MESSAGE FROM THE PRESIDENT

First I'd like to state how honored I am to be chosen President of the USPA by a jury of my peers.

Secondly, I want to emphasize that in the role of President, it is important to understand that I am openly soliciting the input of all members. To that end, you may call me at (213) 462-7093 day or night with USPA-related business. The buck stops here.

Thirdly, it is important for members to realize that the Board of Directors and the Officers are here to serve you and not vice versa.

And, finally, I would like to make my Data Base available on genuine research projects related to psychotronics. The USPA must remain an open forum and that must be its only function, aside from the social one of bringing us together every year.

Robert Beck,
President, USPA

United States Psychotronics Association

Board of Directors:

Robert Beck '85
Peter Kelly '85
Elizabeth Rauscher '85
Rita Fryer '86
Kathleen Joyce '86
Edwin Skilling '86
Thomas Bearden '87
Samuel Lentine '87
Marcel Vogel '87

Officers:

Robert Beck--Pres.	Kathleen Joyce-Exec. Secy.
<u>Vice Presidents</u>	64 A Fire Station Road
Peter Kelly-1st	Rt. 4 Box 288
Rev. Henry Nagorka-2nd	Los Lunas NM 87031
Andrija Puharich-3rd	Robert Beutlich-Secy./Treas.
J. G. Gallimore-4th	3459 Montrose Avenue
Jerry Fridenstine-5th	Chicago IL 60618
Preston Nichols-6th	(312) 478-7715

AIMS

1. To promote the free exchange, discussion and dissemination of information, theories, ideas and practices related to psychotronics.
2. To maintain high standards of ethics, humanitarianism and scientific practices in the study and application of psychotronics.
3. To preserve the history and genealogy of psychotronics.
4. To secure cooperative action in advancing the common cause of its members.
5. To disseminate information of a general, economic, social or governmental character, to analyze subjects relating thereto, and to secure and present the views of its members to other organizations, the government, and the public.
6. To cooperate with other organizations of like interest.
7. To further the training and education of its members.
8. To promote standardization in the investigation, testing, reporting and evaluation of psychotronics.
9. To provide in its periodical(s) a national forum for the report and publication of all worthy activities and projects of persons, groups or organizations working in the field of psychotronics.
10. To make awards, locally and nationally, to persons, associations or agencies, in recognition of outstanding contributions or accomplishments in the field of psychotronics.

MEMBERSHIP

The U.S. Psychotronics Association, incorporated in the District of Columbia in August, 1977, is empowered to enroll members in the parent organization and to develop chapters throughout the nation.

Six categories of membership are open to the imaginative individual who wishes to join with the U.S.P.A. on the new frontiers of science in working constructively for the qualitative improvement of man and his environment.

1. General--\$20.00 per year (any citizen of the United States).
2. Family--\$25.00 per year (includes all members of one immediate family).
3. Affiliate--\$13.00 per year (any firm, corporation, or organization). Non-voting.
4. Student--\$10.00 per year (any full-time student attending an accredited educational institution; or member of the Armed Forces of the United States).
5. Fellow--\$40.00 per year (any U.S. citizen active in Psychotronics, deemed eligible by the Board of Directors).
6. Honorary--No fee (granted for life by the Board of Directors for outstanding service).

Natural or not?

Scientists, former officers debate cause of mysterious cloud

Shortly after 1 p.m. April 9, 1984, Charles H. McDade, pilot of Japan Airlines Flight 36 from Tokyo to Anchorage, Alaska, was flying off the northern coast of Japan when he put in a mayday call to Anchorage:

"We have a...round ball cloud...looks like a nuclear explosion, only there was no lightning, but the cloud was there very definitely...We're at altitude 33,000 feet...the cloud continues to explode like a great big cloud, easy to see...and it expanded very rapidly... I turned off course to get away from it as much as possible...We are on 100 percent oxygen just as a precaution.

About the same time, four other airline pilots in the area reported seeing the same huge mushroom cloud rise to a height of 60,000 feet in two minutes. The pilots, fearing they were witnessing a nuclear explosion, reported the sighting and, upon landing, had their planes checked for radioactivity. None was discovered.

The next day, the Japanese government sent a reconnaissance plane into the area to search for radioactive dust or debris. None was discovered.

Today the event remains shrouded in mystery, with one scientist claiming the explosion could not have been a known natural event and a former Army officer claiming the cloud was the product of a Soviet test of a new type of long-range beam weapon.

In statements to the Federal Aviation Administration, the pilots reported seeing the mushroom cloud about the same time. After their inquiry, FAA officials attributed the event to an unexplained natural phenomenon.

That might have ended it, except for subsequent findings by Dr. Daniel A. Walker, a professor of geophysics at the University of Hawaii, monitors an array of hydrophones on the ocean bottom that record acoustic signals from seismic and volcanic activity.

In a telephone interview, Walker said

he initially believed the cloud resulted from the eruption of a submarine volcano. But after analyzing the data, he concluded there was no source of volcanic or seismic activity in the area where the cloud was sighted.

Walker, whose paper on the event has been accepted for publication in Science magazine in the next few weeks, concluded that the cloud was an unknown natural phenomenon or a manmade atmospheric explosion.

"Wild speculation" is the kind of language mainstream scientists use to characterize a theory about the cloud being promoted by two former military officers, Thomas E. Bearden, a retired Army lieutenant colonel, and Dr. Stefan Possony, a former Air Force intelligence officer. They believe the cloud is evidence that the Soviet Union is testing a new type of beam weapon unknown to U.S. scientists and researchers.

The 54-year-old Bearden, who worked on high energy lasers and did analyses of surface-to-air missiles for the Defense Department, claims the Soviets are exploiting a branch of physics developed by Nikola Tesla, a contemporary of Thomas Edison whose theories on electromagnetism have been largely dismissed by physicists.

According to Bearden, two electromagnetic beams can be calibrated in such a way that at their intersection they can create enormous amounts of directed energy. He says the mushroom cloud sighted off Japan in April was caused by a test of a Tesla-type weapon.

Many leading physicists and arms analysts dismiss Bearden's ideas, but Dr. Possony is more sympathetic.

Possony wrote in a recent issue of Defense & Foreign Affairs magazine, "Tesla weapons (could) mean a military transformation whose magnitude would exclude that of the nuclear and electronic space revolutions."*

[A Boston Globe release, quoted in the Dayton Daily News of Sunday, January 13, 1985.]

PSYCHOTRONICS: A STRANGE BRAND OF SCIENCE

Suppose you could light and heat your house without paying a bill, or diagnose an illness by inserting a photograph into a machine or cause a reaction in another person by holding a piece of crystallized quartz in your hands.

Suppose, as a videotape by author Thomas E. Bearden proclaimed in Springfielder Bill Sheline's living room recently, that a country could, through harnessing some form of free energy, bring attitudinal changes and even death to people in another country.

Welcome to the world of psychotronics -- or part of it, said Emerson King, who heads the new Clark County group.

"Psychotronics, an inter-disciplinary science concerned with the interactions of matter, energy and consciousness, has a wide range of interest areas, from physics to metaphysics and holistic medicine to free energy," he said.

The Springfield chapter is only the sixth across the country, according to Robert Beutlich, an officer with the national group, the U.S. Psychotronics Association. Some 550 people pay the \$20 a year national membership fee, he said. The organization, started in 1976, is an offshoot of the U.S. Radionics Congress.

"You must understand we are interested in the technical end of the abnormal," Beutlich said. "We're not out holding seances."

At least half the members are interested in explanations of "how it happens" with the realization that "physics doesn't explain everything." He estimated 30 per cent are interested in the laying on of hands and using crystals for healing.

"A primitive form of psychotronics lies in the voodoo doll," said King. "A more common but less sophisticated form is in the Ouija Board."

Some members believe free energy can be harnessed to heat and light homes and that research of this belief is stifled by the politics of the electric and gas companies. Likewise, some believe, expanded use of machines which diagnose

illness through Polaroid photographs is stifled by physicians.

"Not everyone with an interest in psychotronics subscribes to the same beliefs and theories," King said. "We don't ask that. We only ask that you don't make fun of someone else for what they believe."

A general sameness lies in two areas. They are acceptance of free energy and belief in the "expanding capabilities of the mind," he said. Beyond that, as a roundtable discussion at the organizational meeting revealed, the interests vary.

The Clark County group included, for example:

- A husband, wife and child interested in mood-altering factors of music.
- A man interested in energies of stones.
- A couple who investigate reported sightings of UFOs.

Bearden, whose book Excalibur Briefing is read by many involved in psychotronics, details a theory whereby a psychotronic disease or death vectors could be induced into television receivers. He also has theories about cattle mutilations, the Legionnaire's disease and UFOs.

"I can't say I agree with everything he says," King said. "But he makes a good plausible case and supports it well. I hope that his projections are not totally valid. Most psychotronic enthusiasts are interested in putting free energy into some constructive purpose."

Several area farmers are using radionic machines to cure ills of the soil. King claimed to know chiropractors who use the machine, sometimes secretly, to diagnose their patients. He said the machines are not popular with the AMA.

"There is a small number of people working on hardware of various kinds," he said. "We are at the edge of a grass roots revolution. These things are popping up all over. And some people believe we eventually won't need the machine, that the mind will do what the machine does."

[From an article written by Pat Huston for the Springfield (O.) News-Sun.]

INTERVIEW

PSYCHOTRONIC FARMING

An Interview With Peter Kelly
by Leslie Aickin

A controversial technique is having a having a growing impact in the farm community

The earth energies so important to old cultures may be a phenomenon similar to "energy meridians" and "pressure points," but in this case for the body of the earth. What offends the traditional scientific mind about all this is that detecting these energies requires trained human beings, not just mechanical instruments.

The subject of the following interview deals with a subtle technique which mixes instrumentation and human sensitivity and claims to detect and affect subtle energies which are not normally recognized by Western science. Because of this blend of mind and electronics, it is now known as "psychotronics," although when it was first developed it was called "radionics." It got started many decades ago when some inventors were attempting to use certain circuits to analyze mineral specimens, but found their readings were influenced by nearby plants and people. They changed direction, and have steadily explored the interaction between their equipment and the living world around them.

The validity of all this is definitely controversial, and my intention is not to "sell" you on psychotronics, one way or the other, but simply to explore beyond the edges of the comfortably known and remind ourselves that the land may hold mysteries beyond anything we have yet imagined.

Peter Kelly, an electronics engineer turned inventor and teacher, is the director of Interdimensional Sciences (P. O. Box 167, Lakemont Georgia 30552) and first vice-president of the U.S. Psychotronics Association (3459 Montrose Avenue, Chicago Illinois 60618). Leslie Aickin lives in Port Townsend, Washington, and is a personal friend of Peter. The interview is from the Winter 1984 issue of IN CONTEXT magazine.

Leslie: How does psychotronics work?

Peter: It is really very simple, if you first understand what modern physics has discovered: Everything in this universe seems to be patterns of energy at its primary level, and it is these patterns of energy crossing and recrossing their nodal points and their resonant points that make the physical universe, or seem to. They create a holographic pattern which is the physical substance itself. Psychotronics is a way of tuning in to these patterns of energy - these nodal points of crossing or points of resonance, whatever you want to call them.

L: How do you do that tuning; what equipment do you use?

P: Our tuners are rectangular boxes, about 2 feet long by 1.5 feet high by 1 foot deep, filled with various electronic components, and functioning somewhat like a bridge circuit in ordinary electronics. As you may know, a bridge circuit has three known sides plus a fourth side that can be filled by an unknown component to be tested. In a similar way, a psychotronic tuner detects the energy fields around whatever you put into it.

L: Where do you put the specimen that you are working with?

P: Into an input well. You then turn the dials connected to the variable capacitors, and (here's where it gets a little tricky) you have to rub an acrylic plate at the same time until your fingers stick to the plate. The operator has to be trained to do this successfully.

L: So the operator winds up being part of the whole circuit?

P: Normally. We've had some success with a system that does away with the operator, but it's still in the experimental stages.

L: What then do you do with these techniques?

P: When you can tune into something and attune to an aspect of it, then it's possible to modify its patterns of energy, and thus to affect the physical substance that is based on these patterns.

(Continued on page 7)

Interview (Continued)

For example, if you have a pattern that corresponds to an e Coli bacteria and you were to transpose this pattern electronically and feed it back 180 degrees out of phase, in theory you would see that the two opposite wave forms should cancel out, which would mean that the e Coli would be canceled out, and that is what we find to be the case in working with primitive organisms. Particularly in agriculture, things in their larval stage, or their simpler stages, are most amenable to cancellation or elimination.

L: On the physical plane would you be observing dying?

P: Not dying, disappearing.

L: So you wouldn't have a remnant form or body?

P: No, not in the very simple organisms. In a more complex one, you would have some remnants, but in the simple ones they just go back to their native materials, like water and basic energy. I know in research that has been done in, for example, corn borers. The corn borer literally dissolves in the ear of corn itself. You see the path leading down into where they were and just a wet smear. That is all that is left of them, to be reabsorbed by the corn.

That is where psychotronics has come from. The direction it is going to is completely different. We've started taking to heart a lot of what Dr. Philip Callahan has been saying. He is an entomologist with the USDA out of Gainesville, Florida, and author of the books Tuning in to Nature, Soul of the Ghost Moth, and Ancient Mysteries, Modern Visions. In his books he shows that the structure of the insects themselves make them receptors for for microwave level radiation or near infra-red - very high microwave - and that the signal comes off, say, a field of unhealthy corn which broadcasts to these insects and attracts them. So our approach nowadays, rather than trying to kill anything (since everything has its place in nature somewhere, even the insects in cleaning up diseased or unbalanced crops), would be to raise the vitality of the plant, raise the vitality of the field, so that the insects are no longer attracted to them.

L: In addition to no longer attracting damaging insects, does healthy corn also attract helpful organisms?

P: Absolutely. In connection with this we could go in a number of different directions, but let's start with the soil. Over the years, the soils in most fields have become literally a witches brew of chemicals in various levels. First, they have put on mineral-type fertilizers that tend to make the soil more full of salts every year, which means it is less conducive to life. Second, they have been using herbicides and pesticides to try to eliminate the problems that their unhealthy soil has caused.

We take that soil and in enough instances have demonstrated that first, we can neutralize these various chemicals that have been placed on the fields over many years. Second, we can clean out any imbalances in the fields that existed in the first place. Then we match the soil to any of a number of varieties of seeds. In effect, what we're saying is "OK, you seeds, which of you can grow best in this type of soil?"

L: You use a psychotronics device in order to determine this?

P: Oh yes, and find out what nutrients are available in the field, and then comparing it to what the plant would need through to its full production as a crop. Then we can potentize or add energy of the seed back to the seed. Now that seems strange unless you can remember that because everything is patterns of energy, if we take the pattern of energy off a seed, then we can replicate that pattern of energy and cast it back to the same seed. Next we take the fertilizer that shows best suited to the seed and the soil, and take out any factors that show to be detrimental to either the seed or the soil. Before we apply the fertilizer, after we have cleaned it out and balanced it, we can potentize it, which means that if before you needed a ton per acre, now you need only 200 pounds per acre. And then we can find out what the seed and later the plant is going to need all the way until it is harvested as far as additional minerals or nutrients or whatever.

(Continued on page 8)

Interview (Continued)

L: So you can set up a program to encourage maximum health for the plant throughout its whole cycle?

P: Right through to harvest. What we are trying to do is take the very inexact science of agriculture and make it a more exact science so that a farmer doesn't have to spend as much to produce, and yet what he does produce is very high in quality. To give you an example, one of our farmers last year had a total planting cost per acre for corn of \$29, compared to a national average of \$120/acre.

He's taking his own manure, turning it into compost, and balancing it and potentiating it using his psychotronic techniques. He is getting equivalent yields to anyone in his neighborhood, yet spending only 1/4 of what they are. His product doesn't mold, doesn't spoil, and has very high sugar readings because of the way he is producing it. We have other farmers who have sugar (Brix) readings on their alfalfa hay that are astounding, up around 30% sugar range, which is unheard of. Having such a high quality, such a high natural sugar level, the stuff doesn't spoil.

L: So storage becomes an easier function as well?

P: Absolutely. The way it's been done in the past is that the old salesman comes up to the farm and says "Well, how many acres are you going to do in corn this year?" And the farmer says "Well, I'm going to do 200 acres in corn." And the guy says "You are going to need X tons of fertilizer; when do you want it and how are you going to pay for it?" And the farmer just takes what they bring him.

L: Which is a very low labor approach in one way of looking at it; not in the long term, but in the short term. Do you find that farmers using your type of fertilizing program put more labor into the care of their fields, as opposed to more money?

P: There is a balance struck. For example, it doesn't take much thinking to realize that if you are spending \$29 or \$30 per acre as opposed to \$120 per acre, somewhere in there is a \$90 per acre premium that you are going to get, and you can afford to spend a little bit more

time in doing your own composting.

L: How would you characterize the people who seem to be attracted to using psychotronics as an alternative to conventional methods?

P: The ones that are at the bitter end, one step away from bankruptcy.

L: They have one more crop to make it or break it?

P: That's right. And once they have turned things around and at least break even for that year, once they see how what we're doing is cost effective, then they're sold for life. Now, some of the farmers that we've trained have taken the better part of a year to get their land clear, to get their animals cleaned out, to get the cows so they don't have chronic mastitis, or whatever. But if they stick with it, they get results. For example there are all sorts of tests they do on milk and on dairy herds in most states. Typical is what they call a somatic cell count of the milk. Up to something like a million cells is relatively safe. We have farmers now that (without putting any antibiotics in their feed like most others do) are getting somatic cell counts under 100!

They also don't have a lot of abortion taking place in the cows, which has been a big problem for a lot of farmers. These guys clean and balance their feed and water, and also work on their crops. So something is happening, it's real, and it's affecting their bottom line where everything is affected in the end.

L: What kind of time commitment does your training take?

P: My best answer is as much time as they have to spare.

L: This is for basic training in how to use psychotronics equipment and becoming familiar with their fields and that sort of thing?

P: Yes, and then the big thing of course is taking it home and using it. Those that do are becoming very successful. Those that put it on the side or just say well, you know, maybe this is what I thought it should be, end up without any real gain. It is not something you can do a little of, you have to make a commit-

(Continued on page 9)

Interview (Continued)

ment to work on these things, as we teach, and if they do, then we virtually guarantee they will have changes in their operation. We haven't lost a farmer yet, one they got hold of what we're doing, which is pretty remarkable when you consider the rate of farm bankruptcies in recent years.

L: How do these farmers hear about psychotronics in the first place?

P: Everything has been word of mouth so far. One guy telling his neighbor who tells his neighbor who tells a relative in another state and they are curious, or they have a friend that's curious, and they have heard of it or something. We have yet to advertise anything we've ever done and yet, between the personal classes and the agricultural classes, we've trained over 2,000 people in five years.

L: That's a substantial number of farmers, Peter.

P: Yes, and it's going up exponentially, too.

L: How widespread is psychotronic farming? Where do the people come from?

P: I've had people from Hawaii, Maine, California, Washington, Idaho, just about every state in the U.S. I've got apple orchards in Connecticut and Vermont, dairy farmers in New Jersey, Pennsylvania, Ohio, Iowa, Wisconsin. All through the farm belt, everywhere. As a matter of fact, I can't think of a single state where I haven't trained at least one person so far, plus many from other countries also.

L: Do you find that the people who are using psychotronics with farming come from any particular age group or educational background?

P: No, we've had them from 18 years old to the late 70's in the classes we've taught. In fact we've had one elderly couple from western Virginia that have a goat farm. We also get people from many different religious and philosophical backgrounds. In addition to all the usual denominations, we've had Amish, Mennonites, and others of the "plain people," as they call themselves.

L: So the people who are using it, then, are not necessarily people who are already predisposed to alternative solu-

tions?

P: Exactly. For some of them, that's the farthest thing from their minds. We feel very comfortable about that because we're creating a level of awareness that is affecting the whole nation, not just a specialized group of freethinkers.

L: How does what you are doing with psychotronic farming relate to approaches like biological agriculture and permaculture?

P: It adds a whole other dimension and puts you five years ahead right away because you can absolutely see the relationships between your land and anything you put on it or do with it. In our training what we stress, more than any other thing, more than the actual treating of the land, is the capability to know exactly where your land is -- the absolute ability to diagnose.

L: Could the techniques you are developing be used as a technological fix that would still leave some important attitude questions about the land unaddressed?

P: I won't claim that these techniques can't be misused, but all our material is set up to teach a person to go for a cause behind a cause behind a cause. For example, at one time the farm family was thought of as the healthiest segment of the population, with all that fresh air, good hard work, and good basic food. But now because of all the chemicals they are using, the farm community is full of stories of heart attacks and early cancers in 20- and 30-year-olds and a birth defect level higher than the national average.

So our first emphasis for these folks is for them to get themselves cleaned and balanced, and attitudes are an essential part of this. Once they have done this, then they can do the same thing to everything around them, their animals and then their land.

To make it work, you have to deal with the whole system.†

HARMONY WITH NATURE --
INTERPLANETARY AND INTERGALACTIC
Riley Hansard Crabb
(Abstract)

Thirty Years of Flying Saucer Research have convinced me that the Universe is a living entity with direction and purpose, not a thing of chance. It is a moral universe in which the Golden Rule applies. I am my brother's keeper! This means that advanced beings from older Systems assume the responsibility for the guidance and protection of beings like ourselves in younger Systems. With their high morals and ethics they live in harmony with Nature and must teach us how to cooperate with them, the Guardians.

Other beings without morals and ethics have also mastered space travel. They are here to try to take us over and use the planet and ourselves for their purposes. The result is war for control.

Being so advanced scientifically -- both the Good Guys and the Bad Guys -- their methods of communications are also advanced, as far beyond us as we are beyond the jungle drums of Africa. So they are masters of telepathy and can communicate easily, mind to mind. Thus our best sources of information are those sensitive human beings who have been chosen for telepathic contact.

One of the best in the Borderland Sciences Research Foundation was a mechanical engineer of Akron, Ohio, who was told of the constant, unceasing patrol activity going on over our heads to try to stop Invaders "at the outer limits of the Solar System." I believe those who do get through are ruthlessly hunted and shot down. This accounts for the evasive actions of some UFOs and the tremendous anti-matter explosions: Madrid, Spain 1897; Tunguska, Siberia 1908; Chugach Mountains, Alaska 1947; New Zealand 1950, Argentina October 6, 1980; Bolivia May 6, 1978; Siberia May 31, 1983.

Another threat we and the Guardians

have to deal with is the Lunar Mafia, the Men in Black who forcefully confiscate Flying Saucer evidence and threaten Contactees with bodily harm if they reveal their telepathic and/or physical relationship with Flying Saucers and their crews. We are told their bases of operation are the Moon and the interior of the Earth.

The best proof of the existence of the Guardians and their support is the fantastic success of the Apollo Project -- while the Russians have lost how many men in space? Ten? Fifteen? Guardian control was obvious in the aborted Moon landing of Apollo 12, which carried its cargo of nuclear material around the Moon and back to the Earth, leaving the Moon uncontaminated!

Harmony with Nature at the interplanetary level is the next step for Mankind. This means that our fledgling world government, the United Nations, must be ready for diplomatic relations with representatives of the Interplanetary Confederation, with Secretary General Perez de Cuellar prepared to go to John F. Kennedy Airport to publicly welcome the arrival of an interplanetary ambassador, and to escort him to United Nations headquarters in New York City with the event televised for all the world to see. The sequence is logical: United States/United Kingdom/USSR; United Nations; United Planets (Solar System); and United Constellations -- from which at least 24 civilizations have sent fleets of Space Ships to help guide the Earth through the present crisis.*

GIZA 1984 SURVEY

A nine-year study, covering the span from 1975 to 1984, all inclusive. The collected works of America's foremost scholars, researchers and New Age Thinkers compiled and edited by Rocky McCollum. Theories explored, measurements refined, updates of Ancient Symbology, Numerology, Shadowphase Photos, Cosmic Energy. The Giza Plateau examined, the three Great Pyramids computer-analyzed, Lotus Theory evaluated, plus many Maps, Cosmic Charts, Diagrams and Photos. A Goldmine of information!

Tapes F-1 through F-6 (C-60) are priced @ \$5.00 each

Tapes F-7 through F-26 (C-90) are priced @ \$6.00 each

Tapes F-27a, b, & c (C-90 & C-30) are \$7.00 /set

Discount Price for Complete Set of Cassette Tapes is \$110.00

All Lectures are available on Video Cassette --

the price is \$40.00 for each single lecture

(Order four tapes, get one free!)

For ordering information, see page 19.

1983 USPA CONFERENCE TAPES

- G-1 Edwin Skilling - Hendershot Generator
- G-2 Dr. Wm. Bauer - Neuro-Electric Medicine

- G-3 Elizabeth Rauscher - EM Phenomena in Complex Geometries & Non-Linear Non-Hertzian Waves & Magnetic Monopoles

- G-4 George Hathaway - Non-Conventional Energy Technology -- Recent and Past Developments

- G-5 B. Stillings - Baaken Library, Medical Archives, Radionic History
- G-6 Haroldine - Lithium, The Ultimate Crystal Compound

- G-7 Robert Beutlich - Genetic Code from the Kabbalah
- G-8 Dr. C. Whitehouse - New Designs in Radionics Using Crystals

- G-9 J. Fridenstine - Energy Towers & Agri-Radionics; and Keynote Speech
- G-10 Peter Kelly - Report & Update, Interdimensional Sciences

- G-11 General Meeting USPA, 1983: Election and Discussion
- G-12 Panel Discussion: "Where Do We Go From Here?--Rauscher, Beck, Bearden, Arul, Bise, Puharich

- G-13 Bob Beck - Neuro-Electric Therapy; Micro-Electronic Brain Tuners Might Be Tomorrow's "Miracle Cure" Black Box

- G-14 J. G. Gallimore - Solid State Psychic Sensor
- G-15 Dr. Andrija Puharich - Successful Treatment of Mammary Neoplasms in Mice with Gaseous Superoxide Anion and Ozone; A Theoretical Discussion of the Data

- G-16 Bill Bise - Liquid Psychic Sensors (Lecture and Demo)
- G-17 Lutie Larsen - Radionic Balancing & YOU; Home, Family, Garden, Animals
- G-18 Lia Lissant - Vitally Intensified Music, ELH-HF Patterns & Demo

- G-19 Loren Parks - Simple Healing of Chronic Conditions (Lecture & Demo)
- G-20 Walter Uphoff - PK Effects Captured on Film

- G-21 Sue Wallace - Magnets and Their Use in Healing
- G-22 Benedict Arul - Cancer: A Prohomeostatic Systemal Strategy

- G-23a Sarah Hieronymus - Eloptic Energy & Plant Genetics
b T. G. Hieronymus - Eloptic Energy & Agricultural Innovations

- G-24a Edwin Skilling - Circuits & Construction of ELF-TENS Units
b Jack Houck - A Conceptual Model of Paranormal Phenomena (Spoon Bending)

- G-25a Robert Beutlich - Occult Chemistry Revisited & Reviewed -- New Data
b David Owen - Kirlian Photographs

- G-26a E. James Faubel - Subtle Energy and the Chakras
b Hugh Scott - Low Frequency Sound & ELF Radiation Effects on Health in Home From Heating Plant & Appliances

(Continued on Next Page)

- G-27a Erwin "Red" Stark - The Connections With Tomorrow
 - b Joan Orion - Bio-Training/Fantasy Techniques, Analogies With Brain Research
- G-28a James Kness - Some Electrical Engineering Problems in Free Energy Technology
 - b Riley Crabb - World Power Grid System & ELF Waves
- G-29a Kathleen Joyce - Psychotronics & Pythagorean/Platonic World View
 - b M. Kelly & S. Lentine -Consciousness, Vibrations, & Patterns of Crystalization
- G-30a Thomas Valone - The One-Piece Faraday Generator
 - b George Friebott - Suppression of Successful Oxygen Therapy of Cancer
- G-31a Toby Grotz - Spectral Analysis of the Lakhovsky Multiple Wave Oscillator from 20Hz to 20GHz
 - b Gary Fleck - Crystal Healing & Energy Attunement
- G-32a Joseph Cater - Soft Particle Physics
 - b J. G. Gallimore - Psychotronics: Past, Present, and Future
- G-33 Tom Bearden - New Electromagnetics, Where the "Old Math" Took the Wrong Turn
- G-34 Preston Nichols - From Telepathy to Vacuum Tubes
- G-35 Marcel Vogel - The De la Warr Camera, Its Theory and Operation

Tapes G-1 through G-12 (C-60) are priced @ \$5.00 each

Tapes G-13 through G-32 (C-90) are priced @ \$6.00 each

Tapes G-33 through G-35 (C-90 & C-30) are \$8.00 for each set

Complete Set of Tapes: List \$204.00; Discount Price \$145

All lectures are available on Video Cassette
 @\$40.00 for each single lecture
 (Except G-35, which is \$65.00)

For ordering information, see page 19.

**THE POTENTIAL HAZARDS TO AGRICULTURE FROM THE EMERGING GREENHOUSE EFFECT
 AND AMELIORATION OF ITS IMPACT**

Andrija Puharich
 (Abstract)

A review of the mechanisms behind the mini-floods and mini-droughts of the past two years which have ravaged the world. The analysis points to the carbon dioxide buildup in the atmosphere, and to a thermal buildup inside the planet.

The carbon dioxide buildup can be treated by reduction of fossil fuel burning and a rapid increase in new forests which put carbon dioxide in storage. These two treatments require the introduction of new, clean and renewable energy sources. The introduction of new forests (and new food supplies) requires novel approaches in agriculture, particularly from the field of psychotronics. The diagnosis of this world problem and its treatment is discussed in great detail.

1984 USPA CONFERENCE TAPES

AGRICULTURE

- H-1 Andrija Puharich - Potential Hazards to Agriculture of the Greenhouse.....C-90
Effect and Its Cure
- H-2 Philip Callahan - Ancient Mysteries and Modern Visions.....C-60
- H-3 Agricultural Panel - Soil Balancing, Germination, Plant-Animal Growth.....C-90
- H-4a Charles Walters - Agri-Economics and Psychotronic Inroads.....C-90
b Dan Carlson - Plant Growth at ELF Sound Frequencies of 4 to 6 Khz
- H-5a Jerry Fridenstine - Earth Assimilation and Refraction.....C-90
b Peter Kelly - Crystal-Powered Psychotronic Tuners in Agriculture
- H-6a Murray Bast - Homeopathic Agriculture Through Psychotronics.....C-90

TECHNICAL

- H-6b Curtis Wallace - Space Geometry
- H-7 Bruce DePalma** - The 'N' Generator - New Designs and Theory.....2 ea. C-60
- H-8 Preston Nichols - Vacuum Tubes That Amplify Longitudinal δ Waves;
Analysis of "Old-Time" Radio Circuits.....2 ea. C-60
- H-9 Christopher Bird - The Priore Affair.....2 ea. C-60
- H-10 Eldon Byrd - Interactions of Weak Nonlinear ELF EM Fields with
Biological Processes.....C-90
- H-11 John Bedini - The Bedini Motor - A Free Energy Device.....C-60
- H-12 Tom Bearden - Update on Soviet Psychotronic Weapons.....C-60
- H-13a Elizabeth Rauscher - Models of Psychokinesis and Human Volitional
Remote Interaction.....C-90
b William Van Bise - EM Waves and Brain Waves and Their Apparent Link
with PK Phenomena
- H-14 Robert Beutlich & - 8 X 8 Matrix (I Ching & Kabbalah) with Time, Electric,
J.G. Gallimore Magnetic, and Gravity Fields Yield New Fields.....C-90
- H-15a Tom Bearden - Soviet Weather Warfare over North America.....C-90
b Tom Valone - The One-Piece Faraday Generator: Theory and Experiment
- H-16a Bob Beck - Original Tesla Paper (circa 1934) on the "Death Ray".....C-90
b Rowena Patee - Mapping of Leptons & Quarks on the I Ching

HEALTH

- H-17a William Bauer - Latest Results From Use of TENS Units.....C-90
b Ruth Harvey - ELF Use of the Alpha-Stim -- Equipment & Demo
- H-18 Andreas Marx - Bio-Physical Tests Determine Exposure to ELF, Radionics,
and Noxious Zones.....C-90
- H-19 Richard Powers - New Magnetometer Detects Geopathic Disturbance Fields....C-60
- H-20a Ed Skilling - Improving Health With ELF Electronics -- Update.....C-90
b James Solomon - Light and Energy
- H-21a Louis Leonardi - Matching Crystalline Patterns of Saliva & Herbs
for Treatment.....C-90
b Julius Soled - Chromotherapy

(Continued on Next Page)

- H-22 Paul Patches - Mycrous Nutrition.....C-90
- H-23 Paul Esch - Psychic Dentistry.....C-90

RADIONICS

- H-24 Sam Lentine - Psychotronic Investigation of an Innovative Treatment
of Allergies.....C-90
Psychotronic Alteration of Physical & Chemical Behavior
- H-25a Kathleen Joyce - Pattern Analysis of the Malcolm Rae Cards.....C-90
b Lutie Larsen - Psychotronic First Aid Procedures
- H-26 Marcel Vogel & - Analysis of Psychoenergetics of Dowsing and Radionics
J. T. Smith and How It Works.....C-90
- H-27 Gary Fleck - Crystal Radionic Instrument; Crystal Healing.....C-90

General

- H-28 Riley Crabb - Harmony With Nature, Interplanetary and Intergalactic.....C-90
- H-29 Barbara Hero & - Awakening Consciousness Through Generating Patterns of
Robert Foulkrod Harmonic Sounds.....C-90
- H-30 Kay Bruch & - Genesa, Moving, Feeling, Knowing --
Robert Kent Demo and Workshop.....C-90
- H-31 Rocky McCollum - The Ray of Creation.....C-90
- H-32 Mike Bradford - Theory and Application of Universal Dynamics.....C-90
- H-33 Dennis Stillings - Cosmic Psychotronics.....C-90
- H-34 Dick Benson - World's Oldest & Map.....C-90
- H-35a Mary Hardy & - Organon of Medicine.....C-90
b Dean Hardy - Sakkara, School of Mind Over Matter

C-60 Tapes are priced at \$5.00 each

C-90 Tapes are priced at \$6.00 each

Discount Price for Complete Set of Cassette Tapes is \$145.00

All lectures (except H-7**) are available on Video Cassette --
the price is \$40.00 for each single lecture
(Order four tapes and get one free!)

=====

ORDERING INFORMATION

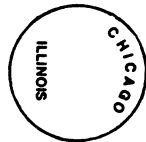

Indicate tapes or video cassettes (specify VHS or Beta) desired
and send remittance to:

U.S. Psychotronics Association, Inc.
3459 Montrose Avenue
Chicago IL 60618

Add Shipping and Handling Charges per Order of: \$2.00 U.S. & Canada
\$6.00 Other Foreign
For overseas airmail shipment of video tapes, add \$3.00 per tape

All foreign payments must be by dollar drafts on American Banks.
