

UNITED STATES

PSYCHOTRONICS ASSOCIATION
NON-PROFIT ORGANIZATION

\$5.00

Spring, 1987

NEWSLETTER

Vol. VII, No. 1

**THE U.S. PSYCHOTRONICS ASSOCIATION
ANNUAL CONFERENCE**

THEME:

"THE MISSING LINK IN PHYSICS: CONSCIOUSNESS"

will be held

JULY 29 through AUGUST 2, 1987

at the Colorado School of Mines

Golden, Colorado

CALL FOR CONFERENCE PAPERS

**All abstracts of papers for presentation
are due by May 30, 1987.**

Send abstracts to: Bob Beutlich

2141 Agatite, Chicago, IL 60625

(312) 275-7055

COPIES OF COMPLETE PAPER AND VIEWGRAPHS

ARE DUE ON JULY 15TH, 1987

FOR INCLUSION IN THE PROCEEDINGS.

The call for papers ends May 30th. The USPA will be following its usual policy that **only** speakers who have submitted abstracts and written papers by the cut-off dates will be allowed to give their presentations. This requirement is necessary so the schedule can be made out and the conference programs printed in time for the conference. See page 4 for information on acceptable formats and suggestions for the submission of your presentation.

**UNITED STATES PSYCHOTRONICS ASSOCIATION
NON-PROFIT ORGANIZATION**

Board of Directors

Rita Fryer ('89)
Edwin Skilling ('89)
Thomas Valone ('89)
Robert Beck ('88)
Peter Kelly ('88)
Elizabeth Rauscher ('88)
Eldon Byrd ('87)
Samuel Lentine ('87)
Marcel Vogel ('87)

Officers

Robert Beck – President
Peter Kelly – 1st Vice President
Dennis Stillings – 2nd Vice President
Nell Thompson – 2nd Vice President
Thomas Valone – 2nd Vice President
Kathleen Joyce – Executive Secretary
64A Fire Station Road, Los Lunas, NM 87031
(505) 865-5701
Robert Beutlich – Secretary-Treasurer
2141 Agatite, Chicago, IL 60625
(312) 275-7055

WHAT IS 'PSYCHOTRONICS'?

The Association defines "psychotronics" as the science of mind-body-environment relationships. This is an interdisciplinary science concerned with the interactions of matter, energy, and consciousness.

AIMS OF THE ASSOCIATION

1. To promote the free exchange, discussion and dissemination of information, theories, ideas and practices related to psychotronics.
2. To maintain high standards of ethics, humanitarianism, and scientific practices in the study and application of psychotronics.
3. To preserve the history and geneology of psychotronics.
4. To secure cooperative action in advancing the common cause of its members.
5. To disseminate information of a general, economic, social, or governmental character; to anaylze subjects relating thereto; and to secure and present the views of its members to other organizations, the government, and the public.
6. To cooperate with other organizations of like interest.
7. To further the training and education of its members.
8. To promote standardization in the investigation, testing, reporting, and evaluation of psychotronics.
9. To provide in its periodical(s) a national forum for the report and publication of all worthy activities and projects of persons, groups or organizations working in in the field of psychotronics.
10. To make awards, locally and nationally, to persons, associations or agencies, in recognition of outstanding accomplishments in the field of psychotronics.

President's Message . . . April 1987

In support of our 1987 Conference theme "Consciousness – the Missing Link in Physics?" I've just spent several days contacting some of the most interesting resource people in psychotronics to invite them as presenters for our July 29 – August 2 annual meeting at the Colorado School of Mines in Golden. Bill Jenkins, KABC's Mentor of the landmark "Open Mind" series has accepted as our Keynote Speaker and presenter, as have several other "Living Legends" in their fields. We're planning a very interesting and diversified program this year.

As *your* Open Forum for new-age discoveries, USPA seems to be rolling back the tides of ignorance and dogmatism in many areas. No matter what your interests, you'll find many gems concentrated into this smorgasboard of presentations.

This year has seen a rapid proliferation of both European and domestic modalities for the enhancement of health and consciousness, some of which are definitely on the thin boundary between Science and Magic. "Subtle Energy" detectors, "Scalar," and "Tesla" are still buzz-words, and although several highly-publicized "Free Energy" devices have proven to be mere delusions, other tools in the arenas of Holistic Medicine have gained credibility and acceptance in the marketplace.

Finally, our USPA – only ten years old in its present form – appears to be maturing. There's greater acceptance and cooperation between previously polarized viewpoints. There's light at the end of our tunnel.

Since one of the primary goals of USPA is information exchange and networking, our L.A. Chapter has just inaugurated a new feature. I'm bringing a briefcase-sized photocopy machine and high-speed Cassette Duplicator to every meeting to encourage the free and open swapping of papers, plans, articles, taped lectures, radio programs, seminars and other absolutely fascinating gleanings of our hundred-plus attendees from their special areas of interests. Members clone whatever they find interesting. Some bring their own blank tapes or buy C-92's for 40¢. Needless to say, attendees love it and everyone's data base is expanding through this cooperative effort.

See you in the next issue.

Bob Beck

BOOK REVIEW

The Genius of the Few, by Christian O'Brien with Barbara Joy O'Brien, deals with the Garden of Eden time period. It analyzes ancient documents and describes groups of Sages known to the Sumerians as the *Anannage*, and to the early people of the Middle East as the *Shining Ones*. These people settled into a fertile basin within the mountains of southern Lebanon. There they established an agricultural and animal-breeding center for their own survival, and for the purpose of teaching early Man the elements of civilized living. These Sages were deified and became known as "angels." Based on extensive research into ancient Middle Eastern languages and little-known documents, **The Genius of the Few** challenges dogmatic interpretations of the biblical Book of Genesis and raises questions and probabilities that have immense implications for the study of prehistory and modern religion. (Turnstone Press Limited, Wellingborough, Northamptonshire, England, 1985, \$12.95 softcover.)

1987 ANNUAL CONFERENCE

We are actively seeking qualified speakers for our Conference. Members are requested to contact persons knowledgeable in psychotronic-related fields as potential contributors. We provide an open forum for those using, researching, and/or experimenting with psychotronics, with the aim of providing both current and historical data to others interested in this field. The following topics have been suggested as among those appropriate:

Color and music therapy, wholistic health, homeopathy, radionics, crystal energies, UFO's, anti-gravity and free energy, Tesla physics, ELF devices, agricultural aids, electronic acupuncture.

If you know anyone working in any of these areas who is interested in participating in our Conference ask them to submit a **one or two page abstract** to Bob Beutlich by **May 30, 1987**.

Conference Speakers . . .

Must provide a written copy of the entire presentation, *including illustrations and viewgraphs*. In the event your presentation consists almost entirely of slides, we require a synopsis of the content describing the slides for inclusion in the Proceedings. The proper position in the text for each illustration is to be indicated either in the text, or on the margin of the page if the graphic material is included on a separate sheet with its own caption. This is necessary to provide information for the typesetter and maintain continuity for the reader when the Proceedings is prepared.

If you have used a computer to prepare your text, we request a copy of the disk labeled with the file name, word processing program used, and the name and model computer you used. We are able to use disks for the Macintosh, IBM compatible (MS-DOS 2.11 or higher), and CPM systems. This will enable us to reduce preparation costs and facilitate the production of the Proceedings. Please include a hard copy for editing and proofreading purposes.

Please note: If you are using copies of published material to illustrate your presentation there may be a copyright in force on it. It is **your responsibility** to contact the publisher for permission to include copyright material in our Proceedings as part of your presentation.

Conference Reservations. . .

Lodging space on the campus this year will be limited, so please get your reservations in as early as possible. Fee details are unavailable at this time, but will be included in the next issue of this newsletter, which will be produced as quickly as possible. Please do not call to make reservations - the form will be required.

ERIC DOLLARD PRESENTATION ON TESLA TECHNOLOGY A HIGHLIGHT OF 1986 CONFERENCE

Eric Dollard's presentation at the 1986 Conference was well received. He has deeply researched Tesla technology and the following material is abstracted from a publication he has for sale, entitled *Theory of Wireless Power*.

The cover has an interesting quote from Tesla: "Today's scientists have substituted mathematics for experiments and they wander off through equation after equation and eventually build a structure which has no relation to reality."

Tesla's oscillating current transformer did not produce transverse vibrations of light waves as theorized by Maxwell. Instead, the emanations were of longitudinal-dielectric waveform, i.e., in the form of **electric rays of induction**. This explains the purpose of Tesla's extensive research into X-rays and other forms of radiation, which at that period in time were considered to be longitudinal waves in the luminiferous aether.

Tesla understood that the transverse, or Hertzian, waveform was useless for the transmission of electric energy on an industrial scale. The scattering nature of these waves represents the primary limitation to efficient energy transfer.

The system of transmission and reception of electrical energy without the employment of connecting wires, or waveguides, as conceived by Dr. Tesla, is not the propagation of any type of electromagnetic wave, nor is it the excitation of the earth-ionosphere waveguide. Tesla's system employs resonant actions along lines, or rays, of **electric induction**; these lines standing between the transmitter and receiver. The apparatus for establishing these lines of induction is called the Tesla Magnifying Transmitter (TMT). The TMT is a system of resonant transformers harmonically balanced to the electric condition of the earth. The monopolar nature of the TMT induction facilitates the ease of transmission and reception that this apparatus exhibits. These lines of induction established by the TMT are drawn into the high inductivity of the earth's interior, despite the conductivity of the surface, which would screen electro-magnetic waves.

The dielectric induction through the interior of the earth communicates the energy from the transmitter to the receiver. The unused portion of energy is reflected back to the transmitter more or less completely. Operating this energy reciprocation between transmitter and receiver at the natural period and waveshape of the earth's own energy pulsation rate greatly overcomes the effect of distance,, hence no significant loss of energy is apparent. Thus, a standing wave of induction energy exists between the transmitter and receiver, or what can be called transponders, pulsating at one of the earth's natural harmonics. If the phase angle of the earth pulsation frequency lags the phase angle of the pulsating frequency, energy is abstracted from the earth's supply of energy and delivered as "free energy" to the transponders.

It can therefore be seen that while the transmission of transverse waves involves spraying of energy, with its consequent square law diminishment of energy density, and no hope of retrieving the unused energy, the Tesla system involves the direct connection of transmitter and receiver, via the pulsating lines of electrical induction. Therefore the transmitter and receiver are rendered as one apparatus.

Because the energy is propagated through the "ground," the question exists as to how to ground the apparatus; that is, how to establish an electric reference point, since

Eric Dollard Presentation, continued . . .

the so-called ground is now the hot terminal of the transponders and therefore incapable of also serving as an electric reference point. Here exists the singular feature of the Tesla oscillating current transformer in that the distributed mutual inductance and odd function resonance work to establish a virtual ground. This fundamental principle of virtual grounding is also to be found in the Tesla Tele-geodynamic Oscillator (TGO), which serves as a mechanical analog to the Tesla Magnifying Transmitter. The principle behind this is the geometrical reconfiguration of the fundamental components of energy – the kinetic and potential – this reconfiguration resulting in the separation of cause and effect in not only time but also in space. The result hereof is the circumvention of the Newtonian laws of action and reaction. This allows for the production of heretofore unexplored phenomena.

Hence, the Tesla Magnifying Transmitter (as well as the Tesla Tele-geodynamic Oscillator) is capable of transmitting vibrations by virtue of the fact that it is SELF-REFERENCING, thereby not requiring any ground – that is, no solid backing against which to push. This relates somewhat to the saying "Give me a fulcrum, and I will move the earth." Tesla found this fulcrum and moved the earth – both mechanically, producing a local earthquake in New York City – and electrically, producing a standing lightning discharge at Colorado Springs (and possibly lightning elsewhere on the planet).

The Tesla transponder (TMT) can be divided into five distinct components:

1. Earth
2. Reflecting Capacitance
3. Energy
4. Coupling Transformer
5. Resonant Coil

In this arrangement, energy is continuously bounced back and forth between the earth and the reflecting capacitance at a rate tuned to a natural rate of the earth. This standing wave of energy pulsation is maintained by the the energy transformer which delivers electric energy to this standing wave via the coupling transformer. A certain percentage of this energy in the standing wave is refracted through the earth-transformer reflection point and into the earth. This refracted energy establishes another standing wave in the earth. Hence, a pair of standing waves are produced which communicate energy through the refraction.

The oscillating resonant coil, tuned to an earth harmonic, establishes a virtual ground at one terminal of the coupling transformer, thus rendering the earth terminal active. From the standpoint relative to the electric conditions surrounding the apparatus, the coil terminal designated as the reflecting capacitance appears active and the earth terminal appears to be neutral; whereas, from the earth's standpoint, the earth terminal is active. Thus the reason for the popular notion that the reflecting capacitance is the output of the apparatus. In light of the virtual ground theory, this is obviously not correct.

The electric conditions surrounding the TMT no longer can be represented by conventional, or electromagnetic, concepts because the system has converted the electromagnetic energy of the dimensions

$$W_{11} = mc^2 = m(l^2/t^2)$$

into a dematerialized, or mass free energy. The dimensions of this form of energy were

Continued on next page

Eric Dollard Presentation, continued . . .

given by Dr. Wilhelm Reich as

$$W_1 = (l^3/t^2),$$

where mass (m) is functionally equivalent to dimension of length l.

This dematerialized energy is the spatial analog of the reactive, or wattless, energy that is encountered in alternating current systems. Plasma discharges resulting from dielectric saturation (breakdown) of the dielectric medium that surrounds the TMT no longer can be related to the laws of thermodynamics, but are related to the laws of organic growth, such as the spontaneous production of energy and golden ratio proportioning. It is of particular interest to note that these phenomena serve as experimental verification of the theory of Cosmic Suprimposition as put forth by Dr. Wilhelm Reich.

The pulsation of energy between the energy transformer, which is dielectric in nature, and the coupling transformer, which is magnetic in nature, represents an additional standing wave independent of that of the resonant coil and independent of that of the earth. This new standing wave is called an electric oscillation and represents a standing wave in the dimension of time. The energy of this standing wave is refracted through the coupling transformer, thereby exchanging energy with the other standing wave.

It can be seen that the TMT involves three distinct standing waves in its operation – each coupled to the other through two points of refraction. Each of these standing waves represents a distinct dimensional aspect:

1. Earth Wave: Space Dimensional
2. Inter-Transformer Wave: Time Dimensional
3. Resonant Coil Wave: Extra Dimensional

The analogous relations in musical representation are:

1. Harmony: Space Dimensional
2. Rhythm: Time Dimensional
3. Melody: Extra Dimensional

In order for this triple resonant, or sextic (6), energy transient to operate in consonant resonance, conjugate relation must be made to exist between all six energies. Unfortunately, very little theoretical knowledge exists for transients of more than double energy. This is primarily due to the limited understanding of the science of algebra with regard to the solutions of equations higher than the second degree.

BOOK REVIEW

The Ghost of 29 Mega-Cycles, by John G. Fuller

This book deals with Dr. George Meek's work in developing an apparatus to communicate with the "dead." Dr. Meek is an internationally known research engineer who has devoted the last two decades and over half a million dollars to developing *Spiritcom*, an electronic means of crossing the communications boundary between the life and death states. Meek has been aided in his work by William O'Neil, who is both a technical genius and a brilliant medium. Hundreds of hours of dialogue with persons on the "other side" have been taped. Relatives have identified the voices of dead members of their families. (Signet Paperback, 1981, \$3.95.)

Bits and Pieces . . .

from Kathleen Joyce

The Atlanteans are presumed by some people to have been knowledgeable in psychotronic warfare. The Greeks were also aware of the powers of the mind. One famous Greek philosopher rid a city of flies by having a brass statue of a fly made and placed outside the city walls. He then had the people focus their attention on it and the flies disappeared from the city.

Brad Steiger, in his book *The Reality Game and How to Win It* (Newcastle Publishing Co., Inc., P. O. Box 7589, Van Nuys, CA 91409, \$8.95), has collected some very interesting facts on how long humans have been around on this planet. Humanlike tracks were discovered in carboniferous sandstone – formed 250 million years ago. Fossilized sandal prints were found in Utah, and one of the prints has a squashed trilobite embedded in it. This would indicate a sandal-clad being walking around 500 million years ago. Prehistoric footprints have also been found which are linked to the age of dinosaurs. The book also describes bodies which have been found of giants and very tiny people.

Another incident cited in the Steiger book dealt with a man who was photographed while leaning over the brim of the Grand Canyon. However, seven more years elapsed before the man actually visited the Grand Canyon. The 1948 film exposure showed the camera that the man bought in 1955. Shades of Ruth Drown and George de la Warr!

Both Drown and de la Warr perfected etheric photography. George de la Warr was able to take pictures of both the past and the future. He photographed some flower seeds and got pictures of the flowers that the seeds would grow to become in the future. He also took a picture of his wedding – which had occurred some 30 years previously. There has also been a story circulated around verbally that a Dominican priest in Italy perfected a device that could view the past. Supposedly, the Italian government knows about it, and a number of their top physicists. The story stated that the Church was researching the time of Jesus. It is unknown if the story is true or not. However, those of you who have had past life regression experiences have your own way of tuning in to the past and reexperiencing it – sometimes very vividly! If enough data was collected from people's past life regression sessions, we could probably rewrite the history books and have a much more accurate account of what really happened.

For UFO buffs, I will mention one other incident from the Steiner book. This involved a patient in a hospital in Honolulu in 1968, who had had pins put through his tibiae and femur bones due to a traffic accident. The man was totally incapable of moving his legs. One night he told a hospital orderly that he would be gone for an hour while he was with friends aboard a UFO. A bedcheck later that night revealed the man missing – but the metal traction pins were lying on his bed. A search was instituted. Later the man was discovered once again in his bed, with the traction pins in place. It would have been impossible for him to reinsert the pins. The man explained that he had been with his friends aboard the UFO, just as he had said he would do.

If you are interested in the very early history of this planet, the three-volume set of *The Earth Chronicles* by Zecharia Sitchin is excellent. The three volumes are entitled: *The 12th Planet*, *The Stairway to Heaven*, and *The Wars of*

More Bits and Pieces . . .

Gods and Men (1985, Avon Books, paperback). The books are extremely well documented, and much interesting data from early translations of ancient tablets and scrolls is given. The history starts 450,000 years ago, on Nibiru, which is the name for the 12th planet in our solar system. The life wave there was in danger of slow extinction from the erosion of their planet's atmosphere. A deposed ruler from there came to Earth in a spaceship and discovered gold. The Nibiru people had developed a way to protect their atmosphere using gold, so they began distillation and mining operations here to get the gold they needed. The wars between the different gods are very well chronicled. Their race was highly developed technologically and could do many things we have not been able to do yet. At one point, they decided that the mining work was too strenuous, so they decided to create a "worker" race, utilizing their knowledge of genetic engineering and artificial insemination. Thus, they created the human race about 300,000 years ago. The deluge is covered and the continuing power struggles among the different Nibiru gods. They also involve mankind in their wars. One interesting chapter describes the nuclear war the Niribus had in 2024 B.C. It took place in the Dead Sea area, and the book states that water from springs which surround the Dead Sea still have enough radioactivity to cause sterility in humans or animals that drink water from that source over a number of years. The deciphering of all the ancient tablets that have been unearthed in the past 100 years certainly gives a different viewpoint than the caveman-to-civilized man anthropological theories popularly espouse!

Another very important book that gets more into the ancient genetic engineering data is **The Genius of the Few** by Christian O'Brien with Barbara Joy O'Brien (1985, Turnstone Press Ltd., Northamptonshire, England, \$12.95). This book should be available or orderable through metaphysical book stores. (See review on page 3.) This book is also well documented and relies on the ancient tablets and scrolls that have recently been translated. It starts with a settlement of astronauts from our 12th planet at Kharsag, just north of Mount Hermon. It goes into much more detail on how we humans were created via genetic engineering. It also covers the flood and the diasporas of the Anannage into areas in the rest of the world.

Needles of Stone by Tom Graves (1978, Turnstone Press Ltd., 37 Upper Addison Gardens, London, W14, England, \$11.00) is also a superb book, dealing with dowsing. The chapter on "Healing the Land" is worth the entire price of the book. It describes "earth acupuncture" and how to use it to heal the earth and make whole the atmosphere. The techniques can be used to correct energy imbalances in the earth and to deal with noxious earth radiations. Wooden stakes with copper wire wound around the top of each are placed into the ground at various points selected by dowsing. Copper-sheathed iron stakes can also be used to restructure the energy flow. Physical insulation materials such as plastic sheeting can be placed upstream of a "black" (bad energy) underground stream to protect the ground area above it. A down-stream comma-shaped area of protection from the noxious influence generally is the result of this action. The size of the area of protection is dependent upon the accuracy of the dowsing to determine the correct location to place the sheeting.

Shamanism for the New Age, A Guide to Radionics and Radiesthesia, by Jane E. Hartman (1987, Aquarian Systems Incorporated, Publishers, P. O. Box 575, Placitas, New Mexico 87043, \$12.95) is a new book on

Continued on next page

More Bits and Pieces . . .

radionics. It deals with the nature of power or energetic systems, human invisible bodies (codes to balance), chakras and endocrine glands, patterns, broadcasting techniques, modalities and the use of power objects (such as colors, gems, aromas, flower essences, homeopathy, Schusser cell salts), and the seven rays. Since shamans were able to manipulate universal energies, radionics and radiesthesia can be considered a form of shamanism. According to the book, "All serious radionic practitioners, like their more primitive predecessors, alter their everyday consciousness in order to work in a clear state and bring in the necessary information." That does bring us back to the fact that it is the mind that is doing the work by being receptive to Universal Intelligence. The book goes into techniques for working with a pendulum and for using witnesses. It discusses the Malcolm Ray instruments and the following patterns for broadcasting: The Solomon Seal, The Static Diamond, Magneton Pattern, Molecular Patterns, and the Dally Star Card Pattern. The book also gives directions on cleansing the physical body and foods (Clorox bath for fruits and vegetables, body soak for metallics, and body soak for radiation). This is a good book to recommend to friends who are just becoming interested in the area of radionics/psychotronics.

Pyramid mathematicians will delight in this opus: **The Coming Star-Shift and Many Prophecies of Bible and Pyramid Fulfilled** by O. Gordon Pickett, original copyright 1948, published in 1981 by Sun Publishing Co., Santa Fe, New Mexico, \$27.50. This 8 x 11" book has 571 pages almost completely devoted to mathematical diagrams on the Great Pyramid relationships. It also utilizes numerology and goes into biblical data and prophecy. It deals with biblical numerics and numerical harmony. The book represents but a small amount of the author's work during 30 years. The 19 chapters of this book are: 1) English Alphabet as related to Numerics; 2) Joseph, builder of the Great Pyramid; 3) Playfair PI, Perfect Numbers PI, True PI; 4) Matthew I and some numerical harmony; 5) 49 Names: Arphaxed to Jesus in Numerics; 6) Ascending Pas: Shows Life of Christ; 7) Jesus, Christ: Birth Date and Many Features; 8) Prophecy: Many fulfilled are shown; 9) World Wars: Time-cycles and other features; 10) Rome: Many prophecies concerning that city; 11) Tables: Many important ones given, 12) Star-shifts: Flood; Sun stood still for Joshua; shadow moves back for Hezekiah; the coming star-shift, Nov. 17, 1948; 13) General Interest: Biblical verses in 271 languages; Noah's Ark discovered; Diable Canyon meteor, etc.; 14) Flood and Adamic dates; Bethlehem elevation; Hebrew calendar; Pyramid Date-line; 15) Astronomy: Mars and other planets shown; 16) Great Pyramid: Many wonderful features; 17) Exodus: 1250 B.C. shown to be the date; 18) Queen's Chamber: England, about 40 plates; 19) Perfect Numbers: Used as checks.

Silicon Shock: The Menace of the Computer Invasion, by Geoff Simons

This book details the hazards of the computer invasion including its use as an agent of repression. The dehumanizing aspects of a computer society are discussed as well as the war-making potential of the computer and its use - with robotics - as an alternative love-object. Computer phobia is also covered. (Basil Blackwell, Oxford and New York, 1985, \$16.95 hardcover.)

JAPANESE HAVE COMPUTER THAT PRINTS OUT YOUR MEMORY

An article appearing in the "Sun" issue of June 3, 1986, described a computer that could do a memory printout. The device plugs into your brain and is designed to print out any memory that you might desire to relive.

Dr. Haleo Yamasawa, who is one of Japan's leading computer experts, designed the machine. The machine made its debut at the Japan Computer Expo in Tokyo, Japan. There is one drawback, however. A person desiring to use the system would have to have a surgeon install a small plug in their head. The operation is relatively simple: an eighth of an inch of hair is shaved off behind the left ear and a tiny hole is drilled into the skull. An electrode is inserted into the hole to connect to your brain. After the electrode is fastened in place, a small plug which fits the computer is attached to the electrode. The operation takes about 25 minutes.

Dr. Yamasawa, who has had a plug installed behind his ear, gave a demonstration by plugging himself into his invention. When he entered the date April 25, 1948, on his computer, the computer produced a 3-page output which was printed out on the line printer. According to the system, on that date Yamasawa had been age 22 and had recently been hired by a construction company. The printout was time-coded with the time of day. It started at 6 a.m. when Dr. Yamasawa awoke and ended when he went to bed. Dr. Yamasawa believes the data comes from the unconscious mind. The article quoted Dr. Yamasawa as saying "This exciting new computer program will teach people more about themselves and their mind than they ever knew before. I see this being especially helpful in overcoming certain mental illnesses."

Another person who had the plug installed was a woman who reived her birth experience. She described the shock of the bright lights in the delivery room and also experienced pain when her umbilical cord was cut.

Obviously, such a device could be used for both positive and negative purposes. A positive purpose would be to enable people to learn more about themselves and to help them to think positive thoughts so that they create a better reality for themselves.

COSMIC WORLD PEACE CONFERENCE IN AFRICA JULY 7 through 14, 1987

On the shores of Lake Victoria at the source of the River Nile
Theme: Science & Technology – Soul Over Mind
Rather than Mind Over Matter

Among the lectures and workshops offered at this International Conference are one on "Beyond Biological Evolution" by Dr. Janis Roze, and one called "Morphic Resonance and Fields of Consciousness" by Dr. Rupert Sheldrake.

For complete information on the conference and available tour package from New York, call:

Lenny/Syndnade (210) 402-0870
Karen (212) 283-1689
Ida (212) 299-287-8756

Please report changes or errors to the USPA National Secretary-Treasurer.

Five USPA members in good standing are required for the formation of a local Chapter. For an application form, please write to USPA National Secretary-Treasurer, Robert E. Beutlich, 2141 Agatite, Chicago, IL 60625.

USPA Chapters are eligible to rent USPA Conference video tapes for \$5.00 each. FORM A LOCAL CHAPTER AND RENT A VIDEO FOR ONLY \$5.00!

MEMBERSHIP

The U.S. Psychotronics Association (USPA), incorporated in the District of Columbia in August, 1977, is empowered to enroll members in the parent organization and to develop Chapters throughout the United States, Canada, and Mexico. Six categories of membership are open to the imaginative individual who wishes to join with the USPA on the new frontiers of science in working constructively for the qualitative improvement of man and his environment.

1. General \$20.00 per year (any citizen of the U.S., Canada or Mexico).
2. Family: \$25.00 per year (includes all members of one immediate family).
3. Affiliate: \$13.00 per year, North America } (any non-citizen, firm, corporation,
\$20.00 per year, Overseas } or organization). Non-Voting.
4. Student: \$10.00 per year (any full-time student attending an accredited educational institution, or member of the Armed Forces of the United States).
5. Fellow: \$40.00 per year (any U.S. citizen active in psychotronics, deemed eligible by the Board of Directors).
6. Honorary: No fee (granted for life by the Board of Directors for outstanding service).

Mail appropriate dues for membership information to the Secretary-Treasurer,
Bob Beutlich, 2141 Agatite, Chicago, IL 60625

CODE OF ETHICS

1. Members shall maintain high standards of ethics and scientific practices and shall be guided in their relationships by personal integrity.
2. They shall uphold the dignity and reputation of the USPA before the public at all times.
3. They shall avoid and discourage sensationalism, exaggeration, undignified and unwarranted statements, or misleading advertising.
4. In providing services for compensation, they shall refuse to undertake that which is of a questionable nature and they shall advise the probability of success.
5. In providing devices of any nature, they shall offer a 30-day money-back guarantee and provide a year's warranty on the item in writing (except for expendable parts). Also, they shall provide a repair service for any device offered (reasonable use required).
6. Devices which require some psychic ability (e.g., pendulum, rub plate, GSR meter) shall not be sold unless some training is offered by the manufacturer (or the manufacturer's agent) which is adequate to effectively operate the device.
7. They shall not use their membership in this Association as evidence of qualification, or as a measure of ability or performance.
8. They shall not exhibit or use the name U. S. Psychotronics Association on any letterhead, stationery, or business cards, nor in advertising of a business or professional nature.
9. Any conflicts within the membership are encouraged to be submitted to the Ethics Committee of the USPA for investigation first, prior to any public statements, allowing the committee reasonable time to resolve the conflict.
