Fall 1982

NEWSLETTER Vol. III Number 4

THE PRESIDENT ANNOUNCES '83 CONVENTION PLANS

The Executive Committee has selected the University of Portland, Portland, Oregon as the site for the 1983 Annual Conference of USPA. The dates are July 20, 21, 22, 23 and 24 (Wednesday through Sunday). Registration will be on Wednesday evening allowing three full days and Sunday morning for the Conference activities. There will be a Board meeting on Wednesday evening.

Very shortly the Conference '83 Committee will be activated, call for papers issued, etc. The tapes from the '82 Conference are ready. See the back pages of this newsletter for the listing. New video taping equipment has been purchased as authorized at the last Board meeting.

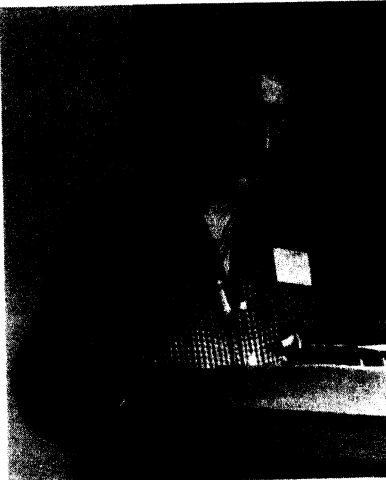

The results of the questionnaire that was circulated during the Conference in Golden were encouraging. There were very few negative comments and views of the membership will be considered in reaching future decisions. They will be compiled for your information in a future newsletter.

We officially welcome and recognize Elizabeth Rauscher, our new Board Member. I'm sure that I speak for all when I say that we are pleased and proud to have you with us, Elizabeth.

Congratulations also to all those directors and officers who were returned to their respective offices for another term.

Walk in peace and in the Light.

David O. Rhoads
September, 1982

Dr. Andrija Puharich accepting the 1982 USPA Achievement Award for current research.

**Reich, Puharich Win
1982 USPA Awards**

Golden, CO—Upon completion of his keynote address at the Annual Awards Banquet during the 1982 conference at the School of Mines, Dr. Andrija Puharich was presented with the USPA Achievement Award by Awards Committee Chairman, Rev. Henry J. Nagorka.

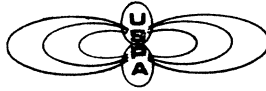

The recipient was taken aback by the unexpected honor and the enthusiastic approval of the assembled membership. He recovered quickly, however, and in expressing his appreciation, shared information which electrified his colleagues. (Available on tape recording F-7b, page 30.)

United States Psychotronics Association

Board of Directors

T. Galen Hieronymous-Life
Rev. Henry Nagorka-'83
Joan Orion-'83
David Rhoads-'83
Thomas Bearden-'84
Ivan Kruglak-'84
Samuel Lentine-'84
Robert Beck-'85
Peter Kelly-'85
Elizabeth Rauscher-'85

Officers:

David Rhoads—Pres.
J.G. Gallimore—1st V.P.
Peter Kelly—2nd V.P.
Samuel Lentine—Exec. Secy.
Robert Beutlich—Secy.-Treas.
3459 Montrose, Chicago, IL
60618 (312) 478-7715

AIMS

1. To promote the free exchange, discussion and dissemination of information, theories, ideas and practices related to psychotronics.
2. To maintain high standards of ethics, humanitarianism and scientific practices in the study and application of psychotronics.
3. To preserve the history and genealogy of psychotronics.
4. To secure cooperative action in advancing the common cause of its members.
5. To disseminate information of a general, economic, social or governmental character, to analyze subjects relating thereto, and to secure and present the views of its members to other organizations, the government, and the public.
6. To cooperate with other organizations of like interest.
7. To further the training and education of its members.
8. To promote standardization in the investigation, testing, reporting and evaluation of psychotronics.
9. To provide in its periodical(s) a national forum for the report and publication of all worthy activities and projects of persons, groups or organizations working in the field of psychotronics.
10. To make awards, locally and nationally, to persons, associations or agencies, in recognition of outstanding contributions or accomplishments in the field of psychotronics.

MEMBERSHIP

The U.S. Psychotronics Association, incorporated in the District of Columbia in August 1977, is empowered to enroll members in the parent organization and to develop chapters throughout the nation.

Five categories of membership are open to the imaginative individual who wishes to join with the U.S.P.A. on the new frontiers of science in working constructively for the qualitative improvement of man and his environment.

1. **General**—\$20.00 per year (any citizen of the United States).
2. **Affiliate**—\$13.00 per year (any firm, corporation, or organization). Non-voting.
3. **Student**—\$10.00 per year (any full-time student attending an accredited educational institution; or member of the armed forces of the United States).
4. **Fellow**—\$40.00 per year (any U.S. citizen active in Psychotronics, deemed eligible by the Board of Directors).
5. **Honorary**—No fee (granted for life by the Board of Directors for outstanding service).

Psychotronics in the News

ORGANIZING THE FUTURE

The World Future Society held its fourth general assembly in Washington, D.C., July 18-22, 1982. The conference theme, "Communications and the Future", concentrating on technology innovations, was only peripherally of interest to psychotronics.

Averaging 15 simultaneous presentations, every two-hour session over five days the meeting offered a mass of material and became a major national meeting.

Among the better known participants were: Barbara Marx Hubbard; Ellen Burstyn, actress; Steven Dedijer, University of Lund, Sweden; several members of Congress; Marilyn Ferguson; Fritjof Capra and Buckminster Fuller.

Dr. Elizabeth Rauscher, newly elected member of the Board, presenting a paper on "ELF Radiation and Non-Linear Coherent Phenomena".

1983 USPA Conference Planning Gets Early Start

According to information released by President David Rhoads, the U.S. Psychotronics Association Conference site for 1983 has been set for the campus of the University of Portland, Oregon. The length of the 1983 meeting is being extended by one day in order to accommodate the growing interest in psychotronics. Dates have been set for July 20-24, Wednesday evening through Sunday midday.

Further details regarding registration, call for papers, etc. will appear in following newsletters.

Vilenskaya Journal Offers Reports on Soviet Parapsychology

Psi Research, the "East-West Journal on Parapsychology, Psychotronics and Psychobiophysics" provides interesting new information in its issue, Vol. 1, No. 3, September 1982.

The reports and articles heavily emphasize ongoing research in the Soviet Union and Far East. Among the noteworthy articles are:

Riddle of Human Potential [on Kulagina];

Bioenergetic Aspects of the Relationship Between the Image of Perception and the Perceived Object;

Studies in Nen-graphy in Japan; On the Possibility of Biolocation of Oil Deposits.

Psi Research is a quarterly, edited by Larissa Vilenskaya, published by the Washington Research Center and the Foundation for Human Science, 3101 Washington Street, San Francisco, CA 94115, (415) 563-7780.

Author/researcher David Tansley of England is offering a seminar at Dr. Sherer's Academy of Natural Medicine, October 14 - 25 at 514 Onate PC, Santa Fe, NM. Sponsored by **Eridani Foundation**, P.O. Box 2708, Santa Fe, NM 87301.

REQUEST FOR INFORMATION

USPA requests that members and the general public who have had business correspondence or dealings with Herbert Scott and Associates of Hancock, Wisconsin, inform the secretary, Robert Beutlich of their experiences.

The purchase of radionic kits or assembled devices is of special interest to the Ethics Sub-Committee of the Standards Committee. The Sub-Committee, in accordance with the USPA

Tesla, Puharich Awards

Continued from page 1

Puharich's paper on "Chemical Compounds—Receptors of Artificial ELF" presented the following day, elicited considerable positive reaction.

In accordance with USPA practice, the Annual Achievement Award is made in two categories: (1) posthumously to an early pioneer who's contribution to the field has been recognized as highly significant, and (2) currently to a researcher whose work during the past year has contributed exceptionally to Psychotronics.

Honored with Dr. Puharich was Wilhelm Reich, developer of the Or-gone Energy concept:

charter, is exploring the advertising claims and marketing of radionic instruments which may be counter-productive to the field of psychotronics.

The membership will be informed of developments in this matter through future Newsletters.

WE'LL NEVER BE THE SAME AGAIN

A Personal View of '82

In retrospect, our trip to Golden, Colorado remains a bright highlight of the year. Oh—naturally, there were a few little hurdles to overcome—such as the combined registration and lodging costs—and clearing our busy schedules of the time to take a five day break—but all considered, it would not have been expensive had we been able to travel by car. The air fare reduced our bank account by \$600 (there wasn't much left!).

Travelling together made it a most enjoyable extended weekend excursion. My wife is very active professionally and so am I. The conference provided us with the opportunity to break

routine in an exciting and highly constructive manner.

The outward flight was pleasant, and upon landing in Denver we were reunited with family which we had not seen in a decade. After appropriate embracing and inspecting each other we were chaffered through the Colorado Mountains, past the enormous Coors Brewery installation and delivered very comfortably to Twin Towers Residence Hall at the School of Mines in Golden.

We had known of the School of Mines since our college days, but were unprepared for the dramatically

A Selection of Abstracts From Presentations Made at the 1982 USPA Conference

THRESHOLD + 1

PETER KELLY

We have reached a point in time and understanding that we create our own reality. This takes place on many levels, but foremost on a personal one.

Once one reaches the realization that we create and are responsible for ourselves and let go of the idea that others are responsible for the way our life is going, you can restructure your life to move events into a positive direction. Beyond the individual level, this principle extends also to social groups, nations, and finally to the whole world.

For purposes of this discussion, Radionics, Psychotronics, and Free Energy phenomena will all manifest to their full levels, as the collective consciousness of mankind accepts and functions within the premise that we create our reality.

The first reason for this is causality. Causality is structured linearly in time. If A causes B then A must occur in time before B.

The second principle is acausality. The acausal incidental principle (ACOP) assumes synchronicity which,

according to Jung and Pauli, is at right angles to causality and structured in space. John Bell's Theorem states that particles that were once in contact continue to influence one another, no matter how far apart they move. This influence is regarded as instantaneous, even if the particles are at opposite ends of the universe.

Dr. Jack Sarfatti claims that the medium of interconnectedness is not consciousness but information. This best explains why randomizing leads to order and the more randomizing, the greater the order.

Why should this lead to breakthroughs in psychotronics? Very simply because we create our reality—and as more people become involved in the research and operation of mind/matter devices, and the more information becomes available, the greater will be the successes due to first: causality, and then secondly: acausal principles.

Early pioneers such as Dr. Albert Abrams, Dr. Ruth Drown, and Dr. T. G. Hieronymus, based their devices on accepted scientific principles or created principles that became (their) reality through their acceptance and belief.

When a sufficient number of individuals accepts and believes, the re-

sults become scientific (scientifically replicable). Enough momentum builds in the world-mind so that it becomes everyone's reality. This principle is unfortunately true with negative ideas and beliefs also. As Winston Churchill stated after the Battle of Britain, "We have nothing to fear but fear itself". At some level, by allaying the fears of a discouraged Nation, he rallied them toward a belief of right which led to the turning point of WWII.

The point in linear time between an original idea and its universal acceptance at the world-mind level could properly be called "Kindling Time" (ala Tom Bearden in his many papers and book "Excalibur Briefing"). I believe (and create by my own belief) that we are in a time in which the seeds have been sown, beliefs created, and enough people have added their beliefs so that breakthroughs in technology will occur on a regular basis. The time of Kindling varies, but since we are in linear time, "Kindling Point +1," would occur by my definition: "When the building of beliefs, anomalies, and effects thereof, reaches a point of cascading or full manifestation into full reality."

Naturally, this is not limited to Psychotronics but is probably some part of the "Whole Truth". Through our realization, may our manifestations all be positive and right for the benefit of the collective consciousness of mankind, the planet Earth, and the Universe of which we are all integral parts.

TOWARD A NEW ELECTROMAGNETICS

TOM BEARDEN

The technical part of Tesla's work, with some new, important aspects of electromagnetics and physics that follow from it. The new work offers

the possibility of eventually tying in Charles Muses' work on the structure of time. It proposes that vacuum, spacetime, and charge are electrical ideas in unexpected ways. It offers a new concept of electrical current that should have been foreseen by the particle physicists, and that is consistent with the two-slit experiment, including delayed choice experiments. It also shows exactly what "hyperfields" and "hypercurrents" are, and how they are related to present electrical current and to particle physics.

A PRELIMINARY REPORT

ANDRIJA PUHARICH, M.D., LL.D.

Identification of a chemical compound which may possibly be the receptor mechanism for artificial predatory ELF emissions. In Vitro, and In Vivo [human] studies.

ABSTRACT:

The *in vitro* synthesis of a protoporphyrin complex which shows free oscillatory entrainment from the earth's natural ELF magnetic field at 8 Hz in a solution. This compound has also been found in human blood where it may possibly serve as the receptor-detector for artificial predatory ELF emissions. These findings suggest a line of research to be followed that may lead to a means of protection and defense against artificial predatory ELF emissions.

RADIONICS ON THE HOMESTEAD

Abstract

LUTIE LARSEN

Session A

I The Intensive Home Garden—
with a Radionic Boost

- A Soil and Fertility—how to check, chart and balance—soil structure
- B The Lay of the Land—ley-lines, water, magnetic, direction, earth energy
- C Companions—and Succession—have a continuous garden—the use of plants to one another
- D Stewardship—meeting the needs of your garden—how to determine ways to supply
- E Summary—the harvest

Session B

- II The Radionic Homestead
 - A The Home—balancing energies—creating a refuge from the world
 - B The Garden—overlighting energies
 - C The Orchard—insects—intemperate weather—bird problems
 - D Field Crops—define the problem—find the cure
 - E Farm Animals and Creatures—a “natural” health problem
 - F Pest Control—some devices and principles
 - G Summary—the key is balance and consistency

RADIONICS AND OTHER TECHNOLOGIES IN AGRICULTURE

Abstracts

Kathleen Joyce

Suggestions for the use of reagents to stimulate plant growth. Specific reagents affect certain kinds of insects. The importance of correct soil preparation.

Sources include reference works on radionics and Steiner's work in bio-

dynamics, Langham's work on Circle Gardening, companion planting guides, etc.

Physical models of coils and other devices will be shown for stimulating plant growth.

PATTERNS OF UFO REPORTS

Abstract

R. Leo Sprinkle, Ph.D.

The lecture/slide presentation provides a brief history of the modern era (1947 to date) of some of the patterns of UFO reports: the number of reports, cycles, location, duration, and descriptions of “flying saucers.” “Classic” UFO photographs are shown and analyzed. Well known UFO investigators and abductees are shown and the pattern of experiences in UFO observations/abductions/and contacts are commented upon.

The bias of the presenter, based upon his own observations and his own investigations, is twofold:

1. UFO experiences are “real” and continue to occur.
2. UFO phenomena are real at several levels: physical, biological, psycho-social, and at psychic levels.

THE NEURO-PHYSIOLOGY OF SUBTLE BODY EMANATIONS

Abstract

DR. LOUIS LEONARDI, D.C., N.D.

PURPOSE: to examine subtle emanations of the human body and their importance to optional functioning and potential.

: to explore the physical-neurological counterparts of these

subtle energies and their important ramifications.

: to explain how they can be detected and recorded.

: to demonstrate how they can bring about harmony and well being.

DISCUSSION: When the nervous system is in a pathological state it emanates the specific frequency of 69.5 GHZ. An instrument has been developed to detect and record this subtle energy. Through delicate manipulation, the nervous system can be balanced and the emanation of 69.5 can be stopped. It is our conclusion that this condition of the nervous system is the first physical manifestation of disease in the human organism.

HOMEOPATHY AND PATTERNS OF HEALTH

Outline of Presentation

RT. REV. DR. E. W. PLETTNER III

1. Some Considerations from Physics
2. Homeopathic Rational
 - a. vitalism and man's threefold nature
 - b. individualization and hierarchical functioning
 - c. simillimum
 - d. Herring's Law
 - e. minimal intervention
3. Energetic Medicine: techniques and systems
4. Patterns of Disease and Health

SUBTLE ENERGY - A CHALLENGE FOR RESEARCH

Abstract

E. JAMES FAUBEL AND
WILLARD FRANK

I. Brief historical references to: Abrams, Drown, Hieronymus, DeLaWarr, Burr and Northrup, Russian and Austrian work, Tansley and subtle energy relationships.

II. A brief over-view of energy fields and centers as an introduction to specific energy fields.

III. A comparison of energy fields.

- A. Electrostatic fields
- B. Electromagnetic fields
- C. Acoustic fields
- D. Nuclear and high energy particle fields
- E. Gravitational fields
- F. Subtle Energy fields

IV. Problems in measuring subtle energy.

A. Electrical energy measures and means; speed equals frequency times wavelength ($S = FW$)

B. Instantaneous or infinite factor in subtle energy measurements

V. A proposed means for a standard unit of measurement for subtle energy.

A. The need for a standard unit of measurement.

B. A proposed standard.

VI. Summary of major points and request for input.

A. Cooperative research efforts.

B. Questions from attendees.

BIO-MICRO-ENERGETICS AN ULTRA FINE THERAPY

Outline of Presentation

WILBERT L.

HABERTHIER, M.D. - HND

Evolution of Bio-Micro-Energetics

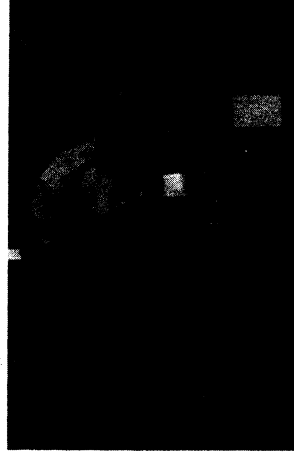

A). Why it evolved

B). What it is accomplishing

C). Approaches utilized in its evolution

Thomas Bearden, member of the Board, responding to discussion during his presentation on Tesla Waves, "Toward a New Electromagnetics"

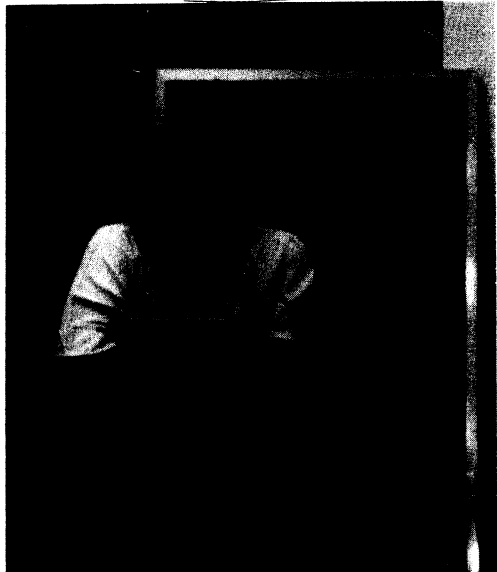

Kathleen Joyce, former Board member and publisher of the periodical "Energy Unlimited", speaking on "Radionics and Other Technologies in Agriculture".

Ann Johnson, long-term former Board member, presenting a paper on "Possessions, Alien and Spirit".

William Bise, founder of the Pacific Northwest Center for the Study of Non-Ionizing Radiation, discussing "Measurement of ELF Signals".

- 1). Acupuncture
 - A). Classical approach
 - B). Theory
 - C). Application
 - D). Problems
- 2). Homeopathy
 - A). Classical approach
 - B). Problem areas
 - C). Practical approach
- 3). Bio-Micro Energetics
 - A). A comprehensive concept
 - B). Its approach
 - C). What it consists of
 - D). What it accomplishes
 - E). Problem areas

of self, unique manifestation, creativity, and realization of being one with a Universal flow.

People are trained to recognize what is happening in the energy field of the individual's body as the changes occur. Enhancing the subtle tactile sensations and overall feeling of the rediscovered health patterns permits these to be continued.

The instances included describe use of psychotronic principles for achieving objective monitoring as well as instrumentation to clarify the goals of the client.

(EAV)

- A). Portions of acupuncture theories, empirical facts
- B). Meridians and acupuncture points
- C). Homeopathic involvement
- D). Allopathic involvement
- E). Instrumentation (Dermatron)
 - 1). Basic function
 - 2). What it tells us
 - 3). How its results are utilized
 - 4). Determining correct method of therapy (remedies)
- F). Results

POSSESSION, ALIEN AND SPIRIT

Abstract

ANN JOHNSON

Possession, alien or spirit, can create instantaneous personality changes, clouded minds, multiple personalities, schizophrenia, paranoia, alcoholism, drug addiction . . . ad nauseum. From the most subtle to life threatening, change will be apparent as one gropes for answers. It has been said, "He's just not the same guy since his operation," "She looks so strange out of her eyes," "He's like a different person when he drinks," "I just don't know her anymore."

Carefully researched techniques and an exceptional record of exorcisms make it possible to follow the directions of the super-conscious of an individual in an altered state of consciousness and to communicate with these possessing spirits or invading aliens. Audio and film clips offer profound insight into this stark reality. Scenes ranging from horror and pain to blissful freedom are shared as the appropriate energy is engaged to release these forces into light. Mental and physical illnesses and bur-

**HIGHER SENSORY PERCEPTION
TRAINING TO MONITOR
PSYCHOTRONICS**

Abstract

REV. J. T. ORION

A review of several instances in which the client, counselor and operator cooperate in discerning quantity, quality and time span of various therapies.

Specifically, this paper is concerned with the repatterning of body energy flow for seven major characteristics of humanity: physical, emotional, memory/intellect, recognition of truth

dens can be observed instantly being released.

How does it happen? What forces sustain them? What are the effects? What are the threats to you? How can you protect yourself? How can you tell if you are possessed? How can they be released? How can they be controlled? These are some of the many questions which are answered.

THE LAWS OF SOUND

Abstract

BARBARA HERO

This presentation discusses briefly the origin of the Lambdoma Diagram and presents its laws relating sound to mathematics. Applications of the Lambdoma Diagram to physics, particularly sound, light, electricity and gravity.

Lambdoma sounds generated by computer at MIT are presented by video.

The effects of these sounds upon residents in a drug rehabilitation art workshop are presented and their results are shown by slides.

The possibility of other applications will be suggested.

SYSTEMOLOGY: A NEW PARADIGM TO RECONCILE PSYCHOTRONICS AND CONVENTIONAL SCIENCES

Abstract

REV. HENRY J. NAGORKA

The history of science records innumerable instances of hostile reception to new ideas—as a result of which scientific progress is impeded. For some time, the fledgling science of psychotronics has been trying to gain

recognition and acceptance as a valid discipline but with little success. The cause lies in the character of the present scientific paradigm which ignores vital functions that confront us in nature. This paper presents the fundamental viewpoints of an alternate paradigm with its own epistemology and methodology originated by a highly gifted friend and colleague, Benedict Victor Arul.

Positivism, logical positivism, and empiricism stand challenged by the discoveries in the psychology of perception which has shown that perception is subject to organization suggesting that "the empiricist credo claiming the possibility of objective knowledge through experiment and observation alone is substantially at variance with truth." (Arul, 1981).

What kind of organization intervenes to arrange sense-derived information into a cognitive system that serves to confer meaning on the world of one's experiences? Arul argues that the same laws that govern the development of biological systems operate in cognitive system formation. This position is in line with the thought of the well known psychologist, Jean Piaget (1971). The necessity of supplanting the present paradigm with another that can live in harmony with the complexities of living systems, and of embracing a scientific method that is suited to the study of living nature is becoming increasingly evident. As Ernst Mayr has noted, the conventional scientific method has been heavily influenced by physics and chemistry (Mayr, 1982), while it is biology which deserves the preeminent position as a field wherein conceptual novelties suitable for application in the investigation of natural phenomena should originate.

The general parameters of such an approach which include all biological

and cognitive systems are presented for examination.

**RECENT DEVELOPMENTS IN
E.L.F., CONSCIOUSNESS,
PSYCHOTRONICS, AND ENERGY
SYSTEMS**

Abstract

ROBERT C. BECK, D.SC.

DESCRIPTORS: Soliton Fields, Morphogenetic Fields, E.L.F., "Life Force" Patterns, Computerized Radionics, Free-Energy developments, Psychokinesis and Metal Bending.

The years 1981-82 have seen stunning and unexpected advances in the fields of many previously controversial disciplines, including psychotronics, radionics, life-fields, P.K., and alternative energy systems. Common links are emerging in unrelated scientific studies.

"Morphogenetic Fields" or universal "patterns" (re: Rupert Sheldrake, Cambridge) are under investigation by numerous researchers. Experiments with lower life-forms indicate that our matrices exist externally to our physical bodies, and are NOT carried in the RNA/DNA as previously postulated. Genes may be simply "tuners".

These findings, coupled with the Pribim/Baum "Holographic Mind" model, suggest for the first time hard core scientific models for empirically established successes of distant treatment with "psychotronic" devices, which with "intention", tap life patterns.

Slides show a modern medical facility in Nevada using advanced, computerized radionics, acupuncture and homeopathic modalities achieving stunning success rates with previously "incurable" patients. Advanced instrumentation will be discussed.

Since 1973, when the author first undertook human experiments with E.L.F. magnetic stimulus with human subjects, nearly 2000 studies by medical and university researchers have replicated in large part his initial findings. "Soliton" waves in human neuronal tissue have been postulated by Adey, and Huth has demonstrated 100% cures of certain forms of cancer with EM irradiation. Millimeter waves existing on intercellular membranes appear to carry the life-signals instead of random noise as previously assumed. When these are decoded, "life patterns" themselves may emerge. This may portend vastly more significant changes in consciousness and medicine than the physical/chemical "genetic engineering" making today's headlines. Implications for E.S.P. and psychokinesis will be discussed. Slides will show "metal bending" tests via "mind". The reproduceable interface between Electronics, Gravity, and Life-Patterns (Burr/Ravitz) may have been discovered by W. Hooper shortly before his death in 1971. Two U.S. Patents, issued posthumously, disclose a simple electronic system for generation "motional electric" fields that may simulate the communications link (scalar interferometry) used by higher life-forms for supra-normal communications. (Slides will show his patents and devices and methods.)

Finally, two recent and mysterious "meld-downs", apparently impossible by accepted scientific knowledge, have occurred at widely separated locations in the Southern California deserts. The writer was privileged to be called into the investigation, and hard-core evidence suggests that a new and unexpected mechanism has been accidentally revealed for generating megawatts of power with simple magnetic devices. Slides of the sites, the apparatus, and the devices will be shown. "Hooper" waves are strongly implicated as the "trigger" for converting

gravity into electricity. Time permitting, new electronic instruments may be demonstrated so that participants can directly experience the effects of the Scalar Polarization Vector fields.

ELECTROTHERAPEUTICS: WAVE FORMS OF THE PRESENT

Abstract

RUTH HARVEY

Pain . . . neuro-musculo-skeletal pain in particular, is the number one reason most people seek the help of their physicians. In some cases, pain is relieved by the administration of analgesic medication, facet rhizotomies and cordotomies. These are traumatic, invasive and stress producing methods which often prove to be ineffective for long term relief. The chronic pain patient appears to be quite refractory to rehabilitation through surgery or analgesics.

Recognizing the depth of the problem, pain clinics are sprouting in growing numbers all across the land. Using biofeedback, autogenics, hypnosis, meditation, acupuncture and nutrition . . . all methods designed to assist the body in its effort to right its disorders naturally.

Recent advances in the neurosciences, micro electronics and computer technology have given us an unsurpassed method for pain relief and other disorders: Electro-stimulation. Safe, non-invasive, painless, cost effective and fast. Average treatment time is five to ten minutes, with 80% of patients receiving immediate relief for hours, days or permanently from back pain, joint pain (arthritis and bursitis), headaches, muscle pain, nerve pain, post operative pain, whiplash, idiopathic pain and more.

Electromedicine includes electro-acupuncture, transcutaneous electric nerve stimulation and biofeedback technology. Electro-acupuncture is a more efficient modality than acupuncture as it does not necessitate puncturing the skin. Also, treatment time is shortened considerably.

Another arm of electromedicine is auriculo-therapy, the somatotopic mapping of the body, which is represented upon the external ear. According to this system, the pioneering work of the French neurologist Paul Nogier, auricular areas of increased electrical conductivity and tenderness to touch, correspond to specific areas of the body where there is pathology. The hypothetical map of bodily regions appears on the external ear in the form of an inverted fetus. Upon diagnosing a reactive point by way of a minute current (one microampere) plus computerized feedback, treatment is administered via biphasic current at particular frequencies and amplitudes.

Other areas of the body can be similarly tested and treated, pathology being denoted in any given area by high impedance to electrical flow. The goal is to break through this impedance and increase conductivity, thereby assisting the body in the correction of electrical balances.

PRE-ATLANTEAN UFO SITES IN THE WEST

Abstract

TOBY GROTZ

Certain archaeological sites throughout the southwestern United States, centered about the "four-corners" area, defy conventional explanations. Excavations have failed to explain who, when, or why these sites were occupied. Several sites in Utah and

Colorado are examined. Dowsing techniques, psychics and trance sensitives have been used to determine site characteristics. The standing stone circles, unique petroglyphs and other megalithic structures of this area, as well as possibly related sites in Peru and Mexico, have provided clues to the ancient's origin, understanding and use of earth energy. The significance of this understanding is just now beginning to be appreciated.

THE MANY VARIETIES OF ENERGY

Abstract

DR. DANIEL W. FRY

Energy is defined as the ability to cause changes in matter or in other forms of energy. Any change in the condition, the position or the state of motion of any matter, requires energy. "Matter, if entirely without energy would be a meaningless essence which could not manifest itself in any way, and could not even be seen." (Aristotle in "The Physics.") Energy, in itself is completely non-material, and can manifest only through effects of interacting with matter. These effects constitute the great bulk of the science of physics.

There are however, some forms of energy which, like the neutrino, do not interact with matter, but only with other forms of energy, and so cannot be detected by material instruments. Some of these energy forms are so subtle and so difficult to detect or to measure, that they are virtually unknown to the conventional sciences, and become known only to those dedicated individuals who spend their lives seeking them out and developing means to demonstrate their existence and properties. One of these energy forms is now generally known as Life

Energy, but in the past has been known as Vril, Prana, Elan VitalZ and by many other names. Its presence is necessary to the creation and the continuation of any form of life, and the degree to which its flow is unimpeded determines the degree of life expectancy, since the aging process begins only as the flow of life energy dwindles.

There are several of the more subtle energy forms that tend to inhibit the generation and the flow of life energy. One of these is emitted from the nucleus of any atom when, for any reason, there is a net loss of binding energy, whether it results from the fission of a heavy atom or the fusion of several light ones, or even in chemical changes, although in that case they are vanishingly small. Since the radiated energy does not interact with matter, it cannot be detected by any of the instruments designed for the detection of nuclear particles or energies. Since it readily penetrates all matter, there is no way in which any life can be shielded from its effects, and because of the constant nuclear actions going on in the sun, all life is exposed to a certain amount of it. Like all radiation however, it is attenuated according to the inverse square law of distance, and is to begin with, a rather weak energy form. There is little likelihood that life on earth will be endangered by it, but its effects upon life expectancy will probably become measurable as nuclear processes proliferate on the planet itself.

PART TWO

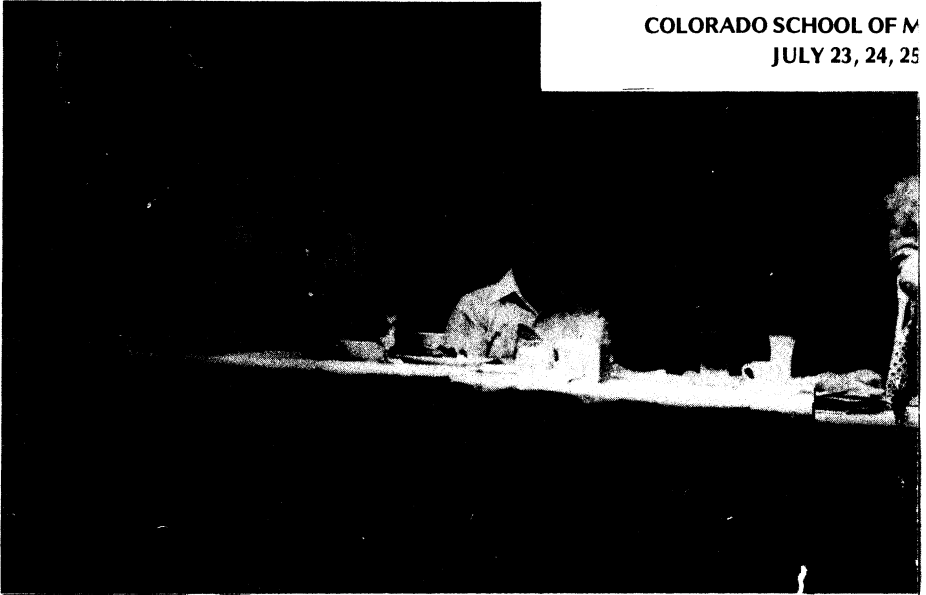

APPLICATION OF NATURAL ENERGY TO HUMAN NEEDS

One of the principal differences between man and animal is that the latter uses only his own muscular system as

PAPERS Continued from page 15

an energy source, while man has always sought to acquire and to use energy sources greater than those which his own body can generate. Primitive man enlisted the aid of animals stronger than himself to perform his tasks. Even today, in some countries the muscles of domestic animals contribute a large percentage of the energy available to man. As man's knowledge increased however, he began to make more and more use of the many forms of natural energy manifesting themselves all around him. When man learned to create and to control fire, he was separated for all time from the life pattern of animals. The heat of fire enabled him to melt metals and to make tools for the collection of other forms of energy, such as that from wind and falling water. Few people today, except those who have studied the subject, have any real concept of the degree to which natural energy sources had been utilized in the distant past and whose technology had progressed steadily until rudely interrupted by the discovery and use of fossil fuels. The fossil fuel interlude will soon be drawing to a close and man will return to the interrupted development of the natural and perpetual sources which will easily serve all of his needs until perhaps, he achieves the final technological breakthrough of the rotation of matter upon the energy axis, or the complete conversion of hydrogen atoms to energy, without pollution and without residue.

THEORETICAL AND FIELD STUDIES OF EXTREMELY LOW FREQUENCY RADIATION AND COHERENT NONLINEAR PHENOMENA

Abstract

ELIZABETH A. RAUSCHER, PH.D.

We have monitored and examined ELF radiation in France, Utah, Los

Angeles, and San Francisco, from about 3 to 30 Hz. Both inductance coil and Panasonic receiver were utilized, with researchers William Bise, Robert Beck, William Wolkowski and Henry Dakin. Both natural and artificial radiation were monitored, catalogued, and characterized. Wave characteristics, frequency, amplitude, and location (and local facilities) were noted.

I have conducted detailed theoretical studies of coherent, nonlinear electromagnetic phenomena. For example, monopole like soliton solutions are found for Maxwell's equations formulated in a complex Minkowski space. Nonlocal (as well as superluminal) connections are fundamental properties of three multi-dimensional geometries we have examined in detail. These are the complex eight space, five and six dimensional Kaluza-Klein geometries, and Descartes geometries. The twister algebra of the complex eight space is mappable one-to-one to the spinor calculus of the Kaluza-Klein geometry. The nonlinear properties associated with the imaginary components of space and time lead to soliton "non-dispersive" solutions of the Schroedinger and Dirac equations, which demonstrates a mechanism of this remote connectedness.

Certain detected radiations may be explained by such a model of electromagnetic phenomena. Source and interaction terms such as nonlinear coupling constants are theoretically formulated and experiments are suggested.

HISTORY OF RADIONICS

Abstract

RILEY HANSARD CRABB

Review of the education, background and qualifications of Dr. Albert

Abrams. His discovery of the Electronic parameters of living tissue in the early 1900s, and the establishing of a vibratory rate system for the diseases and organs of the body, and their amplitude. The additions, improvements and refinements of his students, Dr. Ruth Drown, E. Stanley Rogers, Dr. Lindbergh, Dr. Chapman, Sir Francis Barr and others. Development of the rubbing plate, contact and broadcast treatment with the Oscilloclast. The advanced work of the late Malcolm Rae using rate cards as symbols for dial settings on the diagnostic and treatment instruments. Over 2000 of Rae's instruments are in use all over the world. The Rae broadcast instrument is an ELF wave device with a pulse rate of about six cycles per second. The Abrams Oscilloclast is also an ELF wave device, with a rate of 1½ Herz as a base rate, modulated with specific disease rates in the area of 40 megacycles. It is significant that this early work in Radionics anticipated the re-discovery of ELF waves and their importance to human consciousness by several generations!

MEASUREMENT OF E.L.F. SIGNALS

Abstract

WILLIAM BISE

Detection and measurement of extremely low frequency (E.L.F.) signals require specialized instrumentation that is not available as a calibrated, off the shelf, low priced manufactured item. As a result research in this very narrow band of the spectrum is very sparse. Dr. Robert Beck of Los Angeles CA pioneered in development of sensitive inexpensive magnetic detectors and gathered significant data over the last decade. Measurement of E.L.F. magnetic signals a few years

later employing custom built detectors for monitoring both natural and man-made E.L.F. waves has produced data indicating that living systems on earth are sensitive to and interact with E.L.F. radiation in highly interesting ways. Brainwaves, cardiac waves, nerve impulses, earthquakes, lightning discharges, and volcanism all operate in the E.L.F. waveband and have the potential of interaction.

Geological and solar E.L.F. emanations can entrain or change human brainwaves and heart rhythms.

Some of these interactions are examined in demonstrations utilizing custom built instrumentation.

PSYCHOKINETIC LIQUID SENSOR

Abstract

WILLIAM BISE

99.9+ % pure nickel anodes of critical diameter, submerged in cells of extremely dilute distilled water solutions of certain alkali halides, when subjected to microampere direct current of low forward potential difference have shown sensitivity to mental activity. Sudden mood and metabolism changes in humans, up to several kilometers distance from the cells, also cause them to react.

Artifactual effects such as R.F. and A.C. interferences, capacitance and instrument noise have been ruled out.

Continuing research into these phenomena over the past twenty years, has indicated the likelihood that a psychokinetic effect can take place between living systems and these isolated nickel anode coupled saline cells. This effect can occur when a cell and a living system are separately connected to similar sources of low potential difference and direct currents, which are then amplified and displayed

on a suitable read-out device. Coinciding readout deflections have been intentionally produced in these separate systems. The phenomenon is replicable although exact degrees of instrument deflections will vary.

This phenomenon is described and demonstrated.

OTHER PAPERS PRESENTED AT THE 1982 USPA CONFERENCE

Ivan Kruglak- "Programmable Strobe: Can It Induce Altered States"

Sue Wallace- "Magnetism, Kinetics, and Body Harmony"

Elizabeth Rauscher- "ELF Radiation & Non-Linear Coherent Phenomena"

Andrija Puharich- "Chemical Compounds—Receptors of Artificial ELF"

Andrija Puharich- "Keynote Speech—Kindling Plus 1" at the Awards Banquet.

"Award to A. Puharich for Excellence in Research"

David Rhoads- "Opening Remarks by the President of USPA"

Betty Reeves- "UFO's, Past & Present" (UFO Contactee of 3rd Kind)

Michael Helous- "Astrosonics"

Irwin Stark- "Psychotronics & Perception Mechanics"

David Wilcox- "UFO's: Do you Believe?"

T.G. Hieronymus- "The Future of the Healing Arts"

Sarah Hieronymus- "Laboratory Techniques with Subtle Energies"

Toby Grotz- "Auric Experiments with Pulsating Magnetic Fields"

W. Hoffman- "Radionics, Patterns, and Homeopathic Practices"

J. Rollins, et-al- "Phiso-Energy and Mechanics"

J.G. Gallimore- "Selection & Use of Crystals, Talismans & Healing"

Gary Fleck- "Crystals for Healing"

Elaine Finster- "Healing and Color"

J. Freidenstein- "Psychotronics, Natural Farm Rescue"

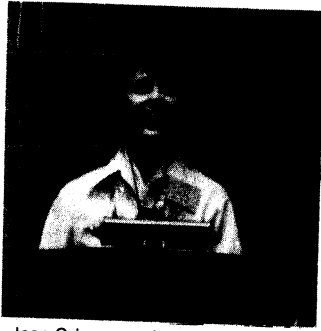

Wiley Brooks- "Breatharism" (How to Live on Air Only)

THANK YOU USPAns!

The USPA Executive Council expresses its appreciation to participants in the 1982 Conference and congratulates the Organizing Committee, co-chaired by Dean Stonier and Toby Grotz, of the Colorado Chapter of USPA, for generating one of the best meetings in its history.

Minor coordinating difficulties were taken in stride. Constructive cooperation, with a few insignificant exceptions, functioned throughout the meeting.

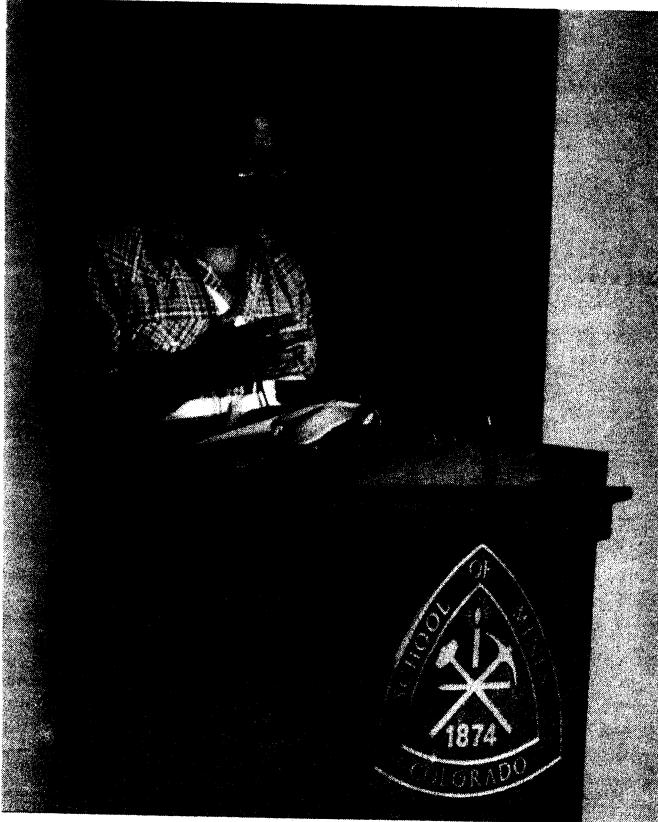

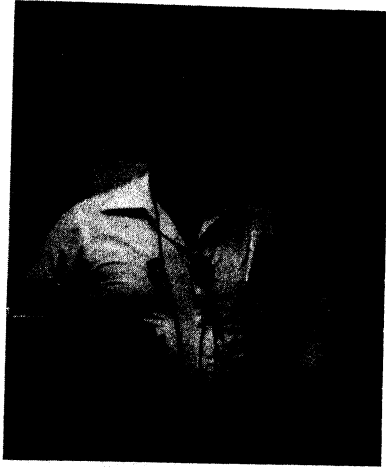

The Executive Council looks forward to a similar level of effectiveness in the 1983 Conference at the University of Portland, Oregon.

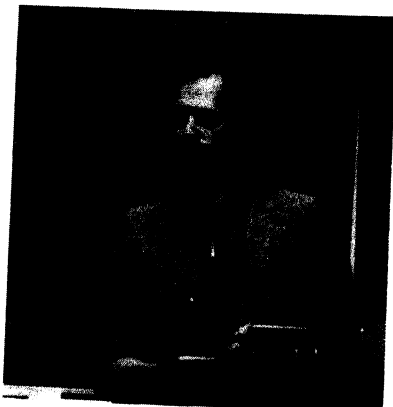

Rev. Joan Orion, member of the Board, speaking on "HSP/Biofeedback to Monitor Psychotronics"

Jerry Fridenstein answers questions relating to his presentation, "Psychotronics, Natural Farm Rescue".

Ivan Kruglak, member of the Board, speaking on "Programmable Strobe: Can It Induce Altered States?"

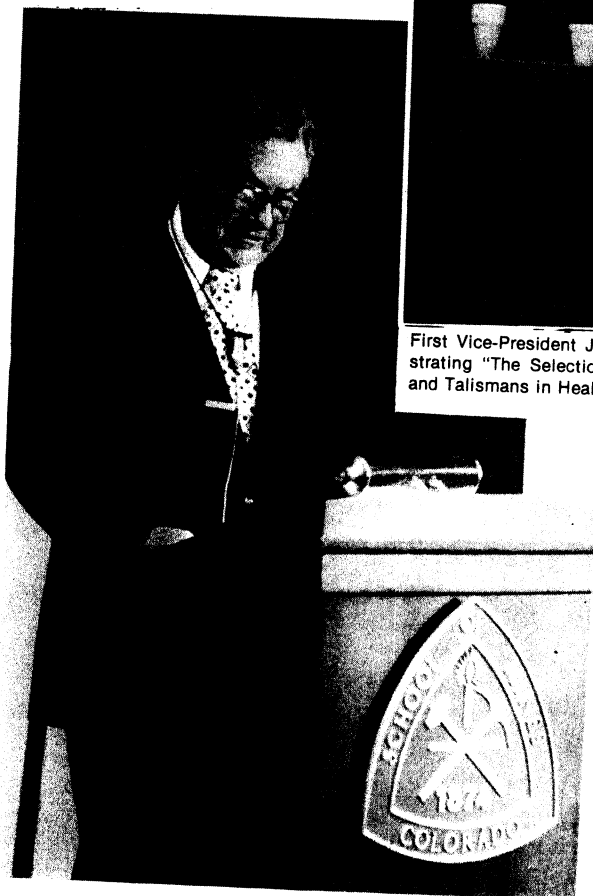

Dr. E. W. Plettner III, presenting his paper, "Homeopathy and Patterns of Health".

First Vice-President J. G. Gallimore, demonstrating "The Selection and Use of Crystals and Talismans in Healing".

Rev. Henry J. Nagorka, member of the Board and publisher of **The Psychic Observer**, presenting a paper on "Systemology, a New Paradigm to Reconcile Psychotronics and Conventional Science".

beautiful mountainside setting of the town and the school.

The air was pristine at the 5,690 foot altitude and the occasional lazy white cloud only emphasized the intensely blue sky. The horizon in one direction was completely eliminated by a sharply rising range of mountains, partly covered with pine and brush—while in the opposite direction it was possible to see the land dropping away toward Denver, leaving an expansive vista of twenty or more miles.

When we spoke excitedly of this natural beauty, a native resident reacted with reserve.

"You came at a very unusual time. We're usually cloaked in smog up here!"

This was indeed difficult to accept. Here? At a mile up—in the mountains?!

"Yeah"—said the man without reaction. "More and more industry is coming into the area. . ."

After registering and settling into the pleasant accommodations—with no locks on the doors—we stepped out to look about the town—a full three or four blocks long. We discovered Golden to be a treasure house of Americana. The old evidences of a mining town were everywhere. The hilly streets and nineteenth century buildings almost suggest a film setting for a John Wayne western.

description of the watch and her address to the secretary/treasurer—Robert Beutlich, USPA, 3459 Montrose Avenue, Chicago, IL 60618.

A Personal View

Continued from page 24

We found our way to the dining hall on campus and discovered that we were in for a treat. Institutional food does not need to be overcooked and bland. The cooks at the cafeteria prepared good fresh food with imagination—and tastily seasoned. The “new-agers” among our participants—and there are more every year—were pleased to find enough meatless fare and variety of salads and vegetables.

For the most part, the meals were taken up with discussion of the papers just heard—and although friendly, the excitement of new concepts or directions scientifically and metaphysically often animated the cafeteria table debaters.

The scheduling of the presentations into two main lecture halls to run simultaneously was a wise departure from former practice. Although voices were heard objecting to the necessity to choose one speaker over another, this was a natural development resulting from USPA growth. Compare this with the scheduling of 15 speakers simultaneously by the World Future Society (see News Note on page 3) or an even greater number of conflicts each year in the meetings of the American Association for the Advancement of Science.

We found ourselves sampling some of the presentations by checking both. For the most part however, it was possible to make a decision from the titles in the program. We missed one or two presentations which we later learned were of serious interest to us. Most of what we heard was useful. A few presentations represented the spearhead research being conducted in the field. Several papers approached the “Ah Ha!” level and were mind-boggling. Exactly what we came to hear!

The release of heretofore concealed information in electromagnetism theory and its profound implications for the future of this civilization made the presentations by Tom Bearden and Bob Beck most significant. Of equal, if not greater importance, was the exposition by Andrija Puharich on how he is creating life in the laboratory, and his discovery of the key to move it into flora or fauna. Puharich’s award for achievement in 1982 was appropriate indeed. The disclosures he made during his acceptance remarks were shockingly significant. It is not necessary to go into the substance of his comments since they are available in their original form on tape (see the end pages of this newsletter), but for the reader who was not there, the substance concerned itself with the mechanisms of interaction with non-terrestrial, god-like intelligences and individualities which have lived for thousands of years.

The evening rap sessions held privately for exchanging information which could not be offered publicly, as well as group metal-bending sessions—these could not compete in excitement and meaning with the Bearden, Beck and Puharich presentations. These lifted us out of this world into some other—and it was hard indeed to return to the physical present.

Packing up to leave the conference we felt great reluctance—wishing to meet again and again with these giants of the frontiers of science and to bathe in the light of their expert knowledge and wisdom. But, the accommodations were already assigned to the next conference—due to arrive that evening—and so with considerable feeling, we made our farewells.

We both agree—we’ll never be the same again. We’ve moved forward.

—A member of USPA

PLEASE USE ORDER FORM ON FOLLOWING PAGE [31]

REQUEST FOR INFORMATION

USPA requests that members and the general public who have had business correspondence or dealings with Herbert Scott and Associates of Hancock, Wisconsin, inform the secretary, Robert Beutlich of their experiences.

The purchase of radionic kits or assembled devices is of special interest to the Ethics Sub-Committee of the Standards Committee. The Sub-Committee, in accordance with the USPA charter, is exploring the advertising claims and marketing of radionic instruments which may be counter-productive to the field of psychotronics.

The membership will be informed of developments in this matter through future Newsletters.
