.

01:24:05.000 --> 01:24:32.000

And USPA has, one of, his talks from I believe the 2,018 conference that Marty helped bring him too so we were glad to have him back with us and we'll of probably work on having him do a master class somewhere down the line this year.

01:24:32.000 --> 01:24:36.000

Okay, Marty. Other, questions and comments?

01:24:36.000 --> 01:24:41.000

Well, there's there's a question. There's no possible risk to playing at that level.

01:24:41.000 --> 01:24:42.000

You know?

01:24:42.000 --> 01:24:48.000

Oh, there's always risks. Absolutely. And you know, as, as you do that work.

01:24:48.000 --> 01:25:00.000

You know, it is important as you're going through and even though I can, you know, have a fairly high opinion of my own work, you know, I still ask to make sure it is safe and appropriate.

01:25:00.000 --> 01:25:11.000

The last thing that you wanna do. Is help somebody manifest. Their darkest fears. Well, unless that's what you want to do to them.

01:25:11.000 --> 01:25:12.000

And, you know, and that's probably, that's probably a whole nother story.

01:25:12.000 --> 01:25:29.000

Yeah, so, if they are in that dark place. You know, let's say that the white coats of just giving them the diagnosis that everybody fears and they're thinking of all the terrible things that are probably going to happen to them.

01:25:29.000 --> 01:25:37.000

You want to take care of a lot of other things before you start making it easier for them to manifest.

01:25:37.000 --> 01:25:47.000

You know, and so that's where the rest of your healing work, the rest of your balancing work comes, comes in.

01:25:47.000 --> 01:26:01.000

When you talked about karmic bonds. You mentioned 3 ways to dissolve. That energy I mean in some cases that can be this dark energy that you're talking about.

01:26:01.000 --> 01:26:12.000

What are the 3 ways to dissolve? You mentioned transmutation, chemical expulsion. And then, physical.

01:26:12.000 --> 01:26:17.000

Well, I mean, that's, you know, when you dissolve the, the comic bonds, you get You get a lot of detox.

01:26:17.000 --> 01:26:30.000

And there, there are entire. Philosophies and and and spiritual practices where they they work to dissolve the karmic bonds.

01:26:30.000 --> 01:26:37.000

And Many of the people that have done that work will look at at my work and go, okay.

01:26:37.000 --> 01:26:48.000

This makes no sense to me, but. In my view, a karmic bond is just another frequency pattern.

01:26:48.000 --> 01:26:54.000

And hanging on to that frequency pattern is either beneficial for me or it's not beneficial for me.

01:26:54.000 --> 01:27:00.000

And so when we dissolve that. And I use a reagent to do that.

01:27:00.000 --> 01:27:05.000

For those of you that are doing, you know, a lot of energy work, you could certainly use a thought form for that.

01:27:05.000 --> 01:27:15.000

And for those that want to, you could probably even hold scanner rate for it. I use one of my reagents because I find that works the best for me.

01:27:15.000 --> 01:27:21.000

And as people let go of that stuff.

01:27:21.000 --> 01:27:32.000

It allows them to heal. And I think we've all seen the pictures where the guy is trying to drag this great big bag of stuff.

01:27:32.000 --> 01:27:36.000

Up the hill and somebody says, hey, just let go of that. You know, just let go of that.

01:27:36.000 --> 01:27:44.000

Baggage if you will. Where we are. Okay, now this is Marty's philosophy. If it doesn't agree with what your what works for you.

01:27:44.000 --> 01:27:58.000

Then throw it away. But my belief is that where we are energetically, you know, in in this planet right now is that that those old lessons.

01:27:58.000 --> 01:28:06.000

That we have been carrying around for hundreds or perhaps thousands of years. Are no longer useful to us.

01:28:06.000 --> 01:28:16.000

And we can let them go if you're willing to. And simply dissolve those bonds and move forward.

01:28:16.000 --> 01:28:21.000

And, and if, you disagree, you know, that's fine. And, and if you've got a better way of dealing with it, that works for as well.

01:28:21.000 --> 01:28:30.000

You know, I'm telling you what works for me and what's been working in my lab.

01:28:30.000 --> 01:28:38.000

And you know, as for me, I try to look at everything as simply a combination of energy and information.

01:28:38.000 --> 01:28:50.000

And that energy and information, that frequency pattern. Either is helpful or it's not helpful and if it's not helpful and it's not useful I don't see a reason to hang on to it.

01:28:50.000 --> 01:28:59.000

So. You know, I probably got into more trouble than I than I intended with that, but. So that's I use a reagent.

01:28:59.000 --> 01:29:11.000

Some people use a, rate and, other people left. And, let's see, early, I have expanded my, my, Monday as zoom classes.

01:29:11.000 --> 01:29:25.000

I did have them every other week and now they're every week at Monday at eight. And, And so that's and I encourage you to go to my website if you've got questions radianx.

01:29:25.000 --> 01:29:33.000

Dot us or email me. Marty@radionics.us. Any other questions or comments?

01:29:33.000 --> 01:29:41.000

You better update your website. Cause I got the first and third from your Okay, just for I know how hard that is

01:29:41.000 --> 01:29:49.000

It's not the only thing on my website that's wrong. Yeah.

01:29:49.000 --> 01:29:50.000

Yeah.

01:29:50.000 --> 01:30:05.000

No, no, no, I just, I just want everybody not to miss it. I've tuned in a few times and even though I'm not, a practitioner, and even though I'm not a practitioner per say, your words of wisdom and your, Spirit to

01:30:05.000 --> 01:30:12.000

Help people with information is is really something that opens my heart.

01:30:12.000 --> 01:30:17.000

Thank you.

01:30:17.000 --> 01:30:28.000

Thank you for inviting me. I'm, you know, as I look at the presenters, here at the USPA and the leaders in this industry.

01:30:28.000 --> 01:30:35.000

I am I am so. Pumbled, to be included, with this group and, and to be able to share, share some of the work that I'm doing.

01:30:35.000 --> 01:30:42.000

And, you know, it's kind of like showing off the kids. And I'm, I'm so happy and proud to do it.

01:30:42.000 --> 01:30:53.000

And I'm, so happy and proud to do it. And, you know, would love your feedback, you know, would love your feedback, you know, on how it works for you.

01:30:53.000 --> 01:31:09.000

And and if and i know that for those that don't live you know here if you i do have my zoom classes recorded and so you can get get recordings of those zoom classes.

01:31:09.000 --> 01:31:15.000

So, any other questions or comments?

01:31:15.000 --> 01:31:16.000

Scott, thank you very much.

01:31:16.000 --> 01:31:18.000

Greationics. radionics.us. Radionics.

01:31:18.000 --> 01:31:21.000

Yes.

01:31:21.000 --> 01:31:33.000

Dot us is. We'll get that written down in the chat, Marty. And then, it'll, it'll go in our email that will send the email out to all.

01:31:33.000 --> 01:31:42.000

242 people that signed up so if they missed it they can still see what the chat was and they can then go to our If you're a member, you can go to our members only area and watch Marty again and again.

01:31:42.000 --> 01:32:01.000

Or you can even purchase it in our shop. So we have a lot of great material, not just on radionics, but there is a lot of radionic material and other associated things.

01:32:01.000 --> 01:32:12.000

So please support our organization just like Marty has in the past. And we'll keep, up this information network.

01:32:12.000 --> 01:32:16.000

And thank you for your kind comments. So.

01:32:16.000 --> 01:32:28.000

Yes, again, next month we have Jerry Wills, the human body, the quitting central radianics conductor, Ludi Larson, a longtime USPA member.

01:32:28.000 --> 01:32:35.000

She's going to be talking about radionic gardening and home care. Glenn Ryan who's talking more and more about radionics from his.

01:32:35.000 --> 01:32:49.000

Biological physics perspective. It's just unbelievable. The view that he is working with.

01:32:49.000 --> 01:32:54.000

And again, Marty, have you ever worked with DNA per se?

01:32:54.000 --> 01:33:02.000

Not, with Radionics. I've got, you know, several visualizations that we work with people to get their DNA squared away.

01:33:02.000 --> 01:33:09.000

But, you know, again, one of the things that, that I measure, is percent of active DNA.

01:33:09.000 --> 01:33:17.000

And again, got a rate for that and for those that, that are dowzers, you know, you may wanna douse to see, you know, what.

01:33:17.000 --> 01:33:23.000

What percent active DNA somebody has. You know, if they've only got 40% of their DNA active.

01:33:23.000 --> 01:33:29.000

You know, if you wanted to be healthy, probably should get that closer to 100%.

01:33:29.000 --> 01:33:54.000

Because that's the process of manifestation. Into the physical. Yeah, and and Glenn's work is talking about the same thing that Radionics is is is the ability to change that and using light to measure that and and move it along.

01:33:54.000 --> 01:33:55.000

Thank you everybody.

01:33:55.000 --> 01:33:59.000

So, fantastic. Thank you very much, Marty. And, everybody thanks for coming in and sharing this presentation.

01:33:59.000 --> 01:34:01.000

Okay, we'll see you again next month.

01:34:01.000 --> 01:34:07.000

Yes indeed.

01:34:07.000 --> 01:34:14.000

And.
