**U. S. PSYCHOTRONICS ASSOCIATION
1985 ANNUAL CONFERENCE**

The USPA Annual Conference was held in Dayton, Ohio, at Bergamo Center, July 11 – July 14, 1985.

The highlight of the conference was a tremendous demonstration of a Tesla coil built by Preston Nichols, which was assembled on the hilltop to the rear of the conference center. A portable power generator fired the 3' high primary 20' diameter via a rotating spark gap. The secondary coil, which was 2' in diameter and 12' high, provided a bountiful array of 3- to 5-foot long "lightning strokes" as well as some very regular spiral discharges which rotated around the secondary and up the center of the secondary.

A spoon-bending party was also enjoyed by many at the conference. A belly-dancer also provided entertainment. The USPA talk abstracts start on page 3.

U.S. PSYCHOTRONICS ASSOCIATION ANNUAL CONFERENCE (1985)

(continued from page 1)

There were two sets of speakers, one set of speakers for technical and scientific subjects, and another group of speakers who dealt more with energetic analysis.

The Room A (technical and scientific) talks included:

A CONCEPTUAL MODEL OF PARANORMAL PHENOMENA, INFORMATION TRANSFER AND MIND/BRAIN INTERACTION by Jack Houck

Experimental results obtained in testing a multi-dimensional model developed to provide a simple way of thinking about how remote information transfer can occur. Houck draws on more than 120 personally conducted PK parties, remote viewing experiments, and research into remote viewing. Potential applications of both extrasensory perception and psychokinesis are outlined.

A NEW APPROACH TO ELECTROMAGNETISM by Henry C. Monteith

Recent experiments by Dr. Peter Graneau show the Ampere Force Law predicts a longitudinal tension in an electrical circuit which is not predicted by the Lorentz Force Law. Results imply that something fundamental has been overlooked in Electromagnetism as set forth by Maxwell. Monteith is attempting to develop a microscopic theory acceptable to modern physicists incorporating this overlooked Ampere tension.

EXAMINATION OF PHYSICAL MODELS – REMOTE CONNECTEDNESS PHENOMENA by Elizabeth Rauscher

Kaluza-Klein geometry applied to remote reviewing.

THE DYNAMIC THEORY: A NEW VIEW OF SPACE, TIME, AND MATTER by Pharis Williams

The foundation of the theory rests upon generalizations of the classical laws of thermodynamics, particularly Caratheodory's abstract statement of the second law. The result is a view of the universe in a five-dimensional manifold of space, time, and mass density in which the gauge field includes gravitational and electromagnetic components coupled by a single system of eight differential equations.

MACROSCOPIC VACUUM POLARIZATION by Moray King

Modern physics has acknowledged that the zero-point energy or ether must be incorporated into any complete description of electromagnetic phenomena. This paper cites literature leading to the hypothesis that the ion-acoustic mode of a plasma may induce and detect macroscopic vacuum polarization displacement currents. Nikola Tesla and T. Henry Moray may have tapped into these displacement currents and actually discovered a novel form of environmental radiant energy.

FOUNDATIONS OF SCALAR ELECTROMAGNETICS by Thomas Bearden

The author briefly develops the scalar electromagnetic theory necessary to understand the mechanisms utilized by the Soviet Union for weather control over the United States.

AN OVERLOOKED UNIFICATION IN PHYSICS by Henry C. Monteith

In this paper, the author will show how all of the fundamental equations being used by physicists today can be derived from one fundamental unifying principle which has been in the scientific literature for over one hundred years but apparently has been overlooked. This single principle directly implies that time, entropy and information are one and the same and lie at the foundation of all universal forces and actions.

ELF EFFECTS ON CELLULAR MEMBRANES: WORK TOWARDS A PREDICTIVE THEORY OF SIGNAL-SPECIFIC EFFECTS OF COMPLEX WAVEFORMS by L. A. Surgalla

ENGINEERING BASED METHODOLOGY TO DESCRIBE BRAIN ENTRAINMENT TO ELF VISUAL STIMULI by Andrew Junker

Investigating the relationship of the response to the entraining stimulus in brain entrainment experiments, using systems engineering technology. This approach utilizes the mathematics of machines and the characterization of systems from input-output measurements. Building upon the results, we are beginning to develop techniques with which to achieve machine control using brain waves and brain-to-brain communication using lock-in amplifiers.

TRANSCENDENTAL MEDICATION by Eldon Byrd

Science has become the most worshipped religion in the history of the world. An irreverent look at the past and future of psychotronics.

EXPERIMENTS WITH A BEDINI/WEST GERMAN TYPE PULSED DC MOTOR by Kenneth Moore

Summary of recent efforts to develop a pulsed-motor-battery combination that will sustain itself and drive an external load. Includes slides of set-ups and circuitry.

NEW TECHNOLOGY FOR THE NEW AGE by Thomas Valone

ELF measurement and demonstration using a frequency counter attached to a Commodore home computer. Review of physics + consciousness + Faraday generator.

BEYOND SPACE AND TIME: THE THIRD SECTOR OF THE HUMAN UNIVERSE by Frank Meyer

An overview of and commentary on the Reciprocal System of Physics developed by Dewey B. Larson. From just two general postulates, Larson was able to develop a complete theoretical universe.

UNNECESSARY SCHISM BETWEEN SCIENCE AND RELIGION by Fredric Blau

This paper discussed how science and religion view the world.

THE FINAL SOLUTION TO THE ELF PROBLEM by Andrija Puharich

The number of sources of ELF pollution in modern civilization is so great that it has become almost impossible to control them. The danger of ELF fields arises because they penetrate the cell nucleus and stimulate DNA to produce specific chemicals with specific frequencies which, in turn, unbalance the body chemistry. One way to deal with the ELF pollution problem is to create a device that protects each person individually. The author has developed an electromagnetic device in the form of a bracelet that neutralizes all ELF pollution impinging on the body.

FURTHER RESEARCH ON SCALAR WAVES by Preston Nichols

This is a demonstration of the biological effects of the scalar components of music recorded and reproduced on pre-solid state equipment. Audience participation occurred during the demonstrations.

FUNDAMENTAL FIELDS AND PHASE INFORMATION by Jack Dea

Paranormal phenomena may be a transference of information via the phase rather than via energy bits as in the case of electronics communication. Aharonov and Bohm in 1959 demonstrated that the scalar and vector potentials are more fundamental fields than the more familiar electric and magnetic force fields. The potential fields can be detected through electron interference when both the electric and magnetic fields are set to zero. The mathematical properties of potential fields resemble descriptions of psi fields and may be identical.

COUNTERMEASURES II: A NEW APPROACH TO THE ELF PROBLEM by Al Bielek

This is a review of prior art and a description of circuitry and subtle energy generation and radiating systems of personal ELF pollution countermeasures. New instruments do not entrain the user — they appear to build up the natural body defense or shielding mechanism to reject negative information which causes imbalance.

INFRARED DETECTION IN PSYCHOTRONICS by Ed Skilling

This is a report on a new psi detector which uses state-of-the-art electronic and infrared technology to detect the temperature of the target instantaneously, identifying the moment of psi response. Update on ELF units for medical use and a report on a new subliminal tape system with no masking sounds. You record your own message and it is played just above the audible range.

SOVIET WEATHER ENGINEERING OVER NORTH AMERICA by Thomas Bearden

Techniques and methods used by the Soviets utilizing Tesla physics and scalar technology to alter U. S. weather. Reviews past presentations and presents new developments.

ACOUSTIC LASERS: HOW TO DISABLE SURVEILLANCE SATELLITES by Bill Van Bise

This presentation reviews the history of attempts at utilizing acoustics in warfare, and the basic principles and cautions to be observed in working with coherent acoustic waves. A table-top model is proposed.

ADVANCED ELECTRONIC SENSORS OF OCCULT INFLUENCES IN HEALTH AND DISEASE by Bob Beck

This is a presentation of several unique and inexpensive electronic instruments designed and built by Beck to easily detect, measure, and quantify low-level psychoactive signals. Slides, demo, and schematics of selected units.

THEORETICAL EXAMINATION OF NONLINEAR, FAR FROM EQUILIBRIUM, SELF-ORGANIZING PHENOMENA by Elizabeth Rauscher

The structure and form of soliton equations applicable to a wide variety of physical, chemical, and biological systems and how they relate to the usual wave equation and dispersion relation. These theoretical models can be applied to describe different natural phenomena and predict classes of devices which can be designed and constructed to operate on these principles. Although these devices do not violate the Second Law of Thermodynamics, they can be highly efficient and utilize ambient available energy or are extremely efficient energy converters.

PARANORMAL PHOTOGRAPHY AND ENLARGEMENT WITH INTERPRETATION by Joseph Gambil

This presentation included 30 photographs, with explanations through paranormal, dowsing and automatic writing techniques. The types of photographic equipment and printing methods are briefly presented.

THE ESOTERIC WORLDVIEW: A READY-MADE CONCEPTUAL FRAMEWORK FOR PSYCHOTRONICS by Jan Brice

A critical commentary on and synthesis of the major paradigm systems applicable to Tesla physics and hyperspatial phenomena.

WORKSHOP: "L" FIELDS — ENERGY BALANCING by J. G. Gallimore

This workshop demonstrated measurement of "L" fields as represented by the static electrical charge on the surface of the human body. Audience participation

was encouraged. Healing techniques used in rebalancing were verified by instrument measurement. The construction of a simple device was described.

MATRIX MODEL OF THE TIME DENSITY & TELLURIC FIELD CHARACTERISTICS MAY DESCRIBE GRAVITATIONAL ANOMALIES by Eugenia Macer-Story

This presentation involved reading the report, description of a matrix, description of an experiment using 35mm photos to show that psi effect on film occurs independent of the location of gravitational anomalies, and that it is related to the psychic individual.

THREE DIMENSIONAL PLOT OF 8 X 8 MATRIX / I CHING, TIME, ELECTRIC, MAGNETIC AND GRAVITY FIELDS by Robert Beutlich

A "periodic table" of triune fields showing known fields and predicting new unknown fields.

PHYSICS OF TELEPATHY, PSYCHOKINESIS, AND BIOPHYSICAL HEALING by Fredric Blau

Extensive evaluation and analysis of psi data reveals strong evidence for the spatial attenuation of experimental telepathy, which indicates a biogenic electromagnetic source of frequency range 0.1 Hz to 200 Hz. The author has collected, collated, and analyzed 6.2 million trials of informational psi from 1882 to 1981. Telepathy scores five times more than clairvoyance or precognition. Clairvoyance and precognition are found to be the same phenomena. The non-equivalence of telepathy and clairvoyance is established. It is established that all modalities have unequivocal learning. This learning appears to occur with or without trial-by-trial feedback. Literature and RSPK cases support biogenic electromagnetic model.

The following schedule describes the energetic analysis lectures given in Room "B."

The sciences of color therapy, homeopathy and psychotronics are based on the ability to understand and balance the electromagnetic field, not just the physical body. The secret of healing with these modalities is based on the spin factor and the body's ability to transmute one salt or electrolyte into another. The presenters are actively engaged in utilizing pyramid and other form energies in their occupations.

9:00 A.M. *INTERNATIONAL HARMONY BASED UPON A MUSIC OF PLANETARY GRID SYSTEMS* by Barbara Hero

This paper proposes a method of correlating Earth Grid systems with specific musical notes by a process of translating length to frequencies, which can then be translated to musical notes. A method of octave expansion and octave reduction was used to determine the specific frequency of a note. When this theory is applied to the relationships of countries to sounds, a way of increasing harmony between countries can be suggested by knowing a key note of the distance between them. A correspondence with a Pythagorean Lambdoma of seven rays is suggested. This presentation gave an exposition of the earth grid structure and its energy interrelationships.

1:00 P.M. *PRELIMINARY REPORT: EXTENSION OF FUNCTIONAL APPROACHES TO PSYCHOTRONIC BIO-SYNTHESIS* by Samuel Lentine

The wave functions of quantum mechanics are carriers of information which reveal the state of any given system. They explain much pertaining to the basis of chemical behavior. Any modification of such information packets results in an alteration of its chemical behavior. Experimental verification of this postulate was carried out by the use of psychotronic instrumentation which would accomplish a coding process. The experimentation covered three major areas of concern: (1) crystal growth, (2) electrical conductivity studies, and (3) biosynthesis. For example; crystals could be made to grow faster and larger, electrical conductivity took on a periodic nature, and there is definite evidence to support the supposition that particulate structures having simulated life processes can be synthesized with proper radiation coding techniques. The implications of such techniques are indeed far reaching. Advanced correlations of Reichian procedures and current psychotronic capabilities were presented.

FAMOUS RADIONIC PIONEER/PRACTITIONER DIES IN MEMORIUM

MARK LEWIS GALLERT, N.D.
April 22, 1912 – July 12, 1985

Mark Gallert had a total commitment to his work up to the last month of his life. Born with a frail body beset with numerous problems, he was brought through his school years by tutors coming to his bedside during his first 29 years. But he was constantly learning and was the first in Santa Clara County, California, to construct a crystal radio set while still a boy, and his genius was on its way. College courses brought him his BA, MA and Master of Science degrees, followed by training in chiropractic theory.

It was a remarkable woman, Dr. Ruth Drown of Santa Barbara, a pioneer in early radionics, who helped him toward improved health, and who first inspired him to pursue this science and art to benefit hundreds of clients for more than 30 years. At one on his lectures in San Francisco, he met a woman, Annise, and he "sensed that he knew her before." Equally dedicated to the healing field, she became his wife and help-mate.

An important contribution by Dr. Gallert was his further development of the Abrahms radionic detector instrument. One could recount in many of his case histories, of pinpoint accuracy and selection of remedies and remedial techniques, as well as his reasonable fees. He never exploited his skills to put himself "on easy street." Besides working with chiropractors, he was also associated with MD doctors including an eye surgeon in an eastern hospital, who used Dr. Gallert's homeopathic and biochemical findings for resolving obscure case problems. Gallert also developed visualization therapy techniques taught by some of his followers today.

We, who have known him and have been helped by his expertise through the years, are most grateful. We will remember his uncompromising sincerity, his quiet overcoming of tremendous odds, his keen curiosity to research anything of value in the healing arts, and the courage and dedication to his life's work. He will be missed.
